GROSS EXTERNAL DEBT OF BULGARIA¹

October 2013

Gross External Debt

Gross external debt amounted to EUR 36,686 million at end-October 2013, decreasing by EUR 949.4 million (2.5%) from end-2012 (EUR 37,635.4 million). As a percentage of GDP² it equalled 90.3%, dropping by 4.6 p.p. from end-2012 (94.9% of GDP). In comparison with end-October 2012 (EUR 37,182.1 million) the gross external debt decreased by EUR 496.1 million (1.3%).

Long-term liabilities totalled EUR 26,406.3 million (72% of total external debt), decreasing by EUR 785.1 million (2.9%) from end-2012 (EUR 27,191.3 million, 72.2% of total external debt). As a percentage of GDP *long-term external debt* equalled 65%, dropping by 3.5 p.p. from end-2012 (68.5% of GDP). Long-term debt dropped by EUR 1,195.9 million (4.3%) from October 2012 r. (EUR 27,602.1 million).

Short-term liabilities amounted to EUR 10,279.8 million (28% of total external debt), declining by EUR 164.3 million (1.6%) from end-2012 (EUR 10,444.1 million, 27.8% of GDP). As a percentage of GDP short-term external debt equalled 25.3%, dropping by 1 p.p. from end-2012 (26.3% of GDP). Short-term liabilities increased by EUR 699.7 million (7.3%) from October 2012 r. (EUR 9,580 million).

General government debt amounted to EUR 3,068 million (7.6% of GDP), declining by EUR 306.3 million (9.1%) from end-2012 (EUR 3,374.3 million, 8.5% of GDP)³. It decreased by EUR 346.8 million (10.2%) year-on-year (from EUR 3,414.8 million).

Banks' debt amounted to EUR 5,729.8 million (14.1% of GDP), decreasing by EUR 724.7 million (11.2%) against end-2012 (EUR 6,454.5 million, 16.3% of GDP). It grew by EUR 172 million (3.1%) year-on-year (from EUR 5,557.5 million). *Deposits of non-residents* in local banks amounted to EUR 2,849.2 million at end-October 2013, declining by EUR 749.9 million (20.8%) from end-2012, and down by EUR 686.5 million (19.4%) year-on-year.

Other sectors' debt⁴ totalled EUR 11,993.2 million (29.5% of GDP), declining by EUR 163.3 million (1.3%) compared with end-2012 (EUR 12,156.5 million, 30.6% of GDP). It increased by EUR 62.9 million (0.5%) on a year-on-year basis (from EUR 11,930.3 million).

At end-September 2013, 74.4% (EUR 7,802.3 million) of the *loans of other sectors* were liabilities of foreign direct investment enterprises and government guaranteed loans. They decreased by EUR 52.4 million from end-2012 (EUR 7,854.7 million, 74.2%), and on a year-on-year basis dropped by EUR 29.1 million (from EUR 7,831.5 million, 73.8% in October 2012).

¹ The analysis is based on tables *Gross External Debt by Sectors*. Preliminary data. The data for the period April – September 2013 have been revised. In accordance with the methodological notes, the data for October 2013 are to be revised with the November 2013 report.

² GDP amounting to EUR 40,624 million for 2013 (BNB estimate), and EUR 39,667.1 million for 2012 (NSI data as of 6 March, 2013).

³ Following the residence concept.

⁴ Due to the quarterly reporting of firms, the data are subject to revisions.

Intercompany lending⁴ increased by EUR 244.9 million (1.6%) to EUR 15,895 million (39.1% of GDP) at end-October 2013, compared with EUR 15,650.1 million (39.5% of GDP) at end-2012. It dropped by EUR 384.2 million (2.4%) from October 2012 (EUR 16,279.2 million).

Disbursements⁵

The **loans and deposits extended by non-residents** totalled EUR 3,334.2 million (8.2% of GDP) in January – October 2013, compared with EUR 5,791.3 million (14.6% of GDP) in the same period of 2012.

The loans received by **general government** equalled EUR 282.1 million (8.5% of the total amount of disbursements, 0.7% of GDP), decreasing by EUR 913.5 million (76.4%) from January – October 2012 (EUR 1,195.6 million, 3% of GDP)³.

Banks received loans and deposits amounting to EUR 744.7 million (22.3% of the total disbursements, 1.8% of GDP), declining by EUR 815.9 million (52.3%) from January – October 2012 (EUR 1,560.6 million, 3.9% of GDP).

Other sectors received credits totalling EUR 904.9 million (27.1% of the total disbursements, 2.2% of GDP), down by EUR 70.8 million (7.3%) from January – October 2012 (EUR 975.7 million, 2.5% of GDP)⁴.

Intercompany lending amounted to EUR 1,402.6 million (42.1% of the total amount, 3.5% of GDP), decreasing by EUR 656.8 million (31.9%) from January – October 2012 (EUR 2,059.4 million, 5.2% of GDP)⁴.

The **declared new loans received from non-residents** totalled EUR 3,362.3 million (1,844 loans) in January – October 2013, dropping by EUR 193.8 million (221 loans less) from the same period in 2012 (EUR 3,556.1 million; 2,065 loans). Out of the declared new loans, 1,115 were *intercompany loans*, and 729 were *other loans*. On a year-on-year basis, the stock of the declared new *intercompany loans* decreased by EUR 1,142 million (45.8%) to EUR 1,352.4 million, and the stock of the new *other loans* increased by EUR 948.2 million (89.3%), totalling EUR 2,009.9 million.

In January – October 2013, 74.3% of the total stock of declared loans were in EUR, compared with 80% in the same period of 2012. The average weighted interest rate on the declared new loans in EUR was 2.8%, dropping by 0.8 p.p. year-on-year.

Gross External Debt Service⁶

The **gross external debt service** totalled EUR 5,014.3 million (12.3% of GDP) in January – October 2013 compared with EUR 5,398.2 million (13.6% of GDP) in the same period of 2012.

General government external debt service amounted to EUR 683.8 million (1.7% of GDP) in January – October 2013, compared with EUR 687.8 million (1.7% of GDP) in the same period of 2012.

Banks' external debt service equalled EUR 1,524.2 million (3.8% of GDP) in January – October 2013, compared with EUR 1,576.4 million (4% of GDP) in the same period of 2012.

Other sectors' external debt service totalled EUR 1,310.9 million (3.2% of GDP) in January – October 2013, against EUR 1,522.3 million (3.8% of GDP) in the same period of 2012⁴.

