## 1.8. BANK GROUPS \*

(as of 31 March 2001)

Code	Bank
<b>Group I</b>	
200	United Bulgarian Bank
300	DSK Bank
621	Bulbank
<b>Group II</b>	
150	First Investment Bank
400	SG Expressbank
440	BNP Paribas, Bulgaria
660	Biochim Commercial Bank
800	Hebros Commercial Bank
920	Bulgarian Post Bank
<b>Group III</b>	
130	Municipal Bank
155	Raiffeisenbank, Bulgaria
320	Roseximbank
561	Bulgaria-Invest Commercial Bank
790	Central Cooperative Bank
888	Economic and Investment Bank
<b>Group IV</b>	
120	Neftinvestbank
160	Bulgarian-American Credit Bank
170	Evrobank
195	Unionbank
220	Corporate Commercial Bank
240	Demirbank, Bulgaria
260	Tokuda Credit Express Bank
470	First East International Bank
480	International Commercial Bank, Bulgaria
545	TeximPrivate Entrepreneurial Bank
620	Encouragement Bank
890	International Bank for Trade and Development
<b>Group V</b>	
140	Hypovereinsbank, Bulgaria, Sofia Branch
145	ING Bank N. V., Sofia Branch
180	Societe Generale, Sofia Branch
190	Piraeus Bank, Sofia Branch
199	National Bank of Greece, Sofia Branch
250	Citibank N. A., Sofia Branch
350	T.C. Zirrat Bank, Sofia Branch
898	Alpha Bank, Sofia Branch

\* Banks are classified into five groups depending on balance-sheet figure.  
 Changes in the groups will be made provided there is sufficient proof that the balance-sheet figure is impacted by fundamental factors.

*Group I* over BGN 800 million;  
*Group II* from BGN 300 million to BGN 800 million;  
*Group III* from BGN 100 million to BGN 300 million;  
*Group IV* up to BGN 100 million;  
*Group V* foreign banks' branches.

\* Analytical reporting of the balance of payments in accordance with IMF 5th edition of the Balance of Payments Manual.

<sup>1</sup> Preliminary data.

<sup>2</sup> Data based on customs declarations as of the moment of customs clearings, provided by the Computing Center Directorate to the Information Service Ltd., processed by the BNB and supplemented with NSI information. Data is coordinated with the NSI. Preliminary data as of 14 June 2001.

<sup>3</sup> BNB estimates.

<sup>4</sup> Data of the Ministry of Internal Affairs and estimates of the Ministry of Economy and the BNB.

<sup>5</sup> Including data provided by the Agency for Foreign Aid and the Bulgarian Red Cross.

<sup>6</sup> A minus sign denotes flight of capital (increase in assets or decrease in liabilities).

<sup>7</sup> Data provided by the companies with foreign interest, the Privatization Agency, specialized ministries, the NSI, the Central Depository and commercial banks. The *Direct Investment in Bulgaria* item includes nonresidents' investment in real estate.

<sup>8</sup> Data based on reports of residents' obligations to foreign persons received at the BNB. Due to quarterly reporting of these obligations, data is subject to an additional revision.

<sup>9</sup> BNB data.

<sup>10</sup> Including changes in households' forex deposits with local banks, net of valuation adjustments. A minus sign denotes a decrease of deposits and a positive sign an increase of deposits.

<sup>11</sup> Data based on reports of residents' obligations to foreign persons received at the BNB.

<sup>12</sup> Excluding changes in BNB forex reserves due to valuation adjustments. A minus sign denotes an increase of forex reserves and a positive sign a decrease.

<sup>13</sup> Including loans extended for balance of payments support (incl. the EU, the World Bank, etc.).

\* Analytical reporting of the balance of payments in accordance with IMF 5th edition of the Balance of Payments Manual.

<sup>1</sup> Preliminary data.

<sup>2</sup> Data based on customs declarations as of the moment of customs clearings, provided by the Computing Center Directorate to the Information Service Ltd., processed by the BNB and supplemented with NSI information. Data is coordinated with the NSI. Preliminary data as of 22 March 2001.

<sup>3</sup> BNB estimates.

<sup>4</sup> Data of the Ministry of Internal Affairs and estimates of the Ministry of Economy and the BNB.

<sup>5</sup> Including data provided by the Agency for Foreign Aid and the Bulgarian Red Cross.

<sup>6</sup> A minus sign denotes flight of capital (increase in assets or decrease in liabilities).

<sup>7</sup> Data will be revised according to the survey which will be held in 2001.

<sup>8</sup> Data provided by the companies with foreign interest, the Privatization Agency, specialized ministries, the NSI, the Central Depository and commercial banks. The *Direct Investment in Bulgaria* item includes nonresidents' investment in real estate.

<sup>9</sup> Data based on reports of residents' obligations to foreign persons received at the BNB.

<sup>10</sup> BIS data for the period January – June 2000 and BNB data for July – December 2000.

<sup>11</sup> Including changes in households' forex deposits with local banks, net of valuation adjustments. A minus sign denotes a decrease of deposits and a positive sign an increase of deposits.

<sup>12</sup> Data based on reports of residents' obligations to foreign persons received at the BNB.

<sup>13</sup> Excluding changes in BNB forex reserves due to valuation adjustments. A minus sign denotes an increase of forex reserves and a positive sign a decrease.

<sup>14</sup> Including loans extended for balance of payments support (incl. the EU, the World Bank, etc.).

