GROSS EXTERNAL DEBT OF BULGARIA¹

JUNE 2009

Gross External Debt

As of end-June 2009, **Gross External Debt** amounted to EUR 36,925.2 million, increasing by EUR 195.4 million (0.5%) compared to the end of 2008 (EUR 36,729.8 million). As a percent of GDP² the gross external debt was 109%, increasing by 1.3 p.p. compared to end-2008 (107.7% of GDP). The debt increase was mainly due to the intercompany lending (an increase of EUR 551.5 million, 4.3%). Compared to end-June 2008 (EUR 33,608.4 million) the gross external debt increased by EUR 3,316.8 million.

Excluding valuation changes, gross external debt as of end-June 2009 compared to end-2008 increased by 0.5% (EUR 201.4 million) against a reported nominal increase of 0.5% (EUR 195.4 million).

Long-term liabilities were EUR 23,752.7 million (64.3% of total external debt), increasing by EUR 311.1 million compared to end-2008 (EUR 23,441.6 million, 63.8% of total external debt). Compared to end-June 2008 (EUR 21,524.6 million, 64% of total external debt) they increased by EUR 2,228.1 million (10.4%).

Short-term liabilities amounted to EUR 13,172.5 million (38.9% of GDP), decreasing by EUR 115.7 million compared to end-2008 (EUR 13,288.2 million, 38.9% of GDP). Short-term debt of *Banks*' decreased by EUR 184 million (of which EUR 221.2 million *deposits of non-residents*), while the short-term liabilities of *Other Sectors* increased by EUR 68.4 million (*short-term financial loans* increase). Compared to end-June 2008 (EUR 12,083.8 million) short-term debt increased by EUR 1,088.7 million (9%).

General Government debt amounted to EUR 2,761.6 million (8.2% of GDP), increasing compared to end-2008 by EUR 41.7 million (1.5%)³. Compared to end-June 2008 (EUR 2,715 million) the sector's debt increased by EUR 46.6 million (1.7%). Compared to end-May 2009 the sector's debt increased by EUR 132.2 million (5% of GDP), mainly due to a financial loan received from the World bank.

Banks' debt amounted to EUR 8,397.8 million (24.8% of GDP), decreasing by EUR 679.3 million (7.5%) compared to end-2008 (EUR 9,077.1 million, 26.6% of GDP). Compared to end-June 2008 (EUR 7,884.4 million) the sector's debt increased by EUR 513.4 million (6.5%).

As of end-June 2009 **deposits of non-residents** in local banks amounted to EUR 5,753.4 million, and the decrease against end-2008 amounted to EUR 221.2 million (3.7%).

Other Sectors' debt⁴ was EUR 12,330.6 million (36.4% of GDP), increasing by EUR 281.4 million (2.3%) compared to end-2008 (EUR 12,049.2 million, 35.3% of GDP). Compared to end-June 2008 (EUR 11,182.6 million) it increased by EUR 1,148.1 million (10.3%).

As of end June 2009⁵, 63.6% (EUR 6,565.7 million) of the financial loans of *Other Sectors* were liabilities of enterprises with foreign direct investment, against 61.8% (EUR 6,156 million) at the end of

¹ The analysis is based on the table *Gross External Debt by Sectors*. Preliminary data for 2008 and 2009. The data for May 2009 are revised. In accordance with the methodological notes with the July 2009 report the data for 2006 – 2008 and January – June 2009 are to be revised.

² GDP for 2008 (preliminary NSI data) - EUR 34,117.5 million and GDP for 2009 (preliminary BNB estimates) at EUR 33,883 million.

³ Following the resident concept.

⁴ Due to quarterly reporting of firms April – June 2009 trade credits data are subject to revisions.

⁵ Data are presented on a quarterly basis.

2008. 114.6% of the total increase of *Other Sectors'* financial loans was due to the increase of financial credits of enterprises with foreign direct investment.

Intercompany Lending⁴ increased by EUR 551.5 million (4.3%) and amounted to EUR 13,435.1 million (39.7% of GDP) as of end-June 2009 against EUR 12,883.6 million (37.8% of GDP) at the end of 2008. Compared to end-June 2008 (EUR 11,826.4 million) it increased by EUR 1,608.8 million (13.6%).

