As of the February 2017 data release, the BNB discontinues its *Gross External Debt* monthly publication. The *Gross External Debt* press release, the statistical data series on gross external debt (including the dynamics of the declared loans), and the respective methodological notes are available under *Statistics/External Sector/Gross External Debt* on the BNB website.

GROSS EXTERNAL DEBT¹

January 2017

Gross External Debt

Gross external debt amounted to EUR 34,447.5 million at end-January 2017, dropping by EUR 195 million (0.6%) from end-2016 (EUR 34,642.5 million). It equated to 70.7% of GDP², down by 2.4 p.p. from end-2016 (73.1% of GDP). On a year-on-year basis the gross external debt grew by EUR 856.9 million, 2.6% (from EUR 33,590.6 million, 70.9% of GDP in January 2016).

Long-term liabilities totalled EUR 26,633 million (77.3% of total external debt), decreasing by EUR 22.3 million (0.1%) from end-2016 (EUR 26,655.2 million, 76.9% of total external debt). *Long-term external debt* equated to 54.7% of GDP, dropping by 1.6 p.p. from end-2016 (56.3% of GDP). Long-term liabilities grew by EUR 899.8 million (3.5%) on a year-on-year basis (from EUR 25,733.2 million, 54.3% of GDP).

Short-term liabilities amounted to EUR 7,814.5 million (22.7% of total external debt), decreasing by EUR 172.7 million (2.2%) from end-2016 (EUR 7,987.2 million, 23.1% of total external debt). *Short-term external debt* equated to 16% of GDP, dropping by 0.8 p.p. from end-2016 (16.9% of GDP). On a year-on-year basis short-term liabilities decreased by EUR 42.9 million (0.5%), from EUR 7,857.4 million, 16.6% of GDP in January 2016.

General government debt amounted to EUR 6,738.9 million (13.8% of GDP), down by EUR 43.6 million (0.6%) from end-2016 (EUR 6,782.5 million, 14.3% of GDP)³. On a year-on-year basis, it grew by EUR 1,255.6 million, 22.9% (from EUR 5,483.3 million, 11.6% of GDP in January 2016), mostly due to the nonresident-held securities (totalling EUR 1,057.8 million) from Bulgaria's bond issues on international capital markets in March 2016.

Banks' debt amounted to EUR 3,897.2 million (8% of GDP), decreasing by EUR 265.7 million (6.4%) from end-2016 (EUR 4,162.9 million, 8.8% of GDP). **Deposits of non-residents** in local banks totalled EUR 2,682.6 million at end-January 2017, dropping by EUR 211.4 million (7.3%) from end-2016. On a year-on-year basis banks' debt decreased by EUR 170.5 million, 4.2% (from EUR 4,067.7 million, 8.6% of GDP in January 2016).

Other sectors' debt⁴ totalled EUR 11,282 million (23.2% of GDP), growing by EUR 78.7 million (0.7%) from end-2016 (EUR 11,203.3 million, 23.7% of GDP). On a year-on-year basis it dropped by EUR 154.2 million (1.3%), compared with EUR 11,436.1 million, 24.1% of GDP in January 2016.

¹ The analysis is based on tables *Gross External Debt by Sectors*. Preliminary data. The data for January 2015 – December 2016 have been revised. In accordance with the *ECB Timetable for Exchange of Balance of Payments, International Investment Position and Reserve Assets Statistics within the ESCB*, the data for January 2017 are to be revised with the February 2017 report.

² GDP amounting to EUR 48,704 million for 2017 (BNB forecast), and EUR 47,363.3 million for 2016 (NSI data as of 7 March 2017).

Following the residence concept.

⁴ Due to the quarterly reporting of firms, the data are subject to revisions.

At end-December 2016, 74.4% (EUR 6,162.1 million) of the *loans* of *other sectors* were liabilities of foreign direct investment enterprises and government guaranteed loans. Their share decreased by 0.04 p.p. from end-2015 (74.4%, EUR 6,860.8 million).

Intercompany lending⁴ increased by EUR 35.7 million (0.3%) to EUR 12,529.4 million (25.7% of GDP) in January 2017, compared with EUR 12,493.7 million (26.4% of GDP) in December 2016. On a year-on-year basis it decreased by EUR 74 million (0.6%), from EUR 12,603.4 million, 26.6% of GDP in January 2016.

Disbursements⁵

The **loans and deposits extended by non-residents** totalled EUR 203.6 million (0.4% of GDP) in January 2017, compared with EUR 154.1 million (0.3% of GDP) in January 2016.

The external financing received by *general government* equalled EUR 12.8 million (6.3% of the total amount of disbursements, 0.03% of GDP), growing by EUR 7.7 million from January 2016 (EUR 5.1 million, 0.01% of GDP).

Banks received external financing amounting to EUR 74.1 million (36.4% of the total disbursements, 0.2% of GDP), increasing by EUR 66.5 million from January 2016 (EUR 7.7 million, 0.02% of GDP).

Other sectors⁴ received external financing totalling EUR 48.8 million (24% of the total disbursements, 0.1% of GDP), growing by EUR 14.4 million (41.8%) from January 2016 (EUR 34.4 million, 0.1% of GDP).

Intercompany lending totalled EUR 67.8 million (33.3% of the total amount, 0.1% of GDP), dropping by EUR 39.1 million (36.6%) from January 2016 (EUR 107 million, 0.2% of GDP)⁴.

The **declared loans received from non-residents**⁶ totalled EUR 262.8 million (267 loans) in January 2017, down by EUR 70.7 million from January 2016 (EUR 333.5 million; 287 loans). Out of the declared new loans, 190 were *intercompany loans*, and 77 were *other loans*. On a year-on-year basis, the stock of declared *intercompany loans* grew by EUR 2 million (1%) to EUR 203.9 million, and the stock of *other loans* dropped by EUR 72.7 million to EUR 58.9 million.

Gross External Debt Service⁷

The gross external debt service totalled EUR 299.2 million (0.6% of GDP) in January 2017, compared with EUR 367.1 million (0.8% of GDP) in January 2016.

General government external debt service amounted to EUR 64.8 million (0.1% of GDP) in January 2017, compared with EUR 98.4 million (0.2% of GDP) in January 2016.

