GOVERNMENT SECURITIES INTERBANK MARKET

Interbank Market of Government Securities Issued under Regulation No. 5

In August 1999 financial institutions concluded 656 transactions in government securities (including the number and volume of reverse repurchase agreements) issued for budget deficit financing, totaling BGN 672,434.2 thousand nominal value, an increase of BGN 40,647.6 thousand, or 6.43%, compared with the same period of the previous year (Chart 1).

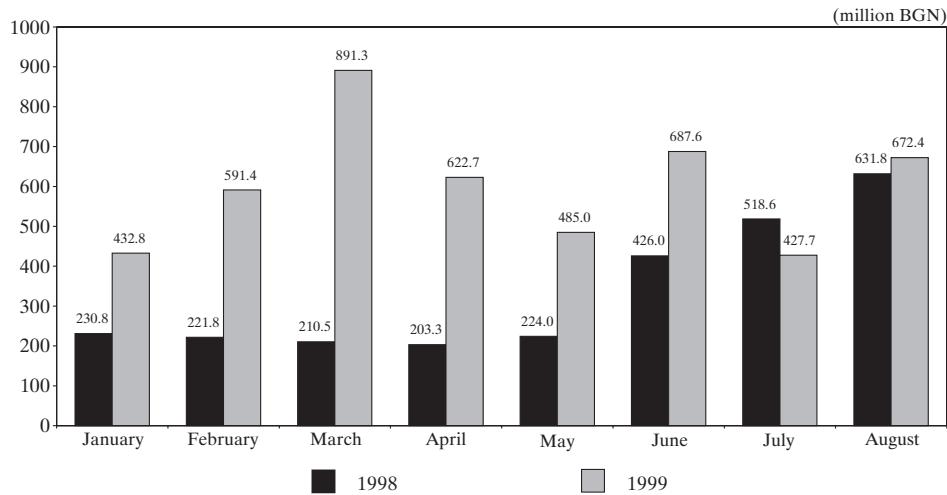

The volume of secondary market transactions in government securities between primary dealers issued under Regulation No. 5 (reverse repo agreements volume excluded) totaled

BGN 339,977.4 thousand, including three-month treasury bills of BGN 9,975.2 thousand, six-month of BGN 1,101 thousand, twelve-month of BGN 167,258.5 thousand, two-year of BGN 144,408.7 thousand and up to five years of BGN 17,234 thousand (Chart 2). In August sales in government securities intensified compared with the previous month, their volume increasing by 37.3%. Structurally, demand for twelve-month treasury bonds occupied the largest share, increasing by 88.7%

In August 1999 secondary market transactions on behalf of clients (i. e. under Article 20 of Regulation No. 5) continued to decrease, accounting for BGN 148 thousand. Transactions be-

tween nonprimary dealers and physical or legal persons (i. e. transactions under Article 21 of Regulation No. 5) dramatically decreased compared with July, amounting to BGN 101.5 thousand. The volume of transactions between primary and nonprimary dealers (under Article 14 of Regulation No. 5) increased from July, reaching BGN 60,768.3 thousand, including bids approved at the government securities auctions on behalf of nonprimary dealers of BGN 1,020 thousand.

Interbank Market of Government Securities Issued as a Result of Structural Reform

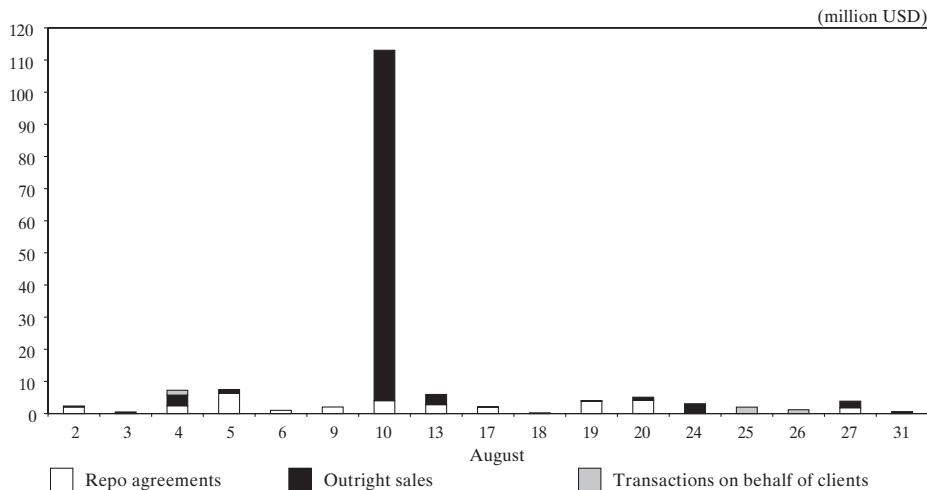

In August financial institutions concluded 58 transactions in USD-denominated government securities issued as a result of structural reform, totaling USD 161.8 million nominal value (in-

cluding the number and volume of reverse repurchase agreements). In August, 22 outright transactions of USD 124.2 million, 27 repo agreements of USD 32.5 million, and 9 transactions on behalf of clients of USD 5.1 million (under Articles 14, 20 and 21 of Regulation No. 5) were concluded. Nineteen transactions of USD 4.8 million were concluded pursuant to Article 14, para. 6 of Regulation No. 5.

In August neither government securities transactions in levs issued as a result of structural reform, nor transactions in forex guaranty government securities were concluded. Seven EUR-denominated repo agreements, totaling EUR 3.5 million were concluded.

In August trade in forex ZUNK bonds intensified: transaction volumes increased by 2.5 times compared with the previous month, with distribution (in terms of

days) characterized mostly as uneven due to specificity of some transactions (Chart 3).

Interbank market prices decreased on the previous month, ranging between USD 48.83 and USD 60; in general they did not reflect price movements of Bulgarian Brady bonds in the international markets. The dramatic price drop on 4 August was incidental.

Government Securities Repo Agreements in the Interbank Market

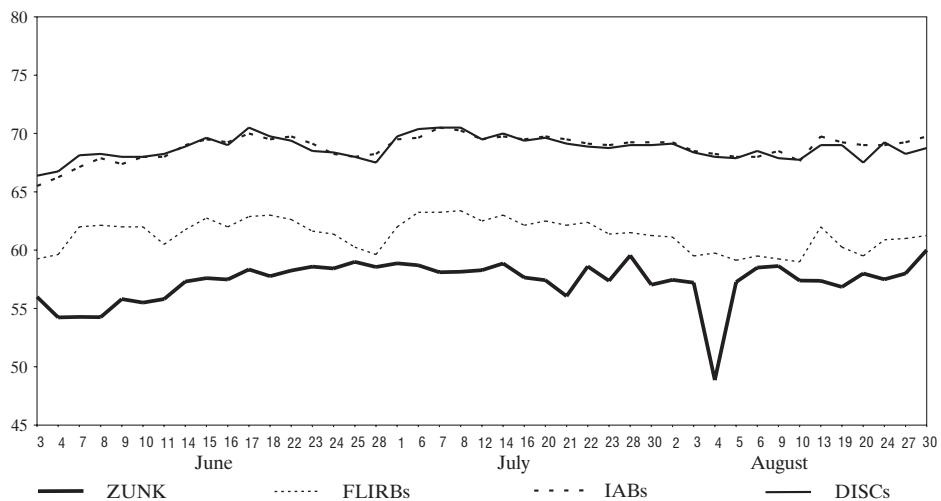

In August the volume of repo agreements traded in the secondary interbank market was uneven (Chart 5). The high was registered on 3 August 1999 due to increased demand for funds by commercial banks, consistent with minimum required reserves regulation. On the same

date interest rates on interbank deposits significantly rose.

In August the yield of repo agreements reflected the insignificant changes in the base interest rate: a decrease in the average term of repo agreements (in terms of days) and an increase in the volume of government securities outright transactions. The yield of repo agreements in government securities was higher than the yield of interbank deposits of up to one-day and seven-day maturities. The yield of transactions of up to three-day and one-month maturities was lower than that of interbank deposits of the same maturities (Chart 6). August was characterized by enhanced activity in the interbank secondary market compared with the previous month, most intensive on the days of minimum required reserves regulation with the BNB.

LIBOR – average six-month LIBOR (London Interbank Offered Rate) quoted by the Reuters for the preceding interest period.
STRIPS – Separate Trading of Registered Interest and Principal of Securities.

In compliance with Article 8 and Article 9, para. 1, items 1 and 2 of the LSPDABC, the Ministry of Finance issues leva and foreign currency guaranty government securities. These are issued under the following conditions:

- in levs – 7-year redemption term; interest – BIR for the respective period, payable semianually; redemption schedule – equal annual installments.
- in US dollars – 3-year redemption term; interest – six-month LIBOR plus 2 percent, payable semianually; redemption schedule – one-off at end-period; transferable only between commercial banks based in this country. Interest coupons are separated from the principal and are freely transferable, provided that the MF and the BNB approve a STRIPS program for the banks applying to trade in interest coupon derivative financial instruments, to be registered in BNB Government Securities Depository. The Law on Bank Deposit Guaranty (published in the State Gazette, issue 49 of 29 April of 1998) repeals the Law on State Protection of Deposits and Accounts with Commercial Banks in Respect Whereof the BNB Has Petitioned the Institution of Bankruptcy Proceedings. The repealed law is applicable to deposits and accounts with banks which had been declared insolvent before the enforcement of the Law on Bank Deposit Guaranty, as well as to the special fund for state protection of deposits and accounts and guaranty government securities service. Principles are based on actual data as of 31 August 1999.

Target Issues of Government Securities Earmarked for Physical Persons

Between 21 July and 17 August 1999¹ the MF offered for sale six issues of government securities earmarked for physical persons under the following conditions:

- Two issues of six-month target discount government treasury bills yielding 5.9% annually. Their average weighted monthly yield is 0.49% (Chart 13). No

repurchases are effected by the clients prior to maturity of these government securities.

- Two issues of twelve-month target discount government treasury bills ensuring 6.99% annual yield. Their average weighted monthly yield is 0.58% (Chart 14). Reverse repurchase of these government securities starts six months after their issue at prices set by the issuer, with their effective annual yield increasing proportionally from beginning to end of the reverse repurchase period.

- Two issues of two-year savings government treasury bonds with fixed annual yield in the form of semiannual interest payment, effective as of the issue date. The last interest payment is effected at maturity together with the

¹ The period under review starts from the issue date and finishes at the end of issue periods, since data is obtained and registered after the sale of a particular issue has been finished. Therefore, this period does not correspond to the calendar month and includes two issue periods or four weeks.

nominal value of government securities. The annual interest rate of the first interest coupon is 8%, the second 9%, the third 10%, and fourth 11%. Reverse repurchases of these bonds start six months after their issue at prices set by the issuer. Reverse repurchase price of two-year savings government securities issues is set by accruing the previous coupon annual rate of interest to the nominal value for the period since the latest interest payment until the reverse repurchase date.

Sales of these government securities totaled BGN 995.3 thousand nominal value: six-month treasury bills of BGN 126.6 thousand (12.72%), twelve-month treasury bills of BGN 75.1 thousand (7.55%) and two-year savings treasury bonds of BGN 793.6 thousand

(79.73%). Data shows that during the reporting period investors opted for two-year savings treasury bonds (Chart 15) generating higher yield.

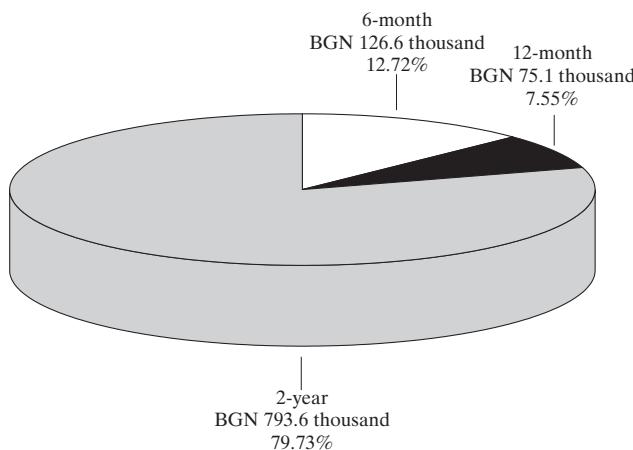

Sales of Government Securities Issued for Structural Reform

The volume of government securities acquired by individuals, companies and nonbank financial institutions and issued for structural reform decreased significantly in August. As of 31 August total sales of government securities accounted for BGN 305,917 thousand (including sales to foreign investors), a decrease of BGN 202,582.4 thousand (39.8%) from July (Chart 17).

The bulk of government securities issued for structural reform was sold by