Changes in BNB forex reserves,  
including valuation changes

\* Analytical reporting of the balance of payments in accordance with IMF 5th edition of the Balance of Payments Manual.

<sup>1</sup> Preliminary data.

<sup>2</sup> Data based on customs declarations as of the moment of customs clearings, provided by the Computing Center Directorate to the Information Service Ltd., processed by the BNB and supplemented with NSI information. Data is coordinated with the NSI. Preliminary data as of 22 March 2001.

<sup>3</sup> BNB estimates.

<sup>4</sup> Data of the Ministry of Internal Affairs and estimates of the Ministry of Economy and the BNB.

<sup>5</sup> Including data provided by the Agency for Foreign Aid and the Bulgarian Red Cross.

<sup>6</sup> A minus sign denotes flight of capital (increase in assets or decrease in liabilities).

<sup>7</sup> Data will be revised according to the survey which will be held in 2001.

<sup>8</sup> Data provided by the companies with foreign interest, the Privatization Agency, specialized ministries, the NSI, the Central Depository and commercial banks. The *Direct Investment in Bulgaria* item includes nonresidents' investment in real estate.

<sup>9</sup> Data based on reports of residents' obligations to foreign persons received at the BNB.

<sup>10</sup> BIS data for the period January – June 2000 and BNB data for July – December 2000.

<sup>11</sup> Including changes in households' forex deposits with local banks, net of valuation adjustments. A minus sign denotes a decrease of deposits and a positive sign an increase of deposits.

<sup>12</sup> Data based on reports of residents' obligations to foreign persons received at the BNB.

<sup>13</sup> Excluding changes in BNB forex reserves due to valuation adjustments. A minus sign denotes an increase of forex reserves and a positive sign a decrease.

<sup>14</sup> Including loans extended for balance of payments support (incl. the EU, the World Bank, etc.).

<sup>1</sup> Actual payments. Preliminary data calculated in US dollars at average monthly exchange rates of respective currencies.

<sup>2</sup> Source: *Debt Registration, Service and Management System* of the Ministry of Finance and Bulgarian National Bank. Preliminary data as of 27 June 2001.

<sup>3</sup> Including drawings of IMF credits. In the BOP tables these credits are received and serviced by the BNB.

<sup>4</sup> Commercial bank data.

<sup>5</sup> Including only credits registered with the BNB and on which information is available. Due to quarterly reporting of these obligations provided for by the Foreign Exchange Law, data on private nonfinancial enterprises is subject to revision.

<sup>6</sup> Including principal and interest payments on government securities bought by nonresidents.

<sup>7</sup> In accordance with international statistical methodology of the foreign debt, government guaranteed loans of budgetary and nonbudgetary enterprises are included in government guaranteed debt amount by the BNB.

Source: BNB.

(million BGN)

	2001				
	I	II	III	IV	V
I. Debt on government securities issued for budget deficit financing	935.4	930.8	946.5	942.9	922.5
II. Direct debt to BNB <sup>3</sup>	2 470.9	2 451.5	2 628.0	X	X
III. Debt on other government securities issued for structural reform	769.5	765.9	796.3	781.0	819.6
IV. EUR-denominated government bonds issued under § 10 of Transitional and Final Provisions of 1999 State Budget Law <sup>2</sup>	X	X	X	X	X
V. Domestic government guarantees	9.7	9.5	9.7	9.2	9.5
Domestic government debt and government guaranteed debt, total <sup>4</sup>	1 714.7	1 706.2	1 752.6	1 733.1	1 751.7

<sup>1</sup> End of period data covering the debt issued by the Ministry of Finance and operations related to that debt which are reported in the central republican budget.

<sup>2</sup> From January 2001 EUR-denominated government bonds issued under § 10 of Transitional and Final Provisions of 1999 State Budget Law were included in item *Debt on government securities issued for budget deficit financing*.

<sup>3</sup> From April 2001 *Direct debt to BNB* was excluded from domestic debt structure. The IMF extends its credits to the central bank which then on-lends them to the government. So far the debt to the IMF was included in the structure of the foreign debt as well as in the structure of domestic debt (as in terms of the budget this debt is domestic debt). It was excluded from domestic debt amount in order to avoid any mistakes and double reporting of the debt data.

<sup>4</sup> In order to ensure comparability of the data *Direct debt to BNB* was excluded from *Domestic government and government guaranteed debt, total* for the period January 2000 – March 2001.

**Overview**

*BNB Monthly Bulletin* includes data on the state and dynamics of the national economy. It focuses on financial and external sectors since information on these sectors is prepared at the BNB. In general, the content, structure and format of statistical information presented in the bulletin are harmonized with the requirements and criteria of the IMF General Data Dissemination System (GDDS), and, to a certain extent, with its higher and stricter form, the Special Data Dissemination Standard (SDDS).

A common principle is adopted: tables represent information for the current and previous years, and charts, for the current and the preceding two years. Depending on availability, specificity, compatibility and comparability of data, tables and charts may contain information for separate periods (months, quarters, years), as well as cumulative data since early year.

All data published in the *Monthly Bulletin* is in redenominated levs.

**1****Financial Sector****Overview**

The information presented in this section covers four major categories:

- (a) monetary survey;
- (b) analytical accounts of the central bank;
- (c) analytical accounts of the banking sector;
- (d) interest rates.

