[1] The average weighted effective yield attained on the secondary market during the reporting period. The yield is calculated using the ISMA formula at ACT/365 day count convention.
[2] LTIR – long-term interest rate for convergence assessment purposes. It is determined on the basis of the secondary market yield to maturity of a long-term bond (benchmark) issued by the *Central Government* sector and denominated in national currency. The ISMA formula at ACT/365 day count convention is used.
[3] Interest rates on short-term loans also include interest rates on overdraft.

[1] The *Households* sector also includes the *NPISHs* sector.
[2] Outstanding amounts, the information on which is obtained for monetary statistics purposes, are reported as overdraft. Credit lines and revolving credits as well as the respective interest rates applied are reported as overdraft with the exception of credit lines that have a repayment plan, a predetermined maturity and purpose of use. These are reported as credits other than overdraft.

[1] The *Households* sector also includes the *NPISHs* sector.
[2] Up to December 2006 deposits automatically renegotiated during the period were considered as new business. Since January 2007 only new agreements set with the active involvement of the customer are recognized as new business.
[3] Deposits redeemable at notice of the *Households* sector include former savings deposits and their scope is extended to include other deposits redeemable at notice offered by banks as well.

* Analytical reporting of the balance of payments in accordance with IMF 5th edition of the Balance of Payments Manual.
1 Preliminary data. Revised data for July 2007.
2 Data based on customs declarations processed by the BNB and supplemented with NSI information.
Final data for 2006 obtained from the Customs Agency, supplemented with NSI information and processed by the BNB.
Preliminary data for 2007 provided by the NSI including Intrastat system data on EU countries as of 4 October 2007 and customs declarations data on countries outside the EU as of 4 October 2007.
Imports estimates at FOB prices based on a BNB and NSI methodology.
3 Freight transportation estimates following a methodology of the BNB and the NSI.
4 Estimates following a methodology of the BNB and the Ministry of Economy. The 2007 data about the number of foreigners who visited Bulgaria are based on information provided by the NBPS and on NSI estimates, while data on Bulgarians who travelled abroad were provided by the NBPS.
5 Estimates following a methodology of the BNB.
6 A minus sign denotes flight of capital (increase in assets or decrease in liabilities).
7 Data provided by the companies with international interest, the Privatisation Agency, the NSI, the Central Depository, banks, *etc.* Data for 2006 and 2007 include only reinvested earnings of banks.
8 Data based on reports of residents' obligations on financial credits to non-residents received at the BNB. Due to quarterly reporting of these liabilities, data are subject to revision.
9 The item includes all transactions associated with acquisitions and mergers.
10 Bank data.
11 Bulgaria's external claims on trade credits (paid advances and claims on suppliers) are included in this item. Due to quarterly reporting, data are subject to revision. Data for the second quaiter of 2007 will be included in the September 2007 report.
12 BIS, data for 2006. Data for 2007 are subject to revision.
13 Bulgaria's external liabilities on trade credits (received advances and obligations to suppliers) are included in this item.
14 Excluding changes in BNB reserve assets due to valuation adjustments. A minus sign denotes an increase in reserve assets and a positive sign a decrease.

Source: BNB.

[1] Preliminary data. Euro equivalent is calculated using average monthly exchange rates of respective foreign currencies as of end of period.
[2] Data source: *Register of Government and Government Guaranteed Debt* of the Ministry of Finance. Preliminary data as of 27 August 2007. Excluding debt liabilities of public sector companies and government guaranteed debt.
[3] Brady bonds, Eurobonds, Global bonds and government securities (denominated in BGN and foreign currency) held by non-residents are included in this item.
[4] In accordance with the residence concept, government securities issued and held by residents on international financial markets are subtracted from debt; therefore, they are shown with a minus sign (at nominal value).
[5] Data source: banks (including data on private and state-owned banks). Deposits related to contingent liabilities are excluded.
[6] Data on public and private companies, including government guaranteed loans. Intercompany loans are excluded. Data cover only loans registered by the BNB and on which the BNB has received information.
[7] In compliance with the requirements of the *External Debt Statistics, Guide for Compilers and Users*, IMF, 2003, paragraphs 3.14 and 7.5, disbursements related to direct investment are included in the long-term external debt.
[8] Data are included in the *Gross external debt* amount.

Source: BNB.

[1] Preliminary data. Euro equivalent is calculated using average monthly exchange rates of respective foreign currencies as of end of period.
[2] Data source: *Register of Government and Government Guaranteed Debt* of the Ministry of Finance. Preliminary data as of 27 August 2007. Excluding debt liabilities of public sector companies and government guaranteed debt.
[3] Brady bonds, Eurobonds, Global bonds and government securities (denominated in BGN and foreign currency) held by non-residents are included in this item.
[4] In accordance with the residence concept, government securities issued and held by residents on international financial markets are subtracted from debt; therefore, they are shown with a minus sign (at nominal value).
[5] Data source: banks (including data on private and state-owned banks). Deposits related to contingent liabilities are excluded.
[6] Data on public and private companies, including government guaranteed loans. Intercompany loans are excluded. Data cover only loans registered by the BNB and on which the BNB has received information.
[7] In compliance with the requirements of the *External Debt Statistics, Guide for Compilers and Users*, IMF, 2003, paragraphs 3.14 and 7.5, disbursements related to direct investment are included in the long-term external debt.
[8] Data are included in the *Gross external debt* amount.

1 Actual external debt disbursements. Preliminary data. Data are recalculated in euro based on monthly average exchange rates of respective foreign currencies.
2 Data source: *Register of Government and Government Guaranteed Debt* of the Ministry of Finance. Preliminary data as of 27 August July 2007. Excluding data on debt liabilities of public sector companies and government guaranteed debt.
3 In accordance with the residence concept, the net decrease in the stock of Brady bonds, Eurobonds and Global bonds held by residents over the reporting month represents a net increase in liabilities to non-residents and is reflected with a positive sign in the *Gross External Debt Disbursements* table.
4 Data source: banks.
5 Deposits related to contingent liabilities are excluded.
6 Including received loans (excluding intercompany loans) registered by the BNB and on which the BNB has received information, as well as government guaranteed loans (Source: *Register of Government and Government Guaranteed Debt* of the Ministry of Finance. Preliminary data as of 27 August 2007).
7 Received loans related to direct investment are recorded as long-term loans.
8 Data not included in the *Gross External Debt Disbursements* table by institutional sector.
9 The net increase in the trade credit stock over the reporting month is reported in supplementary tables to the *Gross External Debt Disbursements* table, while the net decrease is reported in supplementary tables to the *Gross External Debt Service* table.

[1] Actual disbursements. Preliminary data. Data are recalculated in euro based on monthly average exchange rates of respective foreign currencies.
[2] Data source: *Register of Government and Government Guaranteed Debt* of the Ministry of Finance. Preliminary data as of 27 August 2007. Excluding data on debt liabilities of public sector companies and government guaranteed debt.
[3] Principal and interest payments on Brady bonds, Eurobonds, Global bonds and government securities held by non-residents.
[4] In accordance with the residence concept, government securities issued and held by residents on international financial markets are subtracted from debt; therefore, they are shown with a minus sign. The net increase in the stock of Brady bonds, Eurobonds and Global bonds held by residents represents a net decrease in liabilities to non-residents and is reflected with a positive sign.
[5] Data source: banks.
[6] The net increase in the stock of deposits is reported in the *Gross External Debt Disbursements* table and the net decrease in the *Gross External Debt Service* table. Deposits related to contingent liabilities are excluded.
[7] Including principal and interest payments (excluding intercompany loans) registered by the BNB and on which the BNB has received information, as well as payments on government guaranteed debt (Source: *Register of Government and Government Guaranteed Debt* of the Ministry of Finance. Preliminary data as of 27 August 2007).
[8] In compliance with the requirements of the *External Debt Statistics, Guide for Compilers and Users*, IMF, 2003, paragraphs 3.14 and 7.5, disbursements related to direct investment are included in the long-term external debt service.
[9] Data not included in the *Gross External Debt Service* tables by debtor and by creditor.
[10] The net increase in the trade credit stock over the reporting month is reported in supplementary tables to the *Gross External Debt Disbursements* table, while the net decrease is reported in supplementary tables to the *Gross External Debt Service* table.

Source: BNB.

[1] Actual disbursements. Preliminary data. Data are recalculated in euro based on monthly average exchange rates of respective foreign currencies.
[2] Data source: *Register of Government and Government Guaranteed Debt* of the Ministry of Finance. Preliminary data as of 27 Augus 2007. Excluding data on debt liabilities of public sector companies and government guaranteed debt.
[3] Principal and interest payments on Brady bonds, Eurobonds, Global bonds and government securities held by non-residents.
[4] In accordance with the residence concept, government securities issued and held by residents on international financial markets are subtracted from debt; therefore, they are shown with a minus sign. The net increase in the stock of Brady bonds, Eurobonds and Global bonds held by residents represents a net decrease in liabilities to non-residents and is reflected with a positive sign.
[5] Data source: banks.
[6] The net increase in the stock of deposits is reported in the *Gross External Debt Disbursements* table and the net decrease in the *Gross External Debt Service* table. Deposits related to contingent liabilities are excluded.
[7] Including principal and interest payments (excluding intercompany loans) registered by the BNB and on which the BNB has received information, as well as payments on government guaranteed debt (Source: *Register of Government and Government Guaranteed Debt* of the Ministry of Finance. Preliminary data as of 27 Augus 2007).
[8] In compliance with the requirements of the *External Debt Statistics, Guide for Compilers and Users*, IMF, 2003, paragraphs 3.14 and 7.5, disbursements related to direct investment are included in the long-term external debt service.
[9] Data not included in the *Gross External Debt Service* tables by debtor and by creditor.
[10] The net increase in the trade credit stock over the reporting month is reported in supplementary tables to the *Gross External Debt Disbursements* table, while the net decrease is reported in supplementary tables to the *Gross External Debt Service* table.

Overview

BNB Monthly Bulletin includes data on the state and dynamics of the national economy. It focuses on financial and external sectors since information on these sectors is prepared at the BNB.

A common principle is adopted: tables represent information on the current and the previous year, and charts, on the current and the preceding two years. Depending on availability, specificity, compatibility and comparability of data, tables and charts may contain information on separate periods (months, quarters, years), as well as cumulative data since early year.

1 Financial Sector

The information presented in this section is from monetary, interest rate and other financial statistics.

I. GENERAL METHODOLOGICAL NOTES ON MONETARY STATISTICS

Monetary Statistics

1. Methodological Conceptions and Rules of Monetary Statistics Organization

Monetary statistics is collected and compiled according to the international statistical standards and covers, to a great extent, the rules of international financial statistics. The most important standards include:

- ✓ European System of Accounts (ESA'95) and System of National Accounts (SNA'93);[1]
- ✓ Regulation No. 13 of 22 November 2001 and Money and Banking Statistics Compilation Guide, ECB, 1998;
- ✓ Money and Banking Statistics Sector Manual: Guidance for the Statistical Classification of Customers, ECB, 1998;
- ✓ Monetary and Financial Statistics Manual, IMF, 2000.

Bulgaria is a subscriber to the Special Data Dissemination Standard (SDDS) developed by the IMF (see the National Summary Data Page on the BNB website: *Statistics* Section, *Other*).

Main Rules:

a) Accounting rules – the accounting rules followed by monetary financial institutions are presented in the International Accounting Standards (IAS).[2]

b) Reporting rules:

- ✓ Valuation of assets and liabilities – all financial assets and liabilities are reported at market or close to market price. Financial instruments, however, as currency in circulation, deposits, capital and reserves, cash and loans are reported at nominal value.
- ✓ Revaluation of foreign currency positions – exchange rates as of end of the period are applied.
- ✓ Reporting of loans and provisions – for the purposes of statistics loans are shown on a gross basis until their writing off. Accrued provisions are classified under *Other liabilities*.
- ✓ Definition of the reporting period – the reporting period finishes on the last calendar day and if it coincides with a holiday, on the last business day of the month.

c) Economic territory and residency – the economic territory of the country consists of the geographic territory administrated by the government; within this territory, persons, goods and capital circulate freely. The economic territory includes the airspace, territorial waters, and continental shelf lying in international waters over which the country has exclusive rights. Also it includes territorial enclaves, i.e. geographic territories situated in the rest of the world and used, under international treaties or agreements between states, by general government agencies of the country (embassies, consulates, military bases, scientific bases, *etc*.), and any free zones.