Intercompany lending service amounted to EUR 1,495.4 million (3.7% of GDP) for the reporting period, compared with EUR 1,611.7 million (4.1% of GDP) in the same period of 2012⁴.

⁵ Excluding received revolving and trade credits.

⁶ Excluding payments on revolving and trade credits.

Net Flow⁷

The **total net flow** was negative, amounting to EUR 1,207.6 million (3% of GDP) in January – October 2013, against a positive one of EUR 942.7 million (2.4% of GDP) in the same period of 2012.

General government's net flow was negative and amounted to EUR 286.7 million (0.7% of GDP), against a positive one totalling EUR 609.3 million (1.5% of GDP) in January – October 2012.

Banks had a negative net flow of EUR 742.7 million (1.8% of GDP) compared with a positive flow of EUR 28.3 million (0.1% of GDP) in January – October 2012.

Other sectors reported a negative net flow of EUR 245.9 million (0.6% of GDP) against a negative one of EUR 344.6 million (0.9% of GDP) in January – October 2012⁴.

The net flow on item **direct investment: intercompany lending** was positive totalling EUR 67.7 million (0.2% of GDP), against a positive one of EUR 649.7 million (1.6% of GDP) in January – October 2012⁴.

Net External Debt⁸

Net external debt decreased by EUR 1,375.4 million (8.9%) from end-2012 (EUR 15,518.4 million), and stood at EUR 14,143 million at end-October 2013. The decrease was due to both the decline in *gross external debt* (by EUR 949.4 million, 2.5%) and to the increase in *gross external assets* (by EUR 426 million, 1.9%). *Gross external assets* totalled EUR 22,543 million at end-October 2013, compared with EUR 22,117 million at end-2012. As a percentage of GDP the *net external debt* equalled 34.8% at end-October 2013, dropping by 4.3 p.p. from end-2012 (39.1%).

⁷ In accordance with "External Debt Statistics: Guide for Compilers and Users", IMF (2003), p.262, net flow is the difference between total disbursements and total principal payments for the reporting period (excluding revolving and trade credits).

⁸ Net external debt is calculated as the difference between gross external debt stock and gross external assets. Gross external assets include the BNB reserve assets, banks assets abroad and nonfinancial sector deposits abroad.

Dynamics of the Declared New Loans, January – October 2013

In January – October 2013 the declared new loans extended by non-residents¹ amounted to EUR 3362.3 million (1844 loans), decreasing by EUR 193.8 million (221 loans less) from the same period in 2012 (EUR 3556.1 million, 2065 loans). Out of the declared new loans 1115 were *intercompany loans*, and 729 were *other loans*. In comparison with January – October 2012, the stock of the declared new *intercompany loans* decreased by EUR 1142 million (45.8%), reaching EUR 1352.4 million and the stock of *other loans* increased by EUR 948.2 million (89.3%) and amounted to EUR 2009.9 million.

- **Currency Structure**

In January – October 2013 the greatest share was formed by the loans in EUR – 74.3% of the stock of declared loans, against 80% in the same period of 2012 (Table 1). The share of loans in USD amounted to 25.4%, against 19.4% in January – October 2012.

CURRENCY STRUCTURE

Table 1

	Intercompany Loans				Other Loans				Total

¹ Declared by residents new loans. The moment of declaration does not necessarily coincide with the moment of lending.

- **Interest Rate Structure**

With regard to the interest rate structure (Table 2) in January – October 2013 the share of loans with fixed interest rates was 47.2%, and the share of loans with floating interest rates – 38.5%. In January – October 2012, 35.3% of the declared new loans were with fixed interest rates, and 26.8% - with floating interest rates.

INTEREST RATE STRUCTURE

Table 2

	I- X. 2012*			I- X. 2013*		
	Long-Term Loans	Short-Term Loans	Total	Long-Term Loans	Short-Term Loans	Total
Fixed Interest Rate	17.7%	17.6%	35.3%	12.5%	34.7%	47.2%
Floating Interest Rate	17.7%	9.1%	26.8%	22.5%	16.0%	38.5%
Other Types of Interest Rates**	7.3%	7.1%	14.4%	0.6%	6.8%	7.4%
Interest - Free	2.8%	20.8%	23.5%	3.3%	3.7%	6.9%
TOTAL	45.5%	54.5%	100.0%	38.9%	61.1%	100.0%

*Source: BNB (Register of non-guaranteed external debt of Other Sectors) – using data from loan declarations. The percentage shares are calculated using the total declared new loans as a base.

**These encompass interest payment schemes, which utilize more than one interest rate level or for which the interest cannot be defined by the debtor at the time of loan declaration.

In January – October 2013 the average weighted interest rate on the declared new loans in EUR was 2.8%, dropping by 0.8 p.p. compared to the same period of 2012. For *intercompany loans* (in EUR) the interest rate level decreased by 1.4 p.p. to 2.1%, and for *other loans* (in EUR) it decreased by 0.3 p.p. compared to the same period in the previous year (3.7%), reaching 3.4%.

INTEREST RATE LEVELS²

Table 3

	Intercompany Loans		Other Loans		Total	
	in USD	in EUR	in USD	in EUR	in USD	in EUR
VIII. 2012	2.2%	3.0%	5.7%	3.8%	4.6%	0.3%
IX. 2012	1.4%	1.9%	8.5%	5.3%	4.2%	0.3%
X. 2012	3.3%	2.7%	4.4%	3.2%	3.3%	0.3%
I- X. 2012	0.2%	3.6%	2.4%	3.7%	0.4%	3.6%

IX. 2013	1.8%	3.2%	8.0%	2.1%	2.1%	2.4%
X. 2013	3.9%	2.2%	8.0%	4.2%	4.5%	3.2%
I- X. 2013	5.3%	2.1%	2.5%	3.4%	2.8%	2.8%

In January – October 2013 the average weighted interest rate on new long-term loans in USD from abroad was by 5.1 p.p. lower, in EUR – by 5.2 p.p. lower than the weighted average interest

² The interest rate data are average weighted with the volumes of the respective newly declared loans throughout the reporting period.

rates on long-term loans in USD (8.1%) and in EUR (8.2%), granted by local commercial banks to enterprises³. In the same period of 2012 the interest rates for long-term loans in USD abroad was lower by 7.7 p.p. than those in the country and that in EUR – by 4 p.p. lower.

