\* Including transactions of banks and non-bank financial institutions, which are primary dealers of government securities and which have current accounts with the BNB.

\*\* The period of excess reserves' statistical reporting (a calendar month) does not coincide with the period of minimum required reserves' maintenance under BNB Ordinance No. 21. Data on holidays are also used in calculating the daily average amount of excess reserves for the respective month.

Note: The average daily interest rate is the average-weighted rate of the operations effected during the day.

### 1.23. GOVERNMENT SECURITIES YIELD AND LONG-TERM INTEREST RATE<sup>5</sup> FOR CONVERGENCE ASSESSMENT PURPOSES

		Yield on BGN-denominated interest-bearing government securities on the secondary market <sup>1</sup>				Long-term interest rate
		3 years <sup>2</sup>	5 years	7 years <sup>3</sup>	10 years <sup>4</sup>	
2013	II	0.52	1.97	-	1.85	3.25
	III	-	2.27	2.19	2.51	3.54
	IV	0.69	1.95	1.79	2.30	3.47
	V	0.40	1.55	1.65	2.65	3.36
	VI	-	1.76	1.93	2.24	3.40
	VII	1.56	1.83	2.11	3.20	3.46
	VIII	1.19	2.35	-	2.54	3.51
	IX	0.57	2.19	-	2.48	3.64
	X	0.41	2.04	1.91	2.86	3.71
	XI	0.78	2.10	1.68	2.94	3.64
	XII	0.93	2.05	1.74	2.74	3.43
2014	I	1.11	2.12	1.54	2.03	3.56
	II	0.79	1.88	1.48	1.91	3.58

<sup>1</sup> The average-weighted effective yield achieved on the secondary market during the reporting period. The yield is calculated using the ISMA formula at ACT/365 day count convention. Government securities are grouped according to their original maturity.

<sup>2</sup> Government securities with maturity of three years also include issues of three years and six months.

<sup>3</sup> Government securities with maturity of seven years also include possible issues of seven years and three months.

<sup>4</sup> Government securities with maturity of ten years also include issues of ten years and six months.

<sup>5</sup> LTIR – long-term interest rate for convergence assessment purposes. It is determined on the basis of the secondary market yield to maturity of a long-term bond (benchmark) issued by the Ministry of Finance (*Central Government* sector) and denominated in national currency. The ISMA formula at ACT/365 day count convention is used.

<sup>1</sup> Monthly values are calculated as a simple average of daily values.

<sup>2</sup> Since 1 February 2005, according to a Resolution of the BNB Governing Council, the BIR equals the simple average of the daily values of LEONIA (LEV OverNight Index Average, a reference index of the conducted and settled transactions in overnight deposits in BGN) for the business days of the previous calendar month (base period).

<sup>3</sup> ECB data.

\* Analytical reporting of the balance of payments in accordance with IMF 5th edition of the Balance of Payments Manual.

<sup>1</sup> Preliminary data. Data for January 2012 – December 2013 period are revised in compliance with the BNB revision practice and the ECB revision requirements (set out in the Timetable for Exchange of Balance of Payments, International Investment Position and Reserve Assets Statistics within the ESCB). The balance of payments data for January 2014 are to be revised with the February 2014 report.<sup>2</sup> Preliminary data by the NSI as of 7 March 2014 including Intraday system data on EU countries and customs declarations data on countries outside the EU. Imports estimates at FOB prices based on a BNB and NSI methodology.<sup>3</sup> Freight transportation estimates following a methodology of the BNB and the NSI.<sup>4</sup> Estimates following a methodology of the BNB. Data about the number of foreigners who travelled abroad are based on preliminary information provided by the NSI and the BNB estimation of the receipts/expenditure on one trip.<sup>5</sup> Estimates following a methodology of the BNB.<sup>6</sup> A minus sign denotes flight of capital (increase in assets or decrease in liabilities).<sup>7</sup> The Capital account includes Capital transfers and Acquisition/disposal of non-produced non-financial assets.<sup>8</sup> Preliminary data. Data provided by the companies with international interest, the Privatisation Agency, the NSI, the Central Depository, banks, etc. Data include only reinvested earnings of banks.<sup>9</sup> Data based on reports of residents' obligations on financial credits to non-residents received at the BNB. Due to quarterly reporting of these liabilities, data are subject to revision.<sup>10</sup> The item includes all transactions associated with acquisitions and mergers.<sup>11</sup> Data source: banks, other non-bank financial institutions, insurance corporations and pension funds.<sup>12</sup> Bulgaria's external claims on trade credits (paid advances and claims on suppliers) are included in this item. Due to quarterly reporting of these liabilities, data are subject to revision.<sup>13</sup> Other sectors' data provided by the BIS. Data up to September 2013, which were published in January 2014, are used.<sup>14</sup> Bulgaria's external liabilities on trade credits (received advances and obligations to suppliers) are included in this BNB item. Due to quarterly reporting of these liabilities, data are subject to revision.<sup>15</sup> Excluding BNB reserve assets changes due to the exchange rate and price changes, changes associated with the creation of reserve assets (monetarization/demonetarization of SDR) and reallocation of gold and allocation of SDR) and reclassification. A minus sign denotes an increase in reserve assets and a positive sign a decrease.

<sup>1</sup> Preliminary data. Euro equivalent is calculated using average monthly exchange rates of respective foreign currencies as of end of period.<sup>2</sup> Data source: *Register of Government and Government Guaranteed Debt* of the Ministry of Finance. Preliminary data for January 2014 as of 19 February 2014.<sup>3</sup> Excluding debt liabilities of public sector companies and government securities (denominated in BGN and foreign currency) held by non-residents included in this item.<sup>4</sup> Brady bonds, Eurobonds, Global bonds and government securities issued and held by residents on international financial markets are subtracted from debt. Therefore, they are reflected with a negative sign (nominal value).<sup>5</sup> Data source: banks (including data on private and state-owned banks). Deposits related to contingent liabilities are excluded.<sup>6</sup> Data on public and private companies, including government guaranteed loans. Intercompany loans are excluded. Data cover only loans registered by the BNB and on which the BNB has received information.<sup>7</sup> In compliance with the requirements of the *External Debt Statistics*, *Guide for Compilers and Users*, IMF, 2003, paragraphs 3.14 and 7.5, liabilities related to direct investment are included in the long-term external debt.<sup>8</sup> Data are included in the *Gross external debt* amount.<sup>9</sup> Due to quarterly reporting of firms, data are subject to revisions.<sup>10</sup> In line with the EU legal acts in force and the fifth edition of the *IMF's Balance of Payments Manual*, 1993, the amount of SDR allocated in August and September 2009 is reflected only in the reserve assets. According to the sixth edition of BOP Manual, SDR are to be reported as long-term liabilities of the central bank. For the purposes of the national and European statistics of the external sector, the BNB will meet these requirements in September with the Report for July 2014.

Deposits related to contingent liabilities are excluded.																		
Including received loans (excluding intercompany loans) declared at the BNB and on which the BNB has received information, as well as government guaranteed loans (Source: Register of Government and Government Guaranteed Debt of the Ministry of Finance). Preliminary data for January 2014 as of 19 February 2014).																		
This sub-item represents the change in liabilities to non-residents resulting from transactions with residents. The transfer of bonds from residents to non-residents represents an increase in liabilities to non-residents and is reflected with a positive sign.																		
Data source: banks.																		
Source: BNB.																		

<sup>1</sup> Actual external debt disbursements. Preliminary data. Data are recalculated in euro based on monthly average exchange rates of respective foreign currencies.

<sup>2</sup> Data source: *Register of Government and Government Guaranteed Debt* of the Ministry of Finance. Preliminary data for January 2014 as of 19 February 2014. Excluding data on debt liabilities of public sector companies and government guaranteed debt.

<sup>3</sup> This sub-item represents the change in liabilities to non-residents resulting from transactions with residents. The transfer of bonds from residents to non-residents represents an increase in liabilities to non-residents and is reflected with a positive sign.

<sup>4</sup> Data source: banks.

<sup>5</sup> Deposits related to contingent liabilities are excluded.

<sup>6</sup> Including received loans (excluding intercompany loans) declared at the BNB and on which the BNB has received information, as well as government guaranteed loans (Source: Register of Government and Government Guaranteed Debt of the Ministry of Finance). Preliminary data for January 2014 as of 19 February 2014).

<sup>7</sup> In compliance with the requirements of the *External Debt Statistics, Guide for Compilers and Users*, IMF, 2003, paragraphs 3.14 and 7.5, disbursements related to direct investment are included in the long-term external debt.

<sup>8</sup> Data not included in the *Gross External Debt Disbursements* table by institutional sector.

<sup>1</sup> Actual disbursements. Preliminary data. Data are recalculated in euro based on monthly average exchange rates of respective foreign currencies.<sup>2</sup> Data source: *Register of Government and Government Guaranteed Debt* of the Ministry of Finance. Preliminary data for January 2014 as of 19 February 2014. Excluding data on debt liabilities of public sector companies and government guaranteed debt.<sup>3</sup> In accordance with the residence concept, external debt payments are reduced with payments on securities held by residents and are increased with the securities (issued by residents in the international financial markets) which changed owners from non-residents to residents.<sup>4</sup> Data source: banks. Deposits related to contingent liabilities are not included.<sup>5</sup> Including principal and interest payments (excluding intercompany loans) declared at the BNB and on which the BNB has received information, as well as payments on government guaranteed debt.<sup>6</sup> In compliance with the requirements of the *External Debt Statistics, Guide for Compilers and Users*, IMF, 2003, paragraphs 3.14 and 7.5, disbursements related to direct investment are included in the long-term external debt service.<sup>7</sup> Data not included in the *Gross External Debt Service* table.

Source: BNB.

**2.6. EXTERNAL DEBT INDICATORS\***

(%)

	2013						2014
	III	VI	IX	X	XI	XII	I
<b>Gross external debt/GDP</b>	<b>94.86</b>	<b>94.26</b>	<b>93.67</b>	<b>92.82</b>	<b>93.83</b>	<b>93.49</b>	<b>90.45</b>

<sup>1</sup> Preliminary data. The euro equivalent is calculated using the exchange rates of the respective foreign currencies at the end of the period.<sup>2</sup> 'Methodological Notes on the Compilation of International Investment Position of Bulgaria' are published on the BNB website ([www.bnbg.bg](http://www.bnbg.bg)).<sup>3</sup> Including securities issued by non-residents and held by residents. Sources: banks, non-bank investment intermediaries and other financial institutions.<sup>4</sup> Since 2004 data on trade credits-assets (prepaid advances and receivables from suppliers) reported to the BNB are included. Due to quarterly reporting, data are subject to revisions.<sup>5</sup> Data are based on the reports provided to the BNB by banks and companies on financial credits lent to non-residents. Due to quarterly reporting, data are subject to revisions.<sup>6</sup> Source for 'Other sectors' is the Bank for International Settlements (BIS), Basel. Data up to September 2013, published in March 2014, are used.<sup>7</sup> Including monetary and non-monetary gold at market value. Source: Issue Department.<sup>8</sup> Source: Central Depository AD.<sup>9</sup> Data on trade credits-liabilities of local legal entities (received advances and payables to suppliers) reported to the BNB are included in this item. Due to quarterly reporting, data are subject to revisions.<sup>10</sup> Use of IMF credit.<sup>11</sup> Data source: *Register of Government and Government Guaranteed Debt* of the Ministry of Finance. Preliminary data for 2013 as of 19 February 2014. Debt liabilities of the public companies and the government guaranteed debt are excluded.<sup>12</sup> Data are based on the monthly reports by banks.<sup>13</sup> Data on public and private companies, including government guaranteed loans. Intracompany loans are excluded. Data cover only loans declared in the BNB and on which the BNB has received information. Due to quarterly reporting, data are subject to revisions.<sup>14</sup> Data source: banks (including private and state-owned banks). Deposits related to contingent liabilities are excluded.

# Overview and Institutional Sectors

## Overview

*BNB Monthly Bulletin* includes data on the state and dynamics of the national economy. It focuses on financial and external sectors since information on these sectors is prepared at the BNB.

Depending on availability, specificity, compatibility and comparability of data, tables and charts may contain information on separate periods (months, quarters, years), as well as cumulative data since early year.

## General principles

### INSTITUTIONAL SECTORS ACCORDING TO THE ESA'95<sup>1</sup>

#### 1. Institutional units and sectors

The institutional unit is an elementary economic decision-making centre characterised by uniformity of behaviour and decision-making autonomy in the exercise of its principal function.

In conclusion, the following are deemed to be institutional units:

a) units which have a complete set of accounts and autonomy of decision:

- (1) private and public corporations;
- (2) co-operatives or partnerships recognised as independent legal entities;
- (3) public producers which by virtue of special legislation are recognised as independent legal entities;
- (4) non-profit institutions recognised as independent legal entities;
- (5) agencies of general government.

b) units which have a complete set of accounts and which are deemed to have autonomy of decision: quasi-corporations.

c) units which do not necessarily keep a complete set of accounts, but which by convention are deemed to have autonomy of decision:

- (1) households;
- (2) national resident units.

Institutional units must be combined into groups called institutional sectors or simply sectors, some of which are divided into sub-sectors. Each of the sectors and sub-sectors groups together the institutional units which have a similar type of economic behaviour. When the principal function of the institutional unit is to produce goods and services, it is necessary in deciding the sector to which it should be allocated to distinguish first of all the type of producer it is belonging to.

Three types of producers are distinguished in the ESA:

- a) private and public market producers;
- b) private producers of goods and services for own final use;
- c) private and public other non-market producers.

Institutional units which are market producers are classified in the sectors *non-financial corporations* (S.11), *financial corporations* (S.12) or *households* (S.14). Institutional units which are private producers of goods and services for own final use are classified in the *households* sector (S.14) together with the unincorporated enterprises owned by households. Institutional units which are other non-market producers are classified in the sector *general government* (S.13) or *non-profit institutions serving households* (S.15).

#### 2. Description of the different sectors

##### S.11 Non-financial corporations

The sector *non-financial corporations* consists of institutional units whose distributive and financial transactions are distinct from those of their owners and which are market producers whose principal activity is the production of goods and non-financial services. The sector *non-financial corporations* also includes non-financial quasi-corporations.

The institutional units covered are the following:

- a) private and public corporations which are market producers principally engaged in the production of goods and non-financial services;

<sup>1</sup> European System of Accounts (ESA'95), Council Regulation (EC) 2223/96 of 25 June 1996, Chapter II *Units and Grouping of Units*. The European System of Accounts is an international framework of accounts for a systematic and detailed description of the country's economy as a whole, its components, as well as its relationships with other economies developed by Eurostat. ESA'95 is fully compatible with SNA'93 (a joint paper of the IMF, UN, OECD, the European Commission and the World Bank).

- b) co-operatives and partnerships recognised as independent legal entities which are market producers principally engaged in the production of goods and non-financial services;
- c) public producers which by virtue of special legislation are recognised as independent legal entities and which are market producers principally engaged in the production of goods and non-financial services;
- d) non-profit institutions or associations serving non-financial corporations, which are recognised as independent legal entities and which are market producers principally engaged in the production of goods and non-financial services;
- e) holding corporations controlling a group of corporations which are market producers, if the preponderant type of activity of the group of corporations as a whole – measured on the basis of value added – is the production of goods and non-financial services;
- f) private and public quasi-corporations which are market producers principally engaged in the production of goods and non-financial services.

### **S.12 Financial corporations**

The *financial corporations* sector consists of all corporations and quasi-corporations which are principally engaged in financial intermediation (financial intermediaries) and/or in auxiliary financial activities (financial auxiliaries). Financial intermediation is the activity in which an institutional unit acquires financial assets and at the same time incurs liabilities on its own account by engaging in financial transactions on the market. The assets and liabilities of the financial intermediaries have different characteristics, involving that the funds are transformed or repackaged with respect to maturity, scale, risk and the like in the financial intermediation process. Auxiliary financial activities are activities closely related to financial intermediation but which are not financial intermediation themselves.