---

[1] European System of Accounts – an international framework of accounts for a systematic and detailed description of the country's economy, its components, as well as its relationships with other economies developed by Eurostat. ESA'95 is fully compatible with SNA'93 (a joint paper of the IMF, UN, OECD, the European Commission and the World Bank). ESA'95 focuses primarily on conditions and data necessary for the EU.

[2] Unified national accounting standards harmonized with the international standards, valid until end-2002. After that the International Accounting Standards/International Financial Reporting Standards came into effect.

Residents of the country are defined as institutional units which have a center of economic interest[3] within the economic territory of the country; their residence is on the same territory and they manage a significant output in which they participate or intend to participate.

Branches of resident credit institutions abroad with a center of economic interest on the territory of another country are treated as non-residents. Branches of foreign credit institutions licensed to operate in the country are residents and are included in money-creating sector (see *Sector Table*).

Borderline cases of residency:

1) Bulgarian diplomatic, consular, commercial and other representations, as well as their members and staff, and all Bulgarian citizens working for them who are staying abroad by an appointment of the Bulgarian government, regular servicemen on long-term commission abroad and civil persons from the Ministry of Defence employed in missions, headquarters and bodies of international organizations, as well as the members of their families are deemed residents. The foreign ones are classified as residents of their native countries.
2) The following persons are classified as resident units:

✓ Bulgarian citizens staying abroad for education purposes, irrespective of the length of their stay;

✓ Bulgarian citizens staying abroad for medical treatment, irrespective of the length of their stay.

The concept of residency is consistent with the Bulgarian Foreign Exchange Law, ESA'95, and IMF Balance of Payments Manual, 5th edition.

d) Sector distribution – ESA'95 standards of sector classification of institutional units are followed. The main sectors by residency include: *Resident Sector* (S.1) and *Rest of the World* (S.2). The Resident Sector is divided into monetary financial sector, general government sector and non-government sector. Monetary financial sector covers the BNB (S.121) and other monetary financial institutions (S.122); *general government sector* (S.13) consists of three subsectors: central government (S.1311), local government (S.1313) and social security funds (S.1314); *non-government sector* includes non-financial public corporations (S.11001), non-financial private corporations (S.11002+S.11003), other financial intermediaries and auxiliaries except insurance companies and pension funds (S.123 and S.124), insurance companies and pension funds (S.125), households (S.14) and non-profit institutions serving households (S.15). *Non-resident Sector* is divided into *European Union* and *Third countries and international organisations* .European union comprises Monetary Union (MU) and Non-MU, according to the participation of the EU countries in the Monetary Union.
e) Instrumental categories – in the Monetary Survey and Analytical Reporting, indicators are defined in conformity with ECB Regulation No. 13, the Monetary and Financial Statistics Manual of the IMF in accordance with ESA'95 and SNA'93. Definitions of most of the instruments are given in the corresponding tables in Specific Methodological Notes.
f) Foreign currency distribution – all indicators and instruments are in levs and foreign currency, including euro of the forex component.
g) Maturity structure – for the purposes of statistics financial assets and liabilities are presented according to the original term to maturity (Regulation No. 13 of the ECB and SNA'93).

2. Reporting Agents

Monetary financial institutions (MFIs) residing on the territory of the Republic of Bulgaria. These are the BNB and other MFIs. Other MFIs comprise all credit institutions[4], including foreign banks' branches registered in Bulgaria, as well as money market funds[5]. Of all credit institutions, 25 are banks licensed to conduct bank operations in Bulgaria and abroad and five are foreign banks' branches. The number of money market funds is two.

[3] An institutional unit has a center of economic interest within a country when there exists some location – dwellings, place of production or other premises, which the unit engages or intends to engage in economic activities and transactions for an indefinite period of time or for a definite but longer period of time (according to ESA'95 the period is a year or more).

[4] Data on non-operating banks is available on the BNB website for the February 2004 – January 2007 reference period in the *Monthly Sectoral Survey of Non-operating Banks* table.

[5] Included in the scope since February 2007.

Resident monetary financial institutions (MFIs) are included in the MFIs list of EU accession countries. This list is maintained by the ECB on the website http://www.ecb.int.

3. Basic Framework of Monetary Statistics

Reporting agents submit reports pursuant to Article 69 of the Law on Credit Institutions and Article 42 of the Law on the Bulgarian National Bank.

Data are collected electronically *via* BNB's virtual network with the other MFIs.

Monetary statistics framework includes two levels of data compilation and presentation:

- On the first level, the accounting data received from individual reporting agents are aggregated in *analytical reporting* containing comprehensive balance sheet data on the BNB and other MFIs. Analytical reporting of the BNB and analytical reporting of other MFIs aim to provide data classified by residency, sector and instrument.
- On the second level, data from analytical reporting are consolidated into *a monetary survey*. The monetary survey is the main form of monetary statistics and contains a lot of important indicators necessary for macroeconomic analysis. It reveals the mechanism of multiplying the monetary base into aggregate money supply serving transactions in the national economy. Its structure is built so as to facilitate the analysis of broad money and its sources. The monetary survey is accompanied by a detailed presentation of the main elements (by sector and instrument).

4. Principles of Data Processing

- ✓ Aggregation – summing up data by balance of all institutional units within a sector or subsector, or of all assets and liabilities in the framework of a particular indicator. For sectors and subsectors, data on financial assets and liabilities are aggregated in instruments (i.e. loans classified by sector of debtor and deposits classified by sector of creditor). Further aggregation is used to combine the instruments into indicators.
- ✓ Consolidation – it refers to elimination of stocks and flows that occur between institutional units, residents of the country, where they are grouped. The institutional units consisting of a head office and branches report consolidated data through elimination of claims and obligations between them. (This rule does not apply to consolidation of data between a head office and non-resident branches.) Further consolidation is made in the monetary survey between MFIs.
- ✓ Netting – the general principles set in the international statistical standards; data should be collected and compiled on a gross basis. Despite this fact, some categories of data in the monetary survey are also presented in net form due to their use for analytical needs. In the monetary survey and analytical reporting, the following items are presented in net form: *foreign assets, claims on the central government, other items*; while *gross claims on* and *gross liabilities to non-residents, central government* and *other unclassified assets and liabilities* are also shown.

5. Policy of Revisions and Statistical Processing

Revisions of published data are made in the following cases:

- ➢ error in data;
- ➢ change in accounting or statistical standard.

Revisions are marked by the sign **r** and an explanatory text. In case of change in the standard, historical data is also revised starting from the moment of occurrence of the event or change in the standard.

Upon occurrence or creation of prerequisites for publishing a new indicator – sector, instrument, *etc*. – historical time series are constructed by using statistical methods as of the moment of indicator occurrence (where appropriate conditions exist).

6. Publications

Monthly data are as of the end of the reporting period and are published before the end of the month following the reporting period according to the Statistical Data Release Calendar (available on the BNB website: http://www.bnb.bg). Monthly statistical data are also included in periodical publications of the central bank: annual and semiannual reports of the BNB, monthly bulletins. Publications are available on paper and on the website of the BNB.

Appendix: **Sector Table**[6]

	Sectors in Bulgaria's monetary statistics		Definitions
Money-creating sector	Central bank	S.12 Financial corporations	A financial corporation whose principal function is to issue currency, to maintain the internal and external value of the national currency and to hold the international reserves of the country.
Money-creating sector	Other monetary financial institutions	S.12 Financial corporations	Financial corporations, except those classified in the central bank subsector, which are principally engaged in financial intermediation and whose business is to receive deposits and/or close substitutes for deposits from institutional units other than monetary financial institutions, and, for their own account, to grant loans and/or to make investments in securities. These are: a) credit institutions - banks and electronic money institutions, and b) money market funds. Money market funds are collective investment undertakings of which the units are, in terms of liquidity, close substitutes for deposits and which primarily invest in money market instruments and/or in MMF shares/units and/or other transferable debt instruments with a residual maturity of up to and including one year and/or in bank deposits and/or which pursue a rate of return that approaches the interest rates of money market instruments.
Money-holding sector	Other financial intermediaries and auxiliaries, except insurance companies and pension funds	S.12 Financial corporations	1. Financial corporations, which are principally engaged in financial intermediation by a) incurring liabilities (in forms other than currency, deposits and/or close substitutes for deposits) from institutional units other than monetary financial institutions, or b) incurring liabilities other than insurance and pension reserves. 2. Financial corporations - auxiliaries, which are closely connected with financial intermediation but are not financial intermediaries. Here are included financial and leasing houses, investment companies, loan offices, stock exchanges, exchange bureaux, consultants, brokers, *etc*.
Money-holding sector	Insurance companies and pension funds	S.12 Financial corporations	Financial corporations, which are principally engaged in financial intermediation as the consequence of taking insurance and pension risks (and which incur liabilities in the form of insurance and pension reserves).
Money-holding sector	Non-financial corporations		Non-financial corporations, which are market producers, and whose main activity is the production of goods and non-financial services.
Money-holding sector	Households		Individuals or groups of individuals as consumers and possibly also as entrepreneurs producing market goods and non-financial and financial services (market producers). The sector includes individuals or groups of individuals as producers of goods and non-financial services for exclusively own final use. The sector also includes sole proprietorship and partnership without independent legal status which are market producers.
Money-holding sector	Non-profit institutions serving households (NPISHs)		Non-profit institutions which are separate legal entities, whose main activity is connected with servicing, supporting and assisting households. Their principal resources, apart from those derived from occasional sales, are derived from voluntary contributions in cash or in kind from households in their capacity as consumers, from payments made by general government sector[7] and from property income. Here are included trade unions, political parties, foundations, associations, churches or religious societies, social, cultural and sports clubs.

[6] Institutional sectors in Bulgaria's monetary statistics totally meet ECB requirements under strict consistency with ESA'95.
[7] NPIs controlled and mainly financed by General government are classified in the general government sector.

	Sectors in Bulgaria's monetary statistics			Definitions
Money-neutral sector	Central government		S.13 General government	All institutional units, which offer public services, deal with distribution of national income and guarantee the operation of social and economic system. These are ministries, institutions and other central agencies, non-budget funds and administrative departments of the state whose competence extends normally over the whole economic territory, except for the administration of social security funds. Here are included those non-profit institutions which are controlled and mainly financed by central government and whose competence extends over the whole economic territory.
Money-holding sector	Local government			All institutional units, which offer public services, deal with distribution of national income and guarantee the operation of social and economic system locally. This is the local administration, whose competence extends to the economic territory, except for the administration of social security funds. Here are included those non-profit institutions which are controlled and mainly financed by local government bodies and whose competence is restricted to the economic territory of the local government.
	Social security funds			Central and local institutional units whose main activity is to provide social benefits and which fulfill each of the following two criteria: 1) by law or by regulation certain groups of population are obliged to participate in the scheme or to pay contributions; 2) general government is responsible for the management of the institution in respect of the settlement or approval of the contributions and benefits independently from its role as supervisory body or employer.
Non-resident sector	European Union	MU	S.2 Rest of the world	All non-resident units[8] which are engaged in transactions with resident institutional units, or have other economic links with resident units. This sector's accounts provide an overall view of the economic relationships linking the national economy with the rest of the world. The sector includes such institutional units, which are physically located on the territory of the country. It is divided into two sub-sectors: The European Union and Third countries and international organizations. The European Union is divided into Monetary Union and EU member states non-participating in the Monetary Union, including EU institutions.
		Non-MU		
	Third countries and international organisations			

[8] Including institutions of the European Union and international organisations.

II. SPECIFIC METHODOLOGICAL NOTES

The monetary statistics is presented in dynamics in a monetary survey, analytical reporting of the BNB and analytical reporting of other MFIs, and in some additional tables which contain more detailed information. The principle of the organization of all tables is the following: the data is broken down by sector, indicator, national and foreign currency, including euro, instrument and maturity, while the indicators on the asset side are grouped by sector and instrument and on the liability side – by instrument and degree of callability.

Simultaneously monthly sectoral surveys of the BNB and other MFIs are compiled and published. These are static tables presenting the relevant assets and liabilities indicators in a way which allows identification of the sector affiliation of the balance sheets items.

Monetary statistics (dynamic or static) is compiled on the basis of the monthly reporting of the BNB and other MFIs.

In order to preserve the confidentiality[9] and prevent disclosure of individual information about a given reporting agent, some indicators are presented on a more aggregated level.

Tables 1.3.1–1.3.4: Monetary Survey and Analytical Reporting

The structure of the monetary survey may be expressed by the following mathematical identity:
net foreign assets + net domestic assets = broad money + long-term liabilities
Net domestic assets include domestic credit, fixed assets and other items (net).
The analytical reporting of the BNB and other MFIs follows the format of the monetary survey.

Indicators

Net Foreign Assets[10] – a balance between gross foreign assets and liabilities of the Monetary financial sector. Gross foreign assets are reported by instrument and include Bulgaria's international reserves and other foreign assets of the BNB and other MFIs. Gross foreign liabilities reflect liabilities of the MFIs to the foreign sector. A split of gross foreign assets and liabilities of the BNB is made in Table 1.3.5: Foreign Assets and Liabilities of the BNB.

Domestic credit – incorporates credit to the consolidated general government sector and non-government sector.

Credit to the consolidated general government sector includes net claims on the central government and gross claims on local government, and social security funds. Credit to the non-government sector includes gross claims on non-financial corporations, financial corporations, households and NPISHs.

Fixed assets – movable or immovable non-financial assets which monetary financial institutions intend to use over a period longer than one year in their main activity.

Other items (net) – consolidates all components of the balance sheets of the BNB and other MFIs which are not included in the instruments displayed above. They include *Relations between other MFIs (net), Relations between the BNB and other MFIs (net)* and *Other assets and liabilities (net).* Accrued and overdue interest, derivatives, depreciation, provisions, as well as assets and liabilities which are not included elsewhere are part of the *Other assets and liabilities (net)* item (a part of them is presented in Tables 1.3.7 and 1.3.8: Memoranda to the Analytical Reporting of the BNB and other MFIs). The balance on the *Relations between the MFIs (net)* item reflects the float as a result of netting of claims and liabilities between MFIs.

Broad money (money supply) comprises liabilities with money character of MFIs to the resident sector with the exception of the liabilities to the central government and the Monetary financial sector (money-holding sectors: see *Sector Table)*. Monetary aggregate instruments are grouped by liquidity and are presented by currency and sector.

The following monetary aggregates are used: M1, M2, and M3. The M1 monetary aggregate, commonly referred to as narrow money, includes the most liquid instruments used in settlements (currency outside MFIs and overnight deposits in national and foreign currency). The M2 monetary aggregate comprises quasi-money and the M1 monetary aggregate. Quasi-money comprises deposits with agreed maturity of up to two years and deposits redeemable at notice of up to three

[9] Article 25 of the Law on Statistics.
[10] Monetary gold, special drawing rights holdings, claims on interest and interest liabilities in *Net foreign assets* are in BNB only.

months (including savings deposits). The least liquid financial instruments include repos, shares/units of MMFs and debt securities issued up to two years, also called marketable instruments. They are denominated in national and foreign currency and together with M2 form the broadest monetary aggregate, M3, commonly referred to as money supply (broad money).

Long-term liabilities and monetary financial institutions – include liabilities of monetary financial institutions with maturity of over two years or with a notice of over three months, as well as capital and reserves. *Capital and reserves* comprise the statutory fund of the banking system, reserves and financial result.

Main Indicators

Assets side:

1. *Repos* – funds extended under agreements for reverse repurchases of securities where one of the parties receives funds against securities sold under a firm commitment to purchase the same or similar securities at a particular price on a fixed future date.
2. *Loans* – financial assets arising to provide borrowers with funds, goods or services. Loan terms (fixed by the creditor or negotiated) are set in an untransferrable document. A loan is an unconditional debt which shall be repaid upon maturity and shall generate income in the form of interest (see Table 1.3.6: Loans to Non-financial Corporations and Households and NPISHs).
3. *Securities other than shares* – includes securities other than shares and other equity which give the holder the unconditional right to fixed income or contractually determined income in the form of coupon payments and/or stated fixed sum at a stated date or dates starting from the issue date till the date set as maturity/redemption date. These securities do not grant the holder any ownership rights and interest over the issuing company. Also included are instruments with the same characteristics but with options for conversion into shares or other forms of ownership. The *Securities other than shares* indicator covers various types of bonds and other debt securities of bond nature (which can be discount or promissory notes accepted by other MFIs or other commercial paper, used as a form of short-term investments). Compensatory instruments held by credit institutions are also included in the Non-financial Public Enterprises sector.[11]
4. *Shares and other equity* – holdings of securities which represent property rights in corporations. These securities generally entitle the holders to a share in the profit of corporations and to a share in their own funds in the event of liquidation. *MMFs shares/units* are also included here.

Liabilities side:

1. *Currency outside MFIs* is currency into circulation less other MFIs' vault cash.
2. *Deposits* are funds accepted by monetary financial institutions payable at sight, without any notice, at notice or under other preliminary agreed payment conditions. Deposits are agreed upon between the parties by negotiating the terms of keeping deposit accounts, interest amount (if the agreement provides for interest accrual), terms of payment and sanctions for the parties in case of failure to perform their obligations. These are liabilities of the financial institution.
   - ✓ *Overnight deposits* include deposits without agreed maturity and which are immediately convertible into currency or transferable on demand through banker's order or by cheque without significant restrictions or penalties. One-day deposits are also included in this item.
   - ✓ *Deposits with agreed maturity* are not immediately available as they have an agreed term prior to withdrawal. These deposits cannot be used in settlements and are not convertible into currency without any significant restrictions or penalties. They are broken down by maturity: up to two years and over two years. These include loans received with the exception of those from the IMF.
   - ✓ *Deposits redeemable at notice* include savings deposits and other deposits redeemable at notice. Savings deposits are untransferable deposits without specified maturity used

[11] Compensatory instruments include compensatory bills and housing compensatory bills issued under the Law on Compensation of the Owners of Nationalized Properties and registered compensatory bills issued under the Law on the Restitution of Ownership and the Use of Agricultural Lands. These instruments are issued by the government and are freely transferable. Pursuant to the Law on Public Offering of Securities, these are referred to as securities.

for safekeeping of funds of households against issuance of a personal savings book or analogous document. These include lending for house purchase, children's deposits and other deposits. Other deposits redeemable at notice are untransferable deposits without specified maturity which cannot be converted into cash without any notice. Their conversion into cash is not possible or they can be converted into cash prior to the term of the notice but by imposing a sanction. Untransferable deposits with specified maturity which can be converted into cash prior to maturity only at notice are also included here.

3. *Repos* include cash received against securities sold by monetary financial institution under a firm commitment to purchase the same (or similar) securities at a particular price on a fixed future date.
4. *Money market funds shares/units* include shares/unit issued by money market funds.
5. *Debt securities issued* include securities other than shares and other equity issued by credit institutions, generally traded in the secondary market, that do not grant the holder any ownership rights over the issuer's equity. Non-marketable instruments issued (which have not been initially placed through a stock exchange or other official marketplace) and subsequently becoming marketable also belong to this item.

Table 1.3.5: Foreign Assets and Liabilities of the BNB

The table displays claims and liabilities of the BNB to non-residents forming the positions of *Foreign assets* and *Foreign liabilities*.

Instruments

BNB Foreign Assets

Central bank's foreign claims are divided into two groups according to their liquidity – *International reserves* and *Other foreign assets*:

1. *International reserves* include the most liquid foreign assets. Under a currency board (introduced on 1 July 1997) international foreign exchange reserves shall be equal to the assets of the Issue Department included in the BNB consolidated balance sheet (described in Article 28, paragraph 3 of the Law on the BNB).
   International foreign reserves are divided into three sub-sectors: *non-resident banks*, *non-resident governments* and *other non-residents* including the following indicators:
   - ✓ *Cash* – banknotes and coins held in freely convertible foreign currency;
   - ✓ *Special Drawing Rights (SDR)*[12] *held by the BNB*;
   - ✓ *Monetary gold* consisting of gold bullion in standard form in vault and monetary gold deposited with foreign banks. From 1 July 1997 up to 31 January 2005, pursuant to Article 28, paragraph 3, item 6 of the Law on the BNB, the stock of monetary gold is valued at BGN 500 *per* troy ounce or market value if lower. From 1 February 2005 onwards, monetary gold is valued at market value.
   - ✓ *Deposits* – funds in freely convertible currency held by the BNB on accounts with foreign central banks graded by degree of liquidity (overnight deposits, deposits with agreed maturity, deposits redeemable at notice);
   - ✓ *Repos* include funds received in the BNB against a sale of securities with a commitment of reverse repurchase of the same or similar securities at a particular price on a fixed future date;
   - ✓ *Securities other than shares* – debt instruments held by the BNB, issued by non-resident banks, financial institutions and governments, whereof liabilities are assigned one of the two highest ratings by two internationally recognized credit rating agencies, and which are payable in freely convertible currencies with the exception of debt instruments given or received as collateral;
   - ✓ *Reserve position in the IMF* – Bulgaria's unconditional right to draw funds from the IMF. This indicator reflects the payment of forex component in Bulgaria's quota and indicates the balance between the quota and the cash of IMF in national currency.[13]

[12] *Special Drawing Rights* are reserve assets established by the IMF in addition to existing reserve assets. The value of SDR is set on the basis of a basket of reference currencies (the euro, the British pound, the US dollar and the Japanese yen).

[13] The reserve position can be raised to the amount of funds in national currency used by the IMF in transactions with other member states.

- ✓ *Interest receivable* includes claims on accrued interest. The specificity associated with the currency board suggests that interest receivables and interest payable are reported as part of the *International reserves*, correspondingly as part of Bulgaria's foreign liabilities. Therefore, they are not reported as part of *Other assets* and *Other liabilities* as in other reporting units.

2. *Other foreign assets* include less liquid claims on non-residents which after the introduction of the currency board are reported as part of assets of the Banking Department. This position is divided into two sectors (*non-resident governments* and *other non-residents*) and includes the following instruments:
   - ✓ Securities other than shares – debt securities which are not included in international reserves;
   - ✓ Shares and other equity represent capital investment in international financial institutions (e.g. BIS, Basel); MMFs shares/units are also included here – these holdings of securities give the owner the right of a share in the capital of a money market fund.

BNB Foreign Liabilities

Foreign liabilities of the BNB reflect the central bank's liabilities to the non-resident sector grouped into *non-resident banks*, *non-resident government*s and *other non-residents*. Following the introduction of the currency board, foreign liabilities comprise only Bulgaria's liabilities to the IMF and include the following instruments:

- ✓ Loans – interest-bearing credits with a fixed term received from IMF common funds;
- ✓ Accrued interest payable – this item includes interest payable to the IMF.

Table 1.3.6: Loans to Non-financial Corporations, Households and NPISHs

This table reveals information on loans (their residual value) by type, currency and sector granted by credit institutions. Loans are reported under the *Claims on non-government sector* item in the monetary survey and analytical reporting.

Types of Loans

1. *By maturity*
   - ✓ Short-term loans – loans with an original maturity of one year or less, including overdraft.
   - ✓ Loans with maturity of over one to five years – loans with an original maturity exceeding one year but less than five years.
   - ✓ Loans with maturity of over five years – loans with an original maturity exceeding five years.
2. *By quality*
   - ✓ Regular loans – loans classified as 'standard exposures' and 'watch exposures' (excluding restructured loans) as per Ordinance No. 9 of the BNB.
   - ✓ Bad and restructured loans[14] – the total amount of balance sheet loans exposures, which are classified as „substandard exposures", „non-performing exposures" and restructured loans (regardless of the group they are classified in) as per Ordinance No. 9 of BNB, is included.
3. *By use*
   - ✓ Consumer loans – these are loans extended to households. Consumer loans are used to buy goods and services for personal use by households.
   - ✓ Loans for house purchase – these are loans extended to households against security (mortgage, guarantee, *etc.*) to finance real estate construction or purchase of homes. Also included are loans for home improvements.
   - ✓ Other loans include loans extended to households for business purposes, training, *etc*. These are loans made to physical persons with commercial, production or other purposes (e.g. financial leasing, agricultural loans, *etc*.)
4. *By manner of disbursement*
   - ✓ Overdraft – overdrafts are loans made by credit institutions when funds on customer current accounts are insufficient to meet ordered payments. Payment is automatic

[14] Until 30 June 2006 the indicator includes overdue principal, which is not paid.

upon receipt of funds on current accounts. Included are both overdrafts with pre-agreed interest terms and amounts and without pre-agreed terms.

- ✓ Loans, other than overdraft.

Tables 1.3.7 and 1.3.8: Memoranda to the Analytical Reporting of the BNB and Other MFIs

The memoranda show accrued interest and interest arrears on claims and liabilities by type of instrument, derivatives as well as all adjusting balance sheet items employed in accounting practices (i.e. depreciation and provisions).

Data in the table are as of December 2001 since when there is available information.

Description of Items

Accrued interest is interest receivable/payable accrued that has not matured, recorded on a current accrual basis. According to the analytical reporting this interest is recorded in the *Other assets* and *Other liabilities* item in the monetary survey. A specificity of the BNB analytical reporting is that interest accrued on international reserves and IMF loans is recorded in the *Foreign assets* item, correspondingly the *Foreign liabilities* item.

Provisions include allocated provisions for impairment loss (currently the specific provisions on assets), as well as provisions recognized as liabilities in accordance with IAS and Bulgaria's effective legislation. For statistical purposes, assets subject to provisioning are stated on a gross basis and the allocated provisions are included in the *Other liabilities* item. (See General Methodological Notes)

Depreciation represents a kind of adjustment to depreciable long-term tangible and intangible assets. In the published information, long-term assets are reported on a gross basis and accrued depreciation is recorded in the *Other liabilities* item.

Derivatives include the gross fair value of all derivatives held by monetary financial institutions and reported in the balance sheet.

Tables 1.4.1 and 1.4.2: Monthly Sectoral Survey of the BNB and Other MFIs

Monthly sectoral surveys show on a gross basis the claims and liabilities of other MFIs and of the BNB so that asset and liability balance sheet items can be identified by sector. Tables are static and contain information on end-of-month balances. Presented data is in compliance with the main principles of sectoral classification and aggregation of instruments into indicators.

1. Sectoral classification – the main principles set out in ESA'95 have been complied with. All items that are not classified by sector as well as MFIs' own claims and liabilities are reported in a separate column as not allocated.
2. Financial indicators – the scope and content of the indicators are described underneath respective tables. Some items are more aggregated in comparison with monetary survey and analytical reporting, where a part of the instruments in the liability side is presented with additional breakdowns according to their inclusion in the monetary aggregates.

Specific Features of Monthly Sectoral Survey of the BNB

For the purposes of the table, BNB foreign claims are grouped by sector where foreign assets, included in international reserves, and other foreign assets of the central bank are presented together. Cash in foreign currency, Special Drawing Rights and monetary gold are represented in the *Not allocated* column. Foreign assets grouped according to their liquidity as international reserves or other foreign assets are represented in Table 1.3.6: BNB Foreign Assets and Liabilities.

Tables 1.5.1 and 1.5.2: Monetary Aggregates and Their Counterparts – ECB Presentation

The tables present monetary aggregates and their counterparts according to the European Central Bank format.

Besides stocks at the end of the reference period, tables also include data about real transactions.

A real transaction is a creation, purchase, sale or liquidation of a financial asset or liability. It can be calculated by taking the difference between stock positions on end-period reporting dates and then removing all changes which are not consequence of real transactions. These are reclassifications by sector and instrument, adjustments of reporting errors, price revaluation of securities, write-downs and write-offs of loans, exchange rate adjustments.

Real transaction = Stock position at the end of the reporting period – Stock position at the end of the previous reporting period – Exchange rate adjustments – Other revaluations (Write-downs/write-offs of loans, price revaluation of securities).

Interest Rate Statistics

Interest rate statistics includes information on interest rates and volumes on new business applied by banks in Bulgaria to deposits and loans via-à-vis *Non-financial Corporations* and *Households* sectors, indices and interest rates on interbank money market deposits, BIR and secondary market yield on government securities.

I. INTEREST RATE STATISTICS: LOANS AND DEPOSITS OF *NON-FINANCIAL CORPORATIONS* AND *HOUSEHOLDS* SECTORS

Interest rates statistics is compiled according to methodological guidelines which to a great extent cover European Central Bank's requirements under Regulation 18 (ECB/2001/18) and define the terms and procedure for data submission for the purposes of interest rate statistics.[15]

Scope:

• interest rates and volumes on *new business* on time deposits, repos and loans: *new business* is every new agreement between a customer and a reporting agent. New agreements are contracts in which the interest rate, term to maturity or period of notice and other terms of a deposit, a repo or a loan are settled for the first time. Every renegotiation of an interest rate and other terms different from term to maturity or period of notice of an already settled agreement, provided that no such clause exists in the agreement, as well as renegotiation of the term to maturity or period of notice with the active involvement of the customer are also considered as *new business*.

• interest rates and volumes on outstanding amounts on overnight deposits, deposits redeemable at notice and overdraft: the outstanding amounts represent the claims and liabilities of loans or deposits as of a certain reporting moment. For this group of instruments, interest rate statistics on new business and interest rate statistics on outstanding amounts coincide.

Reporting period – a calendar month. End-of-month information is presented for the purpose of interest rate statistics on outstanding amounts, while information for the purpose of interest rate statistics on *new business* includes all new agreements settled during the reporting period.

Reporting rules – definitions and scope of instrument categories follow the respective regulations of monetary statistics with the exceptions of: 1) time deposits, which for the purpose of monetary statistics are included in the deposits with agreed maturity and 2) loans other than overdraft which include repos (repos are reported as a separate indicator for the purposes of monetary statistics).

Instrument categories of interest rate statistics are broken down by sector, currency, term to maturity or notice period as well as purpose of loans to households.

• *Breakdown by sector* – interest rates on loans, deposits and repos agreed by banks and resident legal and natural persons divided into two institutional sectors: *Non-financial corporations* and *Households* (population, employers and own-account workers) are reported. The *Households* sector includes the *Non-profit Organizations Serving Households (NPISHs)* sector.

Credit or deposit agreements with the government and financial sectors as well as non-residents are not reported.

- *Breakdown by currency* – BGN, EUR and USD.
- *Breakdown by original maturity or notice period*:
  - deposits: overnight deposits, time deposits (over 1 day up to 1 month, over 1 month up to 3 months, over 3 months up to 6 months, over 6 months up to 1 year, over 1 year up to 2 years, over 2 years) and deposits redeemable at notice.
  - loans: overdraft, short-term loans (loans up to 1 year, other than overdraft) and long-term loans (over 1 year).

• *Breakdown by purpose of loans to households* – the interest rates on loans other than overdraft in levs to the *Households* sector are divided into three types: loans for house purchases, consumer loans and other loans.

[15] A new interest rate statistics, harmonized with the ECB requirements, is under implementation and when enough long-time series exist, an enlarged edition will be presented to the users before the end of the year.

Data source and data processing

Data sources (reporting units) are banks that are resident on the territory of the Republic of Bulgaria and foreign bank branches registered in Bulgaria. Banks in case of initiated bankruptcy proceedings do not fall under the scope of interest rate statistics.

Interest rates are effective annual rates. They are average weighted with the amounts of *new business* or with the outstanding amounts as of the end of the reporting period. Up to 31 December 2006 monthly interest rates on loans on new business were calculated by applying the method of averaging rates by the amounts of *new business* for the weeks of the month. Since 31 January 2007 monthly interest rates on loans on *new business* are calculated for a calendar month.

II. INTEREST RATE STATISTICS: GOVERNMENT SECURITIES SECONDARY MARKET YIELD AND THE LONG-TERM INTEREST RATE FOR CONVERGENCE ASSESSMENT PURPOSES

Scope

Yield to maturity achieved on the secondary market of government securities denominated in national currency. Treasury bills are discount government securities issued under Ordinance No. 5 of the Ministry of Finance and the Bulgarian National Bank (treasury bills with maturity of up to 3 months and up to 1 year). Bonds are interest-bearing government securities issued under Ordinance No. 5 of the Ministry of Finance and the Bulgarian National Bank with original maturity of over 1 year.

The long-term interest rate (LTIR) for convergence assessment purposes is determined on the basis of the yield to maturity of the secondary market long-term government bonds (benchmark bond). The *Central government* sector is the bond issuer and the bond is denominated in national currency. The applied guidelines for calculation of the LTIR are developed by the BNB in compliance with the requirements of the European Central Bank and are coordinated with the Ministry of Finance (see *www.bnb.bg/Statistics/Interest Rate Statistics/Long-term Interest Rate for Convergence Purposes (LTIR)*.

Reporting period – a calendar month.

Data source and data processing

The calculation of the government securities yield on the secondary interbank market and the LTIR is based on information about the secondary market contracts obtained from the CBSRTGS database (Computerized Book-entry System for Registration of Trade in Government Securities) of the BNB Fiscal Services Department. For more information, see *www.bnb.bg/Fiscal services*.

Monthly values of the secondary market yield on government securities are calculated as the average weighted effective yield on individual transactions achieved on the secondary market during the reporting period.

Monthly values of the LTIR for convergence purposes are calculated as an unweighted average of the daily yields on the benchmark bond.

The yield to maturity on government securities and LTIR is calculated by the ISMA formula at ACT/365 day count convention (the yield to maturity calculated by this formula serves as a nominal long-term interest rate, i.e. no adjustments for coupon effects, taxes, inflation etc. are applied).

2 External Sector

Information on the external sector includes four major categories:

(a) balance of payments;

(b) trade in goods;

(c) debt indicators;

(d) exchange rates.

Balance of Payments[16]

The Bulgarian National Bank is in charge of the compilation of Bulgaria's balance of payments. The legal framework of the balance of payments compilation in Bulgaria is provided for in Article 42 of the Law on the Bulgarian National Bank (published in the Darjaven Vestnik, issue 46 of 10 June 1997). Data for the purposes of the BOP compilation are collected on the basis of Article 42 of the Law on the Bulgarian National Bank as well as pursuant to Articles 7–10 of the Foreign Exchange Law (published in the Darjaven Vestnik, issue 83 of 21 September 1999; amended, issue 60 of 2003). The data are processed by the Balance of Payments and External Debt Division within the BNB Statistics Directorate keeping its confidentiality. At present, the Bulgarian National Bank compiles and publishes analytical presentation as well as standard presentation of the balance of payments in accordance with the Fifth Edition of the **Balance of Payments Manual** (IMF, 1993) and the **Guideline of the European Central Bank**.[17]

The balance of payments' methodology is conceptually related to that of the *System of National Accounts* (SNA). The items of the balance of payments correspond closely to the relevant categories of the *Rest of the World* account in the SNA.

There is a close relationship between the *International Investment Position* and the balance of payments as well. The BOP financial account reveals economy's transactions in external financial assets and liabilities which affect the amount of external financial assets and liabilities reported under the international investment position.

I. Accounting Principles and Conventions

The basic convention applied in constituting Bulgaria's balance of payments is the implementation of the *double entry system*. Credit, with a positive sign, includes: exports of goods and services, income receivable, offsets to unrequited real and financial resources received (transfers), increases in financial liabilities, decreases in financial assets. Debit, with a negative sign, includes: imports of goods and services, income payable, offsets to unrequited real and financial resources provided, increases in financial assets, decreases in financial liabilities.

The *time of recording* the balance of payments transactions is the time of the change in ownership.

Transaction valuations are based on market prices. If the actual market prices are not available, the average market prices are used as approximation.

Valuation changes in Bulgaria's external assets and liabilities due to valuation adjustments are not included in the balance of payments.

The units of account for the balance of payments of Bulgaria are euro, lev and US dollar. The conversion into the unit of account is based on the exchange rate at the time of transaction. If not available, or inapplicable due to other practical reasons, the average exchange rate for the reporting period is used.

II. Balance of Payments Components

The balance of payments components are compiled using basically the *International Transactions Reporting System* (ITRS), which includes (i) banks' reports, and (ii) reports of enterprises which have bank accounts opened abroad (pertaining to the residents' international transactions). These reports cover all components of the balance of payments table. In addition, the data on individual BOP components collected *via* ITRS are substituted by data from other sources: (i) direct investment enterprise survey, (ii) reports by other institutions, (iii) reports by enterprises which have received (extended) financial loans by (to) non-residents, and (iv) reports by enterprises on other liabilities and claims (other than financial loans) to non-residents.

In the analytical presentation, the balance of payments components are classified in the following major categories:

A. Current Account

The *current account* comprises the acquisition and provision of ***goods and services, income***, and ***current transfers*** between Bulgaria and the rest of the world. The flows recorded on the credit side represent that part of the gross domestic product, which is provided to the rest of the world (exports of goods and services), as well as the provision of factors of production expressed by income received or receivable – compensation of employees, and investment income (interest, dividends, *etc.*). Offsets to unrequited real and financial resources received (transfers) are also recorded.

[16] Revised as of 13 April 2007.

[17] Guideline of the European Central Bank on the Statistical Reporting Requirements of the European Central Bank in the Field of Balance of Payments Statistics, the International Reserves Template and International Investment Position Statistics (ECB/2004/15).

The flows on the debit side represent the gross product created in the rest of the world and acquired by the national economy (imports of goods and services), as well as the acquisition of factors of production expressed by income paid or payable. Offsets to unrequited real and financial resources provided are also recorded.

• The *Goods* component of the BOP current account covers movable goods for which changes in ownership between residents and non-residents occurred. Data on imports and exports FOB (free on board) are based on customs declarations, as the codes used are in compliance with the Harmonised System for Description and Coding of Commodities of the World Customs Organisation, introduced in 1988 and supplemented in 1992. With the January 2006 data the Bulgarian National Bank and the National Statistics Institute started to apply jointly the methodology for compilation of imports at FOB prices and receipts and payments regarding the freight transportation, developed by them.[18] The methodology is based on the analysis of the CIF/FOB correlations for the imports of goods depending on the import delivery categories, as well as on the mode of transportation and nationality of the carrier.

Data sources: The source of data between the beginning of 2003 and the end of 2006 was the Customs Agency and for preceding years – the Information Services (at the Information Computing Center Directorate). The Bulgarian National Bank and the National Statistical Institute received the exports and imports data, supplemented them with other information and processed them further. With the application of the Intrastat system (introduced with the Law on Statistics of Intracommunity Merchandise Trade, published in the Darjaven Vestnik, issue 51 of 2006) since January 2007 brought about changes in the way data on the foreign trade of Bulgaria with the rest of the EU member states were reported.

The introduction of the Intrastat system led to changes in the schedule of data receiving and processing. The information on exports (dispatches) and imports (arrivals) of goods is reported by the Intrastat operators (the firms obliged to provide information) to the National Revenue Agency within 20 days after the close of the reporting month. These data are sent to the National Statistical Institute for further processing. The NSI reports to the Eurostat aggregated monthly data (without breakdowns by trade partner and by type of goods) within 42 days after the close of the reporting month. The detailed intratrade data on dispatches and arrivals of goods are reported to Eurostat within 70 days after the close of the reporting month.

The BNB receives aggregated data from the NSI (without breakdowns by trade partner and by type of goods) on the country trade with the other EU member states within 35 days after the close of the reporting month, and these data are supplemented by the data of the Customs Agency on trade with third countries. Therefore, only aggregated data on exports and imports are published in the report on the balance of payments for the reporting month. The BNB receives detailed data on dispatches and arrivals of goods from the NSI within 60 days after the close of the reporting month.

As a result of these changes the schedule for foreign trade data reporting by the BNB is the following:

- Preliminary aggregated data (without breakdowns by trade partner and by type of goods) for the reporting month are published within 42 days after the close of the reporting month in the balance of payments table.
- Preliminary detailed data (with breakdowns by trade partner and by type of goods) for the reporting month are submitted to users not earlier than 73 days after the close of the reporting month.
- The published series of data on Bulgarian imports and exports on the BNB website are updated not earlier than 73 days after the close of the reporting month.

The BNB and the NSI coordinate import and export data before publishing them.

- The *Services* component comprises *transportation, travel*, and *other services*.

The Bulgarian National Bank derives the data on *freight transportation* from foreign trade data and the data on *passenger transportation* from travel data on the basis of estimates.

The BNB introduced a new methodology for estimation of receipts from and expenditures on freight transportation which was applied to the January 2006 data. Freight transportation receipts are set up on the basis of estimated receipts of resident carriers related to the country exports of goods. Expenditures are calculated as an estimation of the expenditures made by residents on behalf of non-resident carriers related to the country imports of goods. The receipts and expenditures

[18] The 2002 to 2005 data are based on this methodology for compilation of imports at FOB prices and of receipts and payments regarding freight transportation.

are estimated according to mode of transportation and nationality of the carrier. The application of the Intrastat system since January 2007 brought about changes in the way of compiling data on receipts and payments on freight transportation of Bulgaria with the rest of the EU member states. Due to the delay in receiving the detailed data on the trade of Bulgaria with the rest of the EU member states from the NSI, as of the date of publication of the preliminary report on the balance of payments for the corresponding month (42 days after the close of the reporting period) the preliminary compilation of receipts and payments on freight transportation is based on data for the preceding years. For exports of transport services the estimate is 7.5 per cent of goods exports FOB, of which 61.8 per cent are performed by resident carriers and are balance of payment transactions. For imports of transport services the estimate is 5 per cent of the imports FOB, of which 48 per cent are performed by non-resident carriers and are subject to reporting in the balance of payments. These estimates are subject to revisions after receiving the preliminary detailed data (with breakdown by trade partner and by type of goods) on trade with the rest of the EU member states for the reporting month.

Travel covers goods and services, including those related to health and education, acquired by travellers for business and personal purposes. The data on travel are based on data from the Ministry of Internal Affairs on the number of travellers crossing the borders and on estimates of *per capita* expenditures, the latter based on the methodology for estimation of the receipts and expenditures from travel services – *Methodology for Estimation of the Receipts and Expenditures from Travel in the Bulgarian Balance of Payments* (the Bulgarian National Bank, Ministry of Trade and Tourism, 18 November 1999). The 2007 data about the number of foreigners who visited the country are based on information provided by the NBPS and on NSI estimates.

Other Services item covers receipts and payments related to services other than transportation and travel (communication, construction, financial, insurance, leasing, cultural, sport and recreational services, *etc*.).

The *major sources* of information on this item are the banks' reports and the reports of enterprises having accounts abroad.

• *Income* consists of two categories: (i) *compensation of employees*, and (ii) *investment income*. *Compensation of Employees* covers wages, salaries and other benefits paid to non-resident workers in Bulgaria or received by resident workers abroad. The compensation of employees also comprises income due to illegal employment. The BNB estimates this flow in accordance with the *Methodology for Estimation of Flows due to Illegal Employment* (14 March 2006).[19] *Investment Income* covers receipts and payments of income associated with external financial assets and liabilities: on direct investment (dividends and reinvested earnings), portfolio investment, other investment, and on reserve assets (deposit accounts).

The *major sources* of information on the *Income* component are the banks' reports and the reports of enterprises, the Ministry of Finance, and the Bulgarian National Bank.

• *Transfers* are all real resources and financial items provided without a *quid-pro-quo* from one economy to another. *Current Transfers* directly affect the level of disposable income of an economy, and the consumption of goods and services. That is, current transfers reduce the income and consumption potential of the donor and increase the income and consumption potential of the recipient. Receipts from EU preaccession and accession funds, private persons' money transfers, as well as gifts, grants, inheritances, prizes won from lotteries, pensions, current taxes, social security contributions, *etc*. are included in the *Current Transfers*.

Sources: The Bulgarian National Bank obtains information on current transfers from the Ministry of Finance, the Bulgarian Red Cross, the Agency for Foreign Aid, and from the monthly banks' reports.

B. Capital Account

The *Capital Account* consists of two categories: (i) *capital transfers,* and (ii) *acquisition or disposal of intangible, non-financial assets*. If in kind, a capital transfer consists of (i) a transfer of ownership of fixed assets, or (ii) forgiveness of a liability by a creditor when no counterpart is received in return. If in cash, a transfer is *capital* when it is linked to, or conditional on, the acquisition or disposal of fixed assets (for example, an investment grant).

[19] Data are based on this methodology since April 2001.

Sources: The Bulgarian National Bank receives information on the capital account from the Ministry of Finance (for capital transfers from the EU funds), from the quarterly reports of the enterprises in the non-financial sector, the monthly reports of the notaries and others.

C. Financial Account

The *Financial Account* comprises all transactions (actual and imputed) in the external financial assets and liabilities of an economy. The external assets and liabilities are primarily classified according to the type of investment. The *Financial Account* includes (i) *direct investment*, (ii) *portfolio investment,* and (iii) *other investment*.

• *Direct Investment* covers direct investment abroad, direct investment in reporting economy and mergers and acquisitions. The *Mergers and acquisitions* subitem shows the transactions related to mergers and acquisitions. The purpose of its inclusion was to eliminate the influence of such transactions over the reported foreign direct investment data. International practice shows that, first, these transactions hardly have any real impact on production capacities and employment, and, second, the conclusions drawn from the analysis of direct investment data in which data on mergers and acquisitions have been included might be misleading as regards investment flows, their dynamics and their branch and geographical structure (see *European Central Bank, Eurostat, Foreign Direct Investment Task Force Report*, March 2004, paragraph 332).

Direct investment is a category of international investment in which a resident of an economy, a direct investor, acquires a lasting interest (at least 10 per cent of the ordinary shares or the voting power) in an enterprise resident in another economy, a direct investment enterprise. The direct investment includes both the initial transaction through which the relationship between the direct investor and the direct investment enterprise is established, and all subsequent transactions between them. The direct investment covers transactions relating to the change in the direct investor's share in the equity capital of the direct investment enterprise and the change in the intercompany debt transactions, as well as the share of the direct investor in the undistributed earnings/loss of the direct investment enterprise. Direct investment is reported on a directional basis: direct investment abroad as an asset, and direct investment in the reporting country as a liability.

Sources: The Bulgarian National Bank receives monthly data on direct investments in Bulgaria from the Privatisation Agency, the Central Depository and from banks' reports; quarterly data are obtained from the Financial Supervision Commission, from quarterly reports of companies with foreign interest and the NSI statistical survey carried out among non-financial sector enterprises; annual data are obtained from banks' annual financial statements and enterprises' reports provided to the BNB. The Bulgarian National Bank receives data on direct investment abroad from the forms for declaring direct investment in the BNB, quarterly reports of non-financial sector's corporations and banks' monthly reports. After data examination intended to avoid information duplication, these data substitute the monthly data received from banks and previously included in the balance of payments.

• *Portfolio Investment* includes portfolio investment assets and portfolio investment liabilities.

Portfolio Investment covers transactions in shares and equity of the investor's share in the capital is less than 10 per cent, transactions in bonds, notes, money market and other tradable securities and transactions in financial derivatives.

The *major source* of information on the liabilities side of the *Portfolio Investment* is the data provided by the Ministry of Finance, the Bulgarian National Bank, banks, enterprises holding bank accounts abroad, and the Central Depository.

Data on the assets side of the *Portfolio Investment* are provided by banks (regarding portfolio investments both on the account of banks and on their customers' account), the Bulgarian National Bank and the Ministry of Finance.

• *Other Investment* includes trade credits, loans, currency and deposits, and other assets and liabilities.

According to the balance of payments conventions, trade credit arises from the direct extension of credit from a supplier to a buyer, i.e. this is a credit extended by a trade partner without issue of tradable securities.

Information on trade credits is provided mainly by the quarterly reports of residents on their claims on/liabilities to non-residents.

The *Loans* item includes received and paid principals on long- and short-term loans between residents and non-residents if no issue of tradable securities is involved with these loans. Transactions concerning disbursements and repayments of principals on IMF loans and disbursements on loans on BOP support are not included in the *Loans* item. They are recorded under the corresponding items of the *E. Reserves and Related Items group.*

Data on loans are based on information received from the Ministry of Finance, the Bulgarian National Bank, the banks and directly from the enterprises that have extended loans or received credits from abroad. The latter report quarterly data to the BNB because of which the monthly data on *Loans*, *Other sectors* (assets and liabilities) are revised each quarter.

The *Currency and Deposits* component shows the changes in the residents' currency and deposits held abroad on the assets side, and the changes in the liabilities of the resident banks to non-residents in national and foreign currency on the liabilities side. Following the basic accounting principle and conventions set in the *Balance of Payments Manual* (IMF, 1993), when compiling this item, the Bulgarian National Bank excludes any changes therein due to exchange rate changes.

The *Other Assets* and *Other Liabilities* items include all transactions on miscellaneous accounts receivable and payable not included elsewhere and transactions in arrears.

D. Net Errors and Omissions

The *Net Errors and Omissions* component is an offsetting item. This component exists in the BOP presentation as the data collection system used by the Bulgarian National Bank is not a closed one but a combination of various sources of information. Unlike other statistical reports, e.g. monetary statistics, data collection required for the balance of payments compilation could not be limited to the financial statements of banks as the only source of information.

The fluctuations in the *Net Errors and Omissions,* both in sign and in size, are mainly due to: (i) revisions of export and import data, (ii) the improvement of the methodology for compiling individual balance of payments' components, and (iii) the existence of objective obstacles to collecting data on particular balance of payments' items.

E. Reserves and Related Items

Reserve Assets include the external assets available to and controlled by the central bank (government) for direct financing of balance of payments imbalances. The reserve assets comprise monetary gold, SDRs, reserve position in the International Monetary Fund, foreign exchange assets (including currency and deposits, and securities), and other claims. The entries under this category pertain to transactions on BNB external holdings which are administered by the Issue Department. Data on reserve assets changes included in the BOP table excludes valuation adjustments, due to exchange rate fluctuations and price revaluation.

In the analytical presentation of the balance of payments, this group includes also the *Use of Fund Credit* and the *Exceptional Financing* items. The exceptional financing comprises the BOP support as well as deferred/rescheduled payments and payments on arrears, associated with balance of payments difficulties. In accordance with the methodology for accounting exceptional financing transactions (*Balance of Payments Manual*, Fifth Edition (IMF, 1993), p. 454), the principal repayments on the BOP support credits are included in the **Financial Account** in *Other Investment Liabilities – Loans – General Government.*

III. Periodicity, Frequency and Timeliness of the Balance of Payments Publications

The Bulgarian National Bank compiles and publishes the balance of payments of the Republic of Bulgaria on a monthly basis. In accordance with its schedule, the Bulgarian National Bank publishes the balance of payments data within six weeks (42 calendar days) after the close of the reference period.

IV. Data Revision Policy

Revisions to published BOP estimates are typical of many balance of payments compilation systems. With the revision publication, the users are duly informed about the revised data on the corresponding items.[20] The data revision policy pursued by the Bulgarian National Bank is based on the following principles:

[20] The annual data on foreign direct investment in the country are revised 15 months after the close of the reporting period (after the annual NSI data on the non-financial sector are received in the BNB).

(i) As for the most frequent data, each monthly publication includes revisions of the data for the last three months and each quarterly publication includes revisions of the monthly data for the whole current year.

(ii) When current changes are made due both to additional information collected and elimination of errors, the Bulgarian National Bank duly informs the users through the monthly press releases and the notes to the balance of payments table.

(iii) When significant revisions are made due to changes in the methodology for reporting particular BOP components or for any other reasons, the Bulgarian National Bank publishes in advance information on the changes to facilitate the users.

V. Data Dissemination

The Bulgarian National Bank disseminates the monthly balance of payments data on its website – http://www.bnb.bg

The data are published also in the *Monthly Bulletin* and in semi-annual and annual reports of the Bulgarian National Bank. Data are simultaneously provided to all interested parties.

VI. Contacts

If you have any questions on the methodology applied by the Bulgarian National Bank or on the published balance of payments data, please do not hesitate to send them to Emil Dimitrov, Director of the Statistics Directorate, and to Liliana El Haddad, Head of the Balance of Payments and External Debt Division, *via* e-mail at *Dimitrov.E@bnbank.org* and *ElHaddad.L@bnbank.org*, or by mail to the following address:

1000 Sofia, Bulgaria

Imports and Exports

I. Data Sources

The data source between the beginning of 2003 and the end of 2006 was the Customs Agency, and for preceding years – the Information Services (at the Informational Computing Center Directorate). The Bulgarian National Bank and the National Statistical Institute received the exports and imports data, supplemented them with other information and processed them further. Until the end of 2006 all enterprises which exported or imported goods were obliged to declare these activities through customs declarations.

Since 1 January 2007 the enterprises trading with other EU member states report according to the Intrastat system (introduced with the Law on Statistics of Intercommunity Merchandise Trade, published in the Darjaven Vestnik, issue 51 of 2006). In compliance with this Law, enterprises whose turnover exceeds the threshold set by the National Statistical Institute (NSI), submit Intrastat declarations to the National Revenue Agency (NRA). The Agency is obliged to perform control over the coverage of the enterprises and to keep track of the fulfilment of their duties under the Intrastat system, as well as to control the authenticity of the provided data. The data from the Intrastat declarations are submitted to the NSI for further processing.

The imports from, and exports to, third countries (non-EU member states), as well as the movement of goods within the EU, which is under customs control, are still reported through customs declarations, and the Customs Agency submits the data to the NSI for processing. The NSI combines these data with the Intrastat data, processes them and after performing additional estimates provides the data to the users, including the Bulgarian National Bank.

II. Data Timelines

The BNB receives from the NSI aggregated data (without breakdowns by trade partner and type of goods) on the country trade with the other EU member states within 35 days after the close of the reporting month. The detailed data on dispatches and arrivals of goods are provided by the NSI within 60 days after the close of the reporting month, and the data on the turnover of trade with third countries are provided by the NSI at the latest on the 29th day of the month following the reporting one.

III. Principles of Reporting

Exports are reported at FOB prices and imports at CIF prices. For the purposes of the balance of payments statistics, however, total imports are re-calculated at FOB prices. The coding system used for commodities is based on the Harmonised Commodity Description and Coding System of the World Customs Organisation, introduced in 1988 and supplemented in 1992.

Based on the common BNB and NSI methodology, since 1999 exports and imports are recorded after the Special Trade System, where the date of transactions' registration is that of the customs declarations' clearance, or of the month of dispatches or arrivals within the Intrastat system. The criteria for the description of partner countries are as follows: imports – by country of commodities' origin; exports – by country of consignment, that is, the latest known country where the commodities are to be delivered. For the purposes of consistency with the statistical time series on imports and exports by major trading partner and region, the BNB has applied these criteria to the 2007 data, too.

In accordance with their common methodology, before publishing the imports and exports data, the BNB and the NSI coordinate the gross figures for imports, exports and trade balance.

IV. Import and Export Tables

A. End-use tables

For the purposes of the economic analysis the BNB publishes tables by end-use based on the harmonised system four-digit codes and grouped according to the purpose and end-use of the respective commodity. The basic principles of commodities' distribution in the respective groups are: purpose of use, on the one hand, and degree of processing, on the other. The tables are monthly, quarterly and annual.

B. Major trading partner and region tables

The tables include only the most important countries and regions for the Bulgarian exports (imports). The subdivision of EU member states into 'EU-15' and 'EU-new member states' is according to the practice and requirements of the Eurostat system and the ECB. The tables are monthly, quarterly and annual.

C. Main trade region and end-use tables

The tables represent a cross-section of the country's import and export data by region and by commodity. The tables are quarterly and annual.

D. Import and export currency structure tables

The tables indicate the relative share of the different currencies in the export and import transactions. The tables are quarterly and annual.

In all published tables exports are reported at FOB prices, and imports at CIF prices.

V. Data Dissemination

The import and export data are available on the website of the BNB (http://www.bnb.bg). The data are also published in the BNB *Monthly Bulletin*. The foreign trade data are included in the BNB official semiannual and annual reports.

Time series for the exports and imports by end-use and major trading partner and region have been published on the website of the BNB since 1995. These series could be searched by period (month, quarter, year) and by end-use (trade partner). Along with this, quarterly and annual major trade region and end-use tables and import and export currency structure tables (till December 2006) are available there.

VI. Timelines of Publications

The data series on the country's exports and imports published on the website of the BNB are updated not earlier than 73 days after the close of the reporting month. Within 42 days after the close of the reporting month, aggregated import and export data (without breakdowns by trade partner and by type of goods) are published in the balance of payments table.

VII. Data Revision Policy

In accordance with its data revision policy, the BNB makes monthly revisions of its data for the last three months, and quarterly revisions of the data for the whole current year. However, in cases of incomplete and/or low quality incoming data, the Bulgarian National Bank may revise the import and export data more frequently.

VIII. Contacts

For further information on the methodology applied by the Bulgarian National Bank or on the foreign trade data published, you may contact Mrs Liliana El Haddad, Head of the Balance of Payments and External Debt Division, via e-mail at *ElHaddad.L@bnbank.org* (tel. +359 2 9145 1439), or Ms Ana Murdjeva, expert, at *Murdjeva.A@bnbank.org* (tel. +359 2 9145 1965).

Gross External Debt[21]

In reporting Bulgaria's gross external debt, the Bulgarian National Bank follows the international standards and requirements set out in the *External Debt Statistics: Guide for Compilers and Users,* 2003 prepared by several international organisations and issued by the IMF[22] and in the *Balance of Payments Manual*, IMF, 5th edition, 1993. On the one hand, this ensures international data compatibility, and consistency between the external debt statistics and the balance of payments, international investment position and national accounts, on the other hand. Data on gross external debt are an important information source for particular balance of payments items and the international investment position.

The BNB compiles and disseminates monthly statistical data on the gross external debt by institutional sector:

Publications comprise monthly data on: (1) gross external debt amount (2) gross external debt service and (3) disbursements. Additional analytical external debt data by creditor is disseminated quarterly.

I. Accounting Principles and Conventions

When compiling debt statistics, the BNB follows the **international definition of gross external debt –** 'Gross external debt, at any given time, is the outstanding amount of those actual current, and not contingent, liabilities that require payment(s) of principal and/or interest by the debtor at some point(s) in the future and that are owed to non-residents by residents of an economy.[23]

The main criterion for a liability to be included in the gross external debt of the country is that **it is issued by a resident and is owed to a non-resident**,[24] regardless of whether it is issued on domestic or international, money or capital markets. The same principle is applied to transactions: only those between residents and non-residents are recorded. In the debt tables the BNB records only the amount of **tranches actually disbursed**.

The stock of liabilities is recorded at **nominal**, not at **market value** even in the case when they are in the form of tradable securities. The gross external debt of Bulgaria is reported in euro.

The distinction between short-term and long-term debt is based on the **original,** not **residual maturity of the liability**. The long-term debt includes all liabilities with original maturity of over one year, as well as all disbursements related to direct investment,[25] and the short-term debt, liabilities with original maturity of one year or less. All principal and interest arrears are recorded as short-term debt.

II. Gross External debt Components

A. By Institutional Sector

The structure of the *Gross External Debt* table by institutional sector is in compliance with the requirements of the *External Debt Statistics: Guide for Compilers and Users, 2003*, prepared by several international organisations and published by the IMF.[26]

The main components of the *Gross External Debt* tables classified by institutional sector are General government, Monetary authorities, Banks and Other sectors. In accordance with the international statistical standards, debt liabilities related to direct investment (intercompany lending) are presented separately. The classification by institutional sector is in compliance with the Fifth edition of the *Balance of Payments Manual (1993).* Within the sectors, the external debt liabilities are classified by maturity: short-term and long-term and by instrument.

[24] For a definition of a resident and non-resident, see the *Balance of Payments Manual*, IMF, 5th edition, 1993, paragraphs 57–58.

[25] *External Debt Statistics: Guide for Compilers and Users*, paragraphs 3.14 and 7.5.

[26] *External Debt Statistics: Guide for Compilers and Users*, IMF, 2003 (Bank for International Settlements, The Commonwealth Secretariat, Eurostat, International Monetary Fund, Organisation for Economic Co-operation and Development, The Paris Club Secretariat, The United Nations Conference on Trade and Development, the World Bank).

General Government

General government debt includes: (1) central government debt, (2) local government debt, (3) debt of social security funds and (4) debt of all non-market non-profit institutions that are controlled and mainly financed by government units. Public corporations and unincorporated enterprises that function as if they were corporations (so called quasi-corporations) are explicitly excluded from the *General government* sector and are allocated to *Banks* or *Other sectors* as appropriate. The debt liabilities of the *General government* sector are long-term and are classified by instrument: *Bonds and notes* and *Loans*. Liabilities for which no issue of tradable securities is involved are reported under *Loans*. Loans received by the central government from the IMF are also reported under *Loans.* The central government liabilities on securities issued on the international markets are reported under *Bonds and notes*, as the item comprises the entire stock of the issue. The part of the issue (Brady bonds, Eurobonds and Global bonds) held by residents at the end of the review period is reported with a negative sign in the *Bonds and notes held by residents* item. Government securities issued by the government on the domestic market and purchased by non-residents are also reported under the *Bonds and notes* item.

Data sources: The main source of data is the *Register of Government and Government Guaranteed Debt* of the Ministry of Finance (prior to 31 December 2002 the source of that data was the *System for Debt Registration, Service and the Management* of the Ministry of Finance and the Bulgarian National Bank). Other sources are Government and Government Guaranteed Debts Depository Directorate with the BNB and the banks.

Monetary Authorities

In accordance with the international methodology on external debt statistics included herein are the external liabilities of the BNB. The data is derived from the *Register of Government and Government Guaranteed Debt* of the Ministry of Finance.

Banks

Short-term liabilities of the banks include short-term loans, non-residents' deposits with domestic banks as well as other payables to non-residents. Deposits in foreign currencies and in levs of non-residents with domestic banks are included in the *Deposits* subitem. The net increase in deposits in the banking system is reported in the *Gross External Debt Disbursements* table, and the net deposit withdrawal – in the *External Debt Service* tables, as a principal payment under the *Deposits* subitem. In accordance with the *External Debt Statistics: Guide for Compilers and Users,* deposits related to contingent liabilities are excluded.[27] Long-term liabilities include loans and bonds and notes issued by the banks and held by non-residents.

Data sources: Data on the amount and transactions on external loans are received monthly directly from the banks through a statistical form on their external liabilities. The Money and Banking Statistics Division with the Statistics Directorate of the BNB provides monthly data for the *Deposits* and *Other liabilities* items. The source for the data on the *Bonds and notes* item is the Central Depository.

Other Sectors

In the *Other sectors* item, the debt of private and state-owned non-bank enterprises (including *Government guaranteed debt*) as well as external liabilities of the households are reported.

Short-term liabilities of *Other sectors* include short-term loans, trade credits as well as other payables to non-residents. Long-term liabilities include loans and bonds and notes issued by the companies and held by non-residents.

Data sources: Data on financial loans are collected through the statistical *Form SPB-4 Report on the Financial Credit Liabilities of Residents to Non-residents* that covers data on the stock and the various types of transactions on the credit. As the Foreign Exchange Law envisages quarterly reporting of these liabilities, for the first two months of each quarter the BNB publishes estimations on the non-bank enterprises based on the debt service schedules provided by companies on the loans extended to them and on estimations. Under the *Trade credits* subitem, the respective liabilities of residents to non-residents[28] are reported excluding trade credit liabilities towards foreign direct investors. Such data are collected from the BNB through *Form SPB-6B Report on the liabilities*

[27] *External Debt Statistics: Guide for Compilers and Users, IMF 2003*, paragraph 2.10.

[28] For a definition of trade credits, see *Balance of Payments Manual*, IMF, 5th edition, 1993, Chapter XX, paragraph 414, as well as *External Debt Statistics*: *Guide for Compilers and Users*, Chapter Three, paragraph 133.

of residents to non-residents. As the Foreign Exchange Law envisages quarterly reporting of these liabilities, for the first two months of each quarter the BNB publishes estimations of the trade credits stock. Data on liabilities of the resident physical persons are collected through the annual statistical *Form SPB-8 Report on the Assets and Liabilities of Resident Physical Persons to Non-residents*.

Direct Investment: Intercompany Lending

In accordance with the international methodology on external debt statistics, a distinction is made between liabilities owed to direct investors (*Intercompany loans*) and such owed to other creditors. Liabilities related to direct investment relationship are separately identified (equity liabilities arising from direct investment, i.e. equity capital and reinvested earnings except non-participating preferred shares are excluded from external debt). Disbursements related to direct investment are included in the long-term external debt.

B. By Creditor

In accordance with the structure recommended by the *External Debt Statistics: Guide for Compilers and Users*, quarterly external debt stock tables by creditor sector are prepared.

C. Public and Publicly Guaranteed External Debt and Private Non-guaranteed External Debt

In accordance with paragraphs 5.5–5.6 of the External Debt Statistics: *Guide for Compilers and Users*, IMF 2003, the public and publicly guaranteed external debt comprises the debt of the general government sector, the monetary authorities sector, the public banks, the public non-financial enterprises, as well as the government guaranteed debt of the private sector. The private non-guaranteed external debt comprises banks and non-financial enterprises' debt, which is not included in the public and publicly guaranteed external debt. The data are monthly.

III. Periodicity, Frequency and Timeliness of the Gross External Debt Publications

The Bulgarian National Bank compiles and publishes data on the stock of the gross external debt of Bulgaria, the debt service payments and the disbursements on a monthly basis. The external sector debt indicators, including external debt indicators, are also disseminated monthly.

The Bulgarian National Bank publishes the data according to its advance release calendar. In case of a change, the BNB informs the users on the new release date at least a week before the advance date.

IV. Data Revision Policy

The data revisions policy of the Bulgarian National Bank is based on the following principles:

(i) Each monthly publication includes revisions of the data for the previous three months, and each quarterly publication includes revisions of the monthly data for the whole current year.

(ii) When on-going changes are made due to additional information collected, as well as resulting from elimination of errors, the Bulgarian National Bank timely informs the users through the monthly press releases, as well as through the notes at the end of the *Gross External Debt* tables.

(iii) When significant revisions are made due to changes in the methodology for reporting of certain external debt components or for other reasons, the Bulgarian National Bank publishes in information on the changes advance to facilitate data users.

V. Data Dissemination

The Bulgarian National Bank publishes monthly gross external debt data on the website of the Bulgarian National Bank: http://www.bnb.bg. The data are also published in the BNB *Monthly Bulletin* and in the semi-annual and annual reports of the Bulgarian National Bank. Data are simultaneously provided to all interested parties.

VI. Contacts

If you have any questions on the methodology applied by the Bulgarian National Bank or on the gross external debt data published, please do not hesitate to contact Emil Dimitrov, Director of the Statistics Directorate, *via* e-mail at *Dimitrov.E@bnbank.org* and Liliana El Haddad, Head of the Balance of Payments and External Debt Division, at *ElHaddad.L@bnbank.org*, or by mail to the following address:

Bulgarian National Bank
Balance of Payments and External Debt Division
1, Knyaz Alexander I Square
1000 Sofia, Bulgaria

International Investment Position of Bulgaria[29]

The Bulgarian National Bank is in charge of the compilation of the International Investment Position (IIP) of the country. Data for the purposes of the IIP compilation are collected on the basis of Article 42 of the Law on the Bulgarian National Bank, as well as on the basis of the Foreign Exchange Law. These data are processed by the Balance of Payments and External Debt Division within the Statistics Directorate of the BNB in compliance with confidentiality rules. The IIP statement is compiled in general conformity with the international standards prescribed by the Fifth Edition of the *Balance of Payments Manual* (IMF, 1993) and the *International Investment Position – A Guide to Data Sources* (IMF, 2002) and the *Guideline of The European Central Bank* (ECB/2004/15).[30] The IIP statement is compiled and published quarterly.

There is a close relationship between the International Investment Position and the balance of payments. The BOP financial account measures economy's transactions in external financial assets and liabilities which affect the stock of external financial assets and liabilities reported in the international investment position.

The international investment position methodology is conceptually related to that of the *System of National Accounts* (SNA). The IIP items correspond to the *Rest of the World* account of the SNA.

I. Accounting Principles and Conventions

Time of recording of transactions in international investment position is the end of the reference period.

Stocks' valuations are based on market prices. If the actual market prices are not available, the average market prices are used as an approximation.

Valuation changes of the country's external assets and liabilities are included in the international investment position.

The units of account for the international investment position of Bulgaria are the EUR and the BGN. The conversion into the unit of account is made using the exchange rate at the end of the reporting period.

II. International Investment Position Components

The IIP is the balance sheet of the country's stocks of external financial assets and liabilities at the end of a specific period. The primary type of classification in the IIP statement is the distinction between assets and liabilities. The second level of classification by function is fully consistent with the BOP financial account. The functional types of *assets* and *liabilities* are (i) *direct investment*, (ii) *portfolio investment*, (iii) *financial derivatives* and (iv) *other investment*. Included in assets are also the reserve assets held by the monetary authorities. The third level of classification is by investment instrument. Instruments recorded as *portfolio investment* and *other investment* are further subdivided by domestic sector, while the components of *other investment* are also cross-classified by original maturity.

International investment position components are classified into the following major categories:

A. Direct Investment

Direct investment is a category of international investment in which a resident of one economy – a direct investor – holds a lasting interest (at least 10 per cent of the ordinary shares or voting power) in an enterprise resident in another economy – a direct investment enterprise. The direct investment includes both the initial transaction, through which the relationship between the direct investor and the direct investment enterprise is established, and all subsequent transactions between them. The direct investment covers transactions related to changes in the direct investor's share in the equity capital of the direct investment enterprise, intercompany debt transactions, as well as the share of the direct investor in the undistributed earnings/loss of the direct investment enterprise. Claims on and liabilities to affiliated enterprises are shown separately, following the directional principle.

Sources and methods: Preliminary data on quarterly FDI stocks are estimated as stocks at the end of previous reporting period and accumulation of BOP flows. For data on direct investments abroad, the Bulgarian National Bank uses the information from declaration forms on Direct Investment Abroad, quarterly reports of non-financial sector enterprises and monthly reports of banks.

[29] Revised as of 10 April 2006.

[30] Guideline of the European Central Bank on the Statistical Reporting Requirements of the European Central Bank in the Field of Balance of Payments Statistics, The International Reserves Template and International Investment Position Statistics (ECB/2004/15).

Later, the stocks of Bulgarian direct investment abroad are replaced with data from an annual survey conducted by the BNB.

The Bulgarian National Bank receives monthly data on direct investments in Bulgaria from the Central Depository, from banks' reports on international transactions, Banking Supervision Department data on financial and accounting reports (balance sheets and income statements), the Notary Public and the Privatisation Agency; quarterly data – from the Financial Supervision Commission, from the reports on intercompany debt transactions and stocks and data from the Bulgarian National Bank surveys regarding major FDI non-financial sector companies. The direct investment equity stocks in Bulgaria for the non-banking sector derived from flows are reconciled and replaced with the annual data provided by the NSI. Breakdowns by sector and by country for both FDI in Bulgaria and abroad are available.

B. Portfolio Investment

Portfolio investment stocks comprise holdings of and liabilities on equity securities and debt securities; the latter are subdivided into bonds and notes (with an original maturity of one year or more) and money market instruments (with an original maturity of less than one year).

Sources and methods: The *portfolio investment assets* of the monetary authorities and the general government do not constitute a part of the reserve assets and are compiled on the basis of information provided by the General Accounting Department of the Bulgarian National Bank and by the Ministry of Finance.

The banks' holdings of securities are compiled on the basis of reporting forms, containing balance sheet data, while the other sectors' *portfolio investment assets* are reported by the custodians.

The stocks of *portfolio investment liabilities* cover securities issued by residents and held by non-residents. The main source of information on the portfolio investment liabilities in equity and debt securities are (i) the banks' balance sheets on portfolio investment in the banking sector and (ii) the Central Depository which provides monthly stocks information on the portfolio investment by sector. The Ministry of Finance, the Bulgarian National Bank and banks are the main sources of stock information on the portfolio investment liabilities in debt securities of the *Monetary Authorities* and the *General Government*.

C. Financial Derivatives

Assets and liabilities in *financial derivatives* cover financial derivative instruments, such as forwards, futures, swaps, options, *etc*. The Bulgarian National Bank does not currently obtain stock information on this IIP component.

D. Other Investment

Other investment covers the stocks of assets and liabilities related to short- and long-term trade credits and loans, currency and deposits and other assets and liabilities (accounts receivable and payable).

According to the fifth edition of the *Balance of Payments Manual*, *trade credits* consist of claims and liabilities arising from the direct extension of credit by suppliers and buyers for transactions in goods and services and advance payments for work in progress (or to be undertaken) that is associated with such transactions.

The *Loans* item includes received and paid principals on short- and long-term loans between residents and non-residents if no issue of a tradable security is involved with these loans. The *Currency and Deposits* component presents, on the assets side, the changes in the residents' currency deposits held abroad, and on the liabilities side – the changes in the liabilities of the resident banks to non-residents in domestic and foreign currency. The *Other assets* and *Other liabilities* items include all transactions on miscellaneous accounts receivable and payable not included elsewhere, and transactions in arrears.

Sources and methods: The sources of information for trade credits are: quarterly Statistical Form SPB-6A for the assets, and quarterly Statistical Form SPB-6B for trade credits liabilities reported by the non-financial sector. Stocks data on the *Loans* item are received by the Ministry of Finance, the Bulgarian National Bank, the banks and directly by the enterprises that have lent to or borrowed from abroad.

E. Reserves and Related Items

According to the fifth edition of the *Balance of Payments Manual*, *reserve assets* consist of those external assets that are readily available to and controlled by monetary authorities for direct financing of payments imbalances and/or for other purposes. The reserve assets comprise monetary gold, SDRs, the reserve position in the IMF, foreign exchange assets (consisting of currency and deposits and securities) and other claims. Under the provisions of the currency board, the *reserve assets* of the Bulgarian National Bank are equal to the assets of the Issue Department as presented in its balance sheet.

III. Periodicity, Frequency and Timeliness of the International Investment Position Publications

The Bulgarian National Bank compiles and publishes the international investment position of Bulgaria on a quarterly basis. The schedule of the Bulgarian National Bank is to publish the data within three months after the close of the reference period.

IV. Data Revision Policy

The policy on revisions pursued by the Bulgarian National Bank is based on the following principles:

(i) Each publication includes revisions of the data for the previous reporting period.

(ii) When on-going changes are made due to additional information collected, as well as resulting from elimination of errors, the Bulgarian National Bank timely informs the users through monthly press releases.

(iii) When significant revisions are made due to changes in the methodology for reporting of certain IIP components or other reasons, the Bulgarian National Bank publishes in advance information on the changes to facilitate data users. With the revisions publication, users are timely acquainted with the revised data on relevant items.

V. Data Dissemination

The Bulgarian National Bank disseminates quarterly international investment position data on its website: http://www.bnb.bg.

Data are also published in the Bulgarian National Bank *Monthly Bulletin*.

Data on the international investment position of Bulgaria are included in the semi-annual and in the annual official reports of the Bulgarian National Bank.

VI. Contacts

If you have any questions on the methodology applied by the Bulgarian National Bank or on the balance of payments data published, please do not hesitate to send them to Mr Emil Dimitrov, Director, Statistics Directorate, *via* e-mail at *Dimitrov.E@bnbank.org*, to Liliana El Haddad, Head of the Balance of Payments and External Debt Division, *via* e-mail at *Elhaddad.L@bnbank.org*, or by mail to the following address:

International Reserves and Foreign Currency Liquidity Data Template of Bulgaria

The Bulgarian National Bank is in charge of the compilation of the *International Reserves and Foreign Currency Liquidity Data Template (the Data Template) of Bulgaria*. These data are processed by the Balance of Payments and External Debt Division within the Statistics Directorate of the BNB. Data on gross official reserve assets and international reserves and foreign currency liquidity are presented by the BNB in millions of EUR.

I. Concepts of the Data Template

The data template on international reserves and foreign currency liquidity is compiled in accordance with the IMF's *International Reserves and Foreign Currency Liquidity Guidelines for a Data Template* (IMF, 2001) as well as with the Fifth Edition of the *Balance of Payments Manual* (IMF, 1993). The framework of the Data Template is built on two related concepts: (1) International Reserves (Reserve Assets) and (2) Foreign Currency Liquidity. The Fifth Edition of the *Balance of Payments Manual* sets forth the definition of the country's international reserves: 'those external assets that are readily available to and controlled by monetary authorities for direct financing of pay-

ment imbalances, for indirectly regulating the magnitudes of such imbalances through intervention in exchange markets to affect the currency exchange rate, and/or for other purposes' (paragraph 424). The concept of the foreign currency liquidity data template is broader than that of international reserves. It refers to the amount of foreign exchange resources that is readily available to the authorities to meet a sudden increase in the demand for foreign exchange and the potential (net) drains on foreign currency resources resulting from short-term foreign currency liabilities and off-balance-sheet activities of the authorities.

II. Key Features of the Data Template

A. Institutional Coverage

In accordance with the currency board arrangement, the Bulgarian National Bank is the only institution holding official international reserves in Bulgaria. The template covers the Bulgarian National Bank as monetary authorities which manage and hold the international reserves and the central government (excluding social security funds) which accounts for most of the official foreign currency obligations.

B. Financial Activities Covered

The Data Template covers only instruments in foreign currencies. Foreign assets in non-convertible currencies, as well as all other assets that do not meet reserve assets concept are excluded.

C. Valuation Principles and Conversion

International reserves are revalued daily at market exchange rates. Securities positions are revalued monthly at the market price of the instruments concerned on the last day of the reference month. Gold is revalued daily at the current market price, whichever is lower. Interest is accrued daily and classified under item 1(A). Data are converted into national currency or euro equivalents (the lev is linked to the euro at a fixed exchange rate) on the basis of official exchange rates announced by the Bulgarian National Bank daily. The reserve data template is calculated and revalued monthly.

III. Structure of the Data Template

The Data Template consists of four sections:

(1) Official reserve assets and other foreign currency assets broken down by major components, viz. convertible foreign currency

A. Official reserve assets (securities, currency and deposits); IMF reserve position; SDRs, gold and other (accrued interest).

B. Other foreign currency assets (central government deposits with local banks, gold not included in the official reserves, Brady bonds collateral).

This section covers stocks data. The definition of these data is consistent with the methodology espoused in the Fifth Edition of the IMF's *Balance of Payments Manual*. Under Article 42 of the Law on the Bulgarian National Bank, the BNB compiles the balance of payments of Bulgaria, a major functional category of which are the reserve assets.

The types of foreign assets that are included in the official reserves of the BNB are explicitly defined by Article 28 of the Law on the BNB. The Law on the BNB (Article 49) also stipulates that data on foreign reserves have to be disseminated on a weekly basis.

Other foreign currency assets refer to foreign currency assets of the BNB that are not included in the official reserves, as well as such assets held by the government (excluding social security funds).

Sources: Data on official reserve assets and on other foreign currency assets are based on the accounting records of the BNB. International reserves and foreign currency liquidity template data can be reconciled with the annual reserve assets data shown in the International Investment Position both published on the BNB website (http://www.bnb.bg) as well as with the assets data in the monthly Balance Sheet of the Issue Department and with the BNB Analytical Reporting table both published on the BNB website (http://www.bnb.bg) and in the BNB *Monthly Bulletin*. Data on central government deposits with local banks are provided by banks through Money and Banking Statistics Division within the Statistics Directorate of the BNB.

(2) Predetermined short-term drains on foreign currency assets

This section covers foreign currency flows related to predetermined payments of principal and interest associated with loans and securities up to and including one year. Unlike data on external debt and international investment position which are based on residency concept (i.e. only liabilities to non-residents irrespective of currencies involved should be included), data included in Section II relate only to liabilities in foreign currencies irrespective of the residency of the holder.

Source: Data on predetermined short-term drains on foreign currency assets are based on Ministry of Finance projections on principal and interest payments on loans and securities denominated in foreign currencies in the 12-month period ahead.

(3) Contingent short-term drains on foreign currency assets

Section III covers contingent foreign currency flows which refer to contractual obligations that might give rise to potential future outflows or inflows of foreign currency assets. By definition, contingent drains cover off-balance-sheet activities.

Source: Ministry of Finance.

(4) Memo items

This section covers stocks and flows not disclosed in the previous sections but relevant for assessing the foreign currency official reserves and liquidity positions (financial instruments denominated in foreign currency and settled in domestic currency) as well as the currency composition of official reserves.

Sources: the Ministry of Finance provides monthly stock data on securities issued for the structural reform (ZUNK) which are denominated in foreign currency and settled in levs. Data on the currency composition of official reserves are provided by the BNB.

IV. Periodicity and Timeliness of the Data Template Publications

The Bulgarian National Bank compiles and publishes International Reserves and Foreign Currency Liquidity Data Template of Bulgaria on a monthly basis within three weeks after the close of the reference period.

V. Data Revision Policy

Revisions to published official reserve assets and international reserves and foreign currency liquidity data are not a common practice. Data on official reserve assets are based on the accounting records of the BNB and are revised only if the accounting records are revised. The policy on revisions pursued by the Bulgarian National Bank is based on the following principles:

(i) As for the International Reserves and Foreign Currency Liquidity data, each monthly publication may include revisions of the data for the previous month.

(ii) When on-going changes are made due to additional information collected, as well as resulting from elimination of errors, the Bulgarian National Bank timely informs the users through monthly press releases, as well as through the notes at the end of the Data Template table.

VI. Data Dissemination

The Bulgarian National Bank disseminates the monthly official reserve assets and international reserves and foreign currency liquidity data on its website: http://www.bnb.bg.

Data are also published in the Bulgarian National Bank *Monthly Bulletin*.

Data on the official reserve assets and international reserves and foreign currency liquidity of Bulgaria are included in the semi-annual and in the annual official reports of the Bulgarian National Bank.

VII. Contacts

If you have any questions on the methodology applied by the Bulgarian National Bank or on the official reserve assets and international reserves and foreign currency liquidity data published, please do not hesitate to send them to Emil Dimitrov, Director of the Statistics Directorate, *via* e-mail at *Dimitrov.E@bnbank.org*, and Liliana El Haddad, Head of the Balance of Payments and External Debt Division, *via* e-mail at *Elhaddad.L@bnbank.org*, or by mail to the following address:

Bulgarian National Bank
Balance of Payments and External Debt Division
1, Knyaz Alexander I Square
1000 Sofia, Bulgaria

3 Fiscal Sector

Information on the fiscal sector is classified into three categories:
(a) government sector operations (government sector);
(b) government operations (republican budget);
(c) domestic government debt.

Fiscal sector includes all ministries, agencies, extra-budgetary funds, individual units of social security and other institutions of the central government, municipalities, as well as enterprises financed and controlled by them.

The consolidated state budget covers data on the government sector and includes the republican budget, the budgets of social security, legal authorities, universities financed by the government, the Bulgarian Academy of Sciences, municipalities, as well as extra-budgetary funds and accounts. The government sector corresponds to the methodology requirements of the European System of Accounts, 1995.

The republican budget includes the central republican budget (the budget of the Ministry of Finance), budgets of other ministries and agencies, regional authorities and the National Audit Office. Together with the budgets of the social security, legal authorities, universities financed by the government, Bulgarian Academy of Sciences and their extra-budgetary accounts it forms the government sub-sector. The institutional coverage of this sub-sector corresponds to the methodology of the European System of Accounts.

4 Real Sector

Tables of the real sector are arranged in the following groups:
(a) macroeconomic indicators (national accounts);
(b) labour market;
(c) price indicators.

Real sector covers a few groups of institutional units – residents on the economic territory of Bulgaria. These include 'non-financial corporations' whose main activity is production and sale of goods and non-financial services for the purpose of making profit; 'non-profit institutions serving households' which provide goods and services free of charge or at economically insignificant prices; 'households' – residents in Bulgaria regardless of their type and amount. Real sector also includes unincorporated production units, as well as those with single-entry accounting owned by local physical persons.

This section of the BNB Monthly Bulletin includes data on:

• *gross domestic product* – by component of final demand (under the method of end-of-use expenditure) and by economic sector (under the production method).

In accordance with the requirements of the European System of Accounts, 1995, holding gains are excluded from GDP data, i.e. changes in its value due to price fluctuations are excluded. Data not reconciled with Supply – Use final tables of the NSI are preliminary. Due to a change in the methodology for calculation of personal consumption of households and exports (imports) of goods and services components, data for the third quarter and the January – September 1999 period are partially comparable with relevant data for 1997, 1998, and the first half of 1999.

• *labour market* – employed under labour contract (public and private sectors), changes in their number (by economic sector), number of unemployed (total, young people, adults) and unemployment rate, average wage of employed (by type of ownership and by economic sector). From early 2001 the NSI publishes monthly data on employment and average wage in the second month following the end of the relevant calendar quarter.

• *consumer price changes* – total and by major commodity and services group.

Resolutions of the BNB Governing Council

4 October Ordinance No. 5 on the Terms and Procedure for Acquistion, Registration, Redemption and Trade in Government Securities was adopted.

Ordinance No. 15 on the Control over Transactions in Government Securities was adopted.