- **Weighted Average Maturity**

The maturity of the declared new loans in January – October 2013 reached 8 years and 2 months against 4 years and 4 months in the same period of 2012. The weighted average maturity of the *intercompany loans* reached 3 years and 6 months in January - September 2013, against 3 years and 10 months in the same period of 2012, and of *other loans* reached 11 years and 3 months in the reporting period, against 5 years and 7 months in January – October 2012 (Table 4).

WEIGHTED AVERAGE MATURITY

Table 4

	I- X. 2012	I- X. 2013
Intercompany Loans	3 years, 10 months	3 years, 6 months
Other Loans	5 years, 7 months	11 years, 3 months
Total	4 years, 4 month	8 years, 2 months

In January – October 2013 declared new long-term loans, as a share of the total stock of new loans, reached 38.9% (Table 5) against 45.5% in the same period of 2012.

SHARE STRUCTURE OF LONG- AND SHORT-TERM LOANS

¹ Preliminary data. The Euro equivalent is calculated using the monthly e.o.p. exchange rates of the respective foreign currencies.

² Data source: The Register of Government and Government-guaranteed Debt of the Ministry of Finance. Preliminary data for October 2013 as of November 20, 2013.

Debt liabilities of the public companies and the government-guaranteed debt are excluded.

³ Brady Bonds, Eurobonds, Global bonds and government securities (denominated in BGN and in foreign currency), purchased by non-residents are included.

The calculations of the item *Bond and Notes* follow the residence concept: the bonds, issued by residents in the international markets and held by residents are subtracted from the external debt.

⁴ Data source: banks (incl. private and state banks). Deposits related to contingent liabilities are excluded.

⁵ Data source: Local individuals and legal entities (incl. state owned companies and government-guaranteed loans from the Register of Government and Government-guaranteed Debt of the Ministry of Finance).

Intercompany loans are excluded. Data comprise only those credits (incl. revolving and intercompany lending) that are declared before the BNB and for which the BNB has received information.

⁶ In accordance with the *EXTERNAL DEBT STATISTICS, Guide for Compilers and Users, IMF 2003 p.3.14* and p. 7.5 liabilities

related to Direct investment are included in the long-term debt.

⁷ The stock of the revolving credits, trade credits and the credits, payable on demand is included in the gross external debt stock of the country.

⁸ Due to the quarterly reporting of firms the data are subject to revisions.

⁹ In accordance with the fifth edition of the Balance of Payments Manual (BPM5) and in line with the legal acts in force, the treatment of SDR allocations as reserve assets

(and not as long-term liabilities as required by the BPM6) shall be maintained until 2014 in national and European statistics.

Until then it shall be shown as a memo item.

¹ Preliminary data. The Euro equivalent is calculated using the monthly e.o.p. exchange rates of the respective foreign currencies.

² The division of the debt into short- and long-term is based on the original maturity.

³ Data source: The Register of Government and Government-guaranteed Debt of the Ministry of Finance. Preliminary data for October 2013 as of November 20, 2013.

⁴ Debt liabilities of the public companies and the government-guaranteed debt are excluded.

⁵ Data source: banks (incl. private and state banks). Deposits related to contingent liabilities are excluded.

⁶ Data source: Local individuals and legal entities (incl. state owned companies and government-guaranteed loans from the Register of Government and Government-guaranteed Debt of the Ministry of Finance). Intercompany loans are excluded.

⁷ Data comprise only those credits that are declared before the BNB and for which the BNB has received information.

⁸ In accordance with the EXTERNAL DEBT STATISTICS. Guide for Compilers and Users, IMF 2003 p.3.14 and p. 7.5 liabilities related to Direct Investment are included in the long-term debt.

¹ Preliminary data. The Euro equivalent is calculated using the monthly e.o.p. exchange rates of the respective foreign currencies.

² Bearer bonds, Eurobonds, Global bonds and government securities (denominated in BGN and in foreign currency) as well as banks' and corporate sector securities, purchased by non-residents are included.

The calculations of the item *Bond and Notes* follow the residence concept: the bonds, issued by residents in the international markets and held by residents are subtracted from the external debt.

³ The item includes government and government-guaranteed credits and loans of enterprises from the public and private sector. Intercompany loans are not included.

⁴ Data source for the government and government-guaranteed debt: The Register of Government and Government-guaranteed Debt of the Ministry of Finance - preliminary data for October 2013 as of November 2013. Data source for nonguaranteed debt: BNB - preliminary data as of November 20, 2013. Data comprise only those credits that are obtained before the BNB and for which the BNB has received information.

⁵ Data source: banks (incl. private and state banks). Deposits related to contingent liabilities are excluded.

¹ Preliminary data. The Euro equivalent is calculated using the monthly e.o.p. exchange rates of the respective foreign currencies. Quarterly data are published.

² Data source: The Register of Government and Government-guaranteed Debt of the Ministry of Finance. Preliminary data for September 2013 as of October 21, 2013. Debt liabilities of the public companies and the government guaranteed debt are excluded.

³ Data source: banks (incl. private and state banks). Deposits related to contingent liabilities are excluded.

⁴ Data source: Local individuals and legal entities (incl. state owned companies and government guaranteed loans from the Register of Government and Government-guaranteed Debt of the MoF). Intercompany loans are excluded. Data comprise only those credits that are declared before the BNB and for which the BNB has received information.

⁵ Due to the fact that direct investment liabilities do not fall naturally into this presentation totals are shown for Direct investment: Intercompany lending. External Debt Statistics: Guide for Compilers and Users, Chapter 7, para 7.43.

⁶ Brady bonds, Eurobonds, Global bonds and government securities (denominated in BGN and in foreign currency), purchased by non-residents as well as debt securities issued by banks and local companies and held by non-residents are included.

Trade Credits ^{9,10}	0.0	286.4	0.0	0.0	-286.4

¹ Actual disbursements. Preliminary data. The Euro equivalent is calculated using the monthly average exchange rates of the respective foreign currencies.

² Change for the period January - October 2013 against January - October 2012.

³ Data source: The Register of Government and Government-guaranteed Debt of the Ministry of Finance. Preliminary data for October 2013 as of November 20, 2013. Disbursements related to debt liabilities of the public companies and the government guaranteed debt are excluded.

⁴ In accordance with the residence concept the net decrease of the stock of Brady bonds, Eurobonds and Global bonds held by residents represents net increase of the liabilities to nonresidents and is reflected with a positive sign.

⁵ Data source: banks.

⁶ Deposits connected with contingent liabilities are not included.