Monetary survey data is derived from monthly financial statements of all financial institutions within the banking system: the BNB and commercial banks (including those in liquidation). The information as presented meets international standards and reflects country-specific aspects of accounting and banking methodology.

Bank assets and liabilities are classified according to sector, currency and financial instrument. For the needs of monetary and banking statistics the national economy is split into three sectors: banking, government and nongovernment. The country's relations with the rest of the world are reflected in the external sector (nonresident legal and physical persons).

The banking sector consists of the monetary authorities (BNB), on the one hand, and all commercial banks licensed by the BNB (including foreign banks' branches), on the other hand.

The government sector consists of the central government and local budgets; the central government includes the state budget, state funds and extra-budgetary accounts.

The nongovernment sector comprises state-owned enterprises, private companies, the public (households) and nonbank financial institutions. The latter include financial brokerage houses, insurance companies and other organizations within the financial sector but outside the banking sector.

The BNB has been preparing monthly monetary surveys since March 1990. Several major changes in the monetary survey's format and content were made until May 1995: lev and foreign exchange items were separated, monetary aggregates were segregated according to liquidity, etc. The most significant changes in time series have occurred since 1 June 1995 with the introduction of the Uniform National Chart of Accounts; consequently all monetary and credit aggregates were segregated according to maturity, sector and currency. Breaks in time series could not be removed because of the different methods used for data collection and processing, and the absence of database.

*The banks in liquidation* are required to provide the same set of accounting information as operating banks. In case banks fail to meet the terms required by regulation, statistical processing of the latest available data is made. Consoli-

dated data on the banks in liquidation is showed in an additional column to the monetary survey and analytical accounts of commercial banks.

Data is revised when an individual bank makes adjustments to its data, or preliminary data (estimates) has been published. This takes place generally in the last month of the year and is explicitly stated.

## Monetary Survey

The monetary survey aggregates the analytical accounts of the monetary authorities (BNB) and commercial banks. It includes major monetary aggregates within the money supply, and its sources: net foreign assets and net domestic assets. *Net foreign assets* are derived as the difference between foreign assets and liabilities of the BNB and commercial banks. Within foreign assets, the country's gross foreign exchange reserves are shown, including BNB most liquid foreign assets. From 1 July 1997, with the currency board arrangement introduction, these are equal to the assets of the Issue Department (incorporated separately within BNB balance sheet), which maintains a fixed exchange rate of the Bulgarian lev to the Deutschemark (since 1 January 1999 to the Euro).

*Net domestic assets* include domestic credit and a general balancing line termed *Other items (net)*. Domestic credit incorporates lending to the consolidated government sector and the nongovernment sector. Credit to the government sector is netted – gross claims less government deposits – and credit to the nongovernment sector is in gross terms. Under *Other items (net)*, a number of accounts are netted relating to interbank and intrabank relationships, relationships between the BNB and commercial banks, banks own funds, as well as unclassified assets and liabilities.

*Claims on the government* include claims of the BNB and commercial banks and are classified according to currency and instrument – government securities, loans, etc. Government securities are split according to their maturity into short-term (up to 12 months), medium-term (up to five years) and long-term (over five years) and according to currency: into government securities denominated in levs and in foreign currency. Until November 1998 government securities were reported at nominal value and from December 1998 these are marked to market.

*Government lev-denominated loans* include loans from the BNB (under the old Law on the BNB, effective until 10 June 1997) and the outstanding direct debt to other commercial banks. *Foreign currency loans* are extended only by the BNB and are in compliance with the new Law on the BNB. These are denominated in special drawing rights (SDR), corresponding by maturity and interest to the country's loans from the IMF.

*Claims on the nongovernment sector* include credits, equity participations, etc. These are reported at gross value (in levs and foreign currency).

For the purpose of analysis *Other items (net)* is subdivided into two items: *Own funds* and *Other assets and liabilities (net)*. The *Own funds* item includes *Capital and reserves* and *Financial result*. The *Own funds* item is presented with an opposite sign due to its transfer from the balance sheet liabilities side to the assets side so as to leave just monetary aggregates in the liabilities side. As a result, a negative *Financial result* shows a profit and a positive one a loss.

Money supply is presented by currency, monetary aggregate and sector. *The M1 monetary aggregate* includes the most liquid monetary instruments used in settlements: *Currency outside banks* and *Demand deposits in levs* (current accounts).

*Quasi-money* is a less liquid monetary aggregate and comprises time deposits, savings deposits and foreign currency deposits. *Time deposits* include lev deposits for a specific term (one-, three-, six-, twelve-month deposits, etc.). *Savings deposits* include only individuals' deposits in national currency and some other deposits (e.g. children's deposits). *Foreign currency deposits* include both current accounts and time deposits. The M2 monetary aggregate is comprised of quasi-money and M1 monetary aggregate.

The least liquid funds include *Money market instruments*, *Import and restricted deposits* and *Deposits in Nonoperating Banks*. These are in levs and foreign currency and together with M2 constitute the broadest monetary aggregate M3 (money supply, broad money).

## Analytical Reporting of the BNB and Commercial Banks

**Bulgarian National Bank.** *Foreign assets* are divided according to liquidity into gross international foreign exchange reserves and other foreign assets. *Monetary gold* is included in gross international reserves. Until 30 June 1997 monetary gold was assessed at USD 300 per 1 troy ounce; thereafter, consistent with the new Law on the BNB, at DEM 500 per 1 troy ounce, or at its market value, if lower.

*Other foreign assets* are less liquid and include participations in international financial institutions (excluding Bulgaria's reserve position in the IMF which is part of the gross international forex reserves), foreign government securities used as collateral against government bonds issued to settle Bulgaria's foreign debt to the London Club creditor banks, letters of credit, etc.

*Claims on nonfinancial state-owned enterprises* and *Claims on nonbank financial institutions* include equity participations in companies directly related to BNB activity.

*Claims on commercial banks* include monetary policy instruments employed by the BNB, as well as other relations with commercial banks (accounts, etc.). Following the currency board arrangement collateralized credit is the only instrument to refinance commercial banks. Under the currency board arrangement the BNB may extend collateralized credits to commercial banks in a lender of last resort capacity in case of a liquidity risk threatening the stability of the banking system.

*Reserve money* includes currency outside banks, funds of commercial banks and some nonbank financial institutions' funds with the BNB and constitutes the monetary base (M0 monetary aggregate). Reserve money is in levs and foreign currency and includes minimum required reserves and excess reserves (settlement accounts, current accounts and time deposits).

*Foreign liabilities* reflect BNB obligations to the external sector. After 1 July 1997 BNB foreign liabilities include only Bulgaria's obligations to the IMF.

The *Own funds* item includes BNB fixed capital, reserve funds and current financial result.

**Commercial banks.** *Reserves* include funds on their accounts with the BNB and cash in commercial banks' vaults. The differences with the corresponding reserve money component in BNB analytical reporting are due to time discrepancies of counter flows between the central bank and commercial banks.

*Foreign assets* include claims on nonresidents (banks, governments, nonbank institutions, etc.) and foreign currency in banks' vaults. Commercial bank foreign assets are not included in Bulgaria's international forex reserves.

## Interest Rate Statistics

The *base interest rate* is the effective interest rate at end of month based on the average annual yield attained at three-month government securities primary auctions.

Interest rate statistics includes summarized data on interest rate levels of banks, except those in liquidation. Interest rates are averaged on a weekly basis for a month.

Short-term interest rates cover maturities from one day up to twelve months, and long-term interest rates maturities over twelve months.

Interest rates on credits and deposits are the average weighted rates of three sectors: state-owned companies, private enterprises and the public.

Interest rates on *credits* reflect interest rates on newly negotiated lev and foreign currency loans during the corresponding month.

Annual compounding of the base interest rate is made on a quarterly basis, that of credits on a monthly basis, and that of deposits by maturity.

*Yield of government securities* is computed as the average weighted yield of all issues during the calendar month in actual amount.

Real interest rate levels on lev credits and deposits are based on the average interest rates during the month deflated by the monthly inflation rate reported for the same period.

## 2

# External Sector

Information on the external sector includes four major categories:

- (a) balance of payments;
- (b) trade in goods;
- (c) debt indicators;
- (d) exchange rates.

## Balance of Payments

The Bulgarian National Bank is in charge of the compilation of the country's balance of payments. The legal basis for the balance of payments compilation in Bulgaria is provided for in Article 42 of the Law on the Bulgarian National Bank (published in the State Gazette, issue 46 of 10 June 1997). Data for the purposes of the BOP compilation is collected on the basis of Article 42 of the Law on the Bulgarian National Bank as well as pursuant to Article 8, para. 2 of the Foreign Exchange Law (published in the State Gazette, issue 83 of 21 September 1999). The data is processed by the Balance of Payments and External Debt Division within the Statistics Directorate of the BNB keeping its confidentiality. At present, the Bulgarian National Bank compiles and publishes analytical presentation as well as standard presentation of the balance of payments in accordance with the Fifth Edition of the *Balance of Payments Manual* (IMF, 1993) and the *Balance of Payments Textbook* (IMF, 1996).

The balance of payments' methodology is conceptually related to that of the *System of National Accounts* (SNA). The items of the balance of payments correspond closely to the relevant categories of the *Rest of the world* account in the SNA.

There is a close relationship between the *International Investment Position* and the balance of payments as well. The BOP financial account measures an economy's transactions in external financial assets and liabilities which affect the stock of external financial assets and liabilities measured in the international investment position.

### I. Accounting Principles and Conventions

The basic convention applied in the construction of Bulgaria's balance of payments is the implementation of the *double entry system*. Under **credit, with a positive sign**, are recorded: exports of goods and services, income receivable, offsets to non-refundable real and financial resources received (transfers), increases in financial liabilities, decreases in financial assets. Under **debit, with a negative sign**, are recorded: imports of goods and services, income payable, offsets to non-refundable real and financial resources provided, increases in financial assets, decreases in financial liabilities.

The *time of recording* of the balance of payments transactions is the time of change of ownership.

*Transaction valuations* are based on market prices. If the actual market prices are not available, the average market prices are used as approximation.

*Valuation changes* of the country's external assets and liabilities are not included in the balance of payments.

The unit of account for the balance of payments of Bulgaria is the US dollar. The conversion into the unit of account is made using the exchange rate at the time of transaction. If not available, or inapplicable for other practical reasons, the average exchange rate for the reporting period is used. Along with the March 2001 publication of the balance of payments the Bulgarian National Bank starts disseminating it in BGN and from January 2002 – in euro.

## **II. Balance of Payments Components**

The balance of payments components are compiled using basically the International Transactions Reporting System (ITRS), which includes (i) commercial banks' reports, and (ii) reports by enterprises which have bank accounts abroad, pertaining to the residents' international transactions. These reports cover all components of the balance of payments table. In addition, the data on certain BOP components collected by the ITRS is substituted for data from other sources: (i) direct investment enterprise survey, (ii) administrative records, (iii) reports by enterprises having liabilities to abroad and (iv) reports by enterprises having borrowed from abroad.

In the analytical presentation the balance of payments components are classified in the following main categories:

### **A. Current account**

The current account comprises the acquisition and provision of *goods and services, income, and current transfers* between the country and the rest of the world. The flows recorded on the credit side represent that part of the gross domestic product, which is provided to the rest of the world (exports of goods and services), as well as the provision of factors of production expressed by income received or receivable compensation of employees and investment income (interest, dividends, etc.). Recorded are also offsets for nonrefundable real and financial resources received (transfers).

The flows on the debit side represent the gross product created in the rest of the world and acquired by the domestic economy (imports of goods and services), as well as the acquisition of factors of production expressed by income paid or payable. Recorded are also offsets to nonrefundable real and financial resources provided.

- The *Goods* component of the BOP current account covers movable goods for which changes of ownership between residents and nonresidents occur. The data on imports and exports FOB is based on customs declarations, as the codes used in them are after the Harmonized System for Description and Coding of Commodities of the World Customs Organization introduced in 1988 and supplemented in 1992. In accordance with the common methodology of the Bulgarian National Bank and the National Statistical Institute, since 1999 the exports and imports are recorded under the special trade system where the moment of transactions' registration is equal to the moment of the customs declarations clearance.

- The Bulgarian National Bank re-calculated and published imports and exports data after the new methodology for the period 1995 – 1998.

*Sources:* The sources of data are the Customs Agency and the Information Service (at the Computing Center Directorate). The Bulgarian National Bank and the National Statistical Institute receive the exports and imports data, supplement it with other information and process it further.

In accordance with the common methodology, before publishing the data, the BNB and the NSI have to agree upon the data. The data is published eight weeks after the expiry of the reporting period. Due to the existing system for processing of the customs data, outside the BNB and the National Statistical Institute, the preliminary foreign trade data is subject to frequent revisions.

- The *Services* component comprises *transportation, travel, and other services*.

• The Bulgarian National Bank derives the data on *freight transportation* from foreign trade data and the data on passenger transportation from travel data on the basis of estimates. The Bank is currently working on a project for a new methodology for estimation of the receipts and expenditures on transportation services.

• *Travel* covers goods and services, including those related to health and education, acquired by travellers for business and personal purposes. The data on travel is based on data from the Ministry of Internal Affairs on the number of travellers crossing the borders and on estimates of *per capita* expenditures. In 1999 the Bulgarian National Bank, together with the Ministry of Economy (former Ministry of Trade and Tourism), worked out a new methodology for estimation of the receipts and expenditures from travel services, *Methodology for Estimation of Receipts and Expenditures on Travel in Bulgaria's Balance of Payments* (Bulgarian National Bank, Ministry of Trade and Tourism, 18 November 1999). Therefore, the data for the period 1995 – 1999 on the travel item was revised.

• *Other services* item covers receipts and payments related to services other than transportation and travel (communication, construction, financial, leasing, insurance, cultural, sport and recreational services, etc.).

The *main sources of information* on this item are the commercial banks' reports and the reports of enterprises having accounts abroad.

• *Income* consists of two categories: (i) *compensation of employees*, and (ii) *investment income*. *Compensation of employees* covers wages, salaries and other benefits paid to nonresident workers in the country or received by resident workers abroad. *Investment income* covers receipts and payments of income associated with external financial assets and liabilities. Included are receipts and payments on direct investment, portfolio investment, other investment, and receipts on reserve assets.

The *main sources of information* on the *Income* component are the commercial banks' reports and the reports of enterprises, the Ministry of Finance, and the Bulgarian National Bank.

• *Transfers* are all real resources and financial items provided without a quid-pro-quo from one economy to another. *Current transfers* directly affect the level of disposable income of the economy, and the consumption of goods and services. That is, current transfers reduce the income and consumption potential of the donor and increase the income and consumption potential of the recipient. Included in the *Current transfers* are gifts, grants, inheritances, prizes won from lotteries, pensions, current taxes, social security contributions, etc.

*Sources of information:* The Bulgarian National Bank receives information on current transfers from the Bulgarian Red Cross, the Agency for Foreign Aid, and monthly reports of commercial banks.

### B. Capital account

• The *Capital account* consists of two categories: (i) *capital transfers* and (ii) *acquisition or disposal of nonproduced, nonfinancial assets*. If in kind, a capital transfer consists of (i) a transfer of ownership of fixed assets, or (ii) forgiveness of a liability by a creditor when no counterpart is received in return. If in cash, a transfer is a *capital transfer* when it is linked to, or conditional on, the acquisition or disposal of fixed assets (for example, an investment grant).

### C. Financial account

The *Financial account* comprises all transactions (actual and imputed) in the external financial assets and liabilities of an economy. The external assets and liabilities are primarily classified according to type of investment. Included in the *Financial account* are (i) *direct investment*, (ii) *portfolio investment* and (iii) *other investment*.

- *Direct investment* is a category of international investment in which a resident of one economy – a direct investor – acquires a lasting interest (at least 10% of the ordinary shares or voting power) in an enterprise resident in another economy – a direct investment enterprise. The direct investment includes both the initial transaction, through which the relationship between the direct investor and the direct investment enterprise is established, and all subsequent transactions between them. The direct investment covers transactions relating to changes in the direct investor's share in the equity capital of the direct investment enterprise, intercompany debt transactions as well as the share of the direct investor in the undistributed earnings/loss of the direct investment enterprise for the reporting period. Direct investment abroad is reported as an asset, and direct investment in the reporting country, as a liability.

*Sources of information:* The Bulgarian National Bank receives monthly data on direct investment in the country from the Privatization Agency and the line ministries, the Central Depository, and from commercial banks' reports; quarterly data – from the Insurance Supervision Directorate at the Ministry of Finance, the reports on intercompany debt transactions and from the statistical survey conducted by the NSI among nonfinancial sector enterprises and annual data from commercial banks' annual financial and accounting reports (Balance Sheet and Profit and Loss Statements). The Bulgarian National Bank receives monthly data on direct investments abroad from the commercial banks' reports and annual – from the survey carried by the BNB among the direct investment enterprises in the country. Because of the different periodicity for data reporting of the different sources of information on direct investments, the data on that item is subject to periodical revisions.

The Bulgarian National Bank and the Agency for Foreign Investment share information on the direct investment in the country.

- *Portfolio investment* covers transactions in shares if the investor's share in the equity shareholders capital of the company is less than 10%, transactions in bonds, notes, money market and other tradable securities and transactions in financial derivatives.

The *main source* of information on the liabilities side of the portfolio investment is the data provided by the Ministry of Finance, the Bulgarian National Bank, commercial banks, enterprises holding bank accounts abroad, and the Central Depository.

Data on the assets side of the portfolio investment is provided by enterprises holding bank accounts abroad, commercial banks, the Bulgarian National Bank and the Ministry of Finance.

- *Other investment* covers trade credits, loans, currency and deposits, and other assets and liabilities.

According to the balance of payments conventions trade credit arises from the direct extension of credit from a supplier to a buyer, i. e. this is a credit extended by a trade partner without issue of a tradable security.

Until 1999 data on trade credits was obtained from the monthly reports of enterprises with bank accounts abroad and from the semiannual survey of the BNB among direct investment enterprises in the country (the latter gives information concerning transactions both with the direct investor and with other nonresidents).

Since January 2001 when the Foreign Exchange Law came in force the main source of information on trade credits (liabilities) are the quarterly reports of enterprises on their liabilities to nonresidents.

The *Loans* item includes received and paid principals on short- and long-term loans between residents and nonresidents if no issue of a tradable security is involved with these loans. Transactions concerning disbursements and repayments of principals on IMF loans and disbursements on loans on BOP support

are not included in the liabilities side of the *Loans* item. They are recorded in the relevant items of group E. *Reserves and related items*.

*Sources of information:* The Bulgarian National Bank compiles data on loans received by resident entities on the basis of information from the Ministry of Finance, the BNB, and from reports of the commercial banks and enterprises that have received loans from abroad. The enterprises that have borrowed from abroad report quarterly data to the BNB. Therefore, the monthly data on *Loans, other sectors* (liabilities side) is revised each quarter.

The *Currency and deposits* component presents on the assets side the changes in the residents' currency and deposits held abroad, and on the liabilities side – the changes in the liabilities of the resident commercial banks to non-residents in domestic and foreign currency. Following the basic accounting principle and conventions set in the *Balance of Payments Manual* (IMF, 1993), when compiling that item the Bulgarian National Bank excludes any changes therein due to exchange rate changes.

The *Other forex deposits* component on the assets side is a peculiarity of the Bulgarian BOP presentation prepared and published by the Bulgarian National Bank. It presents changes in the foreign exchange deposits held by the population and the private enterprises with domestic commercial banks. Increases in the deposits of the population and private enterprises are denoted with a positive sign, and their decreases – with a negative sign. Changes in this item do not reflect the impact of exchange rate differences.

The items *Other assets* and *Other liabilities* include all transactions on miscellaneous accounts receivable and payable not included elsewhere and transactions in arrears.

#### D. Errors and omissions

The *Errors and omissions* component is an offsetting item. Theoretically, this component exists in the BOP presentation because the compilation system used by the Bulgarian National Bank is not a closed one but is a combination of different sources of information. In contrast to other statistical reports, such as monetary statistics, data collection for the purposes of BOP compilation cannot be restricted to commercial banks' financial statements as the only source of information.

The fluctuations in the *Errors and omissions*, both in sign and in size, are mainly due to: (i) revisions of export and import data, (ii) the development of the methodology for compilation of certain BOP components and (iii) the existence of objective obstacles to the collection of certain balance of payments items.

#### E. Reserves and other financing

*Reserve assets* include those external assets that are readily available to and controlled by the central bank (government) for direct financing of balance of payments imbalances. The reserve assets comprise monetary gold, SDRs, reserve position in the Fund, foreign exchange assets (consisting of currency and deposits and securities), and other claims. The entries under this category pertain to transactions in the BNB's external holdings which are administered by the Issue Department. The data on reserve assets changes is published in the BOP excluding valuation changes, such as exchange rate changes.

This group in the analytical presentation of the balance of payments includes also *Use of Fund credit* and the item *Exceptional financing*. The exceptional financing comprises the BOP support, as well as deferred/rescheduled payments and payments on arrears resulting from balance of payments difficulties. In accordance with the methodology for accounting the *exceptional financing* transactions (*Balance of Payments Manual*, Fifth Edition, IMF, 1993, p. 454), the principal repayments on the BOP support credits are included in the financial account under *Other investment – liabilities (Loans, General government)*.

### **III. Balance of Payments Compilation in BGN**

#### **Current account**

The statistical value of imports and exports in BGN from customs declarations as of the moment of customs clearance is used for calculation of foreign trade data. Changes in exports and imports on the same period of the previous year reflect the change in volumes, goods' prices and foreign exchange rates.

Data on travel as well as data on received and repaid income and other services in BGN are based on data in USD at the average monthly rate of the lev against the US dollar. As regards data on current transfers, the information received in BGN is included directly in the balance sheet, and data received in US dollars is recalculated in BGN at the average monthly rate of the lev against the US dollar.

#### **Capital and financial account**

Data on *capital transfers* in BGN is obtained from data in USD using the average monthly rate of the lev against the US dollar. *Direct investment abroad* is recalculated in BGN at the average monthly rate of the lev against the US dollar. As regards *Direct investment in Bulgaria*, the data in BGN is calculated based on the exchange rate of the lev against the respective currency for the date of transaction (if this date is known) or on the average monthly rate (if the date is unknown).

Data on *Portfolio investment* and *Other investment* is based on the data in US dollars at the average monthly rate of the lev against the US dollar. In order to eliminate foreign exchange fluctuations, data on *Portfolio investment in the banking sector in long-term government securities*, *Foreign currency deposits of banks abroad*, *Households' deposits with local commercial banks* and *Nonresidents' deposits in BGN* is obtained by converting the changes in respective items in the original currencies into levs at the average monthly rate of the lev against the respective currency. Likewise data on BNB foreign exchange reserves in BGN is obtained.

### **IV. Periodicity, Frequency and Timeliness of the Balance of Payments Publications**

The Bulgarian National Bank compiles and publishes the balance of payments of the country on a monthly basis. The schedule of the Bulgarian National Bank is to publish the data within eight weeks after the close of the reference period.

### **V. Data Revision Policy**

Revisions of published BOP estimates are a common feature of many compilation systems and are aimed at publishing the most accurate estimates possible. The policy on revisions pursued by the Bulgarian National Bank is based on the following principles:

(i) As for the most frequent data, each monthly publication may include revisions of the data for the last three months and each quarterly publication may include revisions of the monthly data for the whole current year.

(ii) When ongoing changes are made due to additional information collected, as well as resulting from elimination of errors, the Bulgarian National Bank timely informs the users through the monthly press releases and the notes to the BOP table.

(iii) When significant revisions are made due to changes in the methodology for reporting of certain BOP components or other reasons, the Bulgarian National Bank publishes in advance information on the changes to facilitate the users of the data.

## VI. Data Dissemination

The Bulgarian National Bank disseminates the monthly balance of payments data to the subscribers through the Press Office, and within 24 hours after the press release, the data is published on the web site of the Bulgarian National Bank: <http://www.bnb.bg>.

The data is also published in the Bulgarian National Bank *Monthly Bulletin*. Data on the country's balance of payments is included in the semiannual and annual official reports of the Bulgarian National Bank.

## VII. Contacts

If you have any questions on the methodology applied by the Bulgarian National Bank or on the balance of payments data published, please do not hesitate to send them to Mr Emil Dimitrov, head of the Balance of Payments and External Debt Division, via e-mail at [Dimitrov.E@bnbank.org](mailto:Dimitrov.E@bnbank.org), to Mrs Liliana El Haddad, expert ([Bancheva.L@bnbank.org](mailto:Bancheva.L@bnbank.org)), or by mail to the following address:

Bulgarian National Bank  
 Balance of Payments and External Debt Division  
 1 Knyaz Alexander Battenberg Square  
 1000 Sofia  
 Bulgaria

## Imports and Exports

The Bulgarian National Bank provides the country's foreign trade data on a monthly basis. The data is based on customs declarations including codes under the *Harmonized System for Commodity Description and Coding* of the World Customs Organization, introduced in 1988 and supplemented in 1992.

Bulgaria's exports are reported at FOB prices, and imports at CIF prices. For the purposes of the balance of payments, however, total imports are recalculated at FOB prices.

In accordance with the common methodology of the Bulgarian National Bank and the National Statistical Institute, since 1999 exports and imports have been recorded under the Special Trade System where the moment of a transaction's registration is the moment of the customs declaration's clearance. The Bulgarian National Bank recalculated and published imports and exports data under the new methodology for the period 1995 – 1998.

For the purposes of economic analysis the Bulgarian National Bank publishes the tables on *exports and imports by use*. They are based on the four-digit codes under the harmonized system and grouped by purpose and by end-use of the respective commodity. The basic principles in distributing the commodities in the respective groups are: purpose of use and degree of processing. In the tables on *major trading partners and regions* only the most important countries and regions for Bulgaria's exports (imports) are included. The criteria for description of partner countries are as follows: imports – by country of origin of the commodities; exports – by the commodities' recipient country, that is, the last designated country where the commodities are to be delivered.

In all published tables exports are reported at FOB prices, and imports at CIF prices.

Quarterly and annual time series for exports and imports by *use* and by *major trading partner and region* are published on the web site of the BNB for the period 1995 – 2000. For the same period separately are published quarterly tables on *commodity groups (use) and by region and structure of imports and exports by currency*. Exports and imports data as well as foreign trade analysis for the period under review is published on a monthly basis.

Data is provided by the Customs Agency and the Information Services AD (at the Information Computing Center Directorate). The Bulgarian National Bank and the National Statistical Institute receive exports and imports data, supplement it with other information and process it.

In accordance with the common methodology, before publishing the data, the BNB and the NSI have to coordinate it. The data is published eight weeks after expiry of the reporting period.

In principle, the Bulgarian National Bank makes monthly revisions of its data for the last three months, and quarterly revisions of the data for the current year. However, in case the incoming data is incomplete and/or of poor quality, the Bulgarian National Bank may revise imports and exports data more frequently.

The Bulgarian National Bank disseminates imports and exports data through the Press Office, and 24 hours thereafter the data is published on the web site of the Bulgarian National Bank: <http://www.bnb.bg>

Data on Bulgaria's foreign trade is published in the Bulgarian National Bank *Monthly Bulletin*, as well as in the Bank's semiannual and annual reports.

For further information on the methodology applied by the Bulgarian National Bank or on foreign trade and balance of payments data published, you may contact Mr Emil Dimitrov, head of the Balance of Payments and External Debt Division, via e-mail at [Dimitrov.E@bnbank.org](mailto:Dimitrov.E@bnbank.org), (tel. +359 2 9145 1243), or Mrs Liliana El Haddad, expert, at [Bancheva.L@bnbank.org](mailto:Bancheva.L@bnbank.org) (tel. +359 2 9145 1252).

## Foreign Debt

Bulgaria's obligations in convertible currency in the *gross foreign debt* table (by creditor) are divided into *long-term* obligations (with maturity of over one year) and *short-term* obligations.

The item *Public and publicly guaranteed debt* includes the government debt and government guarantees on loans disbursed to Bulgarian companies.

The item *Short-term debt* includes all the country's debts with a term of less than one year. Consistent with international standards and in order to provide comparability between reported balance of payments flows and data on foreign debt service, the item *Short-term debt* includes all arrears on interest and principals.

The item *Other private creditors* includes nonresidents' deposits with domestic commercial banks and nonresidents' purchases of government securities denominated in foreign currency. Also included is information received by the Bulgarian National Bank on credits extended to local physical and legal persons by nonresident private creditors.

## 3

## Fiscal Sector

Information on the fiscal sector is classified into three categories:

- (a) government sector operations;
- (b) government operations (republican budget);
- (c) domestic and foreign government debt.

*Fiscal sector* includes all ministries, agencies, extrabudgetary funds, individual units of social security and other institutions of the central government, municipalities, as well as enterprises financed and controlled by them.

*The consolidated state budget* covers data on the government sector and includes the republican budget, the budgets of social security, legal authorities, universities financed by the government, the Bulgarian Academy of Sciences,

municipalities, as well as extrabudgetary funds and accounts. The institutional coverage of the government sector corresponds to the System of National Accounts and Government Finance Statistics ‘general government’ institutional sector.

*The republican budget* includes the central republican budget (the budget of the Ministry of Finance), budgets of other ministries and agencies, regional authorities and the National Audit Chamber. Together with the budgets of the social security, legal authorities, universities financed by the government, Bulgarian Academy of Sciences and their extrabudgetary accounts it forms the government subsector. The institutional coverage of this subsector corresponds to the System of National Accounts and Government Finance Statistics ‘central government’ institutional subsector.

# 4

## Real Sector

Tables of the real sector are arranged in the following groups:

- (a) macroeconomic indicators (national accounts);
- (b) labor market;
- (c) price indicators.

Real sector covers a few groups of institutional units – residents on the economic territory of Bulgaria. These include ‘nonfinancial enterprises’ whose main activity is production and sale of goods and nonfinancial services for the purpose of making profit; ‘nontrade organizations serving households’ which provide goods and services free of charge or at economically insignificant prices; ‘households’ – residents in Bulgaria regardless of their type and amount. Real sector also includes unincorporated production units, as well as those with single-entry accounting owned by local physical persons.

This section of the BNB Monthly Bulletin includes data on:

- *gross domestic product* – by component of final demand (under the method of end of use expenditure) and by economic sector (under the production method).

In accordance with the requirements of the System of National Accounts, holding gains are excluded from GDP data, i. e. changes in its value due to price fluctuations are excluded. Data not reconciled with Supply – Use final tables of the NSI is preliminary. Due to a change in the methodology for calculation of personal consumption of households and exports (imports) of goods and services components, data for the third quarter and the January – September 1999 period is partially comparable with relevant data for 1997, 1998, and the first half of 1999.

• *labor market* – employed under labor contract (public and private sectors), changes in their number (by economic sector), number of unemployed (total, young people, adults) and unemployment rate, average wage of employed (by type of ownership and by economic sector). From early 2001 the NSI publishes monthly data on employment and average wage in the second month following the end of the relevant calendar quarter.

• *consumer price changes* – total and by major commodity and services group.

## Resolutions of BNB Board

**21 June**

Amendments to Regulation No. 9 of the BNB on the evaluation of risk exposures of banks and the allocation of provisions to cover the risk related thereto were adopted.