The institutional units included in the *financial corporations* sector (S.12) are as follows:

- a) private or public corporations which are principally engaged in financial intermediation and/or in auxiliary financial activities;
- b) co-operatives and partnerships recognised as independent legal entities which are principally engaged in financial intermediation and/or in auxiliary financial activities;
- c) public producers, which by virtue of special legislation are recognised as independent legal entities, which are principally engaged in financial intermediation and/or in auxiliary financial activities;
- d) non-profit institutions recognised as independent legal entities which are principally engaged in financial intermediation and/or in auxiliary financial activities, or which are serving financial corporations;
- e) holding corporations if the group of subsidiaries within the economic territory as a whole is principally engaged in financial intermediation and/or in auxiliary financial activities;
- f) unincorporated mutual funds comprising investment portfolios owned by the group of participants, and whose management is undertaken, in general, by other financial corporations. These funds are institutional units by convention, separate from the managing financial corporation;
- g) financial quasi-corporations.<sup>2</sup>

The *financial corporations* sector is subdivided into five sub-sectors: the *central bank* (S.121); *other monetary financial institutions* (S.122); *other financial intermediaries, except insurance corporations and pension funds* (S.123); *financial auxiliaries* (S.124); *insurance corporations and pension funds* (S.125).

#### **S.121 Sub-sector: The central bank**

The *central bank* sub-sector (S.121) consists of all financial corporations and quasi-corporations whose principal function is to issue currency, to maintain the internal and external value of the currency and to hold all or part of the international reserves of the country. The following financial intermediaries are classified in sub-sector S.121:

- a) the national central bank, also in the case where it is part of the European System of Central Banks;
- b) central monetary agencies of essentially public origin (e.g. agencies managing foreign exchange or issuing currency) which keep a complete set of accounts and enjoy autonomy of decision in

<sup>2</sup> Unincorporated units principally engaged in financial intermediation and subject to regulation and supervision (in most cases classified in the *other monetary financial institutions* sub-sector or the *insurance corporations and pension funds* sub-sector) are deemed to enjoy autonomy of decision and to have autonomous management independent of their owners. Their economic and financial behaviour is similar to that of financial corporations. Therefore, they are treated as separate institutional units. Examples are branches of non-resident financial corporations.

relation to central government. Mostly these activities are performed either within central government or within the central bank. In these cases, no separate institutional units exist.

This sub-sector does not include agencies and bodies, other than the central bank, which regulate or supervise financial corporations or financial markets.

### **S.122 Sub-sector: *Other monetary financial institutions***

The *other monetary financial institutions* sub-sector (S.122) consists of all financial corporations and quasi-corporations, except those classified in the *central bank* sub-sector, which are principally engaged in financial intermediation and whose business is to receive deposits and/or close substitutes for deposits from institutional units other than monetary financial institutions, and, for their own account, to grant loans and/or to make investments in securities.

MFIs cannot be described simply as ‘banks’, because they may possibly include some financial corporations which may not call themselves banks, and some which may not be permitted to do so in some countries, while some other financial corporations describing themselves as banks may not in fact be MFIs. In general, the following financial intermediaries are classified in sub-sector S.122:

- a) commercial banks, ‘universal’ banks, ‘all-purpose’ banks;
- b) savings banks (including trustee savings banks and savings banks and loan associations);
- c) post office giro institutions, post banks, giro banks;
- d) rural credit banks, agricultural credit banks;
- e) co-operative credit banks, credit unions;
- f) specialised banks (e.g. merchant banks, issuing houses, private banks).

The following financial intermediaries may also be classified in sub-sector S.122 where it is their business to receive repayable funds from the public whether in the form of deposits or in other forms such as the continuing issue of bonds and other comparable securities. Otherwise, they should be classified in sub-sector S.123:

- a) corporations engaged in granting mortgages (including building societies, mortgage banks and mortgage credit institutions);
- b) mutual funds (including investment trusts, unit trusts and other collective investment schemes, e.g. undertakings for collective investment in transferable securities – UCITS);
- c) municipal credit institutions.

Sub-sector S.122 does not include:

- a) holding corporations which only control and direct a group consisting predominantly of other monetary financial institutions, but which are not other monetary financial institutions themselves. They are classified in sub-sector S.123;
- b) non-profit institutions recognised as independent legal entities serving other monetary financial institutions, but not engaged in financial intermediation. They are classified in sub-sector S.124.

### **S.123 Sub-sector: *Other financial intermediaries except insurance corporations and pension funds***

The *other financial intermediaries except insurance corporations and pension funds* sub-sector (S.123) consists of all financial corporations and quasi-corporations which are principally engaged in financial intermediation by incurring liabilities in forms other than currency, deposits and/or close substitutes for deposits from institutional units other than monetary financial institutions, or insurance technical reserves.

Sub-sector S.123 includes various types of financial intermediaries especially those which are predominantly engaged in long-term financing. In most cases, this predominant maturity forms the basis of a distinction from the *other monetary financial institutions* sub-sector. Based on the non-existence of liabilities in the form of insurance technical reserves, the borderline with the *insurance corporations and pension funds* sub-sector can be determined.

In particular, the following financial corporations and quasi-corporations are classified in sub-sector S.123 unless they are MFIs:

- a) corporations engaged in financial leasing;
- b) corporations engaged in hire purchase and the provision of personal or commercial finance;
- c) corporations engaged in factoring;
- d) security and derivative dealers (on own account);
- e) specialised financial corporations such as venture and development capital companies, export/import financing companies;

- f) financial vehicle corporations created to be holders of securitized assets;
- g) financial intermediaries which receive deposits and/or close substitutes for deposits from MFIs only;
- h) holding corporations which only control and direct a group of subsidiaries principally engaged in financial intermediation and/or in auxiliary financial activities, but which are not financial corporations themselves.

Sub-sector S.123 does not include non-profit institutions recognised as independent legal entities serving other financial intermediaries except insurance corporations and pension funds, but not engaged in financial intermediation. They are classified in sub-sector S.124.

#### **S.124 Sub-sector: *Financial auxiliaries***

The *financial auxiliaries* sub-sector (S.124) consists of all financial corporations and quasi-corporations which are principally engaged in auxiliary financial activities, that is to say activities closely related to financial intermediation but which are not financial intermediation themselves.

In particular, the following financial corporations and quasi-corporations are classified in sub-sector S.124:

- a) insurance brokers, salvage and average administrators, insurance and pension consultants, etc.;
- b) loan brokers, securities brokers, investment advisers, *etc.*;
- c) flotation corporations that manage the issue of securities;
- d) corporations whose principal function is to guarantee, by endorsement, bills and similar instruments;
- e) corporations which arrange derivative and hedging instruments, such as swaps, options and futures (without issuing them);
- f) corporations providing infrastructure for financial markets;
- g) central supervisory authorities of financial intermediaries and financial markets when they are separate institutional units;
- h) managers of pension funds, mutual funds, *etc.*;
- i) corporations providing stock exchange and insurance exchange;
- j) non-profit institutions recognised as independent legal entities serving financial corporations, but not engaged in financial intermediation or auxiliary financial activities.

Sub-sector S.124 does not include holding corporations which only control and direct a group of subsidiaries principally engaged in auxiliary financial activities, but which are not financial auxiliaries themselves. They are classified in sub-sector S.123.

#### **S.125 Sub-sector: *Insurance corporations and pension funds***

The *insurance corporations and pension funds* sub-sector (S.125) consists of all financial corporations and quasi-corporations which are principally engaged in financial intermediation as the consequence of the pooling of risks.

The insurance contracts administered might relate to individuals and/or groups, whether or not participation results from a general obligation imposed by government. Furthermore, social insurance contracts are sometimes a considerable part of the contracts administered. Sub-sector S.125 includes both captive insurance corporations and reinsurance corporations.

Sub-sector S.125 does not include:

- a) institutional units which fulfil each of the two criteria. They are classified in sub-sector S.1314;
- b) holding corporations which only control and direct a group consisting predominantly of insurance corporations and pension funds, but which are not insurance corporations and pension funds themselves. They are classified in sub-sector S.123;
- c) non-profit institutions recognised as independent legal entities serving insurance corporations and pension funds, but not engaged in financial intermediation. They are classified in sub-sector S.124.

The *insurance corporations and pension funds* sub-sector may be subdivided into:

- a) insurance corporations;
- b) (autonomous) pension funds.

Autonomous pension funds are pension funds which have autonomy of decision and keep a complete set of accounts. They are therefore institutional units. Non-autonomous pension funds are not institutional units and remain part of the institutional unit that sets them up.

### **S.13 General government**

The *general government* sector (S.13) includes all institutional units which are other non-market producers whose output is intended for individual and collective consumption, and mainly financed by compulsory payments made by units belonging to other sectors, and/or all institutional units principally engaged in the redistribution of national income and wealth.

The institutional units included in sector S.13 are as follows:

- a) general government entities (excluding public producers organised as public corporations or, by virtue of special legislation, recognised as independent legal entities, or quasi-corporations, when any of these are classified in the non-financial or financial sectors) which administer and finance a group of activities, principally providing non-market goods and services, intended for the benefit of the community;
- b) non-profit institutions recognised as independent legal entities which are other non-market producers and which are controlled and mainly financed by general government;
- c) autonomous pension funds if the requirements of social security funds are met.

The *general government* sector is divided into four sub-sectors: *central government* (S.1311); *state government* (S.1312); *local government* (S.1313); *social security funds* (S.1314).

#### **S.1311 Sub-sector: Central government**

The *central government* sub-sector (S.1311) includes all administrative departments of the State and other central agencies whose competence extends normally over the whole economic territory, except for the administration of social security funds. Included in sub-sector S.1311 are those non-profit institutions which are controlled and mainly financed by central government and whose competence extends over the whole economic territory.

#### **S.1312 Sub-sector: State government**

The *state government* sub-sector (S.1312) consists of state governments which are separate institutional units exercising some of the functions of government at a level below that of central government and above that of the governmental institutional units existing at local level, except for the administration of social security funds. Included in sub-sector S.1312 are those non-profit institutions which are controlled and mainly financed by state governments and whose competence is restricted to the economic territories of the states.

#### **S.1313 Sub-sector: Local government**

The *local government* sub-sector (S.1313) includes those types of public administration whose competence extends to only a local part of the economic territory, apart from local agencies of social security funds. Included in sub-sector S.1313 are those non-profit institutions which are controlled and mainly financed by local governments and whose competence is restricted to the economic territories of the local governments.

#### **S.1314 Sub-sector: Social security funds**

The *social security funds* sub-sector (S.1314) includes all central, state and local institutional units whose principal activity is to provide social benefits and which fulfil each of the following two criteria:

- a) by law or by regulation, certain groups of the population are obliged to participate in the scheme or to pay contributions;
- b) *general government* is responsible for the management of the institution in respect of the settlement or approval of the contributions and benefits independently from its role as supervisory body or employer.

There is usually no direct link between the amount of the contribution paid by an individual and the risk to which that individual is exposed.

### **S.14 Households**

The *household* sector (S.14) covers individuals or groups of individuals as consumers and possibly also as entrepreneurs producing market goods and non-financial and financial services (market producers) provided that, in the latter case, the corresponding activities are not those of separate entities treated as quasi-corporations. It also includes individuals or groups of individuals as producers of goods and non-financial services for exclusively own final use.

Households as consumers may be defined as small groups of persons who share the same living accommodation, who pool some, or all, of their income and wealth and who consume certain types of goods

and services collectively, mainly housing and food. The criteria of the existence of family or emotional ties may be added.

The principal resources of these units are derived from the compensation of employees, property income, transfers from other sectors or the receipts from disposal of market products or the imputed receipts from output of products for own final consumption.

The *households* sector includes:

- a) individuals or groups of individuals whose principal function is consumption;
- b) persons living permanently in institutions who have little or no autonomy of action or decision in economic matters (e.g. members of religious orders living in monasteries, long-term patients in hospitals, prisoners serving long sentences, old persons living permanently in retirement homes). Such people are treated as comprising, together, a single institutional unit, that is, a single household;
- c) individuals or groups of individuals whose principal function is consumption and that two produce goods and non-financial services for exclusively own final use; only categories of services produced for own final consumption are included within the system: services of owner-occupied dwellings and domestic services produced by paid employees;
- d) sole proprietorships and partnerships without independent legal status – other than those treated as quasi-corporations – which are market producers;
- e) non-profit institutions serving households, which do not have independent legal status or those which do but are of only minor importance.

### **S.15 Non-profit institutions serving households**

The *non-profit institutions serving households* sector (*NPISHs*) (S.15) consists of non-profit institutions which are separate legal entities, which serve households and which are private other non-market producers. Their principal resources, apart from those derived from occasional sales, are derived from voluntary contributions in cash or in kind from households in their capacity as consumers, from payments made by *general governments* and from property income.

Where these institutions are not very important, they are not included in this sector, their transactions being mixed up with those of *households* (S.14).

The *NPISHs* sector includes the following main kinds of NPISHs that provide non-market goods and services to households:

- a) trade unions, professional or learned societies, consumers' associations, political parties, churches or religious societies (including those financed but not controlled by governments), and social, cultural, recreational and sports clubs;
- b) charities, relief and aid organisations financed by voluntary transfers in cash or in kind from other institutional units. Sector S.15 includes charities, relief or aid agencies serving non-resident units and excludes entities where membership gives right to a predetermined set of goods and services.

### **S.2 Rest of the world**

The *rest of the world* (S.2) is a grouping of units without any characteristic functions and resources; it consists of non-resident units insofar as they are engaged in transactions with resident institutional units, or have other economic links with resident units.

The distinction between the national economy and the *rest of the world* is based on the principle of residence. The national economy is limited to resident units, i.e. units which have a centre of economic interest on the economic territory of that country.<sup>3</sup>

The economic territory includes territorial enclaves such as embassies, consulates, military and scientific bases situated in the rest of the world. The economic territory does not include extraterritorial enclaves: foreign embassies or Institutions of the European Union or other international organisations located on the geographic territory of the country.<sup>4</sup> The term *centre of economic interest* indicates the fact that there exists some location within the economic territory on, or from, which a unit engages, and intends

<sup>3</sup> These units (whether institutional, local kind-of-activity or of homogeneous production), known as resident units, may or may not have the nationality of that country, may or may not be legal entities, and may or may not be present on the economic territory of the country at the time they carry out a transaction.

<sup>4</sup> The territories used by the Institutions of the European Union and international organisations thus constitute the territories of States *sui generis*. The feature of such states is that the only residents are the institutions themselves.

to continue to engage, in economic activities and transactions on a significant scale, either indefinitely or over a finite but long period of time (a year or more).

It should be noted that the rule whereby the accounts for the rest of the world include only transactions carried out between resident institutional units and non-resident units is subject to the following exceptions:

- a) the services of transport (up to the border of the exporting country) provided by resident units in respect of imported goods are shown in *the rest of the world* accounts with f.o.b. imports, even though they are produced by resident units;
- b) transactions in foreign assets between residents belonging to different sectors are shown in the detailed financial accounts for the rest of the world; although they do not affect the country's financial position *vis-à-vis* the rest of the world, they affect the financial relationships of individual sectors with *the rest of the world*;
- c) transactions in the country's liabilities between non-residents belonging to different geographical zones are shown in the geographical breakdown of *the rest of the world* accounts. Although these transactions do not affect the country's overall liability to *the rest of the world*, they affect its liabilities to different parts of the world.

# 1 Financial Sector

The information presented in this section is from monetary, interest rate and other financial statistics.

## I. GENERAL METHODOLOGICAL NOTES ON MONETARY AND BANKING STATISTICS

### Monetary Statistics

#### 1. Methodological Concepts and Rules of Monetary Statistics Organization

Monetary statistics is collected and compiled according to the international statistical standards and meets, to a great extent, the rules of international financial statistics. The most important standards include:

- ✓ European System of Accounts (ESA'95) and System of National Accounts (SNA'93);
- ✓ Regulation No. 2423/2001 of 22 November 2001 concerning the consolidated balance sheet of the monetary financial institutions sector and Money and Banking Statistics Compilation Guide, ECB, 1998;
- ✓ Money and Banking Statistics Sector Manual: Guidance for the Statistical Classification of Customers, ECB, 1998;
- ✓ Monetary and Financial Statistics Manual, IMF, 2000.

Bulgaria is a subscriber to the Special Data Dissemination Standard (SDDS) developed by the IMF (see the National Summary Data Page on the BNB website: *Statistics Section, Data Dissemination Standards*).

#### Main Rules:

- a) Accounting rules – the accounting rules followed by monetary financial institutions are presented in the International Accounting Standards (IAS).<sup>5</sup>
- b) Reporting rules:
  - ✓ Valuation of assets and liabilities – all financial assets and liabilities are reported at market or close to market price. Financial instruments, however, as currency in circulation, deposits, capital and reserves, cash and loans are reported at nominal value.
  - ✓ Revaluation of foreign currency positions – exchange rates as of end of the period are applied.
  - ✓ Reporting of loans and provisions – for the purposes of statistics loans are shown on a gross basis until their writing off. Accrued provisions are classified under *Other liabilities*.
  - ✓ Definition of the reporting period – the reporting period finishes on the last calendar day and if it coincides with a holiday, on the last business day of the month.
- c) Economic territory and residency – the economic territory of the country consists of the geographic territory administrated by the government; within this territory, persons, goods and capital circulate freely. The economic territory includes the airspace, territorial waters, and continental shelf lying in international waters over which the country has exclusive rights. Also it includes territorial enclaves, i.e. geographic territories situated in the rest of the world and

<sup>5</sup> Unified national accounting standards harmonized with the international standards, valid until end-2002. After that the International Accounting Standards/International Financial Reporting Standards came into effect.

used, under international treaties or agreements between states, by general government agencies of the country (embassies, consulates, military bases, scientific bases, etc.), and any free zones.

Residents of the country are defined as institutional units which have a center of economic interest<sup>6</sup> within the economic territory of the country; their residence is on the same territory and they manage a significant output in which they participate or intend to participate.

Branches of resident credit institutions abroad with a center of economic interest on the territory of another country are treated as non-residents. Branches of foreign credit institutions licensed to operate in the country are residents and are included in money-creating sector (see *Sector Table*).

Borderline cases of residency:

- 1) Bulgarian diplomatic, consular, commercial and other representations, as well as their members and staff, and all Bulgarian citizens working for them who are staying abroad by an appointment of the Bulgarian government, regular servicemen on long-term commission abroad and civil persons from the Ministry of Defence employed in missions, headquarters and bodies of international organizations, as well as the members of their families are deemed residents. The foreign ones are classified as residents of their native countries.
- 2) The following persons are classified as resident units:
  - ✓ Bulgarian citizens staying abroad for education purposes, irrespective of the length of their stay;
  - ✓ Bulgarian citizens staying abroad for medical treatment, irrespective of the length of their stay.

The concept of residency is consistent with the Bulgarian Currency Law, ESA'95, and IMF Balance of Payments Manual, 5th edition.

- d) Sector distribution – ESA'95 standards of sector classification of institutional units are followed. The main sectors by residency include: *Resident Sector* (S.1) and *Rest of the World* (S.2). The Resident Sector is divided into monetary financial sector, general government sector and non-government sector. Monetary financial sector covers the *BNB* (S.121) and *other monetary financial institutions* (S.122); *general government sector* (S.13) consists of three sub-sectors: *central government* (S.1311), *local government* (S.1313) and *social security funds* (S.1314); *non-government sector* includes *non-financial public corporations* (S.11001), *non-financial private corporations* (S.11002+S.11003), *other financial intermediaries and auxiliaries except insurance corporations and pension funds* (S.123 and S.124), *insurance corporations and pension funds* (S.125), *households* (S.14) and *non-profit institutions serving households* (S.15). *Non-resident Sector* is divided into *European Union* and *Third countries and international organisations*. The European Union is broken down by euro area and non-euro area Member States, according to the participation of EU countries in the Economic and Monetary Union.
- e) Instrumental categories – in the Monetary Survey and Analytical Reporting, indicators are defined in conformity with ECB Regulation (EC) No. 2423/2001 concerning the consolidated balance sheet of the monetary financial sector, the Monetary and Financial Statistics Manual of the IMF in accordance with ESA'95 and SNA'93. Definitions of most of the instruments are given in the corresponding tables in Specific Methodological Notes.
- f) Foreign currency distribution – all indicators and instruments are in levs and foreign currency, including euro of the forex component.
- g) Maturity structure – for the purposes of statistics financial assets and liabilities are presented according to the original term to maturity (Regulation (EC) No. 2423/2001 and SNA'93).

## 2. Reporting Agents

Reporting agents are monetary financial institutions (MFIs) residing on the territory of the Republic of Bulgaria. These are the BNB and other MFIs. Other MFIs include all credit institutions, including foreign banks' branches, as well as money market funds<sup>7</sup> registered in Bulgaria. Of all credit institutions, 24 are banks licensed to conduct bank operations in Bulgaria and abroad and six are foreign banks' branches. The number of money market funds is six.

Resident monetary financial institutions (MFIs) are included in the MFIs list of EU Member States. This list is maintained by the ECB on its website: <http://www.ecb.int>.

<sup>6</sup> An institutional unit has a centre of economic interest within a country when there exists some location – dwellings, place of production or other premises, which the unit engages or intends to engage in economic activities and transactions for an indefinite period of time or for a definite but longer period of time (according to ESA'95 the period is a year or more).

<sup>7</sup> Included in the scope since February 2007.

### **3. Basic Framework of Monetary Statistics**

Reporting agents submit reports pursuant to Article 42 of the Law on the Bulgarian National Bank and Article 69 of the Law on Credit Institutions.

Data are collected electronically via BNB's virtual network with the other MFIs.

Monetary statistics framework includes two levels of data compilation and presentation:

- On the first level, the accounting data received from individual reporting agents are aggregated in *analytical reporting* containing comprehensive balance sheet data on the BNB and other MFIs. Analytical reporting of the BNB and analytical reporting of other MFIs aim to provide data classified by residency, sector and instrument.
- On the second level, data from analytical reporting are consolidated into a *monetary survey*. The monetary survey is the main form of monetary statistics and contains a lot of important indicators necessary for macroeconomic analysis. It reveals the mechanism of multiplying the monetary base into aggregate money supply serving transactions in the national economy. Its structure is built so as to facilitate the analysis of broad money and its sources. The monetary survey is accompanied by a detailed presentation of the main elements (by sector and instrument).

### **4. Principles of Data Processing**

- ✓ Aggregation – summing up data by balance of all institutional units within a sector or subsector, or of all assets and liabilities in the framework of a particular indicator. For sectors and subsectors, data on financial assets and liabilities are aggregated in instruments (i.e. loans classified by sector of debtor and deposits classified by sector of creditor). Further aggregation is used to combine the instruments into indicators.
- ✓ Consolidation – it refers to elimination of stocks and flows that occur between institutional units, residents of the country, where they are grouped. The institutional units consisting of a head office and branches report consolidated data through elimination of claims and obligations between them. (This rule does not apply to consolidation of data between a head office and non-resident branches.) Further consolidation is made in the monetary survey between MFIs.
- ✓ Netting – the general principles set in the international statistical standards; data should be collected and compiled on a gross basis. Despite this fact, some categories of data in the monetary survey are also presented in net form due to their use for analytical needs. In the monetary survey and analytical reporting, the following items are presented in net form: *foreign assets, claims on the central government, other items*; while *gross claims on and gross liabilities to non-residents, central government and other unclassified assets and liabilities* are also shown.

### **5. Policy of Revisions and Statistical Processing**

In accordance with the requirements set out in ECB Guideline 2007/9<sup>8</sup>, historical data may be revised quarterly upon publication of the monthly data at the end of the respective reporting quarter, thus, ensuring consistency between monthly and quarterly statistics of the monetary financial institutions.

Revisions of published data are made in the following cases:

- ✓ obtained additional information, reclassifications, improved reporting procedures and correction of errors in the data submitted by reporting agents;
- ✓ change in accounting or statistical standard.

Revisions are marked with the letter **r**. In the case of a change in the standard, historical data are also revised starting from the moment of occurrence of the event or change in the standard.

Upon occurrence of prerequisites for publishing a new indicator – sector, instrument, etc. – historical time series are constructed using statistical methods as of the moment of occurrence of the indicator (where appropriate conditions exist).

### **6. Publications**

Monthly data are as of the end of the reporting period and are published before the end of the month following the reporting period according to the *Statistical Data Release Calendar* (available on the BNB website: <http://www.bnb.bg>). Monthly statistical data are also included in periodical publications of the central bank: annual and semiannual reports of the BNB, and in the monthly *Monetary Statistics*. Publications are available on paper and on the BNB website.

<sup>8</sup> Guideline of the European Central Bank of 1 August 2007 on monetary, financial institutions and markets statistics (recast) (ECB/2007/9) as amended by Guideline ECB/2008/31 and Guideline ECB/2009/23.

Appendix: Sector Table<sup>9</sup>

	Sectors in Bulgaria's monetary statistics	Definitions
Money-creating sector	Central bank	A financial corporation whose principal function is to issue currency, to maintain the internal and external value of the national currency and to hold the international reserves of the country.
	Other monetary financial institutions	Financial corporations, except those classified in the <i>central bank</i> sub-sector, which are principally engaged in financial intermediation and whose business is to receive deposits and/or close substitutes for deposits from institutional units other than monetary financial institutions, and, for their own account, to grant loans and/or to make investments in securities. These are: a) credit institutions - banks and electronic money institutions, and b) money market funds. Money market funds are collective investment undertakings of which the units are, in terms of liquidity, close substitutes for deposits and which primarily invest in money market instruments and/or in MMF shares/units and/or other transferable debt instruments with a residual maturity of up to and including one year and/or in bank deposits and/or which pursue a rate of return that approaches the interest rates of money market instruments.
S.12 Financial corporations	Other financial intermediaries and auxiliaries, except insurance corporations and pension funds	1. Financial corporations, which are principally engaged in financial intermediation by undertaking liabilities in a form, other than: a) money, deposits and/or close substitutes of deposits of institutional units, other than monetary financial institutions; b) insurance and pension reserves. Here are included investment funds, corporations, specializing in lending, leasing corporations, financial houses, loans offices, etc. 2. Financial corporations – auxiliaries, which are closely connected with financial intermediation but are not financial intermediaries. Here are included stock exchanges, exchange bureaux, consultants, brokers, etc.
	Insurance corporations and pension funds	Financial corporations, which are principally engaged in financial intermediation as the consequence of taking insurance and pension risks (and which incur liabilities in the form of insurance and pension reserves).
Money-holding sector	Non-financial corporations	Non-financial corporations, which are market producers, and whose main activity is the production of goods and non-financial services.
	Households	Individuals or groups of individuals as consumers and possibly also as entrepreneurs producing market goods and non-financial and financial services (market producers). The sector includes individuals or groups of individuals as producers of goods and non-financial services for exclusively own final use. The sector also includes sole proprietorship and partnership without independent legal status which are market producers.
	Non-profit institutions serving households (NPISHs)	Non-profit institutions which are separate legal entities, whose main activity is connected with servicing, supporting and assisting households. Their principal resources, apart from those derived from occasional sales, are derived from voluntary contributions in cash or in kind from households in their capacity as consumers, from payments made by <i>general government</i> sector <sup>10</sup> and from property income. Here are included trade unions, political parties, foundations, associations, churches or religious societies, social, cultural and sports clubs.

(continued)

<sup>9</sup> Institutional sectors in Bulgaria's monetary statistics totally meet ECB requirements under strict consistency with ESA'95.<sup>10</sup> NPIs controlled and mainly financed by *general government* are classified in the general government sector.

(continued)

	Sectors in Bulgaria's monetary statistics		Definitions
Money-neutral sector	Central government		All institutional units, which offer public services, deal with distribution of national income and guarantee the operation of social and economic system. These are ministries, institutions and other central agencies, non-budget funds and administrative departments of the state whose competence extends normally over the whole economic territory, except for the administration of social security funds. Here are included those non-profit institutions which are controlled and mainly financed by central government and whose competence extends over the whole economic territory.
Money-holding sector	Local government	S.13 General government	All institutional units, which offer public services, deal with distribution of national income and guarantee the operation of social and economic system locally. This is the local administration, whose competence extends to the economic territory, except for the administration of social security funds. Here are included those non-profit institutions which are controlled and mainly financed by local government bodies and whose competence is restricted to the economic territory of the local government.
	Social security funds		Central and local institutional units whose main activity is to provide social benefits and which fulfill each of the following two criteria: 1) by law or by regulation certain groups of population are obliged to participate in the scheme or to pay contributions; 2) general government is responsible for the management of the institution in respect of the settlement or approval of the contributions and benefits independently from its role as supervisory body or employer.
Non-resident sector	Euro area European Union Non-euro area EU member states Third countries and international organisations	S.2 Rest of the world	All non-resident units <sup>11</sup> which are engaged in transactions with resident institutional units, or have other economic links with resident units. This sector's accounts provide an overall view of the economic relationships linking the national economy with <i>the rest of the world</i> . The sector includes such institutional units, which are physically located on the territory of the country. It is divided into two sub-sectors: <i>European Union</i> and <i>Third countries</i> and international organizations. The European Union is divided into Monetary Union and EU member states non-participating in the Monetary Union, including EU institutions.

<sup>11</sup> Including institutions of the European Union and international organisations.

## II. SPECIFIC METHODOLOGICAL NOTES

The monetary statistics is presented in dynamics in a monetary survey, analytical reporting of the BNB and analytical reporting of other MFIs, and in some additional tables which contain more detailed information. The principle of the organization of all tables is the following: the data is broken down by sector, indicator, national and foreign currency, including euro, instrument and maturity, while the indicators on the asset side are grouped by sector and instrument and on the liability side – by instrument and degree of callability.

Simultaneously monthly sectoral surveys of the BNB and other MFIs are compiled and published. These are static tables presenting the relevant assets and liabilities indicators in a way which allows identification of the sector affiliation of the balance sheets items.

Monetary statistics (dynamic or static) is compiled on the basis of the monthly reporting of the BNB and other MFIs.

In order to prevent disclosure of individual information<sup>12</sup> about a given reporting agent, some indicators are presented on a more aggregated level.

### **Tables 1.3.1–1.3.4: Monetary Survey and Analytical Reporting**

The structure of the monetary survey may be expressed by the following mathematical identity:

$$\text{net foreign assets} + \text{net domestic assets} = \text{broad money} + \text{long-term liabilities}$$

Net domestic assets include domestic credit, fixed assets and other items (net).

The analytical reporting of the BNB and other MFIs follows the format of the monetary survey.

#### **Indicators**

*Net Foreign Assets*<sup>13</sup> – a balance between gross foreign assets and liabilities of the Monetary financial sector. Gross foreign assets are reported by instrument and include Bulgaria's international reserves and other foreign assets of the BNB and other MFIs. Gross foreign liabilities reflect liabilities of the MFIs to the foreign sector. A split of gross foreign assets and liabilities of the BNB is made in Table 1.3.5: *Foreign Assets and Liabilities* of the BNB.

*Domestic credit* – incorporates credit to the consolidated general government sector and non-government sector.

Credit to the consolidated *general government* sector includes net claims on the central government and gross claims on local government, and social security funds. Credit to the non-government sector includes gross claims on non-financial corporations, financial corporations, households and NPISHs.

*Fixed assets* – movable or immovable non-financial assets which monetary financial institutions intend to use over a period longer than one year in their main activity.

*Other items (net)* – consolidates all components of the balance sheets of the BNB and other MFIs which are not included in the instruments displayed above. They include *Relations between other MFIs (net)*, *Relations between the BNB and other MFIs (net)* and *Other assets and liabilities (net)*. Accrued and overdue interest, derivatives, depreciation, provisions, as well as assets and liabilities which are not included elsewhere are part of the *Other assets and liabilities (net)* item (a part of them is presented in Tables 1.3.7 and 1.3.8: *Memoranda to the Analytical Reporting of the BNB and other MFIs*). The balance on the *Relations between the MFIs (net)* item reflects the float as a result of netting of claims and liabilities between MFIs.

*Broad money (money supply)* comprises liabilities with money character of MFIs to the resident sector with the exception of the liabilities to the *central government* and the *monetary financial institutions* sector. Monetary aggregate instruments are grouped by liquidity and are presented by currency and sector.

The following monetary aggregates are used: M1, M2, and M3. The M1 monetary aggregate, commonly referred to as narrow money, includes the most liquid instruments used in settlements (currency outside MFIs and overnight deposits in national and foreign currency). The M2 monetary aggregate comprises quasi-money and the M1 monetary aggregate. Quasi-money comprises deposits with agreed maturity of up to two years and deposits redeemable at notice of up to three months (including savings deposits). The least liquid financial instruments include repos, shares/units of MMFs and debt securities issued up to two years, also called marketable instruments. They are denominated in national and foreign currency and together with M2 form the broadest monetary aggregate, M3, commonly referred to as money supply (broad money).

<sup>12</sup> Article 8 of the Council Regulation (EC) No 2533/98 of 23 November 1998 concerning the collection of statistical information by the European Central Bank.

<sup>13</sup> Monetary gold, special drawing rights holdings/allocations, claims on interest and interest liabilities in *Net foreign assets* are specific items for the BNB only.

*Long-term liabilities and monetary financial institutions* – include liabilities of monetary financial institutions with maturity of over two years or with a notice of over three months, as well as capital and reserves. *Capital and reserves* comprise the statutory fund of the banking system, reserves and financial result.

### Main Indicators

#### Assets side:

1. *Repos* – funds extended under agreements for reverse repurchases of securities where one of the parties receives funds against securities sold under a firm commitment to purchase the same or similar securities at a particular price on a fixed future date.
2. *Loans* – financial assets arising to provide borrowers with funds, goods or services. Loan terms (fixed by the creditor or negotiated) are set in a non-transferable document. A loan is an unconditional debt which shall be repaid upon maturity and shall generate income in the form of interest (see Table 1.3.6: Loans to Non-financial Corporations and Households and NPISHs). Margin deposits<sup>14</sup> made by the reporting agents are also included in the *Financial corporations* sector.
3. *Securities other than shares* – includes securities other than shares and other equity which give the holder the unconditional right to fixed income or contractually determined income in the form of coupon payments and/or stated fixed sum at a stated date or dates starting from the issue date till the date set as maturity/redemption date. These securities do not grant the holder any ownership rights and interest over the issuing company. Also included are instruments with the same characteristics but with options for conversion into shares or other forms of ownership. The *securities other than shares* indicator covers various types of bonds and other debt securities of bond nature (which can be discount or promissory notes accepted by other MFIs or other commercial paper, used as a form of short-term investments). Compensatory instruments held by credit institutions are also included in the *non-financial corporations* sector.<sup>15</sup>
4. *Shares and other equity* – holdings of securities which represent property rights in corporations. These securities generally entitle the holders to a share in the profit of corporations and to a share in their own funds in the event of liquidation. *MMFs shares/units* are also included here.

#### Liabilities side:

1. *Currency outside MFIs* is currency in circulation less other MFIs' vault cash.
2. *Deposits* are funds accepted by monetary financial institutions payable at sight, without any notice, at notice or under other preliminary agreed payment conditions. Deposits are agreed upon between the parties by negotiating the terms of keeping deposit accounts, interest amount (if the agreement provides for interest accrual), terms of payment and sanctions for the parties in case of failure to perform their obligations. These are liabilities of the financial institution.
  - ✓ *Overnight deposits* include deposits without agreed maturity and which are immediately convertible into currency or transferable on demand through banker's order or by cheque without significant restrictions or penalties. One-day deposits are also included in this item.
  - ✓ *Deposits with agreed maturity* are not immediately available as they have an agreed term prior to withdrawal. These deposits cannot be used in settlements and are not convertible into currency without any significant restrictions or penalties. They are broken down by maturity: up to two years and over two years. These include loans received with the exception of those from the IMF.
  - ✓ *Deposits redeemable at notice* include savings deposits and other deposits redeemable at notice. Savings deposits are non-transferable deposits without specified maturity used for safekeeping of funds of households against issuance of a personal savings book or analogous document. These include deposits for house purchase, children's deposits and other deposits. Other deposits redeemable at notice are non-transferable deposits without specified maturity which cannot be converted into cash without any notice. Their conversion into cash is not possible or they can be converted into cash prior to the term of the notice but by

<sup>14</sup> Deposits made under derivative contracts. They are used as cash collateral, remain in the ownership of the depositor and are repayable when the contract is closed out.

<sup>15</sup> Compensatory instruments include compensatory bills and housing compensatory bills issued under the Law on Compensation of the Owners of Nationalized Properties and registered compensatory bills issued under the Law on the Restitution of Ownership and the Use of Agricultural Lands. These instruments are issued by the government and are freely transferable. Pursuant to the Law on Public Offering of Securities, these are referred to as securities.

- imposing a sanction. Non-transferable deposits with specified maturity which can be converted into cash prior to maturity only at notice are also included here.
3. *Repos* include cash received against securities sold by monetary financial institution under a firm commitment to purchase the same (or similar) securities at a particular price on a fixed future date.
  4. *Money market funds shares/units* include shares/unit issued by money market funds.
  5. *Debt securities issued* include securities other than shares and other equity issued by credit institutions, generally traded in the secondary market, that do not grant the holder any ownership rights over the issuer's equity. Non-marketable instruments issued (which have not been initially placed through a stock exchange or other official marketplace) and subsequently becoming marketable also belong to this item.

**Table 1.3.5: Foreign Assets and Liabilities of the BNB**

The table displays claims and liabilities of the BNB to non-residents forming the positions of *Foreign assets* and *Foreign liabilities*.

**Instruments**

**BNB Foreign Assets**

Central bank's foreign claims are divided into two groups according to their liquidity – *International reserves* and *Other foreign assets*:

1. *International reserves* include the most liquid foreign assets grouped into three sectors – non-resident banks, non-resident governments and other non-residents. Under a currency board (introduced on 1 July 1997) international foreign exchange reserves are equal to the assets of the Issue Department included in the BNB consolidated balance sheet (described in Article 28, paragraph 3 of the Law on the BNB).

Currency reserves include the following indicators:

- ✓ *Cash* – banknotes and coins held in freely convertible foreign currency;
  - ✓ *SDR holdings*<sup>16</sup>;
  - ✓ *Monetary gold* consisting of gold bullion in standard form in vault and monetary gold deposited with foreign banks. From 1 July 1997 up to 31 January 2005, pursuant to Article 28, paragraph 3, item 6 of the Law on the BNB, the stock of monetary gold is valued at BGN 500 per troy ounce or market value if lower. From 1 February 2005 onwards, monetary gold is valued at market value.
  - ✓ *Deposits* – funds in freely convertible currency held by the BNB on accounts with foreign central banks graded by degree of liquidity (overnight deposits, deposits with agreed maturity, deposits redeemable at notice);
  - ✓ *Repos* include funds received in the BNB against sale of securities with a commitment of reverse repurchase of the same or similar securities at a particular price on a fixed future date;
  - ✓ *Securities other than shares* – debt instruments held by the BNB, issued by non-resident banks, financial institutions and governments, whereof liabilities are assigned one of the two highest ratings by two internationally recognized credit rating agencies, and which are payable in freely convertible currencies with the exception of debt instruments given or received as collateral;
  - ✓ *Reserve position in the IMF* – Bulgaria's unconditional right to draw funds from the IMF. This indicator reflects the payment of the forex component in Bulgaria's quota and indicates the balance between the quota and the cash held by the IMF in national currency.<sup>17</sup>
  - ✓ *Interest receivable* includes claims on accrued interest on foreign assets, included in international foreign exchange reserves.<sup>18</sup>
2. *Other foreign assets* include less liquid claims on non-residents which after the introduction of the currency board are reported as part of assets of the Banking Department. This position is divided into three sectors (*non-resident banks*, *non-resident governments* and *other non-residents*) and includes the following instruments:

<sup>16</sup> Special Drawing Rights are reserve assets established by the IMF to supplement its member countries' official reserves. The value of SDR is set on the basis of a basket of reference currencies (the euro, the British pound, the US dollar and the Japanese yen).

<sup>17</sup> The reserve position can be raised to the amount of funds in national currency used by the IMF in transactions with other member states.

<sup>18</sup> A specificity associated with the currency board is that interest receivable and interest payable are reported as part of the international reserves, correspondingly as part of Bulgaria's foreign liabilities. Therefore, they are not reported as part of Other assets and Other liabilities as in other reporting units.

- ✓ *Deposits* – assets held by other non-residents which are not part of the international foreign reserves;
- ✓ *Securities other than shares* – debt securities which are not included in international reserves;
- ✓ *Shares and other equity* represent capital investment in international financial institutions (e.g. BIS, Basel); MMFs shares/units are also included here – these holdings of securities give the owner the right of a share in the capital of a money market fund.

### **BNB Foreign Liabilities**

Foreign liabilities of the BNB reflect the central bank's liabilities to the non-resident sector grouped into *non-resident banks*, *non-resident governments* and *other non-residents*.

Foreign liabilities include the following instruments:

- ✓ *Deposits* – funds, deposited with the BNB by non-residents, payable at sight, without any notice, at notice or under other preliminary agreed payment conditions;
- ✓ *Loans* – interest-bearing credits with a fixed term received from IMF common funds;
- ✓ *SDR allocations*<sup>19</sup>;
- ✓ *Interest payable* – interest payable on foreign liabilities.<sup>20</sup>

**Table 1.3.6: Loans to Non-financial Corporations, Households and NPISHs**

This table reveals information on loans (their residual value) by type, currency and sector granted by credit institutions. Loans are reported under the *claims on non-government* sector item in the monetary survey and analytical reporting.

### **Types of Loans**

1. *By maturity*
  - ✓ Short-term loans – loans with an original maturity of one year or less, including overdraft.
  - ✓ Loans with maturity of over one to five years – loans with an original maturity exceeding one year but less than five years.
  - ✓ Loans with maturity of over five years – loans with an original maturity exceeding five years.
2. *By quality*
  - ✓ Regular loans – loans classified as ‘standard exposures’, as per Article 8 and ‘watch exposures’, according to Article 9 (excluding restructured loans) as per Ordinance No. 9 of the BNB<sup>21</sup>.
  - ✓ Bad and restructured loans<sup>22</sup> – in accordance with the ECB statistical requirements<sup>23</sup>, the BNB collects data on loans, which are restructured or impaired/repayment is overdue. Data on the total amount of balance sheet loans exposures, which are classified as ‘non-performing exposures’ (Article 10), ‘loss’ (Article 11) and ‘restructured exposures’ according to Article 13 (regardless of the group they are classified in) as per Ordinance No. 9 of the BNB, are collected. For the purpose of monetary and interest rate statistics detailed data on the classified risk exposures according to their past due periods are not collected. In accordance with the international practice, reporting for monetary and interest rate statistics differs from supervisory reporting, including the reporting of loans, which are restructured or impaired/repayment is overdue. Therefore, the aggregated data on loans which are restructured and impaired/repayment is overdue, do not represent the total classified risk exposures, nor the share of non-performing exposures (past due more than 90 days). Source of information regarding classified risk exposures are the supervisory data of the BNB.
3. *By purpose*
  - ✓ Consumer loans – loans granted for the purpose of purchase of goods and services for personal use of the households;
  - ✓ Loans for house purchase – loans extended to households for the purpose of investing in housing for own use or rental use, including building and home improvements;

<sup>19</sup> Long-term liability to the IMF, counterpart of the Special Drawing Rights.

<sup>20</sup> See footnote 18.

<sup>21</sup> Ordinance 9 of the BNB of 3 April 2008 on the Evaluation and Classification of Risk Exposures of Banks and the Allocation of Specific Provisions for Credit Risk.

<sup>22</sup> Until 30 June 2006 the indicator includes overdue principal, which is not paid.

<sup>23</sup> Regulation ECB/2001/13 concerning the consolidated balance sheet of the monetary financial institutions sector and Regulation ECB/2001/18 concerning statistics on interest rates applied by monetary financial institutions to deposits and loans *vis-à-vis* households and non-financial corporations.

- ✓ Other loans – all other loans extended to households, including loans for education and medical treatment. Loans for commercial or production purposes and loans to NPISHs are also included in the indicator.
- 4. *By manner of disbursement*
  - ✓ Overdraft – represents debit balance on a current account. Payment of overdraft is automatic upon receipt of funds on current accounts. Both overdrafts with pre-agreed interest terms and amounts and without pre-agreed terms are included.
  - ✓ Loans, other than overdraft.

**Tables 1.3.7 and 1.3.8: Memoranda to the Analytical Reporting of the BNB and Other MFIs**

The memoranda show accrued interest and interest arrears on claims and liabilities by type of instrument, derivatives, as well as all adjusting balance sheet items employed in accounting practices (i.e. depreciation and provisions).

Information in the tables is available since December 2001.

**Description of Items**

*Accrued interest* is interest receivable/payable accrued that has not matured, recorded on a current accrual basis. According to the analytical reporting this interest is recorded in the *Other assets* and *Other liabilities* item in the monetary survey. A specificity of the BNB analytical reporting is that interest accrued on international reserves and foreign liabilities is recorded in the *Foreign assets* item, correspondingly in the *Foreign liabilities* item.

*Provisions* include allocated provisions for impairment loss (currently the specific provisions on assets), as well as provisions recognized as liabilities in accordance with IAS and Bulgaria's effective legislation. For statistical purposes, assets subject to provisioning are stated on a gross basis and the allocated provisions are included in the *Other liabilities* item (see *General Methodological Notes*).

*Depreciation* represents a kind of adjustment to depreciable long-term tangible and intangible assets. In the published information, long-term assets are reported on a gross basis and accrued depreciation is recorded in the *Other liabilities* item.

*Derivatives* include the gross fair value of all derivatives held by monetary financial institutions and reported in the balance sheet.

**Tables 1.4.1 and 1.4.2: Monthly Sectoral Survey of the BNB and Other MFIs**

Monthly sectoral surveys show on a gross basis the claims and liabilities of other MFIs and of the BNB so that asset and liability balance sheet items can be identified by sector. Tables are static and contain information on end-of-month balances. Presented data is in compliance with the main principles of sectoral classification and aggregation of instruments into indicators.

1. Sectoral classification – the main principles set out in ESA'95 have been complied with. All items that are not classified by sector as well as MFIs' own claims and liabilities are reported in a separate column as *not allocated*.
2. Financial indicators – the scope and content of the indicators are described underneath respective tables. Some items are more aggregated in comparison with monetary survey and analytical reporting, where a part of the instruments in the liability side is presented with additional breakdowns according to their inclusion in the monetary aggregates.

**Specific Features of Monthly Sectoral Survey of the BNB**

For the purposes of the table, BNB foreign claims are grouped by sector where foreign assets, included in international reserves, and other foreign assets of the central bank are presented together. Cash in foreign currency, Special Drawing Rights holdings and monetary gold are represented in the *Not allocated* column. Foreign assets grouped according to their liquidity as *international reserves* or *other foreign assets* are represented in Table 1.3.5: Foreign Assets and Liabilities of the BNB.

**Tables 1.5.1 and 1.5.2: Monetary Aggregates and Their Counterparts – Stocks and Transactions**

The tables include data on stocks at the end of the reference period and on financial transactions concluded during the period for monetary aggregates and their counterparts.

A *financial transaction* is a creation, purchase, sale or liquidation of a financial asset or liability. It is calculated by taking the difference between stock positions on end-month reporting dates and then removing all changes which are not consequence of financial transactions. These are reclassifications by

sector and instrument, adjustments of reporting errors, price revaluation of securities, write-downs and write-offs of loans, exchange rate adjustments.

*Financial transaction = Stock position at the end of the reporting period – Stock position at the end of the previous reporting period – Reclassifications and other adjustments – Exchange rate adjustments – Other revaluations (Write-downs/write-offs of loans, price revaluation of securities).*

## Interest Rate Statistics<sup>24</sup>

The statistics of the interest rates, applied by the banks, compiled by the BNB, is based on a harmonized methodology for the euro area countries specified in Regulation (EC) № 63/2002 of the European Central bank of 20 December 2001 (ECB/2001/18)<sup>25</sup>. This statistics presents information about the interest rates, volumes of new business and outstanding amounts of deposits and loans of the *Non-financial Corporations* and *Households and NPISHs* sectors. The classification by institutional sectors is in accordance with the requirements of the European System of Accounts 1995 (ESA'95)<sup>26</sup>.

Data on interbank market indices, BIR and yield to maturity on government securities are also published.

### I. LOANS AND DEPOSITS OF THE NON-FINANCIAL CORPORATIONS AND HOUSEHOLDS AND NPISHS SECTORS

#### Types of interest rates and methods of calculation

The interest rates are effective annual rates. They are average weighted with the volumes of new business throughout the reporting period or with the outstanding amounts as of the end of the reporting period. They include all interest payments on deposits and loans, excluding other charges related to these instruments. The interest rate statistics also presents an *annual percentage rate of charge* which is the total cost of the loan to the borrower expressed as an annual percentage of the amount of the extended loan (Consumer Credit Directive 87/102/EEC amended and complemented by Directives 90/88/EEC and 98/7/EC).

The *annual percentage rate of charge* comprises all interest payments on a loan, as well as all fees, commissions and other charges a client has to pay in order to obtain the loan. It is calculated only for *consumer loans* and *loans for house purchase*.

#### Interest rate statistics provides information on interest rates and volumes on new business and outstanding amounts:

- *New business* – every new agreement between the client and the reporting agent. New agreements are contracts that specify for the first time the interest rate, maturity and other conditions on the deposit or loan. A new agreement is also every renegotiation of the interest rate, maturity and/or other conditions of an existing contract when the possibility for this renegotiation has not been previously provided in it, as well as the renegotiation of the maturity with the active involvement of the client.
- *Outstanding amounts* – all liabilities of the reporting agents to their clients on deposits and all claims of the reporting agents on loans (excluding the loans which are classified as ‘non-performing exposures’, ‘loss’ and ‘restructured exposures’ according to Ordinance No. 9 of the BNB).

#### Breakdown by sector

The interest rate statistics covers loans and deposits of non-financial corporations, households and NPISHs residents of the Republic of Bulgaria.

- *Non-financial corporations* sector (Sector S.11 by ESA'95) – consists of institutional units which are market producers and whose principal activity is the production of goods and/or non-financial services.
- *Households and NPISHs* sector (Sectors S.14 and S.15 by ESA'95) includes the following sub-sectors:
  - *Households* sector (Sector S.14) – individuals or groups of individuals as consumers and possibly also as entrepreneurs producing market goods and services (market producers), as well as producers of goods and non-financial services for exclusively own final use. The sub-sector also includes sole proprietorships and partnerships without independent legal status.
  - *Non-profit institutions serving households* sector (Sector S.15) – separate legal entities, whose principal activity is connected to serving, supporting and assisting households. Their

<sup>24</sup> Last update as of 25 April 2013.

<sup>25</sup> Regulation (EC) No 63/2002 of the European Central bank of 20 December 2001 (ECB/2001/18) concerning statistics on interest rates applied by monetary financial institutions to deposits and loans *vis-à-vis* households and non-financial corporations.

<sup>26</sup> Detailed classification by institutional sectors according to the requirements of the European System of Accounts (ESA'95) is available on the BNB website under [www.bnbg.bg/Statistics/Methodological Notes/Institutional Sectors](http://www.bnbg.bg/Statistics/Methodological%20Notes/Institutional%20Sectors).

principal resources, apart from those derived from occasional sales, are derived from voluntary contributions in cash or in kind from households in their capacity as consumers, from payments made by the General government sector and from property income. Here are included trade unions, political parties, foundations, associations, churches or religious societies, social, cultural and sports clubs.

#### **Breakdown by instrument**

- *Overnight deposits* – deposits without fixed maturity, which are immediately convertible in cash and/or transferable at demand by cheque, banker's order without any restriction or penalty. The instrument also includes deposits up to 1 day. (Interest rates and volumes on new business and on outstanding amounts for this instrument coincide).
- *Deposits with agreed maturity* – deposits that are not immediately available as they have an agreed term or other restrictions on their withdrawal. These deposits cannot be used in settlements and they are not convertible in cash without any restrictions or penalties. *Time deposits* and other deposits with similar characteristics are included (amounts deposited as a security for open letters of credit, amounts pledged as collateral, amounts blocked in relation to legal proceedings and other amounts blocked in deposit accounts, etc.).
- *Loans* – claims on funds lent by reporting agents to borrowers as well as claims transferred from third parties. Loans classified as ‘non-performing exposures’, ‘loss’ and ‘restructured exposures’ (according to Ordinance No. 9 of the BNB) are not included in the scope of interest rate statistics. Loans are divided into two subcategories: *overdraft* and *loans other than overdraft*<sup>27</sup>. (Interest rates and volumes on new business and on outstanding amounts for *overdraft* coincide.)

#### **Currency – BGN**

#### **Breakdown by purpose of loans** (only for the *households and NPISHs* sector)

- *Consumer loans* – loans granted for the purpose of purchase of goods and services for personal use of the households in the consumption of goods and services.
- *Loans for house purchases* – loans extended to households for the purpose of investing in housing for own use or rental use, including building and home improvements.
- *Other loans* – all other loans extended to households, including loans for education and medical treatment. Loans for commercial or production purposes and loans to NPISHs are also included in the indicator.

#### **Breakdown by agreed size of the loan** (only for the *non-financial corporation* sector)

- *Loans up to an amount of EUR 1 million* expressed as its BGN equivalent (the limit of EUR 1 million refers to every individual loan).
- *Loans over an amount of EUR 1 million* expressed as its BGN equivalent (the limit of EUR 1 million refers to every individual loan).

#### **Breakdown by agreed period**

- *Original maturity* – the initially agreed period of time during which the loan cannot be repaid and the deposit – redeemed without any kind of penalty.
- *Period of initial rate fixation* – the predetermined period of time at the start of a loan contract during which the value of the agreed interest rate cannot change.

#### **Reporting period**

The reporting period is one calendar month. End-of-month information is presented for the purpose of interest rate statistics on *outstanding amounts*. Interest rate statistics on *new business* includes data on all new agreements concluded during the reporting period.

#### **Revision policy**

In accordance with the requirements set out in *ECB Guideline 2007/9*<sup>28</sup>, as a rule historical data may be revised with the publication of the data for March, June, September, and December. Thus, consistency between monetary and interest rate statistics is ensured.

Revisions of published data are made in the following cases:

- obtained additional information, incorrect classification, improved reporting procedures and correction of mistakes in the data submitted by reporting agents;
- change in the methodological standards of monetary and interest rate statistics.

<sup>27</sup> Claims on repurchase agreements of the reporting agents are included in the instrument *loans other than overdraft*.

<sup>28</sup> Guideline of the European Central Bank of 1 August 2007 on monetary, financial institutions and markets statistics (recast) (ECB/2007/9) as amended by Guideline ECB/2008/31 and Guideline ECB/2009/23.

Revisions are marked with the sign **r**.

#### **Data source**

Reporting agents are all banks in Bulgaria, including branches of foreign banks. In accordance with the requirements of Council Regulation (EC) No 2533/98 of 23 November 1998 concerning the collection of statistical information by the ECB, national central banks should not publish data when certain reporting agents could be identified. In such cases, the total value of the indicator may not be equal to the sum of its components.

## **II. INTERBANK MARKET**

#### **Scope**

- *Base interest rate (BIR)* – the BIR for the current month equals the simple average of the values of the index *LEONIA* for the business days of the preceding month.

Interbank market indices:

- *LEONIA (LEONIA: LEv OverNight Interest Average)* – an interest rate of BGN overnight unsecured transactions on the interbank market;
- *SOFIBOR (Sofia Interbank Offered Rate)* – a fixing of the quotes for unsecured BGN deposits offered on the Bulgarian interbank market. It is produced for a set of maturities every business day as an average of the ask quotes provided by a representative panel of banks;
- *EONIA (Euro OverNight Index Average)* and *EURIBOR (EURO InterBank Offered Rate)*.

#### **Data processing**

- Monthly data on indices are calculated as simple average of daily data.

#### **Reporting period**

The reporting period is one calendar month.

#### **Data source**

- Bank Policy Directorate of the BNB – for *BIR*, *LEONIA* and *SOFIBOR*.
- ECB – for *EONIA* and *EURIBOR*.

## **III. YIELD TO MATURITY ON GOVERNMENT SECURITIES. LONG-TERM INTEREST RATE FOR CONVERGENCE ASSESSMENT PURPOSES**

#### **Scope**

- *Secondary market yield* to maturity on interest-bearing government securities.
- *Long-term interest rate for convergence assessment purposes (LTIR)* is determined on the basis of the secondary market yield to maturity of a long-term government bond (benchmark bond) issued by the Ministry of Finance (*Central Government* sector) and denominated in the national currency. The *LTIR* is calculated in accordance with the requirements of the European Central Bank. Additional information regarding the *LTIR* is published on the web site of the BNB (*Statistics/Monetary and Interest Rate Statistics/ Interest Rate Statistics/Long-term Interest Rate for Convergence Purposes*).

#### **Data processing**

- The yield to maturity of government securities is calculated as an average weighted effective yield to maturity on individual transactions between primary dealers of government securities during the reporting period. The yield is calculated using the ISMA formula at ACT/365 day count convention. The securities are grouped by their original maturity.

#### **Reporting period**

The reporting period is one calendar month.

**Data sources** – Fiscal Services Department of the BNB – for the yield on government securities.

## **IV. DATA DISSEMINATION**

The Bulgarian National Bank disseminates on its website monthly data on interest rate statistics in a database organized as a set of data series in the *Statistics/Monetary and Interest Rate Statistics/Interest Rate Statistics/Interest Rate Statistics* section.

Selected indicators, representative for the interest rate statistics and organised in tables are published in the electronic issue ‘Interest Rate Statistics’ and in the semi-annual and annual reports of the BNB.

Data is simultaneously released to all interested parties. The publication dates are announced in the Statistical Data Release Calendar.<sup>29</sup>

## V. CONTACTS

Should you have any questions on the data and the applied methodology, please do not hesitate to contact the press office of the Bulgarian National Bank ([press\\_office@bnbank.org](mailto:press_office@bnbank.org)) or Ms. Daniela Dobreva, Head of Monetary and Banking Statistics Division ([dobreva.d@bnbank.org](mailto:dobreva.d@bnbank.org)).

# 2 External Sector

Information on the external sector includes four major categories:

- (a) balance of payments;
- (b) trade in goods;
- (c) debt indicators;
- (d) exchange rates.

## Balance of Payments<sup>30</sup>

The Bulgarian National Bank is in charge of the compilation of Bulgaria's balance of payments. The legal framework of the balance of payments compilation in Bulgaria is provided for in Article 42 of the Law on the Bulgarian National Bank (published in the Darjaven Vestnik, issue 46 of 10 June 1997; amended; Darjaven Vestnik, issue 59 of 2006). Data for the purposes of the BOP compilation are collected on the basis of Article 42 of the Law on the Bulgarian National Bank as well as pursuant to Articles 7–10 of the Foreign Exchange Law (published in the Darjaven Vestnik, issue 83 of 21 September 1999; amended, issue 60 of 2003). The data are processed by the Balance of Payments and External Debt Division within the BNB Statistics Directorate keeping its confidentiality. At present, the Bulgarian National Bank compiles and publishes analytical presentation as well as standard presentation of the balance of payments in accordance with the fifth edition of the Balance of Payments Manual (IMF, 1993) and the Guideline of the European Central Bank.<sup>31</sup>

The balance of payments' methodology is conceptually related to that of the *System of National Accounts* (SNA). The items of the balance of payments correspond closely to the relevant categories of the *rest of the world* account in the SNA.

There is a close relationship between the *International Investment Position* and the balance of payments as well. The BOP financial account reveals economy's transactions in external financial assets and liabilities which affect the amount of external financial assets and liabilities reported under the international investment position.

### I. Accounting Principles and Conventions

The basic convention applied in constituting Bulgaria's balance of payments is the implementation of the *double entry system*. **Credit, with a positive sign**, includes: exports of goods and services, income receivable, offsets to unrequited real and financial resources received (transfers), increases in financial liabilities, decreases in financial assets. **Debit, with a negative sign**, includes: imports of goods and services, income payable, offsets to unrequited real and financial resources provided, increases in financial assets, decreases in financial liabilities.

The *time of recording* the balance of payments transactions is the time of the change in ownership.

*Transaction valuations* are based on market prices. If the actual market prices are not available, the average market prices are used as approximation.

*Valuation changes* in Bulgaria's external assets and liabilities due to valuation adjustments are not included in the balance of payments.

The units of account for the balance of payments of Bulgaria are euro and lev. The conversion into the unit of account is based on the exchange rate at the time of transaction. If not available, or inapplicable due to other practical reasons, the average exchange rate for the reporting period is used.

<sup>29</sup> The Statistical Data Release Calendar is published on the BNB website under [www.bnbg.bg/Press office/Events/Calendar](http://www.bnbg.bg/Press%20office/Events/Calendar).

<sup>30</sup> Revised methodological notes as of 17 June 2013.

<sup>31</sup> *Guideline of the European Central Bank on the Statistical Reporting Requirements of the European Central Bank in the Field of Balance of Payments Statistics, the International Reserves Template and International Investment Position Statistics (ECB/2004/15)*.

## II. Balance of Payments Components

The balance of payments components are compiled using the *International Transactions Reporting System* (ITRS), which includes (i) banks' reports, and (ii) reports of enterprises which have bank accounts opened abroad (pertaining to the residents' international transactions). These reports cover all components of the balance of payments table. As of 1 January 2010 the threshold under which transactions, reported by payment service providers are exempted from balance of payments reporting has risen from BGN 25,000 to BGN 100,000. In addition, the data on certain BOP components collected by the ITRS are substituted for data from other sources: (i) monthly exports and imports of goods, provided by the NSI (ii) BNB estimations for the items *Travel, Transportation, Compensation of employees, credit and Workers remittances, credit* (iii) direct investment enterprise survey and quarterly reports of Bulgarian FDI abroad (iv) monthly reports by banks, other non-bank financial institutions, insurance companies and pension funds on their *Portfolio investments, assets* (v) data from the Central Depository on the *Portfolio investments, liabilities*, (vi) reports by other institutions, (vii) reports by enterprises which have received (extended) financial loans by (to) non-residents, and (viii) reports by enterprises on other liabilities and claims (other than financial loans) to non-residents.

In the analytical presentation, the balance of payments components are classified in the following major categories:

### A. Current Account

The *Current Account* comprises the acquisition and provision of **goods and services, income, and current transfers** between Bulgaria and the rest of the world. The flows recorded on the credit side represent that part of the gross domestic product, which is provided to the rest of the world (exports of goods and services), as well as the provision of factors of production expressed by income received or receivable – compensation of employees, and investment income (interest, dividends, etc.). Offsets to unrequited real and financial resources received (transfers) are also recorded.

The flows on the debit side represent the gross product created in the rest of the world and acquired by the national economy (imports of goods and services), as well as the acquisition of factors of production expressed by income paid or payable. Offsets to unrequited real and financial resources provided are also recorded.

- The *Goods* component of the BOP current account covers movable goods for which changes in ownership between residents and non-residents occurred. Data on imports and exports FOB (free on board) are based on customs declarations, as the codes used are in compliance with the Harmonised System for Description and Coding of Commodities of the World Customs Organisation, introduced in 1988 and supplemented in 1992. The Bulgarian National Bank and the National Statistics Institute apply jointly the methodology for compilation of imports at FOB prices and receipts and payments regarding the freight transportation, developed by them.<sup>32</sup> The methodology is based on the analysis of the CIF/FOB correlations for the imports of goods depending on the import delivery categories, as well as on the mode of transportation and nationality of the carrier.

The geographical breakdown of the Goods item of the BOP is based on the following principles:

For the intra EU trade in goods:

- In case of imports (or arrivals), a partner country is the country (or the Member State) of consignment of the goods.
- In case of exports (or dispatches), a partner country is the country (or the Member State) of final destination of the goods.

For the trade with third countries (outside the EU):

- In case of imports, a partner country is the country of origin of the goods.
- In case of exports, a partner country is the country of final destination of the goods.

*Data sources:* The source of data between the beginning of 2003 and the end of 2006 was the Customs Agency and for preceding years – the Information Services (at the Information Computing Center Directorate). The Bulgarian National Bank and the National Statistical Institute received the exports and imports data, supplemented them with other information and processed them further. With the application of the Intrastat system (introduced with the Law on Statistics of Intracommunity Merchandise Trade, published in the Darjaven Vestnik, issue 51 of 2006) since January 2007 brought about changes in the way data on the foreign trade of Bulgaria with the rest of the EU member states were reported.

<sup>32</sup> The 2002 to 2005 data are based on this methodology for compilation of imports at FOB prices and of receipts and payments regarding freight transportation.

The introduction of the Instrastat system led to changes in the schedule of data receiving and processing. The information on exports (dispatches) and imports (arrivals) of goods is reported by the Instrastat operators (the firms obliged to provide information) to the National Revenue Agency within 14 days after the close of the reporting month. These data are sent to the National Statistical Institute for further processing. The NSI reports to the Eurostat aggregated monthly data (without breakdowns by trade partner and by type of goods) within 42 days after the close of the reporting month. The detailed intratrade data on dispatches and arrivals of goods are reported to Eurostat within 70 days after the close of the reporting month.

The BNB receives aggregated data from the NSI (without breakdowns by trade partner and by type of goods) on the country trade with the other EU member states within 35 days after the close of the reporting month, and these data are supplemented by the data of the Customs Agency on trade with third countries. Therefore, only aggregated data on exports and imports are published in the report on the balance of payments for the reporting month. The BNB receives detailed data on dispatches and arrivals of goods from the NSI within 60 days after the close of the reporting month.

As a result of these changes the schedule for foreign trade data reporting by the BNB is the following:

- Preliminary aggregated data (without breakdowns by trade partner and by type of goods) for the reporting month are published within 42 days after the close of the reporting month in the balance of payments table.
- Preliminary detailed data (with breakdowns by trade partner and by type of goods) for the reporting month are submitted to users not earlier than 73 days after the close of the reporting month.
- The published series of data on Bulgarian imports and exports on the BNB website are updated not earlier than 73 days after the close of the reporting month.

The BNB and the NSI coordinate import and export data before publishing them.

- The *Services* component comprises *transportation, travel, and other services*.

The Bulgarian National Bank derives the data on *freight transportation* from foreign trade data and the data on *passenger transportation* from travel data on the basis of estimates.

As of January 2006 the freight transportation receipts are set up on the basis of estimated receipts of resident carriers related to the country exports of goods. The payments are calculated as an estimation of the payments made by residents on behalf of non-resident carriers related to the country imports of goods. The receipts and payments are estimated according to mode of transportation and nationality of the carrier. With the introduction of the Instrastat system with the January 2007 data, changes in the way of compilation of receipts and payments regarding the freight transportation of Bulgaria with the rest of the EU Member States took place. Due to the delay in receiving the detailed data on trade of Bulgaria with the rest of the EU Member States from the NSI, as of the date of publication of the preliminary balance of payments report for the corresponding month (42 days after the close of the reporting period) the preliminary compilation of receipts and payments of freight transportation is based on data for preceding years. These estimates are subject to revisions after receiving the preliminary detailed data (with breakdown by trade partner and by type of goods) on trade with the rest of the EU Member States for the reporting month.

*Travel* covers goods and services, including those related to health and education, acquired by travellers for business and personal purposes. By the end of 2006 the data on travel is based on data from the Ministry of Internal Affairs on the number of travellers crossing the borders and on estimates of *per capita* expenditures, the latter based on the methodology for estimation of the receipts and expenditures from travel services – *Methodology For Estimation of the Receipts and Expenditures from Travel in the Bulgarian Balance of Payments* (Bulgarian National Bank, Ministry of Trade and Tourism, 18 November 1999).

As of the beginning of 2007 data for the number and the structure of foreigners who visited the country are based on information from the border police and NSI estimates. With the January 2010 data the BNB applies new methodology for estimation of the receipts and expenditures for travel and passenger transportation. The estimation model for the *Travel* item is based on the product of the number of travelers and the respective expenditure for a certain type of purpose of the travel (for more detailed information and questions, related to the methodologies applied, please contact us by e-mail: [press-office@bnbank.org](mailto:press-office@bnbank.org)). The NSI estimates of the number and structure of cross-border traveling are based on Ministry of Internal Affairs data on the number of travellers crossing the state border and NSI estimates. The estimates of the expenditures of the

travel *per capita* are based on the data collected during the *Border Survey among Traveling Bulgarians and Foreigners* conducted by the BNB during the period July 2007 – August 2008. With the publication of the data for January 2010, data for the 2007–2009 period are revised.

*Other Services* item covers receipts and payments related to services other than transportation and travel (communication, construction, financial, insurance, leasing, cultural, sport and recreational services, etc.).

The *major sources* of information till end-2009 on this item are the banks' reports on their customers' imports and exports of non-factor services and the quarterly reports of enterprises having accounts abroad. Since 1 January 2010 Regulation (EC) No 924/2009 of the European Parliament and the Council of 16 September 2009 on cross-border payments in the Community and repealing Regulation (EC) No 2560/2001 entered into force. It provides for the raising by BGN 100,000 of the exemption threshold for settlement-based reporting obligations imposed on payment services providers for balance of payments statistics, related with payment transactions of their customers. The quality and scope of information collected by banks depends to a great extent on the threshold above which banks report to the BNB information on transactions between residents and non-residents carried out by them. The introduction of a EUR 50,000 ceiling as of 1 January 2010 in the absence of an alternative source would lead to a significant deterioration in the quality of balance of payments data and especially of current account data in Bulgaria. The analysis shows that the loss of information about certain kinds of services would come to 90 per cent. Therefore, the BNB changed the methodology of compiling data on exports and imports of services and some other operations in the balance of payments current account. Since 2010 the BNB conducts a regular quarterly survey of the receipts and payments between residents and non-residents in relation with obtaining and providing services, remuneration, insurances and voluntary receipts and payments that are included in the balance of payments current account. Based on the data compiled during this survey, revised data for 2010 are published together with January 2011 data. Banks' data on receipts and payments related with exports and imports of services above the BGN 100,000 threshold and additional BNB evaluations of the receipts and payments under the threshold of BGN 100,000 are used for the purposes of balance of payments monthly reporting. Data are subject to revision upon obtaining quarterly data from the survey among enterprises importing and exporting other services.

- *Income* consists of two categories: (i) *compensation of employees*, and (ii) *investment income*. *Compensation of Employees* covers wages, salaries and other benefits paid to non-resident workers in Bulgaria or received by resident workers abroad. The compensation of employees also comprises income due to illegal employment. The BNB estimates this flow in accordance with the *Methodology for Estimation of Flows due to Illegal Employment* (14 March 2006).<sup>33</sup> *Investment Income* covers receipts and payments of income associated with external financial assets and liabilities: on direct investment (dividends and reinvested earnings), portfolio investment, other investment, and on reserve assets (deposit accounts).

The *major sources* of information on the Income component are the banks' reports and the reports of enterprises, the Ministry of Finance, and the Bulgarian National Bank.

- *Transfers* are all real resources and financial items provided without a quid-pro-quo from one economy to another. *Current Transfers* directly affect the level of disposable income of an economy, and the consumption of goods and services. That is, current transfers reduce the income and consumption potential of the donor and increase the income and consumption potential of the recipient. Receipts from EU preaccession and accession funds, private persons' money transfers, as well as gifts, grants, inheritances, prizes won from lotteries, pensions, current taxes, social security contributions, etc. are included in the *Current Transfers*.

*Sources:* The Bulgarian National Bank estimates, information on current transfers from the Ministry of Finance, the Bulgarian Red Cross, the Agency for Foreign Aid, and from the reporting system of banks on transactions between residents and non-residents.

## B. Capital Account

The *Capital Account* consists of two categories: (i) *capital transfers*, and (ii) *acquisition or disposal of intangible, non-financial assets*. If in kind, a capital transfer consists of (i) a transfer of ownership of fixed assets, or (ii) forgiveness of a liability by a creditor when no counterpart is received in return. If in cash, a transfer is *capital* when it is linked to, or conditional on, the acquisition or disposal of fixed assets (for example, an investment grant).

<sup>33</sup> Data have been based on this methodology since April 2001.

*Sources:* The Bulgarian National Bank receives information on the capital account from the Ministry of Finance (for capital transfers from the EU funds), from the quarterly reports of the enterprises in the non-financial sector, the monthly reports of the notaries and others.

### C. Financial Account

The *Financial Account* comprises all transactions (actual and imputed) in the external financial assets and liabilities of an economy. The external assets and liabilities are primarily classified according to the type of investment. The *Financial Account* includes (i) *direct investment*, (ii) *portfolio investment*, and (iii) *other investment*.

- *Direct investment* covers direct investment abroad, direct investment in reporting economy and mergers and acquisitions. *Direct investment* is a category of international investment in which a resident of one economy – a direct investor – acquires a lasting interest (at least 10% of the ordinary shares or the voting power) in an enterprise resident in another economy – a direct investment enterprise. The direct investment includes both the initial transaction, through which the relationship between the direct investor and the direct investment enterprise is established, and all subsequent transactions between them. The direct investment covers transactions relating to changes in the direct investor's share in the equity capital of the direct investment enterprise, intercompany debt transactions, as well as the share of the direct investor in the undistributed earnings/loss of the direct investment enterprise. Direct investment is reported on a directional basis: direct investment abroad – as an asset, and direct investment in the reporting country – as a liability.

The *Mergers and Acquisitions* subitem shows the transactions related to mergers and acquisitions. The purpose of its inclusion was to eliminate the influence of such deals over the reported foreign direct investment data. The international practice shows that these transactions have hardly any real impact on the production capacities and employment and the conclusions drawn from the interpretation of foreign direct investment data in which data on mergers and acquisitions are included might be misleading about investment flows, developments, branch and geographical structure.<sup>34</sup>

*Sources:* The Bulgarian National Bank receives monthly data on direct investments in Bulgaria from the Privatisation Agency, from the Central Depository, from the reporting system of banks on transactions between residents and non-residents, from notaries and registry offices; quarterly data from the Financial Supervision Commission, from the direct investment enterprises, from the National Statistical Institute, from the Banking Supervision Department of the BNB, from the insurance and pension insurance companies; annual data from the NSI on foreign direct investment stock in enterprises from the non-financial sector.

For data on direct investments abroad, the Bulgarian National Bank uses information from FDI declaration forms, from quarterly reports of non-financial sector enterprises and from the reporting system of banks on transactions between residents and non-residents.

- *Portfolio Investment* includes portfolio investment assets and portfolio investment liabilities.

*Portfolio Investment* covers transactions in shares and equity of the investor's share in the capital is less than 10 per cent, transactions in bonds, notes, money market and other tradable securities.

The *major source* of information on the liabilities side of the *Portfolio Investment* is the data provided by the Ministry of Finance, the Bulgarian National Bank, banks, enterprises holding bank accounts abroad, and the Central Depository.

Data on the assets side of the *Portfolio Investment* are provided by banks (regarding portfolio investments both on the account of banks and on their customers' account), other financial institutions, insurance companies and pension funds, the Bulgarian National Bank and the Ministry of Finance.

- *Other Investment* includes trade credits, loans, currency and deposits, and other assets and liabilities.

According to the balance of payments conventions, trade credit arises from the direct extension of credit from a supplier to a buyer, i.e. this is a credit extended by a trade partner without issue of tradable securities.

Information on trade credits is provided mainly by the quarterly reports of residents on their claims on/liabilities to non-residents.

The *Loans* item includes received and paid principals on long- and short-term loans between residents and non-residents if no issue of tradable securities is involved with these loans. Transactions concerning disbursements and repayments of principals on IMF loans and disbursements on loans on BOP support are not included in the *Loans* item. They are recorded under the corresponding items of the *E. Reserves and Related Items group*.

<sup>34</sup> See European Central Bank, Eurostat, Foreign Direct Investment Task Force Report, March 2004, paragraph 332.

Data on loans are based on information received from the Ministry of Finance, the Bulgarian National Bank, the banks and directly from the enterprises that have extended loans or received credits from abroad. The latter report quarterly data to the BNB because of which the monthly data on *Loans, Other sectors* (assets and liabilities) are revised each quarter.

The *Currency and Deposits* component shows the changes in the residents' currency and deposits held abroad on the assets side, and the changes in the liabilities of the resident banks to non-residents in national and foreign currency on the liabilities side. Following the basic accounting principle and conventions set in the *Balance of Payments Manual* (IMF, 1993), when compiling this item, the Bulgarian National Bank excludes any changes therein due to exchange rate changes.

The *Other Assets* and *Other Liabilities* items include all transactions on miscellaneous accounts receivable and payable not included elsewhere and transactions in arrears.

#### **D. Net Errors and Omissions**

The *Net Errors and Omissions* component is an offsetting item. This component exists in the BOP presentation as the data collection system used by the Bulgarian National Bank is not a closed one but a combination of various sources of information. Unlike other statistical reports, e.g. monetary statistics, data collection required for the balance of payments compilation could not be limited to the financial statements of banks as the only source of information.

The fluctuations in the *Net Errors and Omissions*, both in sign and in size, are mainly due to: (i) revisions of export and import data, (ii) the improvement of the methodology for compiling individual balance of payments' components, and (iii) the existence of objective obstacles to collecting data on particular balance of payments' items.

#### **E. Reserves and Related Items**

- *Reserve Assets* include the external assets available to and controlled by the central bank (government) for direct financing of balance of payments imbalances. The reserve assets comprise monetary gold, SDRs, reserve position in the International Monetary Fund, foreign exchange assets (including currency and deposits, and securities), and other claims. The entries under this category pertain to transactions on BNB external holdings which are administered by the Issue Department. Data on reserve assets changes included in the BOP table excludes valuation adjustments, due to exchange rate fluctuations and price revaluation.

In the analytical presentation of the balance of payments, this group includes also the *Use of Fund Credit* and the *Exceptional Financing* items. The exceptional financing comprises the BOP support as well as deferred/rescheduled payments and payments on arrears, associated with balance of payments difficulties. In accordance with the methodology for accounting exceptional financing transactions (*Balance of Payments Manual*, Fifth Edition (IMF, 1993), p. 454), the principal repayments on the BOP support credits are included in the **Financial Account** in *Other Investment – Liabilities – Loans – General Government*.

### **III. Periodicity, Frequency and Timeliness of the Balance of Payments Publications**

The Bulgarian National Bank compiles and publishes the balance of payments of the Republic of Bulgaria on a monthly basis. In accordance with its schedule, the Bulgarian National Bank publishes the balance of payments data within six weeks (42 calendar days) after the close of the reference period.

#### **IV. Data Revision Policy**

Revisions to published BOP estimates are typical of many balance of payments compilation systems. They are in compliance with the ECB Timetable for Exchange of Balance of Payments, International Investment Position and Reserve Assets Statistics within the ESCB (which includes a data revision timetable). With the revision publication, the users are duly informed about the revised data on the corresponding items.<sup>35</sup> The data revision policy pursued by the Bulgarian National Bank is based on the following principles:

(i) With the report for the first month of the quarter, the monthly data for the whole current year are revised. With the reports for the second and the third months of the quarter, only data for the previous month are revised.

(ii) When on-going changes are made due to additional information collected, as well as resulting from elimination of errors, the Bulgarian National Bank duly informs the users through the monthly press releases, as well as through the notes at the end of the balance of payments table.

<sup>35</sup> The annual data on foreign direct investment in Bulgaria are revised 15 months after the close of the reporting period (after the annual NSI data on the non-financial sector are received in the BNB).

(iii) When significant revisions are made due to changes in the methodology for reporting of certain BOP components or for any other reasons, the Bulgarian National Bank publishes in advance information on the changes to facilitate data users.

#### **V. Data Dissemination**

The Bulgarian National Bank disseminates the monthly balance of payments data on its website – <http://www.bnbg.bg>

The data are published also in the semi-annual and annual reports of the Bulgarian National Bank. Data are simultaneously provided to all interested parties.

#### **VI. Contacts**

If you have any questions on the methodology applied by the Bulgarian National Bank or on the published balance of payments data, please do not hesitate to send them to Mr. Emil Dimitrov, Director of the Statistics Directorate, and to Mrs. Liliana Bancheva, Head of the Balance of Payments and External Debt Division, via e-mail at *Dimitrov.E@bnbank.org* and *Bancheva.L@bnbank.org*, or by mail to the following address:

Bulgarian National Bank  
Balance of Payments and External Debt Division  
1, Knyaz Alexander I Square  
1000 Sofia, Bulgaria

### **Imports and Exports**

**I. Data Sources**  
The data source between the beginning of 2003 and the end of 2006 was the Customs Agency, and for preceding years – the Information Services (at the Informational Computing Center Directorate). The Bulgarian National Bank and the National Statistical Institute received the exports and imports data, supplemented them with other information and processed them further. Until the end of 2006 all enterprises which exported or imported goods were obliged to declare these activities through customs declarations.

Since 1 January 2007 the enterprises trading with other EU member states report according to the Intrastat system (introduced with the Law on Statistics of Intercommunity Merchandise Trade, published in the Darjaven Vestnik, issue 51 of 2006). In compliance with this Law, enterprises whose turnover exceeds the threshold set by the National Statistical Institute (NSI), submit Intrastat declarations to the National Revenue Agency (NRA). The Agency is obliged to perform control over the coverage of the enterprises and to keep track of the fulfilment of their duties under the Intrastat system, as well as to control the authenticity of the provided data. The data from the Intrastat declarations are submitted to the NSI for further processing.

The imports from, and exports to, third countries (non-EU member states), as well as the movement of goods within the EU, which is under customs control, are still reported through customs declarations, and the Customs Agency submits the data to the NSI for processing. The NSI combines these data with the Intrastat data, processes them and after performing additional estimates provides the data to the users, including the Bulgarian National Bank.

#### **II. Data Timelines**

The BNB receives from the NSI aggregated data (without breakdowns by trade partner and type of goods) on the country trade with the other EU member states within 35 days after the close of the reporting month. The detailed data on dispatches and arrivals of goods are provided by the NSI within 60 days after the close of the reporting month, and the data on the turnover of trade with third countries are provided by the NSI at the latest on the 29th day of the month following the reporting one.

#### **III. Principles of Reporting**

Exports are reported at FOB prices and imports at CIF prices. For the purposes of the balance of payments statistics, however, total imports are re-calculated at FOB prices. The coding system used for commodities is based on the *Harmonised Commodity Description and Coding System* of the World Customs Organisation, introduced in 1988 and supplemented in 1992.

Based on the common BNB and NSI methodology, since 1999 exports and imports are recorded after the *Special Trade System*, where the date of transactions' registration is that of the customs declarations' clearance, or of the month of dispatches or arrivals within the Intrastat system. The criteria for the description of partner countries are as follows: *imports* – by country of commodities' origin; *exports* – by country of consignment, that is, the latest known country where the commodities are to be delivered. For

the purposes of consistency with the statistical time series on imports and exports by *major trading partner and region*, the BNB has also applied these criteria to the data following 1 January 2007.

In accordance with their common methodology, before publishing the imports and exports data, the BNB and the NSI coordinate the gross figures for imports, exports and trade balance.

#### **IV. Import and Export Tables**

##### **A. End-use tables**

For the purposes of the economic analysis the BNB publishes tables by end-use based on the *Harmonised Commodity Description and Coding System* four-digit codes and grouped according to the purpose and end-use of the respective commodity. The basic principles of commodities' distribution in the respective groups are: purpose of use, on the one hand, and degree of processing, on the other. The tables are monthly, quarterly and annual.

##### **B. Major trading partner and region tables**

The tables include only the most important countries and regions for the Bulgarian exports (imports). The subdivision of EU member states into 'EU-15' and 'EU-new member states' is according to the practice and requirements of the Eurostat system and the ECB. The tables are monthly, quarterly and annual.

##### **C. Main trade region and end-use tables**

The tables represent a cross-section of the country's import and export data by region and by commodity. The tables are quarterly and annual.

##### **D. Import and export currency structure tables**

The tables indicate the relative share of the different currencies in the export and import transactions. The tables are quarterly and annual.

In all published tables exports are reported at FOB prices, and imports at CIF prices.

#### **V. Data Dissemination**

The import and export data are available on the website of the BNB ([www.bnb.bg](http://www.bnb.bg)). The foreign trade data are included in the BNB official semi-annual and annual reports.

Time series for the exports and imports by *end-use* and *major trading partner and region* have been published on the website of the BNB since 1995. These series could be searched by period (month, quarter, year) and by end-use (trade partner). Along with this, quarterly and annual *major trade region and end-use tables* and *import and export currency structure tables* (till December 2006) are available there.

#### **VI. Timelines of Publications**

The data series on the country's exports and imports published on the website of the BNB are updated not earlier than 73 days after the close of the reporting month. Within 42 days after the close of the reporting month, aggregated import and export data (without breakdowns by trade partner and by type of goods) are published in the balance of payments table.

#### **VII. Data Revision Policy**

In accordance with its data revision policy, the BNB makes monthly revisions of its data for the last three months, and quarterly revisions of the data for the whole current year. However, in cases of incomplete and/or low quality incoming data, the Bulgarian National Bank may revise the import and export data more frequently.

#### **VIII. Contacts**

For further information on the methodology applied by the Bulgarian National Bank or on the foreign trade data published, you may contact Mrs Liliana Bancheva, Head of the Balance of Payments and External Debt Division, via e-mail at [Bancheva.L@bnbank.org](mailto:Bancheva.L@bnbank.org) (tel. +359 2 9145 1439).

#### **Gross External Debt<sup>35</sup>**

In reporting Bulgaria's gross external debt, the Bulgarian National Bank follows the international standards and requirements set out in the *External Debt Statistics: Guide for Compilers and Users, 2003* prepared by several international organisations and issued by the IMF<sup>37</sup> and in the *Balance of Payments Manual*, IMF, 5th edition, 1993. On the one hand, this ensures international data compatibility, and consistency between the external debt statistics and the balance of payments, international investment position and national accounts, on the other hand. Data on gross external debt are an important information source for particular balance of payments items and the international investment position.

<sup>36</sup> Revised methodological notes as of 23 July 2013.

<sup>37</sup> *External Debt Statistics: Guide for Compilers and Users*, IMF, 2003 (Bank for International Settlements, The Commonwealth Secretariat, Eurostat, International Monetary Fund, Organisation for Economic Cooperation and Development, The Paris Club Secretariat, The United Nations Conference on Trade and Development, World Bank).

The BNB compiles and disseminates monthly statistical data on the gross external debt by institutional sector.

Publications comprise monthly data on: (1) gross external debt stock (2) gross external debt service and (3) disbursements. Additional analytical external debt data by creditor is disseminated quarterly.

### I. Accounting Principles and Conventions

When compiling debt statistics, the BNB follows the **international definition of gross external debt** – ‘Gross external debt, at any given time, is the outstanding amount of those actual current, and not contingent, liabilities that require payment(s) of principal and/or interest by the debtor at some point(s) in the future and that are owed to non-residents by residents of an economy.<sup>38</sup>

The main criterion for a liability to be included in the gross external debt of the country is that **it is issued by a resident and is owed to a non-resident**,<sup>39</sup> regardless of whether it is issued on domestic or international, money or capital markets. The same principle is applied to transactions: only those between residents and non-residents are recorded. In the debt tables the BNB records the amount of **tranches actually disbursed, not contingent**.

The stock of liabilities is recorded **at nominal, not at market value** even in the case when they are in the form of tradable securities. The gross external debt of Bulgaria is reported in euro.

The distinction between short-term and long-term debt is based on the **original, not residual maturity** of the liability. The long-term debt includes all liabilities with original maturity of over one year, liabilities without predefined maturity date as well as liabilities related to direct investment,<sup>40</sup> and the short-term debt, liabilities with original maturity of one year or less. All principal and interest arrears are recorded as short-term debt.

### II. Gross External Debt Components

#### A. By Institutional Sector

The structure of the *Gross External Debt* table by institutional sector is in compliance with the requirements of the *External Debt Statistics: Guide for Compilers and Users, 2003*, prepared by several international organisations and published by the IMF.

The main components of the gross external debt tables classified by institutional sector are general government, monetary authorities, banks and other sectors. In accordance with the international statistical standards, debt liabilities related to direct investment (intercompany lending) are presented separately. The classification by institutional sector is in compliance with the Fifth edition of the *Balance of Payments Manual* (1993). Within the sectors, the external debt liabilities are classified by maturity: short-term and long-term and by instrument.

#### General Government

*General government* debt includes: (1) central government debt, (2) local government debt, (3) debt of social security funds and (4) debt of all non-market non-profit institutions that are controlled and mainly financed by government units. Public corporations and unincorporated enterprises that function as if they were corporations (so called quasi-corporations) are explicitly excluded from the *General Government* sector and are allocated to *Banks* or *Other sectors* as appropriate. The debt liabilities of the *General government* sector are long-term and are classified by instrument: *Bonds and notes* and *Loans*. Liabilities for which no issue of tradable securities is involved are reported under *Loans*. Loans received by the central government from the IMF are also reported under *Loans*. The central government liabilities on securities issued on the domestic and on the international markets are reported under *Bonds and notes*, as the principle that only debt owed to non-residents is external debt is followed. The item comprises the entire stock of the issue abroad. The part of the issue abroad, held by residents at the end of the review period is reported with a negative sign in the *Bonds and notes* held by residents item. Government securities and countervailing instruments issued by the government on the domestic market and held by non-residents are also reported under the *Bonds and notes* item.

*Data sources:* The main source of data is the *Register of Government and Government Guaranteed Debt* of the Ministry of Finance (prior to 31 December 2002 the source of that data was the *System for Debt Registration, Service and the Management* of the Ministry of Finance and the Bulgarian National Bank). Other sources are Government and Government Guaranteed Debts Depository Directorate with the BNB, the Central Depository AD and the banks. The source of data on securities issued abroad and held by residents are the custodians and the banks.

<sup>38</sup> *External Debt Statistics: Guide for Compilers and Users*, p. 7, paragraph 2.3.

<sup>39</sup> For a definition of a resident and non-resident, see the *Balance of Payments Manual*, IMF, 5th edition, 1993, paragraphs 57–58.

<sup>40</sup> *External Debt Statistics: Guide for Compilers and Users*, paragraphs 3.14 and 7.5.

### **Monetary Authorities**

In accordance with the international methodology on external debt statistics included herein are the external liabilities of the BNB. The data is derived from the *Register of Government and Government Guaranteed Debt* of the Ministry of Finance.

#### **Banks**

Short-term liabilities of the banks include short-term loans, non-residents' deposits with domestic banks as well as other payables to non-residents. Deposits in foreign currencies and in levs of non-residents with domestic banks are included in the *Deposits* subitem. The net increase in deposits in the banking system is reported in the *Gross External Debt Disbursements* table, and the net deposit withdrawal – in the external debt service tables, as a principal payment under the *Deposits* subitem. In accordance with the *External Debt Statistics: Guide for Compilers and Users*, deposits related to contingent liabilities are excluded.<sup>41</sup> Long-term liabilities include loans and bonds and notes issued by the banks and held by non-residents.

*Data sources:* Data on the amount and transactions on external loans are received monthly directly from the banks through a statistical form on their external liabilities. The Money and Banking Statistics Division with the Statistics Directorate of the BNB provides monthly data for the *Deposits* and *Other liabilities* items. The source for the data on the *Bonds and notes* item is the Central Depository.

#### **Other Sectors**

In the *Other sectors* item, the debt of private and state-owned non-bank enterprises (including *Government guaranteed debt*) as well as external liabilities of the households are reported.

Short-term liabilities of *Other sectors* include short-term loans, trade credits as well as other payables to non-residents. Long-term liabilities include loans and bonds and notes issued by the companies and held by non-residents.

*Data sources:* Data on financial loans are collected through the statistical *Form SPB-4 Report on the Financial Credit Liabilities of Residents to Non-residents* that covers data on the stock and the various types of transactions on the credit. As the Foreign Exchange Law envisages quarterly reporting of these liabilities, for the first two months of each quarter the BNB publishes estimations on the non-bank enterprises based on the debt service schedules provided by companies on the loans extended to them and on estimations. Under the *Trade credits* subitem, the respective liabilities of residents to non-residents<sup>42</sup> are reported excluding trade credit liabilities towards foreign direct investors. Such data are collected from the BNB through *Form SPB-6B Report on the Liabilities of Residents to Non-residents*. As the Foreign Exchange Law envisages quarterly reporting of these liabilities, for the first two months of each quarter the BNB publishes estimations of the stock of trade credits. Data on liabilities of the resident physical persons are collected through the annual statistical *Form SPB-8 Report on the Assets and Liabilities of Resident Physical Persons to Non-residents*.

#### **Direct Investment: Intercompany Lending**

In accordance with the international methodology on external debt statistics, a distinction is made between liabilities owed to direct investors (*Intercompany loans*) and such owed to other creditors. Liabilities related to direct investment relationship are separately identified (equity liabilities arising from direct investment, i.e. equity capital and reinvested earnings except non-participating preferred shares are excluded from external debt). Liabilities related to direct investment are treated as a long-term debt.

### **B. By creditor**

In accordance with the structure recommended by the *External Debt Statistics: Guide for Compilers and Users*, quarterly external debt stock tables by creditor sector are prepared.

#### **C. Public Sector and Private Sector External Debt**

In accordance with paragraphs 5.5–5.6 of the *External Debt Statistics: Guide for Compilers and Users, IMF 2003*, the public sector external debt comprises the debt of the general government sector, the monetary authorities sector, the public banks, the public non-financial enterprises, as well as the government guaranteed debt of the private sector. The private sector external debt comprises banks and non-financial enterprises' debt, which is not included in the public and publicly guaranteed external debt. The data are monthly.

<sup>41</sup> External Debt Statistics: Guide for Compilers and Users, IMF 2003, paragraph 2.10.

<sup>42</sup> For a definition of trade credits, see Balance of Payments Manual, IMF, 5th edition, 1993, Chapter XX, paragraph 414, as well as External Debt Statistics: Guide for Compilers and Users, Chapter Three, paragraph 133.

### **III. Periodicity, Frequency and Timeliness of the Gross External Debt Publications**

The Bulgarian National Bank compiles and publishes data on the stock of the gross external debt of Bulgaria, the debt service payments and the disbursements on a monthly basis. The external sector debt indicators, including external debt indicators, are also disseminated monthly.

The Bulgarian National Bank publishes the data according to its advance release calendar. In case of a change, the BNB informs the users on the new release date at least a week before the advance date.

### **IV. Data Revision Policy**

The data revisions policy of the Bulgarian National Bank is based on the following principles:

(i) Each monthly publication includes revisions of the data for the previous three months, and each quarterly publication includes revisions of the monthly data for the whole current year.

(ii) When on-going changes are made due to additional information collected, as well as resulting from elimination of errors, the Bulgarian National Bank timely informs the users through the monthly press releases, as well as through the notes at the end of the Gross External Debt tables.

(iii) When significant revisions are made due to changes in the methodology for reporting of certain external debt components or for other reasons, the Bulgarian National Bank publishes in advance information on the changes in order to facilitate the users of the data.

### **V. Data Dissemination**

The Bulgarian National Bank publishes monthly gross external debt data on the website of the Bulgarian National Bank: [www.bnb.bg](http://www.bnb.bg). The data are also published in the BNB Monthly Bulletin, in the semi-annual and annual reports of the Bulgarian National Bank. Data are simultaneously provided to all interested parties.

### **VI. Contacts**

If you have any questions on the methodology applied by the Bulgarian National Bank or on the gross external debt data published, please do not hesitate to contact Mr. Emil Dimitrov, Director of the Statistics Directorate, via e-mail at [Dimitrov.E@bnbank.org](mailto:Dimitrov.E@bnbank.org) and Mrs. Liliana Bancheva, Head of the Balance of Payments and External Debt Division, at [Bancheva.L@bnbank.org](mailto:Bancheva.L@bnbank.org), or by mail to the following address:

Bulgarian National Bank  
Balance of Payments and External Debt Division  
1, Knyaz Alexander I Square  
1000 Sofia, Bulgaria

## **International Investment Position of Bulgaria<sup>43</sup>**

The Bulgarian National Bank is in charge of the compilation of the International Investment Position (IIP) of the country. Data for the purposes of the IIP compilation are collected on the basis of Article 42 of the Law on the Bulgarian National Bank, as well as on the basis of the Foreign Exchange Law. These data are processed by the Balance of Payments and External Debt Division within the Statistics Directorate of the BNB in compliance with confidentiality rules. The IIP statement is compiled in general conformity with the international standards prescribed by the Fifth Edition of the *Balance of Payments Manual* (IMF, 1993) and the *International Investment Position – A Guide to Data Sources* (IMF, 2002) and the *Guideline of the European Central Bank* (ECB/2004/15).<sup>44</sup> The IIP statement is compiled and published quarterly.

There is a close relationship between the *International Investment Position* and the balance of payments. The BOP financial account measures economy's transactions in external financial assets and liabilities which affect the stock of external financial assets and liabilities reported in the international investment position.

*The International Investment Position and the Gross External Debt* are conceptually related to the *System of National Accounts* (SNA). The IIP items correspond to the *Rest of the World* account of the SNA.

### **I. Accounting Principles and Conventions**

*Time of recording* of transactions in international investment position is the end of the reference period.

<sup>43</sup> Revised methodological notes as of 23 June 2011.

<sup>44</sup> Guideline of the European Central Bank on the Statistical Reporting Requirements of the European Central Bank in the Field of Balance of Payments Statistics, The International Reserves Template and International Investment Position Statistics (ECB/2004/15).

*Stocks' valuations* are based on market prices. If the actual market prices are not available, the average market prices are used as an approximation.

*Valuation changes* of the country's external assets and liabilities are included in the international investment position.

The units of account for the international investment position of Bulgaria are the EUR and the BGN. The conversion into the unit of account is made using the exchange rate at the end of the reporting period.

## II. International Investment Position Components

The IIP is the balance sheet of the country's stocks of external financial assets and liabilities at the end of a specific period. The primary type of classification in the IIP statement is the distinction between assets and liabilities. The second level of classification by function is fully consistent with the BOP financial account. The functional types of *assets* and *liabilities* are (i) *direct investment*, (ii) *portfolio investment*, (iii) *financial derivatives* and (iv) *other investment*. Included in assets are also the reserve assets held by the monetary authorities. The third level of classification is by investment instrument. Instruments recorded as *portfolio investment* and *other investment* are further subdivided by domestic sector, while the components of *other investment* are also cross-classified by original maturity.

International investment position components are classified into the following major categories:

### A. Direct Investment

*Direct investment* is a category of international investment in which a resident of one economy – a direct investor – holds a lasting interest (at least 10 per cent of the ordinary shares or voting power) in an enterprise resident in another economy – a direct investment enterprise. The direct investment includes both the initial transaction, through which the relationship between the direct investor and the direct investment enterprise is established, and all subsequent transactions between them. The direct investment covers transactions related to changes in the direct investor's share in the equity capital of the direct investment enterprise, intercompany debt transactions, as well as the share of the direct investor in the undistributed earnings/loss of the direct investment enterprise. Claims on and liabilities to affiliated enterprises are shown separately, following the directional principle.

*Sources and methods:* The information on the FDI stocks is derived from monthly, quarterly and annual reports of the financial and the non-financial sector. For particular elements of the FDI position available stock data are used. Other elements of the FDI position for which BNB has no data on stocks available are estimated as accumulation of balance of payments flows to stocks at the end of previous reporting period.

For data on direct investment abroad the Bulgarian National Bank uses the information from declaration forms on direct investment abroad, quarterly reports on non-financial sector enterprises and monthly reports on international transactions of the banks. Later, the stocks of Bulgarian direct investment abroad are updated with data from an annual survey conducted by the BNB.

The Bulgarian National Bank receives monthly data on direct investment in the country from the Central Depository, the banks' reports on international transactions, the notaries and the Privatisation Agency; quarterly data from the Banking Supervision Department's reports on capital and income of foreign-owned banks, the reports on intercompany debt of direct investment enterprises and data from the Bulgarian National Bank surveys regarding major non-financial foreign direct investment enterprises. Direct investment equity stocks in Bulgaria for the non-financial sector derived from balance of payments' flows are supplemented or replaced with the data provided by the NSI's annual survey on foreign direct investment stocks. The Bulgarian National Bank compiles data with a geographical and economic breakdown for both foreign direct investment in Bulgaria and abroad.

### B. Portfolio Investment

*Portfolio investment* stocks comprise holdings of and liabilities on equity securities and debt securities; the latter are subdivided into bonds and notes (with an original maturity of one year or more) and money market instruments (with an original maturity of less than one year).

*Sources and methods:* The stocks of *portfolio investment assets* cover securities issued by residents and held by non-residents. *Portfolio investment assets* of monetary authorities and the general government do not constitute a part of the reserve assets and are compiled on the basis of information provided by the Accounting Department of the Bulgarian National Bank and by the Ministry of Finance.

The banks' holdings of securities are compiled on the basis of reporting forms containing balance sheet data, while the other sectors' portfolio investment assets are reported by the custodians.

The stocks of *portfolio investment liabilities* cover securities issued by residents and held by non-residents. The main source of information on the portfolio investment liabilities in equity and debt securities are (i) the Central Depository which provides monthly stocks information on portfolio investment by sector and (ii) the banks' reports on Bulgarian securities issued abroad and held by residents. The Ministry of Finance, the Bulgarian National Bank and the banks are the main sources of stock information on the portfolio investment liabilities in debt securities of the *monetary authorities* and the *general government*.

### C. Financial Derivatives

Assets and liabilities in *financial derivatives* cover financial derivative instruments such as forwards, futures, swaps, options, etc. The main source of information are the banks.

### D. Other Investment

*Other investment* covers the stocks of assets and liabilities related to short- and long-term trade credits and loans, currency and deposits and other assets and liabilities (accounts receivable and payable).

According to the fifth edition of the *Balance of Payments Manual*, trade credits consist of claims and liabilities arising from the direct extension of credit by suppliers and buyers for transactions in goods and services and advance payments for work in progress (or to be undertaken) that is associated with such transactions.

The *Loans* item includes received and paid principals on short- and long-term loans between residents and non-residents if no issue of a tradable security is involved with these loans. The *Currency and Deposits* component presents, on the assets side, the changes in the residents' currency deposits held abroad, and on the liabilities side – the changes in the liabilities of the resident banks to non-residents in domestic and foreign currency. The *other assets* and *other liabilities* items include all transactions on miscellaneous accounts receivable and payable not included elsewhere, and transactions in arrears.

*Sources and methods:* The sources of information for trade credits are: quarterly Statistical Form SPB-6A for the assets, and quarterly Statistical Form SPB-6B for trade credits liabilities reported by the non-financial sector. Stocks data on the *Loans* item are received by the Ministry of Finance, the Bulgarian National Bank, the banks and directly by the enterprises that have lent to or borrowed from abroad.

### E. Reserves and Related Items

According to the fifth edition of the *Balance of Payments Manual*, reserve assets consist of those external assets that are readily available to and controlled by monetary authorities for direct financing of payments imbalances and/or for other purposes. The reserve assets comprise monetary gold, SDRs, the reserve position in the IMF, foreign exchange assets (consisting of currency and deposits and securities) and other claims. Under the provisions of the currency board, the reserve assets of the Bulgarian National Bank are equal to the assets of the Issue Department as presented in its balance sheet.

## III. Periodicity, Frequency and Timeliness of the International Investment Position Publications

The Bulgarian National Bank compiles and publishes the international investment position of Bulgaria on a quarterly basis. The schedule of the Bulgarian National Bank is to publish the data within three months after the close of the reference period.

### IV. Data Revision Policy

The policy on revisions pursued by the Bulgarian National Bank is based on the following principles:

- (i) Each publication includes revisions of the data for the previous reporting period.
- (ii) When on-going changes are made due to additional information collected, as well as resulting from elimination of errors, the Bulgarian National Bank timely informs the users through monthly press releases.
- (iii) When significant revisions are made due to changes in the methodology for reporting of certain IIP components or other reasons, the Bulgarian National Bank publishes in advance information on the changes to facilitate data users. With the revisions publication, users are timely acquainted with the revised data on relevant items.

### V. Data Dissemination

The Bulgarian National Bank disseminates quarterly international investment position data on its website: [www.bnb.bg](http://www.bnb.bg).

Data are also published in the semi-annual and in the annual official reports of the Bulgarian National Bank.

## VI. Contacts

If you have any questions on the methodology applied by the Bulgarian National Bank or on the balance of payments data published, please do not hesitate to send them to Mr. Emil Dimitrov, Director, Statistics Directorate, via e-mail at *Dimitrov.E@bnbank.org*, to Mrs. Liliana Bancheva, Head of the Balance of Payments and External Debt Division, via e-mail at *Bancheva.L@bnbank.org*, or by mail to the following address:

Bulgarian National Bank  
Balance of Payments and External Debt Division  
1, Knyaz Alexander I Square  
1000 Sofia, Bulgaria

The Bulgarian National Bank is in charge of the compilation of the *International Reserves and Foreign Currency Liquidity Data Template (the Data Template) of Bulgaria*. These data are processed by the Balance of Payments and External Debt Division within the Statistics Directorate of the BNB.

### I. Concepts of the Data Template

The data template on international reserves and foreign currency liquidity is compiled in accordance with the IMF's *International Reserves and Foreign Currency Liquidity Guidelines for a Data Template* (IMF, 2001) as well as with the Fifth Edition of the *Balance of Payments Manual* (IMF, 1993). The framework of the Data Template is built on two related concepts: (1) International Reserves (Reserve Assets) and (2) Foreign Currency Liquidity. The Fifth Edition of the *Balance of Payments Manual* sets forth the definition of the country's international reserves: 'those external assets that are readily available to and controlled by monetary authorities for direct financing of payment imbalances, for indirectly regulating the magnitudes of such imbalances through intervention in exchange markets to affect the currency exchange rate, and/or for other purposes' (paragraph 424). The concept of the foreign currency liquidity data template is broader than that of international reserves. It refers to the amount of foreign exchange resources that is readily available to the authorities to meet a sudden increase in the demand for foreign exchange and the potential (net) drains on foreign currency resources resulting from short-term foreign currency liabilities and off-balance-sheet activities of the authorities.

### II. Key Features of the Data Template

#### A. Institutional Coverage

In accordance with the currency board arrangement, the Bulgarian National Bank is the only institution holding official international reserves in Bulgaria. The template covers the Bulgarian National Bank as monetary authorities which manage and hold the international reserves and the central government (excluding social security funds) which accounts for most of the official foreign currency obligations.

#### B. Financial Activities Covered

The Data Template covers only instruments in foreign currencies. Foreign assets in non-convertible currencies, as well as all other assets that do not meet reserve assets concept are excluded.

#### C. Valuation Principles and Conversion

International reserves are revalued daily at market exchange rates. Securities positions are revalued daily at the market price of the instruments concerned on the previous working day. Gold is revalued daily at the current market price, whichever is lower. Interest is accrued daily and classified under item 1(A). Data are converted into national currency or euro equivalents (the lev is linked to the euro at a fixed exchange rate) on the basis of official exchange rates announced by the Bulgarian National Bank daily. The reserve data template is calculated and revalued monthly.

### III. Structure of the Data Template

The Data Template consists of four sections:

#### (1) Official reserve assets and other foreign currency assets broken down by major components, viz. convertible foreign currency

- A. Official reserve assets (securities, currency and deposits); IMF reserve position; SDRs, gold and other (accrued interest).
- B. Other foreign currency assets (central government deposits with local banks, gold not included in the official reserves, Brady bonds collateral).

This section covers stocks data. The definition of these data is consistent with the methodology exposed in the fifth edition of the IMF's *Balance of Payments Manual*. Under Article 42 of the Law on the Bulgarian National Bank, the BNB compiles the balance of payments of Bulgaria, a major functional category of which are the reserve assets.

The types of foreign assets that are included in the official reserves of the BNB are explicitly defined by Article 28 of the Law on the BNB.

Other foreign currency assets refer to foreign currency assets of the BNB that are not included in the official reserves, as well as such assets held by the government (excluding social security funds).

*Sources:* Data on official reserve assets and on other foreign currency assets are based on the accounting records of the BNB. *International reserves and foreign currency liquidity template* data can be reconciled with the annual reserve assets data shown in the International Investment Position both published on the BNB website ([www.bnb.bg](http://www.bnb.bg)), as well as with the assets data in the monthly Balance Sheet of the Issue Department and with the BNB Analytical Reporting table both published on the BNB website ([www.bnb.bg](http://www.bnb.bg)). Data on central government deposits with local banks are provided by banks through Money and Banking Statistics Division within the Statistics Directorate of the BNB.

#### **(2) Predetermined short-term drains on foreign currency assets**

This section covers foreign currency flows related to predetermined payments of principal and interest associated with loans and securities up to and including one year. Unlike data on external debt and international investment position which are based on residency concept (i.e. only liabilities to non-residents irrespective of currencies involved should be included), data included in Section II relate only to liabilities in foreign currencies irrespective of the residency of the holder.

*Source:* Data on predetermined short-term drains on foreign currency assets are based on Ministry of Finance projections on principal and interest payments on loans and securities denominated in foreign currencies in the 12-month period ahead.

#### **(3) Contingent short-term drains on foreign currency assets**

Section III covers contingent foreign currency flows which refer to contractual obligations that might give rise to potential future outflows or inflows of foreign currency assets. By definition, contingent drains cover off-balance-sheet activities.

*Source:* Ministry of Finance.

#### **(4) Memo items**

This section covers stocks and flows not disclosed in the previous sections but relevant for assessing the foreign currency official reserves and liquidity positions (financial instruments denominated in foreign currency and settled in domestic currency) as well as the currency composition of official reserves.

*Sources:* the Ministry of Finance provides monthly stock data on securities issued for the structural reform (ZUNK) which are denominated in foreign currency and settled in levs. Data on the currency composition of official reserves are provided by the BNB.

### **IV. Periodicity and Timeliness of the Data Template Publications**

The Bulgarian National Bank compiles and publishes International Reserves and Foreign Currency Liquidity Data Template of Bulgaria on a monthly basis within three weeks after the close of the reference period.

### **V. Data Revision Policy**

Revisions to published official reserve assets and international reserves and foreign currency liquidity data are not a common practice. Data on official reserve assets are based on the accounting records of the BNB and are revised only if the accounting records are revised. The policy on revisions pursued by the Bulgarian National Bank is based on the following principles:

- (i) As for the International Reserves and Foreign Currency Liquidity data, each monthly publication may include revisions of the data for the previous month.
- (ii) When on-going changes are made due to additional information collected, as well as resulting from elimination of errors, the Bulgarian National Bank timely informs the users through monthly press releases and through the notes at the end of the Data Template table.

### **VI. Data Dissemination**

The Bulgarian National Bank disseminates the monthly official reserve assets and international reserves and foreign currency liquidity data on its website: [www.bnb.bg](http://www.bnb.bg). Data are presented in million euro.

Data are also published in the semi-annual and in the annual official reports of the Bulgarian National Bank.

## VII. Contacts

If you have any questions on the methodology applied by the Bulgarian National Bank or on the official reserve assets and international reserves and foreign currency liquidity data published, please do not hesitate to send them to Mr. Emil Dimitrov, Director of the Statistics Directorate, *via e-mail at Dimitrov.E@bnbank.org*, and Mrs. Liliana Bancheva, Head of the Balance of Payments and External Debt Division, *via e-mail at Bancheva.L@bnbank.org*, or by mail to the following address:

Bulgarian National Bank  
 Balance of Payments and External Debt Division  
 1, Knyaz Alexander I Square  
 1000 Sofia, Bulgaria

## 3 Fiscal Sector

Information on the fiscal sector is classified into three categories:

- (a) *general government sector* operations (*government sector*);
- (b) government operations (*republican budget*);
- (c) government debt.

*Fiscal sector* includes all ministries, agencies, extra-budgetary funds, individual units of social security and other institutions of the central government, municipalities, as well as enterprises financed and controlled by them.

*The consolidated state budget* covers data on the government sector and includes the republican budget, the budgets of social security, legal authorities, universities financed by the government, the Bulgarian Academy of Sciences, municipalities, as well as extra-budgetary funds and accounts. The *general government* sector corresponds to the methodology requirements of the European System of Accounts, rev. 1995.

*The republican budget* includes the central republican budget (the budget of the Ministry of Finance), budgets of other ministries and agencies, regional authorities and the National Audit Office. Together with the budgets of the social security, legal authorities, universities financed by the government, Bulgarian Academy of Sciences and their extra-budgetary accounts it forms the *central government* sub-sector. The institutional coverage of this sub-sector corresponds to the methodology of the European System of Accounts.

## 4 Real Sector

Tables of the real sector are arranged in the following groups:

- (a) macroeconomic indicators (national accounts);
- (b) labour market;
- (c) price indicators.

*Real sector* covers a few groups of institutional units – residents on the economic territory of Bulgaria. These include *non-financial corporations* whose main activity is production and sale of goods and non-financial services for the purpose of making profit; *non-profit institutions serving households* which provide goods and services free of charge or at economically insignificant prices; *households* – residents in Bulgaria regardless of their type and amount. Real sector also includes unincorporated production units, as well as those with single-entry accounting owned by local physical persons.

This section of the BNB Monthly Bulletin includes data on:

- *gross domestic product* – under the method of end-of-use expenditure and under the production method.

In accordance with the requirements of the European System of Accounts, 1995, holding gains are excluded from GDP data, i.e. changes in its value due to price fluctuations are excluded. Data not reconciled with *Supply – Use* final tables of the NSI are preliminary.

- *labour market* – employed under labour contract (public and private sectors), changes in their number (by economic sector), number of unemployed (total, young people, adults) and unemployment rate, average wage of employed (by type of ownership and by economic sector). The NSI publishes monthly data on employment and average wage in the second month following the end of the relevant calendar quarter.

- *consumer price changes* – compared to the previous month, compared to the relevant month of the previous year and compared to December of the previous year.

# Resolutions of the BNB Governing Council

**13 March** Report on BNB Budget Implementation as of 31 December 2013 was approved.

The BNB Governing Council considered the application for issuing a payment institution license to Bulgarian Posts EAD, submitted to the BNB under Article 10, paragraph 1 of the Law on Payment Services and Payment Systems.

Ordinance on Amendment of BNB Ordinance No 16 of 2009 on Payment Institutions and Payment System Operators Licensing was adopted.

New BNB Ordinance No 27 on the Balance of Payments Statistics, International Investment Position and Security Statistics was adopted.