Banks' external debt service equalled EUR 155.3 million (0.3% of GDP) in January 2017, compared with EUR 12 million (0.03% of GDP) in January 2016.

Other sectors' external debt service totalled EUR 21.3 million (0.04% of GDP) in January 2017, compared with EUR 131 million (0.3% of GDP) in January 2016⁴.

⁵ Excluding received revolving and trade credits.

⁶The moment of declaration does not necessarily coincide with the moment of lending.

Intercompany lending service amounted to EUR 57.8 million (0.1% of GDP), compared with EUR 125.6 million (0.3% of GDP) in January 2016⁴.

Net Flow⁸

The **total net flow** was negative, totalling EUR 73.6 million (0.2% of GDP) in January 2017, compared with a negative one of EUR 191.8 million (0.4% of GDP) in January 2016.

General government's net flow was negative and amounted to EUR 51.4 million (0.1% of GDP), compared with a negative one totalling EUR 90.7 million (0.2% of GDP) in January 2016.

Banks had a negative net flow of EUR 68.9 million (0.1% of GDP), compared with a negative flow of EUR 4 million (0.01% of GDP) in January 2016.

Other sectors reported a positive net flow of EUR 31 million (0.06% of GDP), compared with a negative one of EUR 81.8 million (0.2% of GDP) in January 2016⁴.

The net flow on *direct investment: intercompany lending* was positive totalling EUR 15.6 million (0.03% of GDP), compared with a negative one of EUR 15.4 million (0.03% of GDP) in January 2016⁴.

Net External Debt9

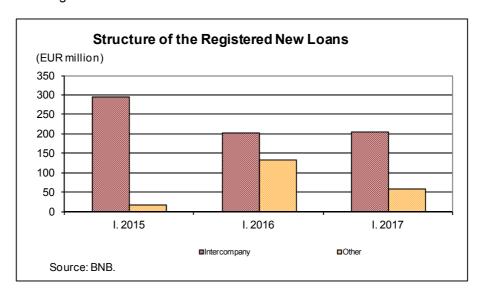

The **net external debt** decreased by EUR 38.9 million (1.5%) from end-2016 (EUR 2,521.9 million), and stood at EUR 2,482.9 million at end-January 2017. Its decline was due to the larger decrease in *gross external debt* (by EUR 195 million, 0.6%) in comparison with the decrease in *gross external assets* (by EUR 156 million, 0.5%). *Gross external assets* totalled EUR 31,964.5 million at end-January 2017, compared with EUR 32,120.6 million at end-2016. *Net external debt* equated to 5.3% of GDP at end-January 2017, compared with 5.4% at end-2016.

⁸ In accordance with *External Debt Statistics: Guide for Compilers and Users*, IMF (2003), p.262, net flow is the difference between total disbursements and total principal payments for the reporting period (excluding revolving and trade credits).

⁹ The *net external debt* position is equal to gross external debt less gross external assets in debt instruments. Gross external assets include the BNB reserve assets, banks' assets abroad and nonfinancial sector deposits abroad.

Dynamics of the Declared Loans, January 2017

In January 2017 the declared loans extended by non-residents¹ amounted to EUR 262.8 million (267 loans), decreasing by EUR 70.7 million in comparison with the same period in 2016 (EUR 333.5 million, 287 loans). Out of the declared new loans, 190 were *intercompany loans*, and 77 were *other loans*. In comparison with January 2016, the stock of the declared new *intercompany loans* increased by EUR 2.0 million (1.0%) to EUR 203.9 million and the stock of *other loans* decreased by EUR 72.7 million totaling EUR 58.9 million.

• Currency Structure

In January 2017, the loans in EUR had the largest share equating to 89.6% of the stock of declared loans, compared with 83.5% in the same period of 2016 (Table 1). The share of loans in USD amounted to 10.4%, compared with 16.5% in January 2016.

¹ New loans declared by residents. The moment of declaration does not necessarily coincide with the moment of lending. Reports for the first quarter of 2017 are to be provided to the BNB in the period 1 – 20 April 2017.

• Interest Rate Structure

With regard to the interest rate structure (Table 2), the share of loans with fixed interest rate was 33% in January 2017, and the share of loans with floating interest rate equated to 38.9%. In January 2016, 47.7% of the declared new loans were with fixed interest rates, and 38.6% - with floating interest rates.

INTEREST RATE STRUCTURE

І. 2017 г.	2.7%	1.2%	0.1%	3.1%	0.7%	1.5%

shares are calculated using the total declared new loans as a base.

**These encompass interest payment schemes, which utilize more than one interest rate level or for which the interest cannot be defined by the debtor at the time of loan declaration.

² The interest rate data are average weighted with the volumes of the respective newly declared loans throughout the reporting period.

In January 2017 the average weighted interest rate on new long-term loans in USD from abroad was down by 3.6 p.p., and on those in EUR – down by 3.2 p.p. in comparison with the weighted average interest rates on long-term loans in USD (6.5%) and in EUR (5.3%), granted by local commercial banks to enterprises³. In the same period of 2015 the interest rates for long-term loans in USD abroad were lower by 1.9 p.p. than those in the country, and those in EUR were lower by 5.2 p.p.

Weighted Average Maturity

The maturity of the declared new loans in January 2017 reached 1 year, compared with 2 years and 4 months in the same period of 2016. The weighted average maturity of the *intercompany loans* reached 5 months in January 2017, against 2 years and 5 months in the same period of 2016, and of o*ther loans* it reached 1 year and 1 month in the reporting period, compared with 2 years and 2 months in January 2016 (Table 4).

WEIGHTED AVERAGE MATURITY

Table 4

		Tubic I
	I. 2016	I. 2017
Intercompany Loans	2 years, 5 months	5 months
Other Loans	2 years, 2 months	1 year, 1 month
Total	2 years, 4 months	1 year

SHARE STRUCTURE OF LONG- AND SHORT-TERM LOANS

In January 2017, the share of the declared new short-term loans equated to 47.8% of the total stock of new loans (Table 5), compared with 50.7% in the same period of 2016.

