^{*} Analytical reporting of the balance of payments in accordance with IMF 5th edition of the Balance of Payments Manual.¹ Final data for 1997 and preliminary data for 1998 and 1999.² Data based on customs declarations. Preliminary data on imports and exports is revised by the NSI. Data for 1999 is provided by the MF Computing Center, complemented with NSI data and adjusted by the BNB.³ BNB estimates.⁴ Data of the Ministry of Internal Affairs and estimates of the Ministry of Trade and Tourism, NSI and the BNB.⁵ Including data provided by the Agency for Foreign Aid and the Bulgarian Red Cross.⁶ A minus sign denotes flight of capital increase in assets or decrease in liabilities.⁷ Data provided by the companies with foreign partnership, MF, Privatization Agency, NSI, Central Depository, specialized ministries and the BNB.⁸ Includes changes in forex deposits of individuals and private companies. A minus sign denotes decrease of deposits and a positive sign increase of deposits.¹⁰ Includes loans extended for balance of payments support (incl. EU, the World Bank, etc.), rescheduled payments and arrears.

Imports and Exports

Data on imports and exports included in Bulgaria's balance of payments is based on customs declarations. The BNB receives information (processed by the MF Computing Center and based on customs declarations), complements it with NSI data and additionally adjusts it. Imports and exports are reported on a monthly basis by the BNB, and on a quarterly basis by the NSI using a common methodology. *The date of goods crossing the state border* is the moment of import and export reporting.¹ Exports are reported at FOB prices and imports at CIF prices; for balance of payments purposes total imports are recalculated at FOB prices.

Frequent and quite often significant (especially of imports) adjustments of reported data, and hence of the trade balance, cause serious problems for precise and complete reporting of imports and exports and necessitate adjustments in the balance of payments, which complicates projections. This is due both to delays in sending customs declarations to the MF Computing Center (or their return to the customs offices in case of incorrectly filled in declarations) and delays in their processing by the MF Computing Center. Thus a delay in declarations processing occurs and they are included in import and export data in the following months. Therefore, data for a particular month needs to be revised several times during the year.

Problems of data adjustment are due both to the quality of filling in customs declarations and the organization of their processing. Therefore, the concept to report imports and exports on the basis of *the date of customs declarations finalization* does not solve existing problems. Such reporting is used in some other countries, including EU countries, but the period between the date of goods crossing the country's border and the date of declarations finalization is insignificant in these countries.² Under these circumstances, reporting of imports and exports on the basis of the date of customs declarations finalization, without solving the above mentioned problems, would cause a considerable distortion of reported data.

Balance of Payments

With the January 1999 data the Bulgarian National Bank started publishing the analytical presentation of the balance of payments on a monthly basis³, prepared in accordance with the Fifth edition of the **Balance of Payments Manual (IMF, 1993)**⁴. Thus, on the one hand, the balance of payments table becomes internationally compatible, and, on the other hand, its analytical potential increases. The present methodological notes have been prepared in order to facilitate the users of the currently published analytical table, compiled according to the Fourth edition of the **Balance of Payments Manual (IMF, 1977)**⁵.

In the analytical presentation the balance of payments components are classified in five main categories (*Groups A – E*)⁶.

A. Current account

1.1. The *Investment income* (interest receivable and payable) and *Compensation of employees* (factor income) are no longer included in services. They are recorded separately in a new item – *Income*. This, on the one hand, allows for a clearer and more detailed definition of the *Services* item, and

¹ Balance of Payments Manual. IMF. Fifth edition, 1993, paras. 114, 117.

² International Merchandise Trade Statistics – Concepts and Definitions. United Nations. New York, 1998, p. 4, para. 15.

³ The balance of payments is published monthly by the eighth week following the end of the reporting month. Each monthly publication of the balance of payments for the current year presents revised data for the previous three months. Each quarterly publication presents revised monthly data for the whole current year.

⁴ Balance of Payments Manual, Fifth edition, 1993, International Monetary Fund.

⁵ Balance of Payments Manual, Fourth edition, 1977, International Monetary Fund.

⁶ Group D is *Net errors and omissions*. For more detailed information see *Balance of Payments Statistics Yearbook*, Part 1, 1997, International Monetary Fund, p. ix.

on the other hand, enhances and emphasizes the relations between the BOP *Income* item and the *Financial account*.

1.2. As the *Current account* structure is defined in accordance with the basic principles of the **System of National Accounts**⁷, only the *Current transfers*, together with *Goods, Services* and *Income*, are included, and the *Capital transfers* are excluded. Thus, only the transfers concerning income and consumption remain in the current account.

B. Capital account

2.1. Only the *Capital transfers* are included in this account. These are nonrefundable assets and/or forgiveness of financial liabilities.

C. Financial account

3.1. The greater part of the financial transactions previously recorded in the *Capital account* according to *BPM4*, are now recorded in the *Financial account*. The BOP Support is excluded and is recorded under the *Reserves and exceptional financing* group. Financial flows are regrouped in three main categories:

- *Direct investment*

Methodology of Direct Investment Reporting in Bulgaria

Reporting of direct investment in Bulgaria by the BNB is based on international standards and requirements.⁸ Accordingly, direct investment is the category of international investment that reflects the objective of obtaining a lasting interest by a direct investor resident in a foreign economy in an enterprise resident in the Bulgarian economy (the direct investment enterprise). Direct investment comprises not only the initial transaction establishing the relationship between the investor and the direct investment enterprise but also all subsequent transactions between them. Transactions may be directed both toward increase/decrease of the enterprise's obligations to its direct investor and toward increase/decrease of the enterprise's claims on its direct investor. Hence, the BNB reports both investment and disinvestment. Major principles of direct investment reporting are: first, only actually paid amounts are included, and second, in case of using financial instruments of payment, they are reported at market value, not at nominal value.

The lasting interest implies the existence of a long-term relationship between the direct investor and the direct investment enterprise and a significant degree of influence by the investor on the management of the enterprise. In order to facilitate the international comparability of the data in different countries, the *Balance of Payments Manual* provides for the principle that owning ten percent or more of the voting power in management of the enterprise is considered to be establishment of relationship between a direct investor and a direct investment enterprise.

According to the standard reporting of the balance of payments, the *Direct investment* item is subclassified into:

- *Participation in equity capital* – nonresidents' transferred or withdrawn capital contributions in/from the share or joint-stock capital of Bulgarian enterprises. Transferred funds are reported as an increase in the country's direct investment and withdrawn funds as a decrease.
- *Intercompany debt* – received and repaid principals and interest on loans between the direct investor and the direct investment enterprise. Receipt of a principal is treated as an increase of direct investment in the country, and the loan redemption as a decrease.
- *Reinvested earnings* – nonresidents' share in reinvested/undistributed earnings and losses of the enterprise. The share in reinvested/undistributed earnings is reported as an increase in the country's direct investment, and the share in losses as a decrease.

For data compilation, the BNB uses information provided by privatization authorities⁹ (Privatization Agency, specialized ministries, Central Depository, enterprises with foreign stake in the financial and nonfinancial sectors).

Privatization authorities provide information on state-owned shares in Bulgarian enterprises sold to nonresidents and thus they are included in the *Participation in equity capital* subgroup. Only actually effected payments on privatization transactions are reported by the BNB. This is due both to the double entry principle of balance of payments reporting and to some instances of renegotiated or cancelled transactions when contracted receipts are not received or are partially received. Receipts are reported in the month of their receipt on residents' accounts. The market value (not the nominal value) is used for receipts reporting of the instruments (ZUNK and Brady bonds). When these principles are not observed, the balance of payments *Errors and omissions* item inevitably increases.

The Central Depository provides information on the shares bought by and sold to nonresidents, who own ten percent or more of an enterprise's capital, and on the average monthly market price of enterprises' shares. The processed data is included in the *Participation in equity capital* subgroup.

Data from financial and nonfinancial sectors is obtained through BNB statistical forms for investment/disinvestment of nonresidents, direct investors in Bulgarian enterprises' capital, for transactions resulting from intercompany indebtedness, and for reinvested earnings.

⁹ Agencies under Article 3 of the Law on Transformation and Privatization of State-owned and Municipal Enterprises.

- *Portfolio investment*

• *Other investment – the item includes flows associated with trade credits extended/received, with loans extended to/received from nonresidents, with forex deposits (of residents abroad and of nonresidents in Bulgaria), as well as other assets and liabilities not classified in the above groups.*

D. Reserves and other financing

4.1. In the analytical presentation of the balance of payments, so-called exceptional financing is also included in this group, along with BNB forex reserves. The group consists of the following items:

- *BNB reserves*
- *Use of Fund credit*

• *Exceptional financing – comprises the BOP Support (loans from the European Union, the World Bank, etc.), as well as the country's rescheduled liabilities and arrears.*

4.2. The most important change in the recording of *Reserves* is that reserve assets changes that are not attributable to transactions, such as exchange rate changes, are excluded. Changes that are associated with the creation of reserve assets (monetization/demonetization of gold, allocation/cancellation of SDRs) are also excluded from the balance of payments table.

Foreign Debt

Bulgaria's obligations in convertible currency in the *gross foreign debt* table (by creditor) are divided into *long-term* obligations (with maturity of over one year) and *short-term* obligations.

The item *Public and publicly guaranteed debt* includes the government debt and government guarantees on loans disbursed to Bulgarian companies.

The item *Short-term debt* includes all the country's debts with a term of less than one year. Consistent with international standards and in order to provide consistency between reported balance of payments flows and data on foreign debt service, the item *Short-term debt* includes arrears on interest and principals both on the public and publicly guaranteed debt and the private debt.

The item *Other private creditors* includes nonresidents' deposits in domestic commercial banks and nonresidents' purchases of government securities denominated in foreign currency. Also included is information received by the Bulgarian National Bank on credits extended (with the permission of the Ministry of Finance) to local physical and legal persons by nonresident private creditors.

2

Monetary Sector

Overview

Monetary survey data is derived from monthly financial statements of all financial institutions within the banking system: the BNB and commercial banks (including those in liquidation). The information as presented meets international standards and reflects country-specific aspects of accounting and banking methodology.

Bank assets and liabilities are classified according to sector, currency and financial instrument. For the needs of monetary and banking statistics the national economy is split into three sectors: banking, government and nongovernment. The country's relations with the rest of the world are reflected in the external sector (nonresident legal and physical persons).

The banking sector consists of the monetary authorities (BNB), on the one hand, and all commercial banks licensed by the BNB (incl. foreign banks' branches), on the other hand.

The government sector consists of the central government and local budgets; the central government includes state budget and state funds and extrabudgetary accounts.

The nongovernment sector comprises state-owned enterprises, private companies, the public (households) and nonbank financial institutions. The latter include financial brokerage houses, insurance companies and other organizations within the financial sector but outside the banking sector.

The BNB has been preparing monthly monetary surveys since March 1990. Several major changes in the monetary survey's format and content were made until May 1995: lev and foreign exchange items were separated, monetary aggregates were segregated according to liquidity, etc. The most significant changes in time series have occurred since 1 June 1995 with the introduction of the Uniform National Chart of Accounts; consequently all monetary and credit aggregates were segregated according to maturity, sector and currency. Breaks in time series could not be removed because of the different methods used for data collection and processing, and the absence of database.

The banks in liquidation are required to provide the same set of accounting information as operating banks. In case banks fail to meet the terms required by regulation, statistical processing of the latest available data is made. Consolidated data on the banks in liquidation is showed in an additional column to the monetary survey and analytical accounts of commercial banks.

Data is revised when an individual bank makes adjustments to its data, or preliminary data (estimates) has been published. This takes place generally in the last month of the year and is explicitly stated.

Monetary Survey

The monetary survey aggregates the analytical accounts of the monetary authorities (BNB) and commercial banks. It includes major monetary aggregates within the money supply, and its sources: net foreign assets and net domestic assets. *Net foreign assets* are derived as the difference between foreign assets and liabilities of the BNB and commercial banks. Within foreign assets, the country's gross foreign exchange reserves are shown, including BNB most liquid foreign assets. From 1 July 1997, with the currency board arrangement introduction, these are equal to the assets of the Issue Department (incorporated separately within BNB balance sheet), which maintains a fixed exchange rate of the Bulgarian lev to the Deutschemark (since 1 January 1999 to the Euro).

Net domestic assets include domestic credit and a general balancing line termed *Other items (net)*. Domestic credit incorporates lending to the consolidated government sector and the nongovernment sector. Credit to the government sector is netted – gross claims less government deposits – and credit to the nongovernment sector is in gross terms. Under *Other items (net)*, a number of accounts are netted relating to interbank and intrabank relationships, relationships between the BNB and commercial banks, banks own funds, as well as unclassified assets and liabilities.

Claims on the government include claims of the BNB and commercial banks and are classified according to currency and instrument – government securities, loans, etc. Government securities are split according to their maturity into short-term (up to 12 months), medium-term (up to five years) and long-term (over five years) and according to currency: into government securities denominated in levs and in foreign currency. Until November 1998 government securities were reported at nominal value and from December 1998 these are marked to market.

Government lev-denominated loans include loans from the BNB (under the old Law on the BNB, effective until 10 June 1997) and the outstanding direct debt to other commercial banks. *Foreign currency loans* are extended only by the BNB and are in compliance with the new Law on the BNB. These are denominated in special drawing rights (SDR), corresponding by maturity and interest to the country's purchases from the IMF.

Claims on the nongovernment sector include credits, equity participations, etc. These are reported at gross value (in levs and foreign currency).

For the purpose of analysis *Other items (net)* is subdivided into two items: *Own funds* and *Other assets and liabilities (net)*. The *Own funds* item includes *Capital and reserves* and *Financial result*. The *Own funds* item is presented with an opposite sign due to its transfer from the balance sheet liabilities side to the assets side so as to leave just monetary aggregates in the liabilities side. As a result, a negative *Financial result* shows a profit and a positive one a loss.

Money supply is presented by currency, monetary aggregate and sector. *The M1 monetary aggregate* includes the most liquid monetary instruments used in settlements: *Currency outside banks* and *Demand deposits* (current accounts). In compliance with the foreign exchange regime providing for settlements in the country only in national currency, this monetary aggregate is reported fully in levs.

Quasi-money is a less liquid monetary aggregate and comprises time deposits, savings deposits and foreign currency deposits. *Time deposits* include lev deposits for a specific term (one-, three-, six-, twelve-month deposits, etc.). *Savings deposits* include only individuals' deposits in national currency and some other deposits (e.g. children's deposits). *Foreign currency deposits* include both current accounts and time deposits. The M2 monetary aggregate is comprised of quasi-money and M1 monetary aggregate.

The least liquid funds include *Money market instruments* and *Import and restricted deposits*. These are in levs and foreign currency and together with M2 constitute the broadest monetary aggregate M3 (money supply, broad money).

Analytical Reporting of the BNB and Commercial Banks

Bulgarian National Bank. *Foreign assets* are divided according to liquidity into gross international foreign exchange reserves and other foreign assets. *Monetary gold* is included in gross international reserves. Until 30 June 1997 monetary gold was assessed at USD 300 per 1 troy ounce; thereafter, consistent with the new Law on the BNB, at DEM 500 per 1 troy ounce, or at its market value, if lower.

Other foreign assets are less liquid and include participations in international financial institutions (excluding Bulgaria's reserve position in the IMF which is part of the gross international forex reserves), foreign government securities used as collateral against government bonds issued to settle Bulgaria's foreign debt to the London Club creditor banks, nonmonetary gold and other precious metals, letters of credit, etc.

Claims on nonfinancial state-owned enterprises and *Claims on nonbank financial institutions* include equity participations in companies directly related to BNB activity.

Claims on commercial banks include monetary policy instruments employed by the BNB, as well as other relations with commercial banks (accounts, etc.). Following the currency board arrangement collateralized credit is the only instrument to refinance commercial banks. Under the currency board arrangement the BNB may extend collateralized credits to commercial banks in a lender of last resort capacity in case of a liquidity risk threatening the stability of the banking system.

Reserve money includes currency outside banks, funds of commercial banks and some nonbank financial institutions' funds with the BNB and constitutes the monetary base (M0 monetary aggregate). Reserve money is in levs and foreign currency and includes minimum required reserves and excess reserves (settlement accounts, current accounts and time deposits).

Foreign liabilities reflect BNB obligations to the external sector. After 1 July 1997 BNB foreign liabilities include only obligations to the IMF.

The *Own funds* item includes BNB fixed capital (BGL 200 million until 1 July 1997 and BGL 20 billion after this date), reserve funds and the BNB current financial result (net).

Commercial banks. *Reserves* include funds on their accounts with the BNB and cash in commercial banks' vaults. The differences with the corresponding

reserve money component in BNB analytical reporting are due to time discrepancies of counter flows between the central bank and commercial banks.

Foreign assets include claims on nonresidents (banks, governments, nonbank institutions, etc.) and foreign currency in banks' vaults. Commercial bank foreign assets are not included in Bulgaria's international forex reserves.

Interest Rate Statistics

The *base interest rate* is the effective interest rate at end of month based on the average annual yield attained at three-month government securities primary auctions.

Interest rate statistics includes summarized data on interest rate levels of banks, except those in liquidation. Interest rates are averaged on a weekly basis for a month.

Short-term interest rates cover maturities from one day up to twelve months, and long-term interest rates maturities over twelve months.

Time deposit rates are based on interest rates on one-month savings deposits in levs and foreign currency, being the preferred maturity for savings.

Interest rates on demand deposits include interest rates on current accounts and sight deposits of state-owned and private companies.

Interest rates on credits and time deposits are the average weighted rates of three sectors: state-owned companies, private enterprises and the public.

Lending rates reflect interest rates on newly negotiated lev and foreign currency loans during the corresponding month.

Annual compounding of the base interest rate is made on a quarterly basis, and that of deposits and credits on a monthly basis.

Yield of government securities is computed as the average weighted yield of all issues during the calendar month in actual amount.

Real interest rate levels on credits and deposits are based on the average interest rates during the month deflated by the monthly inflation rate reported for the same period.

Resolutions of BNB Board

2 July

As of 5 July 1999 the BNB put into circulation a gold commemorative coin ‘120 Years Council of Ministers’ with a nominal value BGL 100, issue 1999, and a silver commemorative coin ‘120 Years Council of Ministers’ with a nominal value BGL 10, issue 1999.

8 July

The Managing Board of the BNB approved a list of documents from the BNB secret fund for the period 1945 – 1989 to be disclosed, which shall be accessible to the public after 1 September 1999.

A 20-year prescriptive term was set for all the secret documents from the BNB fund, effective as of the date of document creation; after the expiry of that term secret documents shall automatically be disclosed. The 20-year term is not valid for: documents which represent official secret at the BNB and are included in the List of facts, information, documents and items related to the procedure and manner of producing, safe-keeping and transportation of banknotes and coins, in respect of which terms longer than 20 years apply; and documents of other institutions with a specific indication that they shall not be disseminated without the prior consent of the document issuing institution.

Commercial banks are recommended to adopt a 20-year period for the automatic disclosure of their documents; simultaneously they should disclose documents created until 1989, which are not considered secret as of present date.

Three volumes of archive documents of the BNB are to be published jointly with the General Archives Office to the Council of Ministers for the periods 1915 – 1929; 1930 – 1947 and from 1948 onward. Thus the publication of a full corpus of archive BNB documents, including the collection of volumes for the periods 1879 – 1900 and 1901 – 1914, will be completed.

15 July

As of 23 July 1999 the BNB put into circulation a silver commemorative coin EURO ‘A House in Plovdiv’ with a nominal value BGL 10, issue 1999.
