<sup>1</sup> Actual disbursements. Preliminary data. Data are recalculated in euro based on monthly average exchange rates of respective foreign currencies.<sup>2</sup> Data source: *Register of Government and Government Guaranteed Debt* of the Ministry of Finance. Preliminary data as of 26 February 2007. Excluding data on debt liabilities of public sector companies and government guaranteed debt.<sup>3</sup> Principal and interest payments on Brady bonds, Eurobonds, Global bonds and government securities held by non-residents.<sup>4</sup> In accordance with the residence concept, government securities issued and held by residents on international financial markets are subtracted from debt; therefore, they are shown with a minus sign. Deposits related to contingent liabilities are excluded.<sup>7</sup> Including principal and interest payments (excluding intercompany loans) registered by the BNB and on which the BNB has received information, as well as payments on government guaranteed debt (Source: *Register of Government and Government Guaranteed Debt* of the Ministry of Finance. Preliminary data as of 26 February 2007).<sup>8</sup> In compliance with the requirements of the *External Debt Statistics, Guide for Compilers and Users, IMF 2003*, paragraphs 3.14. and 7.5., disbursements related to direct investment are included in the long-term external debt service.<sup>9</sup> Data not included in the *Gross External Debt Service* tables by debtor and by creditor.<sup>10</sup> The net increase in the trade credit stock over the reporting month is reported in supplementary tables to the *Gross External Debt Disbursements* table, while the net decrease is reported in supplementary tables to the *Gross External Debt Service* table.

<sup>1</sup> In line with Resolution No. 149 of 16 December 2004 of the BNB Governing Council from 1 February the base interest rate is equal to the lev overnight index average (LEONIA, reference index of concluded and settled transactions in lev overnight deposits) for the business days over the previous calendar month (base period).

<sup>2</sup> Long-term interest rate for assessing convergence is determined on the basis of secondary market long-term bonds' yield to maturity (benchmark) issued by the Ministry of Finance and denominated in national currency. The ISMA formula at ACT/365 day count convention is used. Until December 2005 the data reflect primary market yield, while from January 2006, secondary market yield.

<sup>3</sup> The new business on time deposits, repos and loans category includes the new agreements during the reporting period (all contracts and conditions which define for the first time the interest rate on a deposit, repo or a loan, as well as all renegotiations of the conditions on an existing instrument, including those that are terminated/matured during the reporting period) as well as renegotiated under the same conditions deposits/repos during the period.

<sup>4</sup> The Household Sector includes NPISHs.

<sup>5</sup> The yield attained is the average weighted effective yield on individual transactions in the secondary market during the reporting period. The yield is calculated using the ISMA formula at ACT/365 day count convention. Until December 2005 the data reflect primary market yield, while from January 2006, secondary market yield.