⁷ Data comprise disbursements on those credits (excl. revolving and intercompany lending) that are declared before the BNB and for which the BNB has received information as well as disbursements on government guaranteed loans (source: The Register of Government and Government-guaranteed Debt of the Ministry of Finance. Preliminary data for October 2013 as of November 20, 2013.).

⁸ In accordance with the *EXTERNAL DEBT STATISTICS, Guide for Compilers and Users, IMF 2003 p. 3.14 and p. 7.5* disbursements related to Direct investment are included in the long-term debt.

⁹ Not included in table Disbursements by Institutional Sector.

¹⁰ The net increase in the stock of the trade credits in the reporting month is reported in the Disbursements tables (tables 11 and 12), while the net decrease - in the Debt Service tables (tables 13 and 14).

Memo items:

Revolving credits ⁸	721.8	6582.4	25.5	5918.8	-663.5
Trade Credits ⁸	0.0	286.4	0.0	0.0	-286.4

¹ Actual disbursements. Preliminary data. The Euro equivalent is calculated using the monthly average exchange rates of the respective foreign currencies.

² Change for the period January - October 2013 against January - October 2012.

³ Brady bonds, Eurobonds, Global bonds and government securities (denominated in BGN and in foreign currency) as well as banks' and corporate sector securities, purchased by non-residents are included. In accordance with the residence concept the Brady bonds, Eurobonds and Global bonds held by residents are subtracted.

⁴ The change of bonds ownership from residents to non-residents constitutes an increase of liabilities towards non-residents and is reported with a plus sign.

⁵ The item includes government and government guaranteed credits and loans of enterprises from the public and private sector. Intercompany loans are not included.

⁶ Data source for government and government guaranteed debt: The Register of Government and Government-guaranteed Debt of the Ministry of Finance.

Preliminary data for October 2013 as of November 20, 2013.

Data source for nonguaranteed debt: BNB preliminary data for October 2013 as of November 20, 2013. Data comprise only those credits (incl. revolving and intercompany lending) that are declared before the BNB and for which the BNB has received information.

⁷ Data source: banks (incl. private and state banks). Deposits related to contingent liabilities are excluded.

⁸ Not included in table *Disbursements* by Institutional Sector (table 11).

¹ Actual payments. Preliminary data. The Euro equivalent is calculated using the monthly average exchange rates of the respective foreign currencies.

² Change for the period January - October 2013 against January - October 2012.

³ Data source: The Register of Government and Government-guaranteed Debt of the Ministry of Finance. Preliminary data for October 2013 as of November 20, 2013. Payments related to debt liabilities of the public companies and the government guaranteed debt are excluded.

⁴ In accordance with the residence concept external debt payments are reduced with the payments of securities, held by residents and are increased with the securities (issued from residents in the international financial markets), which changed owners from non-residents to residents.

⁵ Data source: banks. Deposits connected with contingent liabilities (e.g. government-guaranteed loans), which changed owners from non-residents to residents.

⁶ Data comprise principal and interest payments on those credits (excl. intercompany lending) that are declared before the BNB and for which the BNB has received information as well as service on government-guaranteed loans.

⁷ In accordance with the EXTERNAL DEBT STATISTICS, Guide for Compilers and Users, IMF 2003, p.3.14 and p. 7.5 debt service related to Direct Investment are included in the long-term debt.

⁸ Not included in table Debt Service by Institutional Sector.

⁹ The net increase in the stock of the trade credits in the reporting month is reported in the Disbursements tables (table 11 and 12).

while the net decrease - in the Debt Service tables (tables 13 and 14).

¹ Actual payments. Preliminary data. The Euro equivalent is calculated using the monthly average exchange rates of the respective foreign currencies.

² Change for the period January - October 2013 against January - October 2012.

³ Brady bonds, Eurobonds, Global bonds and government securities (denominated in BGN and in foreign currency) as well as banks' and corporate sector securities, purchased by non-residents are included. In accordance with the residence concept the Brady bonds, Eurobonds and Global bonds held by residents are substracted.

⁴ In accordance with the residence concept external debt payments are reduced with the payments of securities, held by residents and are increased with the securities (issued from residents in the international financial markets), which changed owners from non-residents to residents.

⁵ The item includes government and government guaranteed credits and loans of enterprises from the public and private sector. Intercompany loans are not included.

⁶ Data source for government and government guaranteed debt: The Register of Government and Government-guaranteed Debt of the Ministry of Finance. Preliminary data for October 2013 as of November 20, 2013.

⁷ Data source for non-guaranteed debt: BNB - preliminary data for October 2013 as of November 20, 2013. Data comprise only those credits (incl. revolving and intercompany lending) that are declared before the BNB and for which the BNB has received information.

⁸ Data source: banks (incl. private and state banks). Deposits related to contingent liabilities are excluded.

⁹ Not included in table Debt Service by Institutional Sector. Payments on banks' revolving credits are not included.

The net increase in the stock of the trade credits in the reporting month is reported in the Disbursements tables (tables 11 and 12), while the net decrease - in the Debt Service tables (table 13 and 14).

¹¹ Preliminary data for 2012 and 2013. In accordance with the practice of the BNB and the ECB data revision requirements (included in the ECB's *Irregularities for Exchange of Balance of Payments, International Investment Position and Reserve Assets Statistics within the ESCB*, the data for April - September 2013 have been revised.

¹² Flow data include the period from the beginning of the year to the reporting month; stock data are as of the end of the reporting month.

¹³ The EUR equivalent is calculated using e.o.p. exchange rates of the respective foreign currencies. Data on external liabilities on trade credits are included in the debt stock.

¹⁴ Includes *General Government's* external debt, the external debt of banks from the public sector and of non-financial enterprises from the public sector, as well as the publicly guaranteed external debt of the private sector (in accordance with paras 5.5–5.6 of *External Debt Statistics: Guide for Compilers and Users*, 2003). Sources: Ministry of Finance, Bulgarian National Bank, banks, local companies.

¹⁵ Sources: banks, local companies.

¹⁶ The indicators that are based on gross domestic product (GDP) are calculated using the following data: GDP at EUR 40,624 million for 2013 (BNB estimate) and GDP at EUR 39,667.1 for 2012 (NSI data as of 06.03.2013).

¹⁷ Goods and non-factor services. The indicator is calculated on an annual basis.

¹⁸ Actual payments. The EUR equivalent is calculated using the monthly average exchange rates of the respective foreign currencies. Payments on revolving credits are not included.

¹⁹ For 2013 preliminary NSI data as of 5 December 2013 are used, which include data from the *Irstat* system for the EU member states, and from customs declarations for non-EU countries.

²⁰ Data are provided by direct investment companies reporting to the BNB, by the Agency for Privatisation, the NSI, the Central Depository and the banks.

²¹ A negative sign (-) denotes an increase in assets and a decrease in liabilities, and a positive sign (+) denotes a decrease in assets and an increase in liabilities. Including financial derivatives.

²² Data source for the monetary aggregates, banks' assets abroad and the forex deposits: *Monetary Survey*, October 2013.

²³ Including BNB reserve assets, banks' assets abroad and nonfinancial sector deposits abroad.

²⁴ Including monetary and non-monetary gold. Source: *Issue Department*, BNB.

²⁵ Source: *BIS International Banking Statistics*. For 2013 the data as of March 2013 (published in August 2013) have been used.

²⁶ Calculated as the difference between the stocks of gross external debt and gross external assets.

²⁷ International investment position (IIP) data are published quarterly, within 3 months after the reporting period.

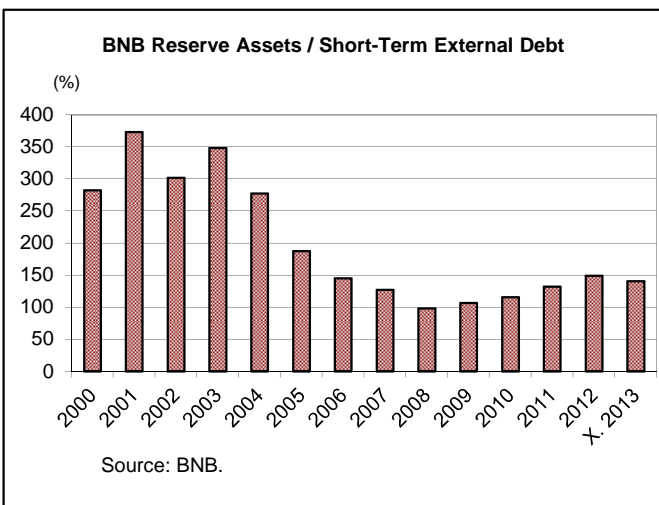

²⁸ The proportion (in months) of BNB Reserve Assets as of the end of the reporting month to the average imports of Goods and Non-Factor Services for the last 12 months.

²⁹ Forex deposits of the population and the non-financial sector.

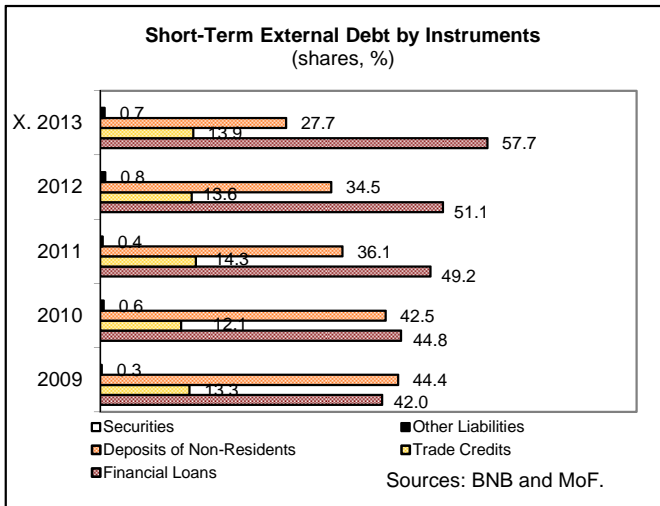

³⁰ The index refers to the reporting month.

³¹ CPI based index calculated for the reporting month.

METHODOLOGICAL NOTES ON THE COMPILATION OF THE GROSS EXTERNAL DEBT OF BULGARIA¹

For the compilation of the Gross External Debt, the Bulgarian National Bank (BNB) follows the international standards and requirements set in the "*External Debt Statistics: Guide for Compilers and Users, 2003*"² and in the "*Balance of Payments Manual*", IMF, 5-th edition, 1993. That ensures international compatibility of the data on one hand, and on the other hand - consistency between the external debt statistics and the balance of payments, international investment position and national accounts. The data on the gross external debt are an important source of information for given items in the balance of payments and in the international investment position.

The BNB compiles and disseminates monthly statistical data on the gross external debt presented by institutional sectors.

Publications comprise monthly data on (1) gross external debt stock (2) gross external debt service and (3) disbursements. Additional analytical external debt data by creditors is disseminated quarterly.

I. ACCOUNTING PRINCIPLES AND CONVENTIONS

When compiling the debt statistics, the BNB follows the international definition of gross external debt - "Gross external debt, at any given time, is the outstanding amount of those actual current, and not contingent, liabilities that require payment(s) of principal and/or interest by the debtor at some point(s) in the future and that are owed to non-residents by residents of an economy."³

The main criterion for a liability to be included in the gross external debt of the country is that it is issued by a resident and is owed to a non-resident⁴, regardless of whether it is issued on domestic or international, money or capital markets. The same principle is applied for transactions - only those between residents and non-residents are recorded. In the debt tables the BNB records the amount of tranches actually disbursed, not contingent.

The stock of the liabilities is recorded at nominal, not market value even in the case when they are in the form of tradable securities. The Gross External Debt of Bulgaria is reported in EUR.

The distinction between short-term and long-term debt is based on the original, not residual maturity of the liability. The long-term debt⁵ includes all liabilities with original maturity of more than a year, liabilities without predefined maturity date as well as liabilities related to direct investment, and the short-term - those with original maturity of one year or less. All arrears of principals and interests are recorded as short-term debt.

¹ Last updated: July 23rd, 2013.

² *External Debt Statistics: Guide for Compilers and Users*, IMF, 2003, (Bank for International Settlements, The Commonwealth Secretariat, Eurostat, International Monetary Fund, Organisation for Economic Co-operation and Development, The Paris Club Secretariat, The United Nations Conference on Trade and Development, the World Bank)

³ *External Debt Statistics: Guide for Compilers and Users*, Chapter Two, para 2.3.

⁴ For a definition of resident and nonresident see the "*Balance of Payments Manual*", IMF, 5-th edition, para 57-58.

⁵ In compliance with the recommendations of EXTERNAL DEBT STATISTICS, Guide for Compilers and Users, IMF 2003, p.3.14 and 7.5 direct investment liabilities are included in the long-term external debt.

II. GROSS EXTERNAL DEBT COMPONENTS

A. By institutional sectors:

The structure of the gross external debt table by institutional sectors is in compliance with the requirements of the "*External Debt Statistics: Guide for Compilers and Users, 2003*"⁶, prepared by several international organizations and published by the IMF.

The main components of the gross external debt tables classified by sectors are General Government, Monetary Authorities, Banks and Other Sectors. In accordance with the international statistical standards, debt liabilities related to direct investment (intercompany lending) are presented separately. The classification by institutional sectors is in compliance with the Fifth edition of the *Balance of Payments Manual (1993)*. Within the sectors the external debt liabilities are classified by maturity – short-term and long-term and by instruments.

General Government

General Government debt includes: (1) central government debt, (2) local government debt, (3) debt of social security funds and (4) debt of all nonmarket nonprofit institutions that are controlled and mainly financed by government units. Public corporations and unincorporated enterprises that function as if they were corporations (so called quasi-corporations) are explicitly excluded from the general government sector and are allocated to banks or other sectors as appropriate. The debt liabilities of the *General Government* sector are long-term and are classified by instruments – *Loans* and *Bonds and Notes*. Liabilities for which no issue of tradable securities is involved are recorded under *Loans*. Loans received by the central government from the IMF are also recorded under *Loans*. The central government liabilities on securities issued on the domestic and on the international markets are recorded under *Bonds and Notes*, as the principle that only debt owed to non-residents is external debt is followed.. The item comprises the entire stock of the issue abroad. The part of the issue abroad, held by residents at the end of the reporting period, is recorded with a negative sign in item *Bonds and Notes, held by residents*. The net decrease in the stock of Brady bonds, Eurobonds and Global bonds, held by residents corresponds to a net increase in the holdings of non-residents and is reported in the Disbursements table, and vice versa – in the tables on external debt service, as a principal payment under the *Bonds and Notes, held by residents* sub-item.

The government securities, issued by the government on the domestic market and held by non-residents, are also recorded under item *Bonds and Notes*.

Data sources: The main source of data is the *Register of Government and Government-guaranteed Debt* of the Ministry of Finance (before 31.12.2002 the source of that data was the *System for Debt Registration, Service and Management* of the Ministry of Finance and the Bulgarian National Bank). Other sources are Government and Government Guaranteed Debts Depository Directorate with the BNB, the Central Depository and the banks. The source of data on securities issued abroad and held by residents are the custodians and the banks.

⁶ *External Debt Statistics: Guide for Compilers and Users*, IMF, 2003 (Bank for International Settlements, The Commonwealth Secretariat, Eurostat, International Monetary Fund, Organisation for Economic Co-operation and Development, The Paris Club Secretariat, The United Nations Conference on Trade and Development, the World Bank)

Monetary Authorities

In accordance with the international methodology on external debt statistics included herein are the external liabilities of the BNB. The data is derived from the *Register of Government and Government-guaranteed Debt* of the Ministry of Finance.

Banks

Short-term liabilities of the banks include short-term loans, non-residents' deposits with domestic banks as well as other payables to non-residents. In sub-item *Deposits* are included deposits in foreign currencies and in leva of non-residents with domestic banks. The net increase in deposits in the banking system is reported in the Disbursements table, and the net deposit withdrawal – in the tables on external debt service, as a principal payment under the *Deposits* sub-item. In accordance with the *External Debt Statistics: Guide for Compilers and Users*, deposits related to contingent liabilities are excluded⁷. Long-term liabilities include loans and bonds and notes issued by the banks and held by non-residents.

Data sources: Data on the amount and transactions on external loans is received monthly directly from the banks through a statistical form on their external liabilities. Money and Banking Statistics Division with the Statistics Directorate of the BNB provides monthly data for the *Deposits* and *Other liabilities* items. Source for the data on *Bonds and Notes* item is the Central Depository.

Other Sectors

In the *Other sectors* item the debt of private and state-owned non-bank enterprises (incl. Government guaranteed debt) as well as external liabilities of the households are recorded.

Short-term liabilities of the *Other sectors* include short-term loans, trade credits as well as other payables to non-residents. Long-term liabilities include loans and bonds and notes issued by the companies and held by non-residents.

Data sources: Data on financial loans is collected through the statistical *Form SPB-4 Report on the Financial Credit Liabilities of Residents to Non-residents*, that covers data on the stock and the various types of transactions on the credits. As the Foreign Exchange Law envisages quarterly reporting of these liabilities, for the first two months of each quarter the BNB publishes estimations on the non-bank enterprises, based on the debt service schedules provided by companies on the loans extended to them and on estimations. Under the *Trade credits* sub-item are recorded the respective liabilities of residents to non-residents⁸ excluding trade credit liabilities towards foreign direct investors. Such data are collected from the BNB through *Form SPB-6B Report on the liabilities of local bodies to non-residents*. As the Foreign Exchange Law envisages quarterly reporting of these liabilities, for the first two months of each quarter the BNB publishes estimations for the stock of trade credits. Data on liabilities of the households is collected through the annual statistical *Form SPB-8 Report on the Assets and Liabilities of Resident Physical Persons to Non-residents*.

⁷ "External Debt Statistics: Guide for Compilers and Users, IMF 2003, para 2.10

⁸ For a definition of trade credits, see "Balance of Payments Manual", IMF, 5-th edition, 1993, chapter XX, para. 414, as well as "External Debt statistics: Guide for Compilers and Users", Chapter Three, para.133.

Direct investment: Intercompany lending

In accordance with the international methodology on external debt statistics a distinction is made between liabilities owed to direct investors⁹ (*Intecompany Lending*) and such owed to other creditors. Liabilities related to direct investment relationship are separately identified (equity liabilities arising from direct investment i.e. equity capital and reinvested earnings except nonparticipating, preferred shares are excluded from external debt). Liabilities related to direct investment are treated as a long-term debt.

B. By creditors

In accordance with the structure recommended by the *External Debt Statistics: Guide for Compilers and Users* quarterly external debt stock tables by creditor sectors are prepared and published.

C. Public Sector and Private Sector External Debt

In accordance with para. 5.5-5.6 of the *External Debt Statistics: Guide for Compilers and Users, IMF 2003*, the public sector external debt comprises of the debt of sector General Government, sector Monetary Authorities, the public banks, the public non-financial enterprises, as well as of the government guaranteed debt of the private sector. The private sector external debt comprises of the banks' and non-financial enterprises' debt, which is not included in the public and publicly guaranteed external debt. The data are monthly.

III. PERIODICITY, FREQUENCY AND TIMELINESS OF THE GROSS EXTERNAL DEBT PUBLICATIONS

The Bulgarian National Bank compiles and publishes data on the stock of the gross external debt of the country, the debt service payments and the disbursements on a monthly basis. The external sector debt indicators, including external debt indicators, are also disseminated monthly.

The Bulgarian National Bank publishes the data according to its advance release calendar. In the case of a change, the BNB informs the users on the new release date at least a week before the advance date.

IV. DATA REVISION POLICY

The data revisions policy of the Bulgarian National Bank is based on the following principles:

(i) Each monthly publication includes revisions of the data for the previous three months, and each quarterly publication includes revisions of the monthly data for the whole current year.

(ii) When on-going changes are made due to additional information collected, as well as resulting from elimination of errors, the Bulgarian National Bank timely informs the users through the monthly press releases, as well as through the notes at the end of the external debt tables.

⁹ The BNB follows the international definition of direct investment according to which the acquisition of 10% or more of the voting power in the investment enterprise is considered to establish a direct investment relationship.

(iii) When significant revisions are made due to changes in the methodology for reporting of certain external debt components or for other reasons, the Bulgarian National Bank publishes in advance information on the changes, in order to facilitate the users of the data.

V. DATA DISSEMINATION

The Bulgarian National Bank publishes the monthly gross external debt data on the web site of the Bulgarian National Bank – <http://www.bnb.bg>. The data are published also in the BNB Monthly Bulletin and in the semi-annual and in the annual official reports of the Bulgarian National Bank. Data are simultaneously released to all interested parties.

VI. CONTACTS

If you have any questions on the methodology applied by the Bulgarian National Bank or on the gross external debt data published, please do not hesitate to contact Mr. Emil Dimitrov, director of the Statistics Directorate, via e-mail at Dimitrov.E@bnbank.org, and Mrs. Liliana Bancheva, head of the Balance of Payments and External Debt Division, via e-mail at Bancheva.L@bnbank.org, or by mail to the following address:

¹ Preliminary data. The Euro equivalent is calculated using end-of-period exchange rates of the respective foreign currencies.

With Q3 2013 data the international investment position for Q2 2013 will be revised.

² Information on the compilation of foreign direct investment stocks to be found in "Methodological notes on the compilation of international investment position of Bulgaria"

published on the BNB web-site - www.bnb.bg.

³ Portfolio investments in securities issued by non-residents and held by residents. Sources: banks and non-bank investment intermediaries and other financial institutions.

⁴ From 2004 onwards data on trade credits-assets (prepaid advances and receivables from suppliers), reported to the BNB are included.

Due to quarterly reporting data are subject to revisions.

⁵ Data are based on the reports by banks and companies on financial credits lent to non-residents. Due to quarterly reporting data are subject to revisions.

⁶ Source: BIS International Banking Statistics. For Q2 2013 the last published in September 2013 data (for March 2013) are used.

⁷ Including monetary and non-monetary gold. Source: Issue Department.

⁸ Source: Central Depository AD.

⁹ Data on trade credits-liabilities (received advances and payables to suppliers), reported to the BNB are included in this item.

Due to quarterly reporting data are subject to revisions.

¹⁰ Use of Fund credit.

¹¹ Data source: The Register of Government and Government-guaranteed Debt of the Ministry of Finance. Preliminary data for Q2 2013 as of August 26, 2013.

Debt liabilities of the public companies and the government guaranteed debt are excluded.

¹² Data are based on the monthly reports by banks.

¹³ Data source: Local individuals and legal entities (incl. state owned companies and government guaranteed loans from the Register of Government and Government-guaranteed Debt of the Ministry of Finance). Intracompany loans are excluded. Due to quarterly reporting data are subject to revisions.

¹⁴ Data source: commercial banks (incl. private and state commercial banks). Deposits related to contingent liabilities are excluded.

METHODOLOGICAL NOTES ON THE COMPILATION OF THE INTERNATIONAL INVESTMENT POSITION OF BULGARIA

The Bulgarian National Bank is in charge of the compilation of the *International Investment Position* (i.i.p.) of the country. The data for the purposes of the i.i.p. compilation are collected on the basis of Article 42 of the Law on the Bulgarian National Bank as well as on the basis of the Foreign Exchange Law. These data are processed by the “Balance of Payments and External Debt” Division within the Statistics Directorate of the BNB, respective of the confidentiality rules. The i.i.p. statement is compiled in general conformity with the international standards prescribed by the *Fifth Edition* of the “*Balance of Payments Manual*” (IMF, 1993) and the “*International Investment Position – A Guide to Data Sources*” (IMF, 2002) and the “*Guideline of The European Central Bank*” (ECB/2004/15)¹. The i.i.p. statement is compiled and published quarterly.

There is a close relationship between the *International Investment Position* and the balance of payments (BoP). The BoP financial account measures economy's transactions in external financial assets and liabilities, which affect the stock of external financial assets and liabilities measured in the international investment position.

The international investment position methodology is conceptually related to that of the *Gross External Debt* and the *System of National Accounts (SNA)*.

I. ACCOUNTING PRINCIPLES AND CONVENTIONS

Stocks' valuations are based on market prices. If the actual market prices are not available, the average market prices are used as an approximation.

Valuation changes of the country's external assets and liabilities are included in the international investment position.

The units of account for the international investment position of Bulgaria are the EUR and the BGN. The conversion into the unit of account is made using the exchange rate at the end of the reporting period.

II. INTERNATIONAL INVESTMENT POSITION COMPONENTS

The i.i.p. is the balance sheet of the country's stocks of external financial assets and liabilities at the end of a specific period. The external financial assets consist of direct investment, portfolio investment, financial derivatives, other investment and reserve assets. The external financial liabilities consist of direct investment, portfolio investment, financial derivatives and other investment and, therefore, they are a broader concept than the liabilities that constitute the country's gross external debt. The primary type of classification in the i.i.p. statement is the distinction between assets and liabilities. The second level of classification by function is fully consistent with the b.o.p. financial account. The functional types of assets and liabilities are (i) direct investment, (ii) portfolio investment, (iii) financial derivatives and (iv) other investment. Included in assets are also the reserve assets held by the monetary authorities. The third level of classification is by investment instrument. Instruments

¹ Guideline of The European Central Bank on the Statistical Reporting Requirements of The European Central Bank in the Field of Balance of Payments Statistics, The International Reserves Template and International Investment Position Statistics (ECB/2004/15)

recorded as portfolio investment and other investment are further sub-divided by domestic sector, while the components of other investment are also cross-classified by original maturity.

A. DIRECT INVESTMENT

Direct investment is a category of international investment in which a resident of one economy – a direct investor – holds a lasting interest (at least 10% of the ordinary shares or voting power) in an enterprise resident in another economy – a direct investment enterprise. The direct investment includes both the initial transaction, through which the relationship between the direct investor and the direct investment enterprise is established, and all subsequent transactions between them. The direct investment covers transactions related to changes in the direct investor's share in the equity capital of the direct investment enterprise, inter-company debt transactions as well as the share of the direct investor in the undistributed earnings/loss of the direct investment enterprise. Claims on and Liabilities to affiliated enterprises are shown separately, following the directional principle.

Sources and methods: The information on the FDI stocks is derived from monthly, quarterly and annual reports of the financial and the non-financial sector. For particular elements of the FDI position available stock data are used. Other elements of the FDI position for which BNB has no data on stocks available are estimated as accumulation of b.o.p. flows to stocks at the end of previous reporting period. .

For data on direct investments abroad the Bulgarian National Bank uses the information from declaration forms on direct investment abroad, quarterly reports of non-financial sector enterprises and monthly reports on international transactions of the banks. Later, the stocks of Bulgarian direct investment abroad are updated with data from an annual survey conducted by the BNB.

The Bulgarian National Bank receives monthly data on direct investments in the country from the Central Depository, from the banks' reports on international transactions, from the Notary Public and from the Privatisation Agency; quarterly data – from Banking Supervision Department – reports on capital and income of foreign owned banks, from the reports on inter-company debt of direct investment enterprises and data from the Bulgarian National Bank surveys regarding major non-financial FDI enterprises. The direct investment equity stocks in Bulgaria for the non-financial sector derived from b.o.p. flows are supplemented or replaced with the data provided by the NSI's annual survey on FDI stocks. The Bulgarian National Bank compiles data with geographical and economic breakdown for both FDI in Bulgaria and abroad.

B. PORTFOLIO INVESTMENT

Portfolio investment stocks comprise holdings of and liabilities on equity securities and debt securities; the latter are subdivided into bonds and notes (with an original maturity of one year or more) and money market instruments (with an original maturity of less than one year).

Sources and methods:

The portfolio investment assets of the monetary authorities and the general government уcбѣ do not constitute a part of the reserve assets and are compiled on the basis of information provided by the Accounting Department of the Bulgarian National Bank and by the Ministry of Finance.

The banks' holdings of securities are compiled on the basis of reporting forms, containing balance sheet data, while the other sectors' portfolio investment assets are reported by the custodians.

The stocks of portfolio investment liabilities cover securities issued by residents and held by non-residents. The main source of information on the portfolio investment liabilities in equity and debt securities are (i) the Central Depository which provides monthly stocks information on the portfolio investment by sector and (ii) the banks reports on the Bulgarian securities issued abroad and held by residents. The Ministry of Finance, the Bulgarian National Bank and the commercial banks are the main sources of stock information on the portfolio investment liabilities in debt securities of the monetary authorities and the general government.

C. FINANCIAL DERIVATIVES

Assets and liabilities in *financial derivatives* cover financial derivative instruments such as forwards, futures, swaps, options, etc.

The main source of information are the banks.

D. OTHER INVESTMENT

Other investment covers the stocks of assets and liabilities related to short and long-term trade credits and loans, currency and deposits and other assets and liabilities (accounts receivable and payable).

According to the BPM5, *trade credits* consist of claims and liabilities arising from the direct extension of credit by suppliers and buyers for transactions in goods and services and advance payments for work in progress (or to be undertaken) that is associated with such transactions. *Loans* item includes received and paid principals on short- and long-term loans between residents and non-residents if no issue of a tradable security is involved with these loans. The *Currency and Deposits* component presents on the assets side the changes in the residents' deposits held abroad, and on the liabilities side – the changes in the liabilities of the resident banks to non-residents in domestic and foreign currency. Items *Other assets* and *Other liabilities* includes all transactions on miscellaneous accounts receivable and payable not included elsewhere and transactions in arrears.

Sources and methods: The sources of information for trade credits are: quarterly Form SPB-6A for the assets, and quarterly Form SPB-6B for trade credits liabilities, reported by the non-financial sector.

Stocks data on the item *Loans* is received by the Ministry of Finance, the Bulgarian National Bank, the banks and directly by the enterprises that have lent to or borrowed from abroad.

E. Reserves and related items

According to the BPM5, *reserve assets* consist of those external assets that are readily available to and controlled by monetary authorities for direct financing of payments imbalances and/or for other purposes. The reserve assets comprise monetary gold, SDRs, the reserve position in the Fund, foreign exchange assets (consisting of currency and deposits and securities) and other claims.

Under the provisions of the currency board, the *reserve assets* of the Bulgarian National Bank are equal to the assets of the Issue Department as presented in its balance sheet.

III. PERIODICITY, FREQUENCY AND TIMELINESS OF THE INTERNATIONAL INVESTMENT POSITION PUBLICATIONS

The Bulgarian National Bank compiles and publishes the international investment position of the country on a quarterly basis. According to the schedule of the Bulgarian National Bank the data are published within three months after the close of the reference quarter.

IV. DATA REVISION POLICY

The policy on revisions pursued by the Bulgarian National Bank is based on the following principles:

- (i) Each publication includes revisions of the data for the previous reporting period.
- (ii) When on-going changes are made due to additional information collected, as well as resulting from elimination of errors, the Bulgarian National Bank timely informs the users through the monthly press releases.
- (iii) When significant revisions are made due to changes in the methodology for reporting of certain i.i.p. components or other reasons, the Bulgarian National Bank publishes in advance information on the changes to facilitate the users of the data. With the revisions publication, the users are timely acquainted with the revised data on the relative items.

V. DATA DISSEMINATION

The Bulgarian National Bank disseminates the quarterly international investment position data on its web site – <http://www.bnb.bg>.

The data are published also in the *Bulgarian National Bank Monthly Bulletin*.

Data on the international investment position of the country are included in the semi-annual and in the annual official reports of the Bulgarian National Bank.

VI. CONTACTS

If you have any questions on the methodology applied by the Bulgarian National Bank or on the balance of payments data published, please do not hesitate to send them to Mr. Emil Dimitrov, director, Statistics Directorate, via e-mail at Dimitrov.E@bnbank.org, to Mrs. Liliana Bancheva, head of the Balance of Payments and External Debt Division, via e-mail at Bancheva.L@bnbank.org, or by mail to the following address:
