* Preliminary data for 1998 and 1999 not reconciled with Supply – Use final tables of the NSI.

Note: Data in old lev. Due to change in the methodology of calculating Personal consumption of households and Exports (imports) of goods and services components, data for the third quarter and the January – September 1999 period is partially comparable with relevant data for the first quarter of 1999 and the remaining periods. Comparable data for the previous periods will be published after the revision made by the NSI.

* Analytical reporting of the balance of payments in accordance with IMF 5th edition of the Balance of Payments Manual.

¹ Preliminary data.

² Data based on customs declarations according to the date of their presentation, provided by the MF Computing Center. NSI final data.

³ BNB estimates.

⁴ Data of the Ministry of Internal Affairs and estimates of the Ministry of Trade and Tourism and the BNB.

⁵ Including data provided by the Agency for Foreign Aid and the Bulgarian Red Cross.

⁶ A minus sign denotes flight of capital (increase in assets or decrease in liabilities).

⁷ Data provided by the companies with foreign partnership, Privatization Agency, specialized ministries, NSI, Central Depository and commercial banks.

⁸ Data provided by the Bank for International Settlements is used.

⁹ Including changes in forex deposits of individuals and private companies, net of valuation adjustments. A minus sign denotes a decrease of deposits and a positive sign an increase of deposits.

¹⁰ Excluding changes in BNB forex reserves due to valuation adjustments. A minus sign denotes an increase of forex reserves and a positive sign a decrease.

¹¹ Including loans extended for balance of payments support (incl. EU, the World Bank, etc.).

Changes in BNB forex reserves due to valuation adjustments:

168.1 -198.5 -65.6 -96.0 -44.4 -263.8 -18.7 -327.0 -14.0 163.9 -41.0 108.8 -54.4 10.7 -224.1 -267.8 -582.0

See Methodological notes.

* Analytical reporting of the balance of payments in accordance with IMF 5th edition of the Balance of Payments Manual.

¹ Preliminary data.² Data based on customs declarations according to the date of their presentation, provided by Computing Center Directorate to the Information Service Ltd. Preliminary data as of 5 January 2000 adjusted by the BNB.³ BNB estimates.⁴ Data of the Ministry of Internal Affairs and estimates of the Ministry of Trade and Tourism and the BNB.⁵ Including data provided by the Agency for Foreign Aid and the Bulgarian Red Cross.⁶ A minus sign denotes flight of capital (increase in assets or decrease in liabilities).⁷ Data provided by the companies with foreign partnership, Privatization Agency, specialized ministries, NSI, Central Depository and commercial banks.⁸ Data provided by the Bank for International Settlements is used for January – June 1999. For the period July – October 1999 BNB data is used.⁹ Including changes in forex deposits of individuals and private companies, net of valuation adjustments. A minus sign denotes a decrease of deposits and a positive sign an increase of deposits.¹⁰ Excluding changes in BNB forex reserves due to valuation adjustments. A minus sign denotes an increase of forex reserves and a positive sign a decrease.¹¹ Including loans extended for balance of payments support (incl. EU, the World Bank, etc.).

Changes in BNB forex reserves due to valuation adjustments:

* Actual payments. Preliminary data. Data is calculated in US dollars at Reuters cross rates at the end of the reporting month.

¹ Data includes all Bulgaria's foreign obligations: government and government guaranteed loans, commercial banks' foreign debt and the debt of local physical and legal persons to nonresidents.

² Including payments on government and government guaranteed credits extended by the World Bank.

³ Including interest payments on forex ZUNK bonds bought by nonresidents.

⁴ Including payments on the debt of commercial banks, private debt and overdue repayments. Payments on revolving credits excluded.

Sources: BNB, Bulbank, commercial banks and local companies.

Notes: 1. The general government budget comprises the central government budget, the budgets of ministries and other institutions, regional authorities and Chamber of Accounts. Together with the budgets of the social security, legal authorities, high schools financed by the government, Bulgarian Academy of Sciences and extrabudgetary accounts it forms the subsector 'Central government'. The institutional coverage of this subsector corresponds to the System of National Accounts and Government Finance Statistics 'Central government' institutional subsector.

2. From January 1999 transfers have a negative sign due to consolidation of extrabudgetary accounts.

* Banks are classified into five groups depending on balance-sheet figure. Changes in the groups will be made provided there is a sufficient prove that the balance-sheet figure is impacted by fundamental factors.

Group I over BGN 500 million;

Group II from BGN 300 million to BGN 500 million;

Group III from BGN 100 million to BGN 300 million;

Group IV up to BGN 100 million;

Group V foreign banks branches.

Note: Until 28 January 1997 the base interest rate (BIR) is one of the BNB monetary policy instruments and is set by the Managing Board. From end-January to end-June 1997 the BNB Managing Board set a market-determined base interest rate:

- a) from 28 January 1997 to 1 March 1997: discretionary, on the basis of the average weighted yield of short-term government securities issued;
- b) from 7 April 1997 to 21 April 1997: on the basis of the average weighted yield of seven-day government securities issued;
- c) from 28 April 1997 to 26 May 1997: on the basis of the average weighted yield of seven-day and 28-day government securities issued;
- d) from 2 June 1997 to 30 June 1997: on the basis of the average weighted yield of 28-day government securities issued.

After the introduction of a currency board in the beginning of July 1997, the base interest rate (based on three-month government securities yield) was announced weekly by the BNB.

External Sector**Imports and Exports**

The Bulgarian National Bank provides monthly foreign trade data structured by *End of use* criterion and *Major trading partners and regions*. The imports and exports data is based on customs declarations, as the codes used in them are after the Harmonized System for Description and Coding of Commodities of the World Customs Organization introduced in 1988 and supplemented in 1992.

The tables by *End of use* are based on the four-digit codes by the harmonized system. The basic principles in the distribution of the commodities in the respective groups are: purpose of their use and degree of processing. The most important countries and regions for the country's exports (imports) are included in the tables by *Major trading partners and regions*.

The country's exports are reported at FOB prices, and the imports at CIF prices, as for the purposes of the balance of payments the total imports are recalculated at FOB prices. The criteria for description of the partner countries are, as follows: imports – by country of origin of the commodities; exports – by the commodities' recipient country, that is, the last known country where the commodities are to be delivered.

Prior to the balance of payments report for the period January – May 1999, in accordance with the common methodology of the Bulgarian National Bank and the National Statistical Institute, imports and exports used to be reported as of the moment when commodities crossed the state border. With the report for the period January – June 1999, after the proposal of the National Statistical Institute, the Bulgarian National Bank started reporting imports and exports at the moment of clearance of the customs declarations. The 1999 and 1998 data is revised after the new method, and the data for previous years is to be revised, too. The increase in imports and the deterioration in the trade balance (for the previous months of 1999) after the new methodology is due basically to the fact that the imports calculated by date of presentation of the declaration includes also imports done in previous years (mainly in 1998) but declared to the customs authorities in 1999.

The sources of data are: the General Customs Directorate and Computing Center Directorate to the Information Service Ltd. (until the end of 1999 the Computing Center to the Ministry of Finance). The Bulgarian National Bank and the NSI receive data on imports and exports, supplement it with other information and further process it.

The Bulgarian National Bank reports the country's imports and exports on a monthly basis, while the National Statistical Institute reports the data on a quarterly basis classified by months. The data is published eight weeks after the expiry of the reporting period. Practically, the moment of publishing of the data depends on the timeliness and quality of the imports and exports data received from the Computing Center to the Ministry of Finance.

In principle, the Bulgarian National Bank makes monthly revisions of its data for the last three months, and quarterly revisions of the data for the current year. However, as the data is incomplete, the Bulgarian National Bank makes more frequent and significant revisions to the imports and exports.

Balance of Payments

The legal basis for the balance of payments compilation in Bulgaria is provided for in Article 42 of the Law on the Bulgarian National Bank. Pursuant to this Article, the Bulgarian National Bank is in charge of the compilation of the country's balance of payments and all government and municipal agencies, legal entities and individuals are obliged to present information to the BNB for the purposes of the BOP compilation. At present, the Bulgarian National Bank publishes analytical presentation of the balance of payments in accordance with

the Fifth Edition of the *Balance of Payments Manual* (IMF, 1993) and the *Balance of Payments Textbook* (IMF, 1996). The publication of the standard presentation of the BOP is in a process of preparation.

I. Accounting Principles and Conventions

The basic convention applied in the construction of Bulgaria's balance of payments is the implementation of the double entry system. Under **credit, with a positive sign**, are recorded: exports of goods and services, income receivable, offsets to nonrefundable real and financial resources received (transfers), increases in financial liabilities, decreases in financial assets. Under **debit, with a negative sign**, are recorded: imports of goods and services, income payable, offsets to nonrefundable real and financial resources provided, increases in financial assets, decreases in financial liabilities.

The time of recording of the balance of payments transactions is the time of change of ownership.

Transaction valuations are based on market prices. If the actual market prices are not available, the average market prices are used as approximation.

The unit of account for the balance of payments of Bulgaria is the US dollar. The conversion into the US dollar is made using the exchange rate at the time of transaction. If not available, or inapplicable for other practical reasons, the average exchange rate for the reporting period is used.

II. Balance of Payments Components

The balance of payments components are compiled using basically the International Transactions Reporting System (ITRS), which includes (i) commercial banks' reports, and (ii) reports by enterprises which have bank accounts abroad, pertaining to the residents' international transactions. These reports cover all components of the balance of payments table. In addition, the data on certain BOP components collected by the ITRS is substituted for data from other sources: (i) direct investment enterprise survey, (ii) administrative records, and (iii) reports by enterprises having borrowed from abroad.

In the analytical presentation the balance of payments components are classified in the following main categories:

A. Current account

The current account comprises the acquisition and provision of *goods and services, income, and current transfers* between the country and the rest of the world. The flows recorded on the credit side represent that part of the gross domestic product, which is provided to the rest of the world (exports of goods and services), as well as the provision of factors of production expressed by income receivable – compensation of employees and investment income (interest, dividends, etc.). Recorded are also offsets for nonrefundable real and financial resources received (transfers).

The flows on the debit side represent the gross product created in the rest of the world and acquired by the domestic economy (imports of goods and services), as well as the acquisition of factors of production expressed by income payable. Recorded are also offsets to nonrefundable real and financial resources provided.

- The *Goods* component of the BOP current account covers movable goods for which changes of ownership between residents and nonresidents occur. The data on imports and exports FOB is based on customs declarations. Prior to the BOP report for the period January – May 1999, exports and imports were reported at the moment when commodities crossed the border. With the report for the period January – June 1999, imports and exports started to be recorded at the moment when customs declarations are presented. This change is made upon a proposal by the National Statistical Institute. The 1999 and 1998 data is revised applying the new method, and the data for previous years is to be revised too.

Sources of information: The Bulgarian National Bank receives customs declarations data from the Computing Centre of the Ministry of Finance. This data is supplemented with data from the National Statistical Institute and is further processed by the Bulgarian National Bank. Due to the existing system for processing of the customs data, outside the BNB and the National Statistical Institute, the preliminary foreign trade data is subject to frequent revisions.

- The *Services* component comprises *transportation, travel, and other services*.
- The Bulgarian National Bank derives the data on *freight transportation* from foreign trade data on the basis of estimates. The Bank is currently working on a project for a new methodology for estimation of the receipts and expenditures from transportation services.

- *Travel* covers goods and services, including those related to health and education, acquired by travellers for business and personal purposes. The data on travel is based on data from the Ministry of Internal Affairs on the number of travellers crossing the borders and on estimates of *per capita* expenditures. Currently, the Bulgarian National Bank is working, together with the Ministry of Trade and Tourism, on a project for a new methodology for estimation of the receipts and expenditures on travel services. Therefore, the 1998 and 1999 data on the *travel* item is revised.

- *Income* consists of two categories: (i) *compensation of employees*, and (ii) *investment income*. *Compensation of employees* covers wages, salaries and other benefits paid to nonresident workers in the country or received by resident workers abroad. *Investment income* covers receipts and payments of income associated with external financial assets and liabilities. Included are receipts and payments on direct investment, portfolio investment, other investment, and receipts on reserve assets.

The *main sources of information* on the *Income* component are the commercial banks' reports and the reports of enterprises, the Ministry of Finance, and the Bulgarian National Bank.

- *Transfers* are all real resources and financial items provided without a quid-pro-quo from one economy to another. *Current transfers* directly affect the level of disposable income of the economy, and the consumption of goods and services. That is, current transfers reduce the income and consumption potential of the donor and increase the income and consumption potential of the recipient. Included in the *Current transfers* are gifts, grants, inheritances, prizes won from lotteries, pensions, current taxes, social security contributions, etc.

Sources of information: The Bulgarian National Bank receives information on current transfers from the Bulgarian Red Cross, the Agency for Foreign Aid, and other sources.

B. Capital account

- The *Capital account* consists of two categories: (i) *capital transfers* and (ii) *acquisition or disposal of nonproduced, nonfinancial assets*. If in kind, a capital transfer consists of (i) a transfer of ownership of fixed assets, or (ii) forgiveness of a liability by a creditor when no counterpart is received in return. If in cash, a transfer is a *capital* transfer when it is linked to, or conditional on, the acquisition or disposal of fixed assets (for example, an investment grant).

C. Financial account

The *financial account* comprises all transactions (actual and imputed) in the external financial assets and liabilities of an economy. The external assets and liabilities are primarily classified according to type of investment. Included in *Financial account* are (i) *direct investment*, (ii) *portfolio investment* and (iii) *other investment*.

- *Direct investment* is a category of international investment in which a resident of one economy – a direct investor – acquires a lasting interest (at least 10% of the ordinary shares or voting power) in an enterprise resident in another economy – a direct investment enterprise. It is reported on a directional

basis: direct investment abroad – as an asset, and direct investment in the reporting country – as a liability. The direct investment covers transactions in equity capital, reinvested earnings, and intercompany debt transactions between the direct investor and the direct investment enterprise.

Sources of information: The Bulgarian National Bank receives data on direct investment from the Privatisation Agency and the specialized ministries, from the Central Depository, from commercial banks' reports, and through a half-year survey among direct investment enterprises in the country and quarterly reports for intercompany debt transactions. Therefore, the semiannual and the annual data on the foreign direct investment is subject to revisions.

The Bulgarian National Bank and the Agency for Foreign Investment share information on the direct investment in the country.

- *Portfolio investment* covers transactions in equity securities and debt securities.

The *main source* of information on the liabilities side of the portfolio investment is the data provided by the Ministry of Finance, the Bulgarian National Bank, commercial banks, enterprises holding bank accounts abroad, and the Central Depository.

- *Other investment* covers trade credits, short- and long-term loans, currency and deposits, and other assets and liabilities (e.g., miscellaneous accounts receivable and payable).

Sources of information: The Bulgarian National Bank compiles data on loans received by resident entities on the basis of information from the Ministry of Finance, the BNB, and from reports of the commercial banks and enterprises that have received loans from abroad. The enterprises that have borrowed from abroad report quarterly data to the BNB. Therefore, the monthly data on *Loans of other sectors* (liabilities side) is revised each quarter.

The *Currency and deposits* component presents on the assets side the changes in the currency and deposits of commercial banks, and on the liabilities side – the changes in liabilities to nonresidents in domestic and foreign currency. The Bulgarian National Bank is working on a project for improvement of the methodology for reporting of the currency and deposits by eliminating the changes therein due to exchange rate changes. Therefore, the items *Portfolio investment* and *Currency and deposits* of commercial banks abroad (assets side) and *Currency and deposits* of nonresidents held with the domestic banks (liabilities side) are revised for 1999.

The *Other forex deposits* component on the assets side is a peculiarity of the Bulgarian BOP presentation prepared and published by the Bulgarian National Bank. It presents changes in the foreign exchange deposits held by the population and the private enterprises with domestic commercial banks. Increases in the deposits of the population and private enterprises are denoted with a positive sign, and their decreases – with a negative sign.

D. Net errors and omissions

The *Net errors and omissions* component is an offsetting item. Theoretically, this component exists in the BOP presentation because the compilation system used by the Bulgarian National Bank is not a closed one but is a combination of different sources of information. The fluctuations in the *Net errors and omissions*, both in sign and in size, are mainly due to: (i) revisions of foreign trade data and subsequently of the current account, (ii) the methodology for compilation of certain BOP components, for example external trade and direct investment, and/or (iii) introduction of a new methodology for compilation of certain balance of payments items.

E. Reserves and related items

- *Reserve assets* include those external assets that are readily available to and controlled by the central bank (government) for direct financing of balance of payments imbalances. The reserve assets comprise monetary gold, SDRs, re-

serve position in the Fund, foreign exchange assets (consisting of currency and deposits and securities), and other claims. The entries under this category pertain to transactions in the BNB's external holdings which are administered by the Issue Department. The data on reserve assets changes is published in the BOP excluding valuation changes, such as exchange rate changes.

This group in the analytical presentation of the balance of payments includes also *Use of Fund credit* and the item *Exceptional Financing*. The exceptional financing comprises the BOP support, as well as deferred/rescheduled payments and payments on arrears resulting from balance of payments difficulties. In accordance with the methodology for accounting the *exceptional financing* transactions ('Balance of Payments Manual', Fifth Edition, IMF, 1993, p. 454), the principal repayments on the BOP support credits are included in the *Financial Account – Other investment – Liabilities – Loans – General Government*.

III. Periodicity, frequency and timeliness of the balance of payments publications

The Bulgarian National Bank compiles and publishes the balance of payments of the country on a monthly basis. The schedule of the Bulgarian National Bank is to publish the data within eight weeks after the close of the reference period. In practice, the timeliness of the publications depends on the timeliness and quality of the received exports and imports data.

IV. Data Revision Policy

Revisions of published BOP estimates are a common feature of many compilation systems and are aimed at publishing the most accurate estimates possible. The policy on revisions pursued by the Bulgarian National Bank is based on the following principles:

(i) As for the most frequent data, each monthly publication may include revisions of the data for the last three months and each quarterly publication may include revisions of the monthly data for the whole current year.

(ii) When ongoing changes are made due to additional information collected, as well as resulting from elimination of errors, the Bulgarian National Bank timely informs the users through the monthly press releases.

(iii) When significant revisions are made due to changes in the methodology for reporting of certain BOP components or other reasons, the Bulgarian National Bank publishes in advance information on the changes to facilitate the users of the data.

V. Data Dissemination

The Bulgarian National Bank disseminates the monthly balance of payments data to the subscribers through the Press Office, and within 24 hours after the press release, the data is published on the web site of the Bulgarian National Bank: <http://www.bnb.bg>.

The data is published also in the Bulgarian National Bank *Monthly Bulletin*.

Data on the country's balance of payments is included in the semiannual and annual official reports of the Bulgarian National Bank.

VI. Contacts

For further information on the methodology applied by the Bulgarian National Bank or on the balance of payments data published, you may contact Mr. Emil Dimitrov, head of the Balance of Payments and External Debt Division, via e-mail: Dimitrov.E@bnbank.org, or Ms. Liliana Bancheva, expert, e-mail: Bancheva.L@bnbank.org.

Foreign Debt

Bulgaria's obligations in convertible currency in the *gross foreign debt* table (by creditor) are divided into *long-term* obligations (with maturity of over one year) and *short-term* obligations.

The item *Public and publicly guaranteed debt* includes the government debt and government guarantees on loans disbursed to Bulgarian companies.

The item *Short-term debt* includes all the country's debts with a term of less

than one year. Consistent with international standards and in order to provide consistency between reported balance of payments flows and data on foreign debt service, the item *Short-term debt* includes arrears on interest and principals both on the public and publicly guaranteed debt and the private debt.

The item *Other private creditors* includes nonresidents' deposits in domestic commercial banks and nonresidents' purchases of government securities denominated in foreign currency. Also included is information received by the Bulgarian National Bank on credits extended (with the permission of the Ministry of Finance) to local physical and legal persons by nonresident private creditors.

2

Monetary Sector

Overview

Monetary survey data is derived from monthly financial statements of all financial institutions within the banking system: the BNB and commercial banks (including those in liquidation). The information as presented meets international standards and reflects country-specific aspects of accounting and banking methodology.

Bank assets and liabilities are classified according to sector, currency and financial instrument. For the needs of monetary and banking statistics the national economy is split into three sectors: banking, government and nongovernment. The country's relations with the rest of the world are reflected in the external sector (nonresident legal and physical persons).

The banking sector consists of the monetary authorities (BNB), on the one hand, and all commercial banks licensed by the BNB (incl. foreign banks' branches), on the other hand.

The government sector consists of the central government and local budgets; the central government includes state budget and state funds and extrabudgetary accounts.

The nongovernment sector comprises state-owned enterprises, private companies, the public (households) and nonbank financial institutions. The latter include financial brokerage houses, insurance companies and other organizations within the financial sector but outside the banking sector.

The BNB has been preparing monthly monetary surveys since March 1990. Several major changes in the monetary survey's format and content were made until May 1995: lev and foreign exchange items were separated, monetary aggregates were segregated according to liquidity, etc. The most significant changes in time series have occurred since 1 June 1995 with the introduction of the Uniform National Chart of Accounts; consequently all monetary and credit aggregates were segregated according to maturity, sector and currency. Breaks in time series could not be removed because of the different methods used for data collection and processing, and the absence of database.

The banks in liquidation are required to provide the same set of accounting information as operating banks. In case banks fail to meet the terms required by regulation, statistical processing of the latest available data is made. Consolidated data on the banks in liquidation is showed in an additional column to the monetary survey and analytical accounts of commercial banks.

Data is revised when an individual bank makes adjustments to its data, or preliminary data (estimates) has been published. This takes place generally in the last month of the year and is explicitly stated.

Data is in redenominated levs (BGN). All time series before 5 July 1999 have been redenominated.

Monetary Survey

The monetary survey aggregates the analytical accounts of the monetary authorities (BNB) and commercial banks. It includes major monetary aggregates within the money supply, and its sources: net foreign assets and net domestic assets. *Net foreign assets* are derived as the difference between foreign assets and liabilities of the BNB and commercial banks. Within foreign assets, the country's gross foreign exchange reserves are shown, including BNB most liquid foreign assets. From 1 July 1997, with the currency board arrangement introduction, these are equal to the assets of the Issue Department (incorporated separately within BNB balance sheet), which maintains a fixed exchange rate of the Bulgarian lev to the Deutschemark (since 1 January 1999 to the Euro).

Net domestic assets include domestic credit and a general balancing line termed *Other items (net)*. Domestic credit incorporates lending to the consolidated government sector and the nongovernment sector. Credit to the government sector is netted – gross claims less government deposits – and credit to the nongovernment sector is in gross terms. Under *Other items (net)*, a number of accounts are netted relating to interbank and intrabank relationships, relationships between the BNB and commercial banks, banks own funds, as well as unclassified assets and liabilities.

Claims on the government include claims of the BNB and commercial banks and are classified according to currency and instrument – government securities, loans, etc. Government securities are split according to their maturity into short-term (up to 12 months), medium-term (up to five years) and long-term (over five years) and according to currency: into government securities denominated in levs and in foreign currency. Until November 1998 government securities were reported at nominal value and from December 1998 these are marked to market.

Government lev-denominated loans include loans from the BNB (under the old Law on the BNB, effective until 10 June 1997) and the outstanding direct debt to other commercial banks. *Foreign currency loans* are extended only by the BNB and are in compliance with the new Law on the BNB. These are denominated in special drawing rights (SDR), corresponding by maturity and interest to the country's purchases from the IMF.

Claims on the nongovernment sector include credits, equity participations, etc. These are reported at gross value (in levs and foreign currency).

For the purpose of analysis *Other items (net)* is subdivided into two items: *Own funds* and *Other assets and liabilities (net)*. The *Own funds* item includes *Capital and reserves* and *Financial result*. The *Own funds* item is presented with an opposite sign due to its transfer from the balance sheet liabilities side to the assets side so as to leave just monetary aggregates in the liabilities side. As a result, a negative *Financial result* shows a profit and a positive one a loss.

Money supply is presented by currency, monetary aggregate and sector. *The M1 monetary aggregate* includes the most liquid monetary instruments used in settlements: *Currency outside banks* and *Demand deposits* (current accounts). In compliance with the foreign exchange regime providing for settlements in the country only in national currency, this monetary aggregate is reported fully in levs.

Quasi-money is a less liquid monetary aggregate and comprises time deposits, savings deposits and foreign currency deposits. *Time deposits* include lev deposits for a specific term (one-, three-, six-, twelve-month deposits, etc.). *Savings deposits* include only individuals' deposits in national currency and some other deposits (e.g. children's deposits). *Foreign currency deposits* include both current accounts and time deposits. The M2 monetary aggregate is comprised of quasi-money and M1 monetary aggregate.

From November 1999 the deposits held in banks in liquidation are excluded from M1 and M2, and are included in a new item ('Deposits in Nonoperating Banks') in M3, with the lowest liquidity. The changes have been reported in all of the time series.

Analytical Reporting of the BNB and Commercial Banks

The least liquid funds include *Money market instruments*, *Import and restricted deposits* and *Deposits in Nonoperating Banks*. These are in levs and foreign currency and together with M2 constitute the broadest monetary aggregate M3 (money supply, broad money).

Bulgarian National Bank. *Foreign assets* are divided according to liquidity into gross international foreign exchange reserves and other foreign assets. *Monetary gold* is included in gross international reserves. Until 30 June 1997 monetary gold was assessed at USD 300 per 1 troy ounce; thereafter, consistent with the new Law on the BNB, at DEM 500 per 1 troy ounce, or at its market value, if lower.

Other foreign assets are less liquid and include participations in international financial institutions (excluding Bulgaria's reserve position in the IMF which is part of the gross international forex reserves), foreign government securities used as collateral against government bonds issued to settle Bulgaria's foreign debt to the London Club creditor banks, nonmonetary gold and other precious metals, letters of credit, etc.

Claims on nonfinancial state-owned enterprises and *Claims on nonbank financial institutions* include equity participations in companies directly related to BNB activity.

Claims on commercial banks include monetary policy instruments employed by the BNB, as well as other relations with commercial banks (accounts, etc.). Following the currency board arrangement collateralized credit is the only instrument to refinance commercial banks. Under the currency board arrangement the BNB may extend collateralized credits to commercial banks in a lender of last resort capacity in case of a liquidity risk threatening the stability of the banking system.

Reserve money includes currency outside banks, funds of commercial banks and some nonbank financial institutions' funds with the BNB and constitutes the monetary base (M0 monetary aggregate). Reserve money is in levs and foreign currency and includes minimum required reserves and excess reserves (settlement accounts, current accounts and time deposits).

Foreign liabilities reflect BNB obligations to the external sector. After 1 July 1997 BNB foreign liabilities include only obligations to the IMF.

The *Own funds* item includes BNB fixed capital, reserve funds and current financial result (net). Until 9 June 1997 BNB fixed capital totaled BGL 200 million, from 10 June 1997 to 4 July 1999 it was BGL 20 billion and after 5 July BGN 20 million.

Commercial banks. *Reserves* include funds on their accounts with the BNB and cash in commercial banks' vaults. The differences with the corresponding reserve money component in BNB analytical reporting are due to time discrepancies of counter flows between the central bank and commercial banks.

Foreign assets include claims on nonresidents (banks, governments, nonbank institutions, etc.) and foreign currency in banks' vaults. Commercial bank foreign assets are not included in Bulgaria's international forex reserves.

Interest Rate Statistics

The *base interest rate* is the effective interest rate at end of month based on the average annual yield attained at three-month government securities primary auctions.

Interest rate statistics includes summarized data on interest rate levels of banks, except those in liquidation. Interest rates are averaged on a weekly basis for a month.

Short-term interest rates cover maturities from one day up to twelve months, and long-term interest rates maturities over twelve months.

Time deposit rates are based on interest rates on one-month savings deposits in levs and foreign currency, being the preferred maturity for savings.

Interest rates on demand deposits include interest rates on current accounts and sight deposits of state-owned and private companies.

Interest rates on credits and time deposits are the average weighted rates of three sectors: state-owned companies, private enterprises and the public.

Lending rates reflect interest rates on newly negotiated lev and newly withdrawn foreign currency loans during the corresponding month.

Annual compounding of the base interest rate is made on a quarterly basis, and that of deposits and credits on a monthly basis.

Yield of government securities is computed as the average weighted yield of all issues during the calendar month in actual amount.

Real interest rate levels on credits and deposits are based on the average interest rates during the month deflated by the monthly inflation rate reported for the same period.

Resolutions of BNB Board

7 January 2000

Regulation No. 2 on the Licenses and Permits Granted by the Bulgarian National Bank was adopted.