Table 5

		I. 2016			I. 2017	
	Long-Term Loans	Short-Term Loans	Total	Long-Term Loans	Short-Term Loans	Total
Intercompany Loans	40.7%	59.3%	100.0%	51.6%	48.4%	100.0%
Other Loans	62.5%	37.5%	100.0%	54.2%	45.8%	100.0%
Total	49.3%	50.7%	100.0%	52.2%	47.8%	100.0%

³ The data on interest rates on new long-term loans granted to enterprises by local banks is sourced from the January 2017 issue of BNB's *Interest Rate Statistics*, published on 27.02.2017.

Gross External Debt Revisions for 2015 - 2016

In accordance with the practice of the BNB and with the ECB data revision requirements (included in the ECB *Timetable for Exchange of Balance of Payments, International Investment Position and Reserve Assets Statistics within the ESCB*), in the beginning of each calendar year the BNB revises the preliminary gross external debt stock data for up to three preceding years.

With the January 2017 data, the BNB publishes revised gross external debt data for the period 2015 – 2016.

The revisions were mainly due to the received additional data on the financial and trade credits of enterprises.

Gross external debt revisions for 2015 – 2016

(EUR million)

		XII. 2015			XII. 2016	
Gross external Debt By Institutional Sector	Preliminary data	Revised data	Revisions	Preliminary data	Revised data	Revisions
I. General Government	5 580.1	5 578.6	-1.5	6 769.7	6 782.5	12.9
II. Monetary Authorities	0.0	0.0	0.0	0.0	0.0	0.0

IV. Other Sectors	11 731.7	11 672.8	-58.9	11 254.3	11 203.3	-51.0
V. Direct Investment: Intercompany Lending	12 650.3	12 614.6	-35.8	12 540.7	12 493.7	-47.0
GROSS EXTERNAL DEBT (I+II+III+IV+V)	34 088.5	33 947.3	-141.2	34 727.6	34 642.5	-85.1

Gross external debt as of end-2016 was revised downwards by EUR 85.1 million (0.2% of GDP) to EUR 34,642.5 million (73.1% of GDP). The decrease was due to the downward revision of the liabilities of *other sectors* (by EUR 51 million) and *intercompany lending* (by EUR 47 million). The liabilities of *general government* rose by EUR 12.9 million.

Gross external debt as of end-2015 was revised downwards by EUR 141.2 million (0.3% of GDP) to EUR 33,947.3 million (75% of GDP). The decline was due to the downward revision of the liabilities of *other sectors* (by EUR 58.9 million), *banks* (by EUR 45 million), and *intercompany lending* (by EUR 35.8 million).

Gross External Debt (I+II+III+IV+V)	<u> </u>											695.2

¹ Preliminary data. In accordance with the BNB practice and with the ECB data revision requirements (included in the ECB Timetable for Exchange of Balance of Payments, International

Investment Position and Reserve Assets Statistics within the ESCB). With the February 2017 report, external debt data for January 2017 are to be revised.

The Euro equivalent is calculated using the monthly e.o.p. exchange rates of the respective foreign currencies.

² Data source: The Register of Government and Government-guaranteed Debt of the Ministry of Finance. Preliminary data for January 2017 as of February 17, 2017.

Debt liabilities of the public companies and the government guaranteed debt are excluded.

Data source: banks.

Data source: banks.

Data source: Local individuals and legal entities (incl. state owned companies and government guaranteed loans from the Register of Government and Government-guaranteed Debt of the MoF).

Intercompany loans are excluded. Data comprise those credits that are declared before the BNB and for which the BNB has received information.

Due to the fact that direct investment liabilities do not fall naturally into this presentation totals are shown for Direct investment: Intercompany lending.
 External Debt Statistics: Guide for Compilers and Users, Chapter 7, para 7.43.

 The Bonds, issued by residents in the international markets and held by residents are included.securities, purchased by non-residents are included.

¹ Actual disbursements.

Preliminary data. In accordance with the BNB practice and with the ECB data revision requirements (included in the ECB Timetable for Exchange of Balance of Payments, International Investment Position and Reserve Assets Statistics within the ESCB), the data for January 2015 - December 2016 have been revised. With the February 2017 report, external debt data for January 2017 are to be revised.

The Euro equivalent is calculated using the monthly average exchange rates of the respective foreign currencies.

² Data source: The Register of Government and Government-guaranteed Debt of the Ministry of Finance. Preliminary data for January 2017 as of February 17, 2017. Disbursements related to debt liabilities of the public companies and the government guaranteed debt are excluded.

³The Bonds, issued by residents in the international markets and held by residents are included.

⁴ Data source: banks.

⁵ Deposits connected with contingent liabilities are not included.

⁶ Data comprise disbursements on those credits (excl. revolving and intercompany lending) that are declared before the BNB and for which the BNB has received information as well as disbursements on government guaranteed loans (source: The Register of Government and Government-guaranteed Debt of the Ministry of Finance. Preliminary data for January 2017 as of February 17, 2017).

⁷ In accordance with the EXTERNAL DEBT STATISTICS, Guide for Compilers and Users, IMF 2003 p.3.14 and p. 7.5 disbursements

related to Direct investment are included in the long-term debt.

8 Not included in table Disbursements by Institutional Sector.

⁹ The net increase in the stock of the trade credits in the reporting month is reported in the Disbursements tables (tables 11 and 12), while the net decrease - in the Debt Service tables (tables 13 and 14).

Memo items:

Revolving credits ⁷	339.6	19.9	-319.7
Trade Credits 7,8	0.0	0.0	0.0

¹ Actual disbursements.

Preliminary data. In accordance with the BNB practice and with the ECB data revision requirements (included in the ECB Timetable for Exchange of Balance of Payments, International

Investment Position and Reserve Assets Statistics within the ESCB), the data for January 2015 - December 2016 have been revised. With the February 2017 report, external debt data for January 2017 are to be revised. The Euro equivalent is calculated using the monthly average exchange rates of the respective foreign currencies.

² The Bonds, issued by residents in the international markets and held by residents are included.
³ The change of bonds ownership from residents to non-residents constitutes an increase of liabilities towards non-residents and is reported with a plus sign.

⁴ The item includes government and government guaranteed credits and loans of enterprises from the public and private sector. Intercompany loans are not included.

The tell illinuous government and government guaranteed debt: The Register of Government and Government-guaranteed Debt of the Ministry of Finance. Preliminary data for January 2017 as of February 17, 2017.

Data source for nonguaranteed debt: BNB preliminary data for January 2017 as of February 17, 2017. Data comprise those credits (incl. revolving and intercompany lending) that are declared before the BNB and for which the BNB has received information.

⁶ Data source: banks (incl. private and state banks). Deposits related to contingent liabilities are excluded.

Not included in table *Disbursements* by Institutional Sector (table 11).
 The net increase in the stock of the trade credits in the reporting month is reported in the Disbursements tables (tables 11 and 12), while the net decrease - in the Debt Service tables (tables 13 and 14).

* The indicators that are calculated using external debt data are presented with the publication of the external debt data for the reporting period.

Upeliminary data for 2016 and 2017 compiled according the BPM6. In accordance with the practice of the BNB and the ECB data revision requirements (included in the ECBTmetable for Exchange of Balance of Payments, International Investment Position and Reserve Assets Statistics within the ESCB, the data for the period January 2015 - December 2016 have been revised.

"The EUR equivalent is calculated using e.o.p. exchange rates of the respective foreign currencies. Data on external liabilities on trade credits are included in the debt stock. Flow data include the period from the beginning of the year to the reporting month; stock data are as of the end of the reporting month.

Includes General Government's external debt, the external debt of banks from the public sector and of non-financial enterprises from the public sector, is a well as the publicly guaranteed external debt of the private sector (in accordancewith paras 5.5–5.6 of External Debt Statistics: Guide for Compilers and Users, 2003). Sources: Ministry of Finance, Bulgarian National Bank, banks, local companies.

³⁷ The indicators that are based on gross domestic product (GDP) are calculated using the following data: GDP for 2016 amounting to EUR 47,363.3 million (NSI data as of 7 March 2017)

and EUR 48,704 million for 2017 (BNB forecast). $^{\vee}$ Goods and non-factor services. The indicator is calculated on an annual basis.

Actual payments. The EUR equivalent is calculated using the monthly average exchange rates of the respective foreign currencies. Payments on revolving credits are not included.

For 2016 - preliminary NSI and BNB data. Data are compiled on a balance of payments basis.

or A positive sign (+) denotes an increase in assets and liabilities, and a negative sign (-) denotes a decrease in assets and liabilities. Including financial derivatives. Data are provided by direct investment companies reporting to the BNB, by the Agency for Privatisation, the NSI, the Central Depository and the banks.

¹¹⁰ Data source for the monetary aggregates, banks' assets abroad and the forex deposits. Monetary Survey, January 2016.
¹²¹ Including BNB reserve assets, banks assets abroad and nonfinancial sector deposits abroad.

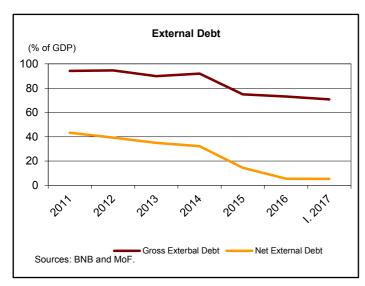

¹³ Including monetary and non-monetary gold. Source: Issue Department, BNB.

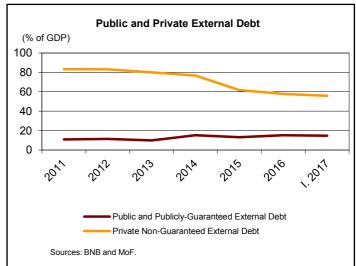

4' Data source for Other sectors: BIS International Banking Statistics. Data till September 2016 published in January 2017 have been used. SCalculated as the difference between the stocks of gross external debt and gross external assets.

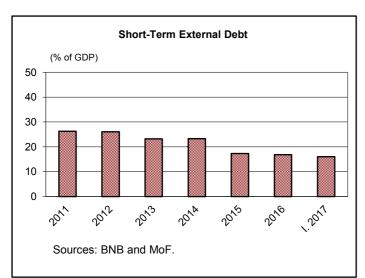

"/ The proportion (in months) of BNB Reserve Assets as of the end of the reporting month to the average imports of Goods and Non-Factor Services for the last 12 months. ⁵⁷ International investment position (IIP) data are published quarterly, within 3 months after the reporting period.

METHODOLOGICAL NOTES ON THE COMPILATION OF THE GROSS EXTERNAL DEBT OF BULGARIA1

For the compilation of the Gross External Debt, the Bulgarian National Bank (BNB) follows the international standards and requirements set in the "External Debt Statistics: Guide for Compilers and Users, 2003"2 and in the "Balance of Payments Manual", IMF, 5-th edition, 1993. That ensures international compatibility of the data on one hand, and on the other hand - consistency between the external debt statistics and the balance of payments, international investment position and national accounts. The data on the gross external debt are an important source of information for given items in the balance of payments and in the international investment position.

The BNB compiles and disseminates monthly statistical data on the gross external debt presented by institutional sectors.

Publications comprise monthly data on (1) gross external debt stock (2) gross external debt service and (3) disbursements. Additional analytical external debt data by creditors is disseminated quarterly.

I. ACCOUNTING PRINCIPLES AND CONVENTIONS

When compiling the debt statistics, the BNB follows the international definition of gross external debt - "Gross external debt, at any given time, is the outstanding amount of those actual current, and not contingent, liabilities that require payment(s) of principal and/or interest by the debtor at some point(s) in the future and that are owed to non-residents by residents of an economy."3.

The main criterion for a liability to be included in the gross external debt of the country is that it is issued by a resident and is owed to a non-resident⁴, regardless of whether it is issued on domestic or international, money or capital markets. The same principle is applied for transactions - only those between residents and non-residents are recorded. In the debt tables the BNB records the amount of tranches actually disbursed, not contingent.

The stock of the liabilities is recorded at nominal, not market value even in the case when they are in the form of tradable securities. The Gross External Debt of Bulgaria is reported in EUR.

The distinction between short-term and long-term debt is based on the original, not residual maturity of the liability. The long-term debt⁵ includes all liabilities with original maturity of more than a year, liabilities without predefined maturity date as well as liabilities related to direct investment, and the short-term - those with original maturity of one year or less. All arrears of principals and interests are recorded as short -term debt.

¹ Last updated: July 23 rd, 2013.

² External Debt Statistics: Guide for Compilers and Users, IMF, 2003, (Bank for International Settlements, The Commonwealth Secretariat, Eurostat, International Monetary Fund, Organisation for Economic Co-operation and Development, The Paris Club Secretariat, The United Nations Conference on Trade and Development, the World Bank)

3 External Debt Statistics Oxide Conference

External Debt Statistics: Guide for Compilers and Users, Chapter Two, para 2.3.

For a definition of resident and nonresident see the "Balance of Payments Manual", IMF, 5-th edition, para 57-58.

⁵ In compliance with the recommendations of EXTERNAL DEBT STATISTICS, Guide for Compilers and Users, IMF 2003, p.3.14 and 7.5 direct investment liabilities are included in the long-term external debt.

II. GROSS EXTERNAL DEBT COMPONENTS

A. By institutional sectors:

The structure of the gross external debt table by institutional sectors is in compliance with the requirements of the "*External Debt Statistics: Guide for Compilers and Users, 2003*"⁶, prepared by several international organizations and published by the IMF.

The main components of the gross external debt tables classified by sectors are General Government, Monetary Authorities, Banks and Other Sectors. In accordance with the international statistical standards, debt liabilities related to direct investment (intercompany lending) are presented separately. The classification by institutional sectors is in compliance with the Fifth edition of the *Balance of Payments Manual (1993)*. Within the sectors the external debt liabilities are classified by maturity – short-term and long-term and by instruments.

General Government

General Government debt includes: (1) central government debt, (2) local government debt, (3) debt of social security funds and (4) debt of all nonmarket nonprofit institutions that are controlled and mainly financed by government units. Public corporations and unincorporated enterprises that function as if they were corporations (so called quasi-corporations) are explicitly excluded from the general government sector and are allocated to banks or other sectors as appropriate. The debt liabilities of the General Government sector are long-term and are classified by instruments - Loans and Bonds and Notes. Liabilities for which no issue of tradable securities is involved are recorded under Loans. Loans received by the central government from the IMF are also recorded under Loans. The central government liabilities on securities issued on the domestic and on the international markets are recorded under Bonds and Notes, as the principle that only debt owed to non-residents is external debt is followed.. The item comprises the entire stock of the issue abroad. The part of the issue abroad, held by residents at the end of the reporting period, is recorded with a negative sign in item Bonds and Notes, held by residents. The net decrease in the stock of Brady bonds, Eurobonds and Global bonds, held by residents corresponds to a net increase in the holdings of non-residents and is reported in the Disbursements table, and vice versa - in the tables on external debt service, as a principal payment under the Bonds and Notes, held by residents sub-item.

The government securities, issued by the government on the domestic market and held by non-residents, are also recorded under item *Bonds and Notes*.

Data sources: The main source of data is the *Register of Government and Government-guaranteed Debt* of the Ministry of Finance (before 31.12.2002 the source of that data was the *System for Debt Registration, Service and Management* of the Ministry of Finance and the Bulgarian National Bank). Other sources are Government and Government Guaranteed Debts Depository Directorate with the BNB, the Central Depository and the banks. The source of data on securities issued abroad and held by residents are the custodians and the banks.

38

⁶ External Debt Statistics: Guide for Compilers and Users, IMF, 2003 (Bank for International Settlements, The Commonwealth Secretariat, Eurostat, International Monetary Fund, Organisation for Economic Co-operation and Development, The Paris Club Secretariat, The United Nations Conference on Trade and Development, the World Bank)

Monetary Authorities

In accordance with the international methodology on external debt statistics included herein are the external liabilities of the BNB. The data is derived from the Register of Government and Government-guaranteed Debt of the Ministry of Finance.

Banks

Short-term liabilities of the banks include short-term loans, non-residents' deposits with domestic banks as well as other payables to non-residents. In sub-item Deposits are included deposits in foreign currencies and in leva of non-residents with domestic banks. The net increase in deposits in the banking system is reported in the Disbursements table, and the net deposit withdrawal - in the tables on external debt service, as a principal payment under the *Deposits* sub-item. In accordance with the External Debt Statistics: Guide for Compilers and Users, deposits related to contingent liabilities are excluded⁷. Long-term liabilities include loans and bonds and notes issued by the banks and held by non-residents.

Data sources: Data on the amount and transactions on external loans is received monthly directly from the banks through a statistical form on their external liabilities. Money and Banking Statistics Division with the Statistics Directorate of the BNB provides monthly data for the Deposits and Other liabilities items. Source for the data on Bonds and Notes item is the Central Depository.

Other Sectors

In the Other sectors item the debt of private and state-owned non-bank enterprises (incl. Government guaranteed debt) as well as external liabilities of the households are recorded.

Short-term liabilities of the Other sectors include short-term loans, trade credits as well as other payables to non-residents. Long-term liabilities include loans and bonds and notes issued by the companies and held by non-residents.

Data sources: Data on financial loans is collected through the statistical Form SPB-4 Report on the Financial Credit Liabilities of Residents to Non-residents, that covers data on the stock and the various types of transactions on the credits. As the Foreign Exchange Law envisages quarterly reporting of these liabilities, for the first two months of each quarter the BNB publishes estimations on the non-bank enterprises, based on the debt service schedules provided by companies on the loans extended to them and on estimations. Under the Trade credits sub-item are recorded the respective liabilities of residents to non-residents⁸ excluding trade credit liabilities towards foreign direct investors. Such data are collected from the BNB through Form SPB-6B Report on the liabilities of local bodies to non-residents. As the Foreign Exchange Law envisages quarterly reporting of these liabilities, for the first two months of each quarter the BNB publishes estimations for the stock of trade credits. Data on liabilities of the households is collected through the annual statistical Form SPB-8 Report on the Assets and Liabilities of Resident Physical Persons to Non-residents.

⁸ For a definition of trade credits, see "Balance of Payments Manual", IMF, 5-th edition, 1993, chapter XX, para. 414, as well as "External Debt statistics: Guide for Compilers and Users", Chapter Three, para.133.

⁷ "External Debt Statistics: Guide for Compilers and Users, IMF 2003, para 2.10

Direct investment: Intercompany lending

In accordance with the international methodology on external debt statistics a distinction is made between liabilities owed to direct investors⁹ (*Intecompany Lending*) and such owed to other creditors. Liabilities related to direct investment relationship are separately identified (equity liabilities arising from direct investment i.e. equity capital and reinvested earnings except nonparticipating, preferred shares are excluded from external debt). Liabilities related to direct investment are treated as a long-term debt.

B. By creditors

In accordance with the structure recommended by the *External Debt Statistics: Guide for Compilers and Users* quarterly external debt stock tables by creditor sectors are prepared and published.

C. Public Sector and Private Sector External Debt

In accordance with para. 5.5-5.6 of the *External Debt Statistics: Guide for Compilers and Users, IMF 2003*, the public sector external debt comprises of the debt of sector General Government, sector Monetary Authorities, the public banks, the public non-financial enterprises, as well as of the government guaranteed debt of the private sector. The private sector external debt comprises of the banks' and non-financial enterprises' debt, which is not included in the public and publicly guaranteed external debt. The data are monthly.

III. PERIODICITY, FREQUENCY AND TIMELINESS OF THE GROSS EXTERNAL DEBT PUBLICATIONS

The Bulgarian National Bank compiles and publishes data on the stock of the gross external debt of the country, the debt service payments and the disbursements on a monthly basis. The external sector debt indicators, including external debt indicators, are also disseminated monthly.

The Bulgarian National Bank publishes the data according to its advance release calendar. In the case of a change, the BNB informs the users on the new release date at least a week before the advance date.

IV. DATA REVISION POLICY

The data revisions policy of the Bulgarian National Bank is based on the following principles:

- (i) Each monthly publication includes revisions of the data for the previous three months, and each quarterly publication includes revisions of the monthly data for the whole current year.
- (ii) When on-going changes are made due to additional information collected, as well as resulting from elimination of errors, the Bulgarian National Bank timely informs the users through the monthly press releases, as well as through the notes at the end of the external debt tables.

⁹ The BNB follows the international definition of direct investment according to which the acquisition of 10% or more of the voting power in the investment enterprise is considered to establish a direct investment relationship.

(iii) When significant revisions are made due to changes in the methodology for reporting of certain external debt components or for other reasons, the Bulgarian National Bank publishes in advance information on the changes, in order to facilitate the users of the data.

V. DATA DISSEMINATION

The Bulgarian National Bank publishes the monthly gross external debt data on the web site of the Bulgarian National Bank – http://www.bnb.bg. The data are published also in the BNB Monthly Bulletin and in the semi-annual and in the annual official reports of the Bulgarian National Bank. Data are simultaneously released to all interested parties.

VI. CONTACTS

If you have any questions on the methodology applied by the Bulgarian National Bank or on the gross external debt data published, please do not hesitate to contact Mr. Emil Dimitrov, director of the Statistics Directorate, via e-mail at Dimitrov.E@bnbank.org, and Mrs. Liliana Bancheva, head of the Balance of Payments and External Debt Division, via e-mail at Bancheva.L@bnbank.org, or by mail to the following address:

Preliminary data as of December 29, 2016. The data are compiled in accordance with IMF 6-th edition of the "Balance of Payments and International Investment Position Manual".

The methodological notes on the compilation of the IIP data are published at the internet page of the BNB - www.bnb.bg In accordance with the BNB practice and with the ECB data revision requirements (included in the ECB Timetable for Exchange of Balance of Payments, International

Investment Position and Reserve Assets Statistics within the ESCB), data for Q1 - Q2 2016 are revised.

² The EUR equivalent is calculated using e.o.p. exchange rates of the respective foreign currencies.

Preliminary data compiled in accordance with the Asset/Liability principle. Data are provided by direct investment companies reporting to BNB, Agency for Privatization, NSI, Central Depository, banks and others.

The 2014 data include only banks' data on reinvested earnings.

On the basis of the reports submitted to the BNB by the enterprises with financial credits received from non-residents.

Due to quarterly reporting data are subject to revisions.

Data on trade credits and advances-assets (paid advances and receivables from suppliers), reported to the BNB are included in this item.

Due to quarterly reporting data are subject to revisions.

Securities issued by non-residents and held by residents. Sources: On the basis of monthly banks', insurance companies and pension funds and other non-bank

The sources for Other sectors are BIS data and balance sheet data of other financial institutions. financial institutions reports and the quarterly reports of other investment intermediaries

Including monetary and non-monetary gold at market prices. Source: Issue Department of the BNB.

On the basis of the reports submitted to the BNB by the enterprises with financial credits lent to non-residents.

Due to quarterly reporting data are subject to revisions.

⁰ Data on trade credits and advances-liabilities (received advances and payables to suppliers), reported to the BNB are included in this item.

Due to quarterly reporting data are subject to revisions. ¹Source: Central Depository AD.

¹² Source: monthly banks' reports.

¹³ Data source: The Register of Government and Government-guaranteed Debt of the Ministry of Finance.

¹⁴Debt liabilities of the public companies and the government guaranteed debt are included. Debt liabilities of the public companies and the government guaranteed debt are excluded.

intercompany loans are excluded. Data comprise those credits (incl. revolving and intercompany lending) that are declared before the BNB and for which the BNB has received information.

⁵Special drawing rights allocations, which comprise liabilities to the IMF.

METHODOLOGICAL NOTES ON THE COMPILATION OF THE INTERNATIONAL INVESTMENT POSITION OF BULGARIA

(in accordance with the sixth edition of the Balance of Payments and International Investment Position Manual)

The Bulgarian National Bank is in charge of the compilation of international investment position (IIP) as part of the financial accounts of the country. The legal basis for the IIP compilation in Bulgaria is provided for in Article 42 of the Law on the Bulgarian National Bank (Adopted by the 38th National Assembly on 5 June 1997; published in the Darjaven Vestnik, issue 46 of 10 June 1997; amended, issues 49 and 153 of 1998; issues 20 and 54 of 1999; issue 109 of 2001; issue 45 of 2002; issues 10 and 39 of 2005; issues 37 and 59 of 2006: in force on the date of entry into force of the Treaty of Accession of the Republic of Bulgaria to the European Union; issue 108 of 2006; issues 52 and 59 of 2007; amended, issues 24, 42 and 44 of 2009; amended; issues 97 and 101 of 2010). Data for the purposes of the IIP compilation are collected on the basis of Article 42 of the Law on the Bulgarian National Bank as well as on the basis of the Currency Law (Adopted by the 38th National Assembly on 8 September 1999; published in the Darjaven Vestnik, issue 83 of 21 September 1999; in force as of 1 January 2000; amended; issue 45 of 2002, issue 60 of 2003, issue 36 of 2004, issue 105 of 2005; issues 43, 54 and 59 of 2006, in force on the date of entry into force of the Treaty of Accession of the Republic of Bulgaria to the European Union; amended, issue 24 of 2009, effective as of 31 March 2009; amended, issues 16, 23 and 96 of 2011) and Ordinance No 27 of the BNB (Issued by the Bulgarian National Bank on 13 March 2014; published in the Darjaven Vestnik, issue 27 of 25 March 2014). These data are processed by the "Balance of Payments and External Debt" Division within the Statistics Directorate of the BNB, ensuring its confidentiality. At present, the Bulgarian National Bank compiles and publishes the international investment position in accordance with the Sixth Edition of the "Balance of Payments and International Investment Position Manual" (IMF, 2008) and the "Recommendation of the European Central Bank of 23 January 2014 amending Recommendation ECB/2011/24 on the statistical reporting requirements of the European Central Bank in the field of external statistics (ECB/2014/2).

The IIP' methodology is conceptually related to that of the *System of National Accounts (SNA)*. The items of the international investment position correspond closely to the relevant categories of the rest of the world account in the SNA and the Gross External Debt.

There is a close relationship between the *International Investment Position* and the balance of payments as well. The BOP financial account measures an economy's transactions in external financial assets and liabilities, which affect the stock of external financial assets and liabilities measured in the international investment position.

I. ACCOUNTING PRINCIPLES AND CONVENTIONS

The time of recording of the stocks in the international investment position is as of the end of the reporting period.

Stocks valuations are based on market prices. If the actual market prices are not available, the average market prices are used as approximation.

Valuation (exchange rate or price) changes of the country's external assets and liabilities are included in the international investment position.

The units of account for the international investment position of Bulgaria are the EUR and the BGN. The conversion into the unit of account is made using the exchange rate at the end of the reporting period.

II. INTERNATIONAL INVESTMENT POSITION COMPONENTS

The IIP is the balance sheet of the country's stocks of external financial assets and liabilities at the end of a specific period. The primary level of classification in the i.i.p. statement is the distinction between assets and liabilities. The second level of classification by function is fully consistent with the b.o.p. financial account. The functional categories of assets and liabilities are (i) direct investment, (ii) portfolio investment, (iii) financial derivatives (other than reserves) and employee stock options and (iv) other investment. Included in assets are also the reserve assets held by the monetary authorities. The liabilities in the IIP are a broader concept than the liabilities that constitute the country's gross external debt, as they include equity related liabilities. The third level of classification is by investment instrument.

In the international investment position components are classified in the following main categories:

A. DIRECT INVESTMENT

Direct investment is a category of cross-border investment associated with a resident in one economy having control or a significant degree of influence on the management of an enterprise that is resident in another economy. As well as the equity that gives rise to control or influence, direct investment also includes investment associated with that relationship, including investment in indirectly influenced or controlled enterprises, investment in fellow enterprises, debt and reverse investment.

Direct investment covers most financial transactions and positions between affiliates resident in different economies. Investment income associated with direct investment positions is also included in direct investment.

Intercompany lending is used to describe direct investment debt positions between affiliated enterprises. It includes debt instrument positions (in debt securities, loans, trade credits and advances and other accounts payable) other than those between selected affiliated financial corporations (it is not classified as direct investment because it is not considered to be so strongly connected to the direct investment relationship). The financial corporations covered by this case are: deposit-taking corporations (both central banks and deposit-taking corporations other than the central bank); investment funds and other financial intermediaries except insurance companies and pension funds.

The Direct investment has two presentations: Asset/Liability presentation (used in the international investment position statistics) and Directional Principle presentation. The directional principle is a presentation of direct investment data organized according to the direction of the direct investment relationship. It can be contrasted with the asset/liability presentation of aggregates used in the presentation of the international investment position, which are organized according to whether the investment relates to an asset or a liability.

The difference between the asset-liability and directional presentations arises from differences in the treatment of reverse investment and some investment between fellow enterprises. Under the directional

principle, direct investment is shown as either direct investment abroad or direct investment in the reporting economy:

- (a) Direct investment abroad covers assets and liabilities between resident direct investors and their direct investment enterprises. It also covers assets and liabilities between resident and nonresident fellow enterprises if the ultimate controlling parent is resident. Direct investment abroad is also called outward direct investment.
- (b) Direct investment in the reporting economy includes all liabilities and assets between resident direct investment enterprises and their direct investors. It also covers assets and liabilities between resident and nonresident fellow enterprises if the ultimate controlling parent is nonresident. Direct investment in the reporting economy is also called inward direct

investment.

Under the directional principle, direct investment abroad and direct investment in the reporting economy include both assets and liabilities, and thus, negative values may arise.

Data on both the asset/liability and directional principle bases of compilation are useful for different kinds of analysis:

- Data on an asset/liability basis are consistent with monetary, financial, and other balance sheet data, so facilitating comparison between the datasets. These data are needed on an immediate counterparty basis to adequately monitor flows and positions. For instance, if a jurisdiction of convenience that is the home to large SPEs (special purpose entities) were to experience a currency or other financial crises, data users would find data sets that look through SPEs (or that net data for SPEs without separate identification of gross levels) to be of limited help. SPEs and other entities may transform debt to equity, long-term to short-term, local currency to foreign currency, fixed to variable rates, etc., and these transformations alter risk characteristics in important ways.
- Data on a directional principle basis assist in understanding the motivation for direct investment and take account of control and influence. In the directional presentation, reverse investment can be seen as equivalent to the withdrawal of investment. The directional principle may be particularly useful for an economy with large values of pass-through funds or round tripping, because the large investment flows into and out of a economy may not be of primary interest to analysts of direct investment.

The international investment position uses direct investment assets and direct investment liabilities (so that reverse investment is not netted in totals).

The BNB publishes FDI data according to both presentations.

Sources: The Bulgarian National Bank receives monthly data on direct investments in the country from the Privatisation Agency, from the Central Depository, from the reporting system of banks on transactions between residents and non-residents, from notaries and registry offices; quarterly data from the Financial Supervision Commission, from the direct investment enterprises, from the Banking Supervision Department of the BNB, from the insurance companies and pension insurance companies; annual data from the NSI on foreign direct investment stock in enterprises from the non-financial sector.

For data on direct investments abroad the Bulgarian National Bank uses the information from FDI declaration forms, from quarterly reports of non-financial sector enterprises and from the reporting system of banks on transactions between residents and non-residents.

B. PORTFOLIO INVESTMENT

Portfolio investment is defined ascross-border positions involving debt or equity securities or investment fund' shares, other than those included in direct investment or reserve assets. Debt securities are subdivided into long-term (with an original maturity of one year or more) and short-term (with an original maturity of less than one year). The stocks of portfolio investment assets cover securities issued by non-residents and held by residents. The stocks of portfolio investment liabilities cover securities issued by residents and held by non-residents.

Securities are debt and equity instruments that have the characteristic feature of negotiability.

Sources: The *main sources* of information on the liabilities side of the *Portfolio investment* are the data provided by the Ministry of Finance, the Bulgarian National Bank, banks and the Central Depository. Data on the assets side of the *Portfolio investment* is provided by banks and non-bank custodians (which give information about their and their clients' portfolio investments), non-bank financial institutions, insurance companies and pension funds, the Bulgarian National Bank and the Ministry of Finance.

C. FINANCIAL DERIVATIVES

The assets and liabilities in financial derivatives (other than reserves) and employee stock options include positions in forward and future contracts, swaps, options, etc.

Sources: The main source of information are the monetary financial institutions.

D. OTHER INVESTMENT

Other investment covers other equity, currency and deposits, loans, trade credits and advances, and other accounts receivable/payable. The liability position includes also the SDR liabilities to the IMF.

The *Currency and Deposits* component presents on the assets side the positions in the residents' currency deposits held abroad, and on the liabilities side – the positions in the liabilities of the resident banks to non-residents in domestic and foreign currency.

Sources: The main sources on the asset side are the BIS-Basel and the balance sheet data of deposit taking corporations and other financial institutions. On the liabilities side data are provided by the deposit taking corporations and the BNB.

Loans item includes outstanding positions (including accrued interest) on short- and long-term loans between residents and non-residents (if no issue of a tradable security is involved with these loans).

Sources: Data on the item *Loans* (assets and liabilities) is received by the Ministry of Finance, the Bulgarian National Bank, the banks and directly by the enterprises that have lent to or borrowed from abroad. The companies report on a quarterly or an annual basis to the BNB. The monthly data on *Loans*, *Other sectors* (assets and liabilities) is revised upon receipt of the respondents' reports.

According to the IIP conventions trade credit arises from the direct extension of credit from a supplier to a buyer, i.e. this is a credit extended by a trade partner without issue of a tradable security.

Items *Other accounts receivable/payable* include all transactions on miscellaneous accounts receivable and payable not included elsewhere and transactions in arrears.

Sources: The main source of information on *trade credits and advances* and *other accounts receivable/payable* (assets and liabilities) are the quarterly reports of enterprises on their assets/liabilities to non-residents.

E. RESERVE ASSETS

Reserve assets include those external assets that are readily available to and controlled by the central bank (government) for direct financing of balance of payments imbalances. The reserve assets comprise monetary gold, SDRs, reserve position in the Fund, foreign exchange assets (consisting of currency and deposits and securities), and other claims. The entries under this category pertain to transactions in the BNB's external holdings which are administered by the Issue Department.

III. PERIODICITY, FREQUENCY AND TIMELINESS OF THE BALANCE OF PAYMENTS PUBLICATIONS

The Bulgarian National Bank compiles and publishes the international investment position of the country on a quarterly basis. The schedule of the Bulgarian National Bank is to publish the data within three months after the close of the reference period.

IV. DATA REVISION POLICY

Revisions to the preliminary international investment position data are mandatory international practice. They are particularly important in compiling the balance of payments and international investment position because of the short deadlines after the end of the reporting period, in which the data is compiled and published. Various sources (banks, non-bank financial enterprises, direct investment enterprises, the Central Depository, the National Statistical Institute, *etc.*) are used for the data compilation. The incoming data from these sources are with different frequency, timeliness (deadline for submitting the information after the reporting period) and coverage. The different frequency and timeliness of the incoming information necessitate these revisions.

The periodic data revisions that the BNB implements are in compliance with the ECB Timetable for Exchange of Balance of Payments, International Investment Position and Reserve Assets Statistics within the ESCB (which includes a data revision timetable), as well as with the Eurostat Timetable for Exchange of data and policy of revisions in the European Union. Observing this policy of revisions ensures the comparability of statistics between Member States of the European Union and the European System of Central Banks. These revisions provide users with timely information on the updated data by separate items¹. Following the requirements of the ECB and Eurostat Timetables, the policy on revisions pursued by the Bulgarian National Bank is based on the following principles:

(i) Each publication might include, if necessary revisions of the data for the previous reporting period. With the forth quarter data, published in March, and the second quarter data, published in September of the current reporting year, the timetables give opportunity for revising the data for the previous up to four years, if necessary. In December with the publication of the data for the third quarter, data revision for the current and previous years is possible, if necessary.

(ii) When on-going changes are made due to additional information collected, as well as resulting from elimination of errors, the Bulgarian National Bank timely informs the users through the notes at the end of the IIP table.

(iii) When significant revisions are made due to changes in the methodology for reporting of certain IIP components or other reasons, the Bulgarian National Bank publishes in advance information on the changes to facilitate the users of the data.

V. DATA DISSEMINATION

The Bulgarian National Bank disseminates the quarterly IIP data on its web site – *http://www.bnb.bg*. The data is published also in the *Bulgarian National Bank Monthly Bulletin*.

Data on the international investment position of the country is included in the semi-annual and in the annual official reports of the Bulgarian National Bank.

Data are simultaneously released to all interested parties.

VI. CONTACTS

If you have any questions on the methodology applied by the Bulgarian National Bank or on the international investment position data published, please do not hesitate to send them to Mr. Emil Dimitrov, director of the Statistics Directorate, via e-mail at Dimitrov.E@bnbank.org, and Mrs. Liliana Bancheva, head of the Balance of Payments and External Debt Division, via e-mail at Bancheva.L@bnbank.org, or by mail to the following address:
