# GOVERNMENT SECURITIES INTERBANK MARKET

## Interbank Market of Government Securities Issued under Regulation No. 5

In November 1999 financial institutions concluded 380 transactions in government securities (including the number and volume of reverse repurchase agreements) issued for budget deficit financing, totaling BGN 369,419.6 thousand nominal value, a two-fold increase compared with the same period of the previous year (BGN 167,535.2 thousand, Chart 1).

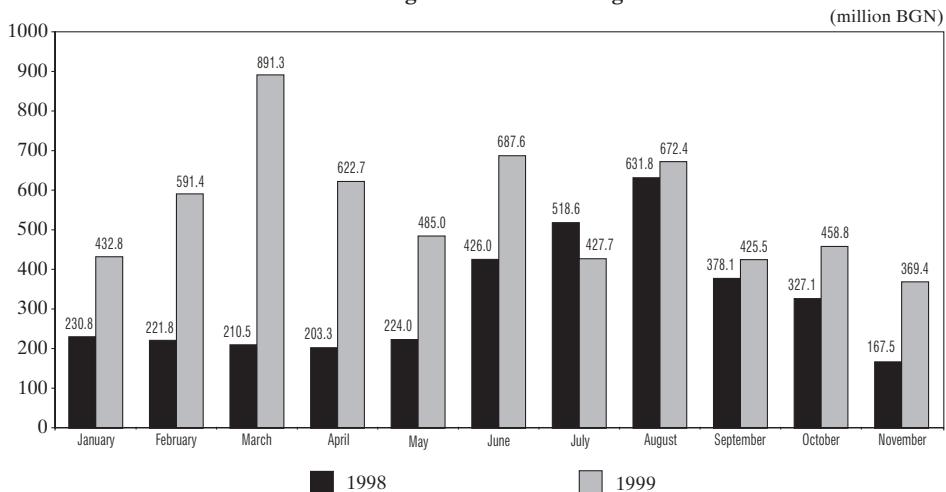

Over the review period the volume of secondary market transactions in government securities between primary dealers issued under Regulation No. 5 (reverse repo agreements volume excluded) to-

taled BGN 213,826.1 thousand, including three-month treasury bills of BGN 8,478.5 thousand, twelve-month of BGN 91,640.5 thousand, two-year of BGN 92,812.1 thousand and up to five years of BGN 20,895 thousand (Chart 2). In November sales in government securities dropped compared with the previous month, their volume decreasing by 17.8%. Structurally, two-year treasury bonds occupied the largest share. Sales of three-month government securities significantly increased in November: their volume rose five times from the previous month.

In November 1999 secondary market transactions on behalf of clients (i.e. under Article 20 of Regulation No. 5) in-

creased almost two times on the previous month, accounting for BGN 2,588.5 thousand. Transactions between nonprimary dealers and physical or legal persons (i.e. transactions under Article 21 of Regulation No. 5) significantly increased compared with October, reaching BGN 473.3 thousand. The volume of transactions between primary and nonprimary dealers (under Article 14 of Regulation No. 5) decreased from October, reaching BGN 52,790.4 thousand, including bids approved at the government securities auctions on behalf of nonprimary dealers of BGN 1,655 thousand.

#### **Interbank Market of Government Securities Issued as a Result of Structural Reform**

In November financial institutions concluded 68 transactions in USD-de-

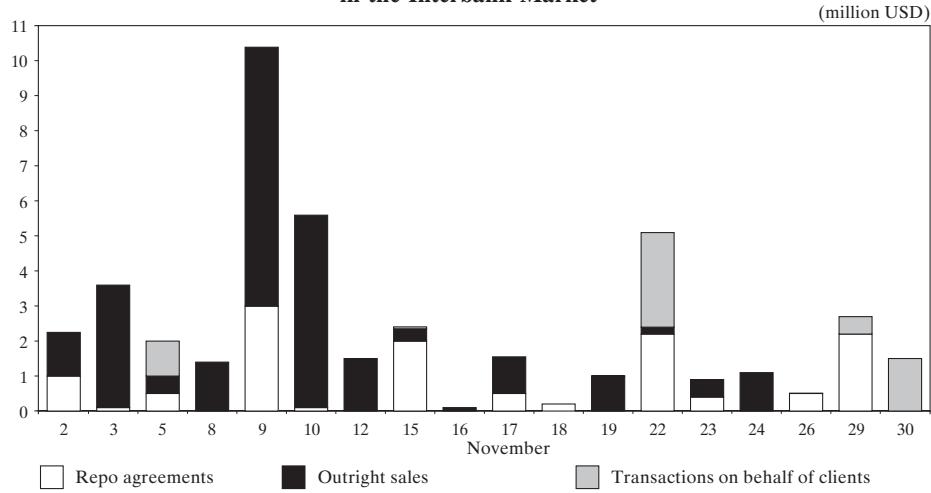

nominated government securities issued as a result of structural reform, totaling USD 49.9 million nominal value (including the number and volume of reverse repurchase agreements). In November, 33 outright transactions of USD 25 million, 23 repo agreements of USD 14.7 million, and 12 transactions on behalf of clients of USD 10.3 million (under Articles 14, 20 and 21) were concluded.

In November one lev-denominated transaction on behalf of clients in government securities issued as a result of structural reform of BGN 547 thousand and ten transactions in EUR-denominated government securities, totaling EUR 6.2 million, were concluded.

One transaction of BGN 827.5 thousand, 19 transactions of USD 6.9 million, and nine transactions of EUR 5.7 million were concluded pursuant to Article 14, para. 6 of Regulation No. 5.

market was characterized by a calm trade and lower daily turnover compared with the previous month. The average daily volume of transactions registered in November was USD 2.6 million. The structure of concluded transactions changed: repo agreements increased and transactions concluded on behalf of clients decreased.

Prices on forex long-term bonds on domestic debt rose by USD 2 – 3 and ranged between USD 67 and USD 68.5 per USD 100 nominal value by the end of month.

#### Government Securities Repo Agreements in the Interbank Market

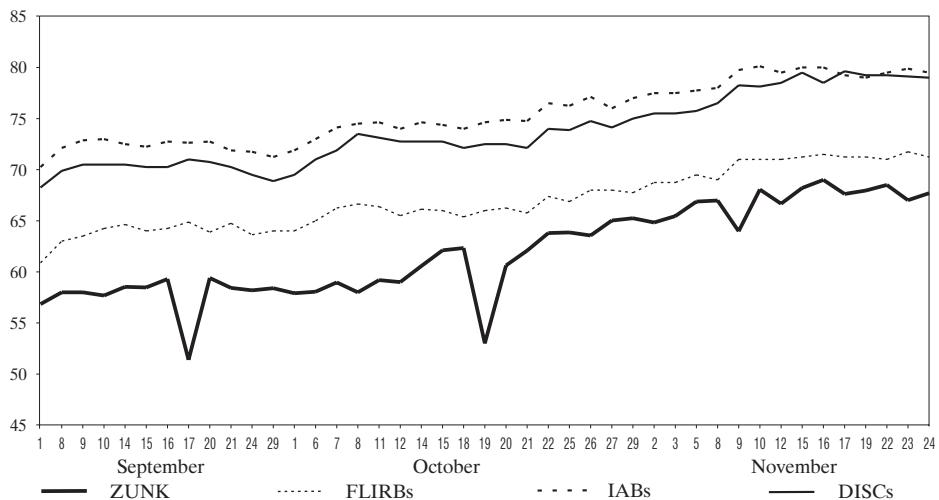

In November the volume of repo agreements traded in the secondary interbank market was uneven (Chart 5). Transactions volume increased in the beginning and at the end of the review pe-

riod, reaching a high on 30 November, primarily due to the increased demand for funds by commercial banks, consistent with minimum reserve requirements regulation with the BNB. During the period under review a considerable increase in the interest rates of interbank deposits occurred. Trade marked the low on 25 November due to injection of liquidity into banks from government securities interest and maturities.

The unchangeable base interest rate in November brought about a relatively stable yield of repo agreements. The average term of repo agreements (in terms of days) increased. The yield of repo agreements in government securities was higher than the yield of interbank deposits of up to one-day and three-day maturities. The yield of transactions of up to seven-day and up to one-month maturity was lower than that of interbank deposits of the same maturity (Chart 6).

LIBOR – average six-month LIBOR (London Interbank Offered Rate) quoted by the Reuters for the preceding interest period.  
STRIPS – Separate Trading of Registered Interest and Principal of Securities.

In compliance with Article 8 and Article 9, para. 1, items 1 and 2 of the LSPDACB, the Ministry of Finance issues lev and foreign currency guaranty government securities. These are issued under the following conditions:

- in levs – 7-year redemption term; interest – BIR for the respective period, payable semianually; redemption schedule – equal annual installments.
  - in US dollars – 3-year redemption term; interest – six-month LIBOR plus 2 percent, payable semianually; redemption schedule – one-off at end-period; transferable only between commercial banks based in this country. Interest coupons are separated from the principal and are freely transferable, provided that the MF and the BNB approve a STRIPS program for the banks applying to trade in interest coupon derivative financial instruments, to be registered in BNB Government Securities Depository.
- The Law on Bank Deposit Guaranty (published in the State Gazette, issue 49 of 29 April of 1998) repeals the Law on State Protection of Deposits and Accounts with Commercial Banks in Respect Whereof the BNB Has Petitioned the Institution of Bankruptcy Proceedings. The repealed law is applicable to deposits and accounts with banks which had been declared insolvent before the enforcement of the Law on Bank Deposit Guaranty, as well as to the special fund for state protection of deposits and accounts and guaranty government securities service.

Principals of lev guaranty government securities are based on actual data as of 30 November 1999.

### Target Issues of Government Securities Earmarked for Physical Persons

Between 27 October and 23 November 1999<sup>1</sup> the MF offered for sale six issues of government securities earmarked for physical persons under the following conditions:

- Two issues of six-month target discount government treasury bills yielding 5.9% annually. Their average weighted monthly yield is 0.49% (Chart 13). No repurchases are effected by the clients

<sup>1</sup> The period under review starts from the issue date and finishes at the end of issue periods, since data is obtained and registered after the sale of a particular issue has been finished. Therefore, this period does not correspond to the calendar month and includes two issue periods or four weeks.

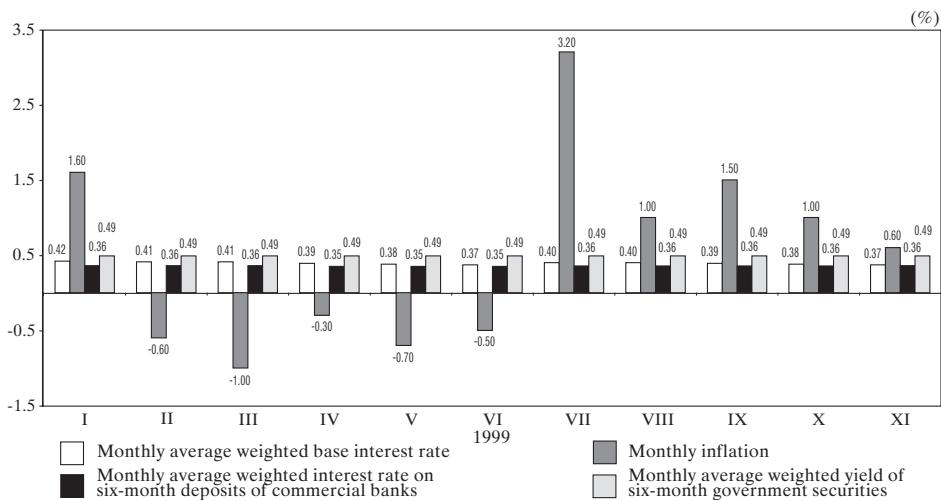

prior to maturity of these government securities.

- Two issues of twelve-month target discount government treasury bills ensuring 6.99% annual yield. Their average weighted monthly yield is 0.58% (Chart 14). Reverse repurchase of these government securities starts six months after their issue at prices set by the issuer, with their effective annual yield increasing proportionally from beginning to end of the reverse repurchase period.

- Two issues of two-year savings government treasury bonds with fixed annual yield in the form of semiannual interest payment, effective as of the issue date. The last interest payment is effected at maturity together with the nominal value of government securities.

The annual interest rate of the first interest coupon is 9%, the second 10%, the third 11%, and fourth 12%. Reverse repurchases of these bonds start six months after their issue at prices set by the issuer. Reverse repurchase price of two-year savings government securities issues is set by accruing the previous coupon annual rate of interest to the nominal value for the period since the latest interest payment until the reverse repurchase date.

Sales of these government securities totaled BGN 1,288.5 thousand nominal value: six-month treasury bills of BGN 82.2 thousand (6.38%), twelve-month treasury bills of BGN 43.7 thousand (3.39%) and two-year savings treasury bonds of BGN 1,162.6 thousand (90.23%), including BGN 0.1 thousand

to foreign physical persons. Data shows that during the reporting period investors opted for two-year savings treasury bonds (Chart 15) generating higher yield.

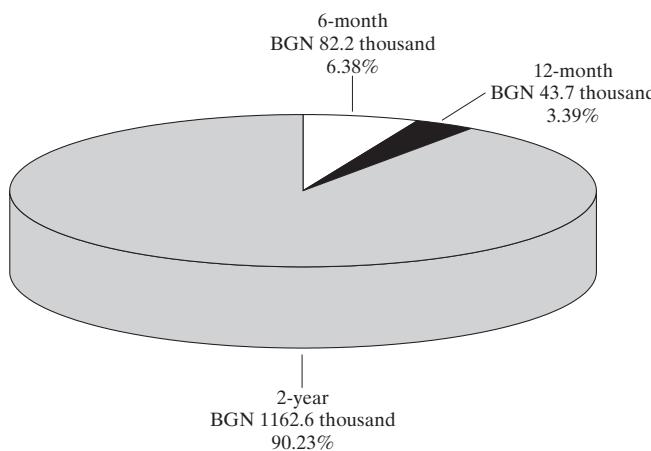

### **Investments in Government Securities Issued for Structural Reform**

The slight increase in the volume of government securities acquired by individuals, companies and nonbank financial institutions and issued for structural reform continued in November. As of 30 November total sales of government securities accounted for BGN 342,815.6 thousand (including sales to foreign investors), an increase of BGN 15,695.5 thousand from October (Chart 17).

# SALES OF GOVERNMENT SECURITIES FOR PARTICIPATION IN PRIVATIZATION TRANSACTIONS

In November long-term government bonds issued under Article 5 of ZUNK, totaling USD 0.03 million, were sold for participation in privatization. Pursuant to Article 5 of the Regulation on participation in privatization of holders of long-term government bonds issued under the terms of ZUNK, CM Decrees Nos. 244 of 1991, 186 of 1993 and 3 of 1994, these government securities were transferred to the MF account for participation in 7 privatization transactions as legal tender; they were canceled at the end of

November.

The average weighted price of the bonds issued under Article 5 of ZUNK and sold for participation in privatization was USD 66.98 per USD 100 nominal value (Chart 23).

In November no transfer transactions in government securities from issue No. 98 of 1993 (to be used as legal tender in privatization transactions) were registered.

In November pursuant to Article 1 of the Regulation on the procedure for uti-