Gross External Debt Currency Structure

As of end June 2009 86.2% of the gross external debt was denominated in EUR (compared to 85.6% as of end 2008) and 6.4% in USD (compared to 6.8% as of end 2008).

Disbursements⁶

In January – June 2009 **loans and deposits received** from non-residents amounted to EUR 2,763.1 million (8.2% of GDP) against EUR 7,257.5 million (21.3% of GDP) in the same period in 2008.

General Government received EUR 333.7 million, which was EUR 180.5 million (117.9%) more compared to the amount received in January – June 2008 (EUR 153.1 million)³.

Banks received loans and deposits amounting to EUR 742.9 million (2.2% of GDP), which was EUR 2,487.7 million (77%) less compared to those received in January – June 2008 (EUR 3,230.7 million, 9.5% of GDP).

Other Sectors received credits amounting to EUR 564 million (1.7% of GDP) or EUR 1,830.5 million (76.4%) less compared to January – June 2008 (EUR 2,394.6 million, 7% of GDP).

Intercompany lending amounted to EUR 1,122.5 million (3.3% of GDP), and it decreased by EUR 356.6 million (24.1%) compared to January – June 2008 (EUR 1,479.1 million, 4.3% of GDP).

In January – June 2009 **the declared new loans** amounted to EUR 2,405.5 million (2,407 loans), which was a decrease of EUR 1,757.9 million (632 loans less) relative to the same period in 2008 (EUR 4,163.4 million, 3,039 loans). In comparison with January – June 2008, the stock of the declared new intercompany loans decreased by EUR 198.8 million (9.4%), reaching EUR 1,905.9 million and the stock of other loans decreased by EUR 1,559 million (75.7%) and amounted to EUR 499.7 million.

In January – June 2009 **the weighted average interest rate on the declared new loans** in USD was 6.6% and was by 0.3 p.p. higher than in the same period of 2008. In January – June 2009 the average weighted interest rate on the declared new loans in EUR was 3%, marking a decrease of 2.1 p.p. compared to the same period of 2008.

Gross External Debt Service⁷

In January – June 2009 **gross external debt service** amounted to EUR 3,431.9 million (10.1% of GDP) against EUR 3,780.2 million (11.1% of GDP) in the same period in 2008.

In January – June 2009 **General Government external debt service** amounted to EUR 394.5 million (1.2% of GDP), against EUR 603 million (1.8% of GDP) in the same period in 2008.

In January – June 2009 **Banks' external debt service** amounted to EUR 1,484.4 million (4.4% of GDP), against EUR 1,162.4 million (3.4% of GDP) in the same period in 2008.

⁶ Excluding revolving and trade credits.

⁷ Excluding payments on revolving and trade credits.

In January – June 2009 **Other Sectors' external debt service** amounted to EUR 611.3 million, against EUR 1,353.7 million in the same period in 2008.

For the reporting period of 2009 **service of Intercompany lending** amounted to EUR 941.8 million, against EUR 661.1 million in the same period in 2008.

Net Flow⁸

Total net flow in January – June 2009 was negative, amounting to EUR 305.4 million (0.9% of GDP), against a positive one amounting to EUR 3,850.2 million (11.3% of GDP) in the same period in 2008.

General Government's net flow was positive and amounted to EUR 38.4 million (0.1% of GDP), against a negative one amounting to EUR 338.6 million (1% of GDP) in January – June 2008.

Sector Banks had a negative net flow amounting to EUR 698 million (2.1% of GDP) against a positive flow amounting to EUR 2,101 million (6.2% of GDP) in January – June 2008.

Other Sectors reported a positive net flow of EUR 68.4 million against a positive flow of EUR 1,182.5 million (3.5% of GDP) in January – June 2008.

The net flow on item Direct Investment: Intercompany Lending was positive, amounting to EUR 285.7 million (0.8% of GDP), against a positive one amounting to EUR 905.3 million (2.7% of GDP) in January – June 2008.

Net External Debt

As of end-June 2009 **net external debt** increased by EUR 944.9 million (4.9%) compared to end-2008, reaching EUR 20,053.7 million. The increase was due to the decrease (by EUR 749.4 million) of gross external assets and the increase of gross external debt (by EUR 195.4 million). As of end-June 2009 as a percent of GDP net external debt amounted to 59.2%, increasing by 3.2 p.p. compared to end-2008 (56%).

As of end-June 2008 net external debt amounted to EUR 15,822.8 million, 46.4% of GDP.

⁸ The difference between total disbursements and total principal payments for the reporting period.

Dynamics of the Declared New Loans¹, January – June 2009

In January – June 2009 the declared new loans amounted to EUR 2,405.5 million (2,407 loans), which was a decrease of EUR 1,757.9 million (632 loans less) relative to the same period in 2008 (EUR 4,163.4 million, 3,039 loans). From the declared new loans 1,719 were *intercompany*, and 688 were *other loans*. In comparison with January – June 2008, the stock of the declared new *intercompany loans* decreased by EUR 198.8 million (9.4%), reaching EUR 1,905.9 million and the stock of *other loans* decreased by EUR 1,559 million (75.7%) and amounted to EUR 499.7 million.

- **Currency Structure**

In January – June 2009 the greatest share was formed by the loans in EUR – 97.2% of the stock of declared loans, against 92.6% in the same period of 2008 (Table 1). The share of loans in USD amounted to 2.7%, against 6.8% in January – June 2008.

I.-VI. 2009	3.7%	2.9%	6.9%	3.5%	6.6%	3.0%

In January – June 2009 the average weighted interest rate on the declared new loans in EUR was 3%, marking a decrease of 2.1 p.p. compared to the same period of 2008. For *intercompany loans* (in EUR) the interest rate level decreased by 2.1 p.p. to 2.9%, and for *other loans* (in EUR) it decreased by 1.7 p.p. to 3.5%.

In January – June 2009 the average weighted interest rate on new long-term loans in USD from abroad was by 2.4 p.p. lower, in EUR – by 5 p.p. lower than the weighted average interest rates

² The monthly interest rate data are strongly influenced by the terms of individual enterprise loans.

on long-term loans in USD (8.8%) and in EUR (9%), granted by local commercial banks to enterprises³. In the same period of 2008 the differences between the interest rates in the country and abroad for long-term loans in USD was negative, amounting to 2.4 p.p., and in EUR was positive, amounting to 3.2 p.p.

- **Weighted Average Maturity**

The maturity of the declared new loans in January – June 2009 reached 2 years and 5 months, against 3 years and 4 months in the same period of 2008. The weighted average maturity of the *intercompany loans* reached 1 year and 8 months in January – June 2009, against 2 years and 5 months in the same period of 2008, and of *other loans* reached 5 years and 2 months in the reporting period, against 4 years and 3 months in January – June 2008 (Table 4).

WEIGHTED AVERAGE MATURITY

¹ Preliminary data. The Euro equivalent is calculated using the monthly e.o.p. exchange rates of the respective foreign currencies.

² Data source: The Register of Government and Government-guaranteed Debt of the Ministry of Finance. Preliminary data for June 2009 as of July 28, 2009.

³ Debt liabilities of the public companies and the government guaranteed debt are excluded.

⁴ Brady bonds, Eurobonds, Global bonds and government securities (denominated in BGN and in foreign currency), purchased by non-residents are included.

⁵ In accordance with the residence concept the bonds, issued by residents in the international markets and held by residents are subtracted from the external debt.

⁶ Data source: banks (incl. private and state banks). Deposits related to contingent liabilities are excluded.

⁷ Data source: Local individuals and legal entities (incl. state owned companies and government guaranteed loans from the Register of Government and Government-guaranteed Debt of the Ministry of Finance). Intercompany loans are excluded. Data comprise only those credits (incl. revolving and intercompany lending) that are declared before the BNB and for which the BNB has received information.

⁸ Due to the reconciliation of the received data on portfolio investment of *Other Sectors*, the data are to be revised (Source: Central Depository AD).

⁹ In accordance with the *EXTERNAL DEBT STATISTICS, Guide for Compilers and Users, IMF 2003 p.3.14* and p. 7.5 liabilities related to Direct investment are included in the long-term debt.

¹⁰ The stock of the revolving credits, trade credits and the credits, payable on demand is included in the gross external debt stock of the country.

¹¹ Due to the quarterly reporting of firms the data for 2009 are subject to revisions.

¹ Preliminary data. The Euro equivalent is calculated using the monthly e.o.p. exchange rates of the respective foreign currencies.

² Data source: The Register of Government and Government-guaranteed Debt of the Ministry of Finance. Preliminary data for June 2009 as of July 28, 2009.

³ Debt liabilities of the public companies and the government guaranteed debt are excluded.

⁴ Brady bonds, Eurobonds, Global bonds and government securities (denominated in BGN and in foreign currency), purchased by non-residents are included.

⁵ In accordance with the residence concept the bonds, issued by residents in the international markets and held by residents are subtracted from the external debt.

⁶ Data source: banks (incl. private and state banks). Deposits related to contingent liabilities are excluded.

⁷ Data source: Local individuals and legal entities (incl. state owned companies and government guaranteed loans from the Register of Government and Government-guaranteed Debt of the Ministry of Finance.). Intercompany loans are excluded. Data comprise only those credits (incl. revolving and intercompany lending) that are declared before the BNB and for which the BNB has received information.

⁸ Due to the reconciliation of the received data on portfolio investment of Other Sectors, the data are to be revised (Source: Central Depository AD).

⁹ In accordance with the EXTERNAL DEBT STATISTICS. Guide for Compilers and Users, IMF 2003 p3.14 and p. 7.5 liabilities related to Direct investment are included in the long-term debt.

¹⁰ Due to the quarterly reporting of firms the data for 2009 are subject to revisions.

¹¹ To date the publicly guaranteed external debt encompasses the government-guaranteed external debt.

¹ Preliminary data. The Euro equivalent is calculated using the monthly e.o.p. exchange rates of the respective foreign currencies.

² Brady bonds, Eurobonds and government securities (denominated in BGN and in foreign currency) as well as banks' and corporate sector securities, purchased by non-residents are included. In accordance with the residence concept the Brady bonds, Eurobonds and Global bonds held by residents are subtracted.

³ Due to the reconciliation of the received data on portfolio investment of *Other Sectors*, the data are to be revised (Source: Central Depository AD).

⁴ The item includes government and government-guaranteed credits and loans of enterprises from the public and private sector. Intercompany loans are not included.

⁵ Data source for the government and government-guaranteed debt: The Register of Government and Government-guaranteed Debt of the Ministry of Finance - preliminary data for June 2009 as of July 28, 2009. Data source for nonguaranteed debt: BNB - preliminary data for June 2009 as of July 28, 2009. Data comprise only those credits that are declared before the BNB and for which the BNB has received information.

⁶ Data source: banks (incl. private and state banks). Deposits related to contingent liabilities are excluded.

¹ Preliminary data. The Euro equivalent is calculated using the monthly e.o.p. exchange rates of the respective foreign currencies. Quarterly data are published.

² Data source: The Register of Government and Government-guaranteed Debt of the Ministry of Finance. Preliminary data for June 2009 as of July 28, 2009. Debt liabilities of the public companies and the government guaranteed debt are excluded.

³ Data source: banks (incl. private and state banks). Deposits related to contingent liabilities are excluded.

⁴ Data source: Local individuals and legal entities (incl. state owned companies and government guaranteed loans from the Register of Government and Government-guaranteed Debt of the MoF). Intercompany loans are excluded. Data comprise only those credits that are declared before the BNB and for which the BNB has received information.

⁵ Due to the fact that direct investment liabilities do not fall naturally into this presentation totals are shown for Direct investment: Intercompany lending. External Debt Statistics: Guide for Compilers and Users, Chapter 7, para 7.43.

⁶ Brady bonds, Eurobonds, Global bonds and government securities (denominated in BGN and in foreign currency), purchased by non-residents as well as debt securities issued by banks and local companies and held by non-residents are included.

Due to the reconciliation of the received data on portfolio investment of Other Sectors, the data are to be revised (Source: Central Depository AD).

Trade Credits ^{9,10}	114.5	346.0	0.0	0.0	-346.0

¹ Actual disbursements. Preliminary data. The Euro equivalent is calculated using the monthly average exchange rates of the respective foreign currencies.

² Change for the period January - June 2009 against January - June 2008.

³ Data source: The Register of Government and Government-guaranteed Debt of the Ministry of Finance. Preliminary data for June 2009 as of July 28, 2009.

Disbursements related to debt liabilities of the public companies and the government guaranteed debt are excluded.

⁴ In accordance with the residence concept the net decrease of the stock of Brady bonds, Eurobonds and Global bonds held by residents represents net increase of the liabilities to nonresidents and is reflected with a positive sign.

⁵ Data source: banks.

⁶ Deposits connected with contingent liabilities are not included.

⁷ Data comprise disbursements on those credits (excl. revolving and intercompany lending) that are declared before the BNB and for which the BNB has received information as well as disbursements on government guaranteed loans (source: The Register of Government and Government-guaranteed Debt of the Ministry of Finance. Preliminary data for June 2009 as of July 28, 2009).

⁸ In accordance with the *EXTERNAL DEBT STATISTICS, Guide for Compilers and Users, IMF 2003 p. 3.14 and p. 7.5* disbursements related to Direct investment are included in the long-term debt.

⁹ Not included in table Disbursements by Institutional Sector.

¹⁰ The net increase in the stock of the trade credits in the reporting month is reported in the Disbursements tables (tables 11 and 12), while the net decrease - in the Debt Service tables (tables 13 and 14).

GROSS EXTERNAL DEBT (I+II+III+IV+V)	2179.5	7257.5	585.1	2763.1	-4494.3

Memo items:

Revolving credits ⁸	565.6	2700.1	402.2	1557.1	-1143.0
Trade Credits ⁸	114.5	346.0	0.0	0.0	-346.0

¹ Actual disbursements. Preliminary data. The Euro equivalent is calculated using the monthly average exchange rates of the respective foreign currencies.

² Change for the period January - June 2009 against January - June 2008.

³ Brady bonds, Eurobonds, Global bonds and government securities (denominated in BGN and in foreign currency) as well as banks' and corporate sector securities, purchased by non-residents are included. In accordance with the residence concept the Brady bonds, Eurobonds and Global bonds held by residents are subtracted. Due to the reconciliation of the received data on portfolio investment of *Other Sectors*, the data are to be revised (Source: Central Depository AD).

⁴ The change of bonds ownership from residents to non-residents constitutes an increase of liabilities towards non-residents and is reported with a plus sign.

⁵ The item includes government and government guaranteed credits and loans of enterprises from the public and private sector. Intercompany loans are not included.

⁶ Data source for government and government guaranteed debt: The Register of Government and Government-guaranteed Debt of the Ministry of Finance.

Preliminary data for June 2009 as of July 28, 2009.

Data source for non-guaranteed debt: BNB preliminary data for June 2009 as of July 28, 2009. Data comprise only those credits (incl. revolving and intercompany lending) that are declared before the BNB and for which the BNB has received information.

⁷ Data source: banks (incl. private and state banks). Deposits related to contingent liabilities are excluded.

⁸ Not included in table *Disbursements* by Institutional Sector (table 11).

¹ Actual payments. Preliminary data. The Euro equivalent is calculated using the monthly average exchange rates of the respective foreign currencies.

² Change for the period January - June 2009 against January - June 2008.

³ Data source: The Register of Government and Government-guaranteed Debt of the Ministry of Finance. Preliminary data for June 2009 as of July 28, 2009.

Payments related to debt liabilities of the public companies and the government guaranteed debt are excluded.

⁴ In accordance with the residence concept external debt payments are reduced with the payments of securities, held by residents and are increased with the securities (issued from residents in the international financial markets), which changed owners from non-residents to residents.

⁵ Data source: banks. Deposits connected with contingent liabilities are not included.

⁶ Data comprise principal and interest payments on those credits (excl. intercompany lending) that are declared before the EMB and for which the EMB has received information as well as service on government guaranteed loans.

⁷ In accordance with the EXTERNAL DEBT STATISTICS. Guide for Compilers and Users. IMF 2003 p.3.14 and p. 7.5 debt service related to Direct investment are included in the long-term debt.

⁸ Not included in table Debt Service by Institutional Sector.

⁹ The net increase in the stock of the trade credits in the reporting month is reported in the Disbursements tables (table 11 and 12), while the net decrease - in the Debt Service tables (tables 13 and 14).

³ Brady bonds, Eurobonds, Global bonds and government securities (denominated in BGN and in foreign currency) as well as banks' and corporate sector securities purchased by non-residents are included. In accordance with the residence concept the Brady bonds, Eurobonds and Global bonds held by residents are subtracted. Due to the reconciliation of the received data on portfolio investment of Other Sectors, the data are to be revised (Source: Central Depository AD).

⁴ In accordance with the residence concept external debt payments are reduced with the payments of securities, held by residents and are increased with the securities (issued from residents in the international financial markets), which changed owners from non-residents to residents.

⁵ The item includes government and government guaranteed credits and loans of enterprises from the public and private sector. Intercompany loans are not included. ⁶ Data source for government and government guaranteed debt: The Register of Government and Government-guaranteed Debt of the Ministry of Finance. Preliminary data for June 2009 as of July 28, 2009.

⁷ Data source: banks (incl. private and state banks). Deposits related to contingent liabilities are excluded.

⁸ Not included in table Debt Service by Institutional Sector. Payments on banks' revolving credits are not included.

⁹ The net increase in the stock of the trade credits in the reporting month is reported in the Disbursements tables (tables 11 and 12), while the net decrease - in the Debt Service tables (table 13 and 14).

METHODOLOGICAL NOTES ON THE COMPILATION OF THE GROSS EXTERNAL DEBT OF BULGARIA¹

For the compilation of the Gross External Debt, the Bulgarian National Bank (BNB) follows the international standards and requirements set in the "*External Debt Statistics: Guide for Compilers and Users, 2003*"² and in the "*Balance of Payments Manual*", IMF, 5-th edition, 1993. That ensures international compatibility of the data on one hand, and on the other hand - consistency between the external debt statistics and the balance of payments, international investment position and national accounts. The data on the gross external debt are an important source of information for given items in the balance of payments and in the international investment position.

The BNB compiles and disseminates monthly statistical data on the gross external debt presented by institutional sectors.

Publications comprise monthly data on (1) gross external debt stock (2) gross external debt service and (3) disbursements. Additional analytical external debt data by creditors is disseminated quarterly.

I. ACCOUNTING PRINCIPLES AND CONVENTIONS

When compiling the debt statistics, the BNB follows the international definition of gross external debt - "Gross external debt, at any given time, is the outstanding amount of those actual current, and not contingent, liabilities that require payment(s) of principal and/or interest by the debtor at some point(s) in the future and that are owed to non-residents by residents of an economy."³

The main criterion for a liability to be included in the gross external debt of the country is that it is issued by a resident and is owed to a non-resident⁴, regardless of whether it is issued on domestic or international, money or capital markets. The same principle is applied for transactions - only those between residents and non-residents are recorded. In the debt tables the BNB records the amount of tranches actually disbursed, not contingent.

The stock of the liabilities is recorded at nominal, not market value even in the case when they are in the form of tradable securities. The Gross External Debt of Bulgaria is reported in EUR.

The distinction between short-term and long-term debt is based on the original, not residual maturity of the liability. The long-term debt⁵ includes all liabilities with original maturity of more than a year as well as liabilities related to direct investment, and the short-term - those with original maturity of one year or less. All arrears of principals and interests are recorded as short-term debt.

¹ Last updated: February 24th, 2009.

² *External Debt Statistics: Guide for Compilers and Users*, IMF, 2003, (Bank for International Settlements, The Commonwealth Secretariat, Eurostat, International Monetary Fund, Organisation for Economic Co-operation and Development, The Paris Club Secretariat, The United Nations Conference on Trade and Development, the World Bank)

³ *External Debt Statistics: Guide for Compilers and Users*, Chapter Two, para 2.3.

⁴ For a definition of resident and nonresident see the "*Balance of Payments Manual*", IMF, 5-th edition, para 57-58.

⁵ In compliance with the recommendations of EXTERNAL DEBT STATISTICS, Guide for Compilers and Users, IMF 2003, p.3.14 and 7.5 direct investment liabilities are included in the long-term external debt.

II. GROSS EXTERNAL DEBT COMPONENTS

A. By institutional sectors:

The structure of the gross external debt table by institutional sectors is in compliance with the requirements of the "*External Debt Statistics: Guide for Compilers and Users, 2003*"⁶, prepared by several international organizations and published by the IMF.

The main components of the gross external debt tables classified by sectors are General Government, Monetary Authorities, Banks and Other Sectors. In accordance with the international statistical standards, debt liabilities related to direct investment (intercompany lending) are presented separately. The classification by institutional sectors is in compliance with the Fifth edition of the *Balance of Payments Manual (1993)*. Within the sectors the external debt liabilities are classified by maturity – short-term and long-term and by instruments.

General Government

General Government debt includes: (1) central government debt, (2) local government debt, (3) debt of social security funds and (4) debt of all nonmarket nonprofit institutions that are controlled and mainly financed by government units. Public corporations and unincorporated enterprises that function as if they were corporations (so called quasi-corporations) are explicitly excluded from the general government sector and are allocated to banks or other sectors as appropriate. The debt liabilities of the *General Government* sector are long-term and are classified by instruments – *Loans* and *Bonds and Notes*. Liabilities for which no issue of tradable securities is involved are recorded under *Loans*. Loans received by the central government from the IMF are also recorded under *Loans*. The central government liabilities on securities issued on the international markets are recorded under *Bonds and Notes*, as the item comprises the entire stock of the issue. The part of the issue, held by residents at the end of the reporting period, is recorded with a negative sign in item *Bonds and Notes, held by residents*. The net decrease in the stock of Brady bonds, Eurobonds and Global bonds, held by residents corresponds to a net increase in the holdings of non-residents and is reported in the Disbursements table, and vice versa – in the tables on external debt service, as a principal payment under the *Bonds and Notes, held by residents* sub-item.

The government securities, issued by the government on the domestic market and purchased by non-residents, are also recorded under item *Bonds and Notes*.

Data sources: The main source of data is the *Register of Government and Government-guaranteed Debt* of the Ministry of Finance (before 31.12.2002 the source of that data was the *System for Debt Registration, Service and Management* of the Ministry of Finance and the Bulgarian National Bank). Other sources are Government and Government Guaranteed Debts Depository Directorate with the BNB, the Central Depository and the banks.

⁶ *External Debt Statistics: Guide for Compilers and Users*, IMF, 2003 (Bank for International Settlements, The Commonwealth Secretariat, Eurostat, International Monetary Fund, Organisation for Economic Co-operation and Development, The Paris Club Secretariat, The United Nations Conference on Trade and Development, the World Bank)

Monetary Authorities

In accordance with the international methodology on external debt statistics included herein are the external liabilities of the BNB. The data is derived from the *Register of Government and Government-guaranteed Debt* of the Ministry of Finance.

Banks

Short-term liabilities of the banks include short-term loans, non-residents' deposits with domestic banks as well as other payables to non-residents. In sub-item *Deposits* are included deposits in foreign currencies and in leva of non-residents with domestic banks. The net increase in deposits in the banking system is reported in the Disbursements table, and the net deposit withdrawal – in the tables on external debt service, as a principal payment under the *Deposits* sub-item. In accordance with the *External Debt Statistics: Guide for Compilers and Users*, deposits related to contingent liabilities are excluded⁷. Long-term liabilities include loans and bonds and notes issued by the banks and held by non-residents.

Data sources: Data on the amount and transactions on external loans is received monthly directly from the banks through a statistical form on their external liabilities. Money and Banking Statistics Division with the Statistics Directorate of the BNB provides monthly data for the *Deposits* and *Other liabilities* items. Source for the data on *Bonds and Notes* item is the Central Depository.

Other Sectors

In the *Other sectors* item the debt of private and state-owned non-bank enterprises (incl. Government guaranteed debt) as well as external liabilities of the households are recorded.

Short-term liabilities of the *Other sectors* include short-term loans, trade credits as well as other payables to non-residents. Long-term liabilities include loans and bonds and notes issued by the companies and held by non-residents.

Data sources: Data on financial loans is collected through the statistical *Form SPB-4 Report on the Financial Credit Liabilities of Residents to Non-residents*, that covers data on the stock and the various types of transactions on the credits. As the Foreign Exchange Law envisages quarterly reporting of these liabilities, for the first two months of each quarter the BNB publishes estimations on the non-bank enterprises, based on the debt service schedules provided by companies on the loans extended to them and on estimations. Under the *Trade credits* sub-item are recorded the respective liabilities of residents to non-residents⁸ excluding trade credit liabilities towards foreign direct investors. Such data are collected from the BNB through *Form SPB-6B Report on the liabilities of local bodies to non-residents*. As the Foreign Exchange Law envisages quarterly reporting of these liabilities, for the first two months of each quarter the BNB publishes estimations for the stock of trade credits. Data on liabilities of the households is collected through the annual statistical *Form SPB-8 Report on the Assets and Liabilities of Resident Physical Persons to Non-residents*.

⁷ "External Debt Statistics: Guide for Compilers and Users, IMF 2003, para 2.10

⁸ For a definition of trade credits, see "Balance of Payments Manual", IMF, 5-th edition, 1993, chapter XX, para. 414, as well as "External Debt statistics: Guide for Compilers and Users", Chapter Three, para.133.

Direct investment: Intercompany lending

In accordance with the international methodology on external debt statistics a distinction is made between liabilities owed to direct investors⁹ (*Intecompany Lending*) and such owed to other creditors. Liabilities related to direct investment relationship are separately identified (equity liabilities arising from direct investment i.e. equity capital and reinvested earnings except nonparticipating, preferred shares are excluded from external debt). Liabilities related to direct investment are treated as a long-term debt.

B. By creditors

In accordance with the structure recommended by the *External Debt Statistics: Guide for Compilers and Users* quarterly external debt stock tables by creditor sectors are prepared and published.

C. Public and Publicly Guaranteed External Debt and Private Non-Guaranteed External Debt

In accordance with para. 5.5-5.6 of the *External Debt Statistics: Guide for Compilers and Users, IMF 2003*, the public and publicly guaranteed external debt comprises of the debt of sector General Government, sector Monetary Authorities, the public banks, the public non-financial enterprises, as well as of the government guaranteed debt of the private sector. The private non-guaranteed external debt comprises of the banks' and non-financial enterprises' debt, which is not included in the public and publicly guaranteed external debt. The data are monthly.

III. PERIODICITY, FREQUENCY AND TIMELINESS OF THE GROSS EXTERNAL DEBT PUBLICATIONS

The Bulgarian National Bank compiles and publishes data on the stock of the gross external debt of the country, the debt service payments and the disbursements on a monthly basis. The external sector debt indicators, including external debt indicators, are also disseminated monthly.

The Bulgarian National Bank publishes the data according to its advance release calendar. In the case of a change, the BNB informs the users on the new release date at least a week before the advance date.

IV. DATA REVISION POLICY

The data revisions policy of the Bulgarian National Bank is based on the following principles:

(i) Each monthly publication includes revisions of the data for the previous three months, and each quarterly publication includes revisions of the monthly data for the whole current year.

(ii) When on-going changes are made due to additional information collected, as well as resulting from elimination of errors, the Bulgarian National Bank timely informs the users through the monthly press releases, as well as through the notes at the end of the external debt tables.

⁹ The BNB follows the international definition of direct investment according to which the acquisition of 10% or more of the voting power in the investment enterprise is considered to establish a direct investment relationship.

(iii) When significant revisions are made due to changes in the methodology for reporting of certain external debt components or for other reasons, the Bulgarian National Bank publishes in advance information on the changes, in order to facilitate the users of the data.

V. DATA DISSEMINATION

The Bulgarian National Bank publishes the monthly gross external debt data on the web site of the Bulgarian National Bank – <http://www.bnb.bg>. The data are published also in the BNB Monthly Bulletin and in the semi-annual and in the annual official reports of the Bulgarian National Bank. Data are simultaneously released to all interested parties.

VI. CONTACTS

If you have any questions on the methodology applied by the Bulgarian National Bank or on the gross external debt data published, please do not hesitate to contact Mr. Emil Dimitrov, director of the Statistics Directorate, via e-mail at Dimitrov.E@bnbank.org, and Mrs. Liliana El Haddad, head of the Balance of Payments and External Debt Division, via e-mail at Elhaddad.L@bnbank.org, or by mail to the following address:
