* Analytical reporting of the balance of payments in accordance with IMF 5th edition of the Balance of Payments Manual.

¹ Preliminary data.

² Data based on customs declarations as of the date of customs clearings, provided by the Computing Center Directorate to the Information Service AD, processed by the BNB and supplemented with NSI information. Data is coordinated with the NSI. Preliminary data as of 16 May 2003.

³ BNB estimates.

⁴ Data of the Ministry of Internal Affairs on tourists' number and travelling purpose and estimates of the Ministry of Economy and the BNB.

⁵ Including data provided by the Agency for Foreign Aid and the Bulgarian Red Cross.

⁶ A minus sign denotes flight of capital (increase in assets or decrease in liabilities).

⁷ Data provided by the companies with foreign interest, the Privatization Agency, the NSI, the Central Depository, commercial banks, etc. The *Direct Investment in Bulgaria* item includes nonresidents' investment in real estate.

⁸ Data based on reports of residents' obligations on financial credits to foreign persons received at the BNB.

⁹ The *Other forex deposits* subitem which covers changes in forex deposits of households with local banks was excluded from the January 2003 Balance of Payments. Following the exclusion of this subitem, data is subject to revision, effective as of 1997.

¹⁰ BNB data, subject to revision.

¹¹ Bulgaria's foreign liabilities on trade credits (received advances and obligations to suppliers) are included in this item.

¹² Excluding changes in BNB forex reserves due to valuation adjustments. A minus sign denotes an increase in forex reserves and a positive sign a decrease.

¹³ Including loans extended in support of balance of payments (including the EU, the World Bank, etc.).

* Analytical reporting of the balance of payments in accordance with IMF 5th edition of the Balance of Payments Manual.

¹ Preliminary data.

² Data based on customs declarations as of the date of customs clearings, provided by the Computing Center Directorate to the Information Service AD, processed by the BNB and supplemented with NSI information. Data is coordinated with the NSI. Preliminary data as of 16 May 2003.

³ BNB estimates.

⁴ Data of the Ministry of Internal Affairs on tourists' number and travelling purpose and estimates of the Ministry of Economy and the BNB.

⁵ Including data provided by the Agency for Foreign Aid and the Bulgarian Red Cross.

⁶ A minus sign denotes flight of capital (increase in assets or decrease in liabilities).

⁷ Data provided by the companies with foreign interest, the Privatization Agency, the NSI, the Central Depository, commercial banks, etc. The *Direct Investment in Bulgaria* item includes nonresidents' investment in real estate.

⁸ Data based on reports of residents' obligations on financial credits to foreign persons received at the BNB.

⁹ The *Other forex deposits* subitem which covers changes in forex deposits of households with local banks was excluded from the January 2003 Balance of Payments. Following the exclusion of this subitem, data is subject to revision, effective as of 1997.

¹⁰ BNB data, subject to revision.

¹¹ Bulgaria's foreign liabilities on trade credits (received advances and obligations to suppliers) are included in this item.

¹² Excluding changes in BNB forex reserves due to valuation adjustments. A minus sign denotes an increase in forex reserves and a positive sign a decrease.

¹³ Including loans extended in support of balance of payments (including the EU, the World Bank, etc.).

* Analytical reporting of the balance of payments in accordance with IMF 5th edition of the Balance of Payments Manual.

¹ Preliminary data.

² Data based on customs declarations as of the date of customs clearings, provided by the Computing Center Directorate to the Information Service AD, processed by the BNB and supplemented with NSI information. Data is coordinated with the NSI. Preliminary data as of 24 March 2003.

³ BNB estimates.

⁴ Data of the Ministry of Internal Affairs on tourists' number and travelling purpose and estimates of the Ministry of Economy and the BNB.

⁵ Including data provided by the Agency for Foreign Aid and the Bulgarian Red Cross.

⁶ A minus sign denotes flight of capital (increase in assets or decrease in liabilities).

⁷ Data provided by the companies with foreign interest, the Privatization Agency, specialized ministries, the NSI, the Central Depository, commercial banks, etc. The *Direct Investment in Bulgaria* item includes nonresidents' investment in real estate.

⁸ Data based on reports of residents' obligations on financial credits to foreign persons received at the BNB.

⁹ The *Other forex deposits* subitem which covers changes in forex deposits of households with local banks was excluded from the January 2003 Balance of Payments.

¹⁰ BIS data for the period January – September 2002. BNB data, subject to revision, for the period October – December 2002.

¹¹ Bulgaria's foreign liabilities on trade credits (received advances and obligations to suppliers) are included in this item.

¹² Excluding changes in BNB forex reserves due to valuation adjustments. A minus sign denotes an increase in forex reserves and a positive sign a decrease.

¹³ Including loans extended in support of balance of payments (including the EU, the World Bank, etc.).

Changes in BNB forex reserves, including valuation adjustments: 324.6 -5.5 51.4 370.4 -211.2 -200.8 -411.5 -823.5 14.6 -119.8 -144.6 -249.8 -130.0 -116.0 -217.5 -463.6 -1166.5

⁹ Analytical reporting of the balance of payments in accordance with IMF 5th edition of the Balance of Payments Manual.

¹¹ Preliminary data.

² Data based on customs declarations as of the date of customs clearings, provided by the Computing Center Directorate to the Information Service AD, processed by the BNB and supplemented with NSI information. Data is coordinated with the NSI. Preliminary data as of 24 March 2003.

³ BNB estimates.

⁴ Data of the Ministry of Internal Affairs on tourists' number and travelling purpose and estimates of the Ministry of Economy and the BNB.

⁵ Including data provided by the Agency for Foreign Aid and the Bulgarian Red Cross.

⁶ A minus sign denotes flight of capital (increase in assets or decrease in liabilities).

⁷ Data provided by the companies with foreign interest, the Privatization Agency, specialized ministries, the NSI, the Central Depository, commercial banks, etc. The *Direct Investment in Bulgaria* item includes nonresidents' investment in real estate.

⁸ Data based on reports of residents' obligations on financial credits to foreign persons received at the BNB.

⁹ The *Other forex deposits* subitem which covers changes in forex deposits of households with local banks was excluded from the January 2003 Balance of Payments.

¹⁰ BIS data for the period January – September 2002. BNB data, subject to revision, for the period October – December 2002.

¹¹ Bulgaria's foreign liabilities on trade credits (received advances and obligations to suppliers) are included in this item.

¹² Excluding changes in BNB forex reserves due to valuation adjustments. A minus sign denotes an increase in forex reserves and a positive sign a decrease.

¹³ Including loans extended in support of balance of payments (including the EU, the World Bank, etc.).

* Analytical reporting of the balance of payments in accordance with IMF 5th edition of the Balance of Payments Manual.

¹ Preliminary data.

² Data based on customs declarations as of the date of customs clearings, provided by the Computing Center Directorate to the Information Service AD, processed by the BNB and supplemented with NSI information. Data is coordinated with the NSI. Preliminary data as of 24 March 2003.

³ BNB estimates.

⁴ Data of the Ministry of Internal Affairs on tourists' number and travelling purpose and estimates of the Ministry of Economy and the BNB.

⁵ Including data provided by the Agency for Foreign Aid and the Bulgarian Red Cross.

⁶ A minus sign denotes flight of capital (increase in assets or decrease in liabilities).

⁷ Data provided by the companies with foreign interest, the Privatization Agency, specialized ministries, the NSI, the Central Depository, commercial banks, etc. The *Direct Investment in Bulgaria* item includes nonresidents' investment in real estate.

⁸ Data based on reports of residents' obligations on financial credits to foreign persons received at the BNB.

⁹ The *Other forex deposits* subitem which covers changes in forex deposits of households with local banks was excluded from the January 2003 Balance of Payments.

¹⁰ BIS data for the period January – September 2002. BNB data, subject to revision, for the period October – December 2002.

¹¹ Bulgaria's foreign liabilities on trade credits (received advances and obligations to suppliers) are included in this item.

¹² Excluding changes in BNB forex reserves due to valuation adjustments. A minus sign denotes an increase in forex reserves and a positive sign a decrease.

¹³ Including loans extended in support of balance of payments (including the EU, the World Bank, etc.).

incl. intracompany	168.9	169.6	168.7

¹ Preliminary data as of 4 April 2003, calculated in US dollars at end of period exchange rates of respective currencies.

² Source: *Register of Government and Government Guaranteed Debts* of the Ministry of Finance and Bulgarian National Bank, commercial banks, local physical persons and legal entities.

³ Including government and government guaranteed loans.

⁴ Based on residence principle applied by the BNB, government securities denominated in levs and foreign currency held by nonresidents are included in the foreign debt, while Brady bonds, eurobonds, and global bonds held by residents (at market value) are excluded from the foreign debt.

⁵ Including only credits registered with the BNB and those on which information is available.

⁶ BNB estimates on trade credit data for the period January – March 2003 due to quarterly reporting and the time required for information processing.

⁷ Including overdue principals and interest.

⁸ Including nonresidents' deposits with local commercial banks.

⁹ Foreign obligations on revolving credits and credits payable at request are included in Bulgaria's gross foreign debt amount.

⁵ Commercial banks data.

⁶ Including only credits registered with the BNB and those on which information is available.

⁷ BNB estimates on trade credit data for the period January – March 2003 due to quarterly reporting and the time required for information processing.

⁸ Based on residence principle applied by the BNB, government securities denominated in levs and foreign currency held by nonresidents are included in the public debt, while Brady bonds, eurobonds, and global bonds held by residents (at nominal value), are excluded from the public debt.

¹ Source: *Register of Government and Government Guaranteed Debts* of the Ministry of Finance and Bulgarian National Bank, commercial banks, local physical persons and legal entities.

² Actual payments. Preliminary data as of 6 March 2003 calculated in US dollars at average monthly exchange rates of respective currencies.

³ Including payments on government and government guaranteed credits.

⁴ Based on residence principle applied by the BNB, principal and interest payments on government securities and ZUNK bonds (denominated in levs and foreign currency) bought by nonresidents are included in gross foreign debt service.

⁵ Including only credits registered with the BNB and those on which information is available. Due to quarterly reporting of these liabilities provided for by Foreign Exchange Law, data on nonfinancial private corporations is subject to revisions.

⁶ Including payments on the debt of commercial banks, local physical persons and legal entities and overdue repayments. Payments on revolving credits excluded.

Source: BNB.

Overview

BNB Monthly Bulletin includes data on the state and dynamics of the national economy. It focuses on financial and external sectors since information on these sectors is prepared at the BNB. In general, the content, structure and format of statistical information presented in the bulletin are harmonized with the requirements and criteria of the IMF General Data Dissemination System (GDDS), and, to a certain extent, with its higher and stricter form, the Special Data Dissemination Standard (SDDS).

A common principle is adopted: tables represent information for the current and previous years, and charts, for the current and the preceding two years. Depending on availability, specificity, compatibility and comparability of data, tables and charts may contain information for separate periods (months, quarters, years), as well as cumulative data since early year.

All data published in the *Monthly Bulletin* is in redenominated levs.

1**Financial Sector**

The information presented in this section covers five major categories:

- (a) monetary survey;
- (b) analytical accounts of the central bank;
- (c) analytical accounts of the banking sector;
- (d) interest rates;
- (e) other financial statistics.

**General
Methodological
Notes of Monetary
and Banking
Statistics**

1. Methodological Conceptions and Rules of Monetary Statistics Organization

Monetary statistics is collected and compiled according to the international statistical standards and covers, to a great extent, the rules of international financial statistics. The most important standards include:

- ✓ European System of Accounts (ESA'95) and System of National Accounts (SNA'93);¹
- ✓ Regulation No. 13 of 22 November 2001 and Money and Banking Statistics Compilation Guide, ECB, 1998;
- ✓ Money and Banking Statistics Sector Manual: Guidance for the Statistical Classification of Customers, ECB, 1998;
- ✓ Monetary and Financial Statistics Manual, IMF, 2000.

Bulgaria is a member of the General Data Dissemination System (GDDS) developed by the IMF. Simultaneously, in the field of monetary and banking statistics requirements of the Special Data Dissemination Standard (SDDS) are also covered and followed.

Main Rules:

- a) Accounting rules – the accounting rules followed by commercial banks and the BNB are presented in the Accountancy Law (November 2001) and International Accounting Standards.²
- b) Reporting rules:
 - ✓ Valuation of assets and liabilities – all financial assets and liabilities are reported at market or close to market price. Financial instruments, however, as currency in circulation, deposits, capital and reserves, cash and credits are reported at nominal value.

¹ European System of Accounts – an international framework of accounts for a systematic and detailed description of the country's economy, its components, as well as its relationships with other economies developed by Eurostat. ESA'95 is fully compatible with SNA'93 (a joint paper of the IMF, UN, OECD, the European Commission and the World Bank). ESA'95 focuses primarily on conditions and data necessary for the EU.

² Unified national accounting standards harmonized with the international standards, valid until end-2002. After that the International Accounting Standards came into effect.

- ✓ Revaluation of foreign currency positions – a daily revaluation of all foreign currency positions is made by applying the exchange rates quoted by the BNB and valid for the day of revaluation.
- ✓ Reporting of credits and provisions – for the purposes of statistics credits are shown on a gross basis until their writing off. Accrued specific provisions by their risk exposure are classified as *Other liabilities*.
- ✓ Definition of the reporting period – the reporting period finishes on the last calendar day or if it coincides with a holiday, on the last business day of the month.

c) Economic territory and residency. The economic territory of the country consists of the geographic territory administrated by the government; within this territory, persons, goods and capital circulate freely. The economic territory includes the airspace, territorial waters, and continental shelf lying in international waters over which the country has executive rights. Also it includes territorial enclaves, i.e. geographic territories situated in the rest of the world and used, under international treaties or agreements between states, by general government agencies of the country (embassies, consulates, military bases, scientific bases, *etc.*), and any free zones.

Residents of the country are defined as institutional units which have center of economic interest³ within the economic territory of the country; their residence is on the same territory and they manage a significant output in which they participate or intend to participate.

Branches of resident banks abroad with a center of economic interest on the territory of another country are treated as nonresidents. Branches of foreign banks licensed to operate in the country are residents and are included in money-creating sector (see *Comparative Sector Table*).

Borderline cases of residency:

- 1) Persons from embassies, consulates, military bases, scientific bases are classified as residents of their native countries (for example bank transactions with foreign embassies are treated as relationships with nonresidents).
- 2) The following are classified as resident units:
 - ✓ Tourists – people who leave the country for a period less than six months due to business or private travels;
 - ✓ Seasonal workers – people who leave the country for several months, but less than six months to work in another country;
 - ✓ Border workers – people who cross the frontier regularly (daily, weekly) to work in neighboring countries;
 - ✓ Crew members of ships, airplanes and other mobile equipment, operating partly or wholly outside the territory of the country;
 - ✓ Bulgarian students in foreign countries, however long they study abroad.
- 3) When land and/or buildings (including villas) are subject to transactions, bank clients are treated as national institutional units, residents of the country, where the property is located, but only in respect of transactions affecting such land or buildings.

The concept of residency is consistent with ESA'95, IMF Balance of Payment Manual, 5th edition, and Bulgarian Foreign Exchange Law.

- d) Sector distribution – ESA'95 standards of sector classification of institutional units are followed. The main sectors by residency include: *Resident Sector* (S.1) and *Rest of the World* (S.2). The Resident Sector is divided into banking sector, general government sector and nongovernment sector. Banking sector covers the BNB (S.121) and commercial banks (S.122);

³ An institutional unit has a center of economic interest within a country when there exists some location – dwellings, place of production or other premises, which the unit engages or intends to engage in economic activities and transactions for a period longer than 6 months (according to ESA'95 the period is a year or more).

general government sector (S.13) consists of three subsectors: central government (S.1311), local government (S.1313) and social security funds (S.1314); *nongovernment sector* includes four subsectors: nonfinancial public corporations (S.11001), nonfinancial private corporations (S.11002+S.11003), nonbank financial institutions (S.123, S.124, S.125), households (S.14). *Nonresident Sector* is divided into banks, governments, and other nonresidents (see *Comparative Sector Table*).

- e) Instrumental categories – in the Monetary Survey and Analytical Reporting, indicators are defined in conformity with the Monetary and Financial Statistics Manual of the IMF, ECB/13/2001 in accordance with ESA'95 and SNA'93. Definitions of most of the instruments are given in the corresponding tables in Specific Methodological Notes.
- f) Foreign currency distribution – all indicators and instruments are in levs and foreign currency.
- g) Maturity structure – for the purposes of statistics financial assets and liabilities are presented according to the original term to maturity (Regulation No. 13 of the ECB and SNA'93).

2. Reporting Units

These are monetary financial institutions residing on the territory of the Republic of Bulgaria. They cover the BNB and commercial banks, including foreign banks' branches registered in the country. Of all commercial banks, 28 are licensed to conduct bank operations in Bulgaria and abroad and six are foreign banks' branches.

According to the EU legislation, the scope of monetary financial institutions is wider and it includes the central bank, credit institutions, money market funds and other institutions covering the definition, i.e. such institutions which collect deposits or their close substitutes from physical and legal persons, other than monetary financial institutions, and grant credits or invest in securities on their own account irrespective of the nature of their business.⁴

3. Nonoperating Banks

A specific feature of the monetary statistics in Bulgaria is reporting of nonoperating commercial banks, which in fact is not included in the official monetary statistics. Data on such banks is shown in separate tables: *Monthly Sectoral Survey of Nonoperating Banks* and *Analytical Reporting of Nonoperating Banks*. The purpose is to get a clear picture of the banking system dynamics, if a bank with a revoked license and under insolvency proceedings is excluded from the scope of the official statistics⁵ and subsequently, if it is excluded from the statistical survey.⁶

4. Basic Framework of Monetary Statistics

Monetary statistics framework includes two levels of data compilation and presentation:

On the first level, all data received from individual reporting units is aggregated in *analytical reporting* containing comprehensive balance sheet data on the BNB and commercial banks. Analytical reporting aims to provide data (classified by residency, sector and instrument) in format suitable for compiling the monetary survey.

⁴ They all are duly reported in a regular list of monetary financial institutions in the eurozone. The ECB publishes this list monthly in the Internet and annually on paper.

⁵ Exclusion of banks from the scope of the official monetary statistics and their inclusion in the group of nonoperating banks: 14 banks in December 1997, one in January 1999, and one in April 2000.

⁶ Exclusion from statistical survey:

a) acquisition of nonoperating banks by operating banks: six banks (July 2000, March 2001, February, August, November and December 2002);

b) acquisition of nonoperating banks' assets by the government represented by the State Receivables Collection Agency or companies outside the banking system: three banks in April, June, and December 2000 and two banks in January and February 2002 acquired by the government; one bank in July 2000 acquired by a company outside the banking system.

On the second level, data from analytical reporting is consolidated into *monetary survey*. Monetary survey is the main form of monetary statistics and contains a lot of important indicators necessary for macroeconomic analysis. It reveals the mechanism of multiplying the monetary base into aggregate money supply serving transactions in the national economy. Its structure is built so as to facilitate the analysis of broad money and its sources. Monetary survey is accompanied by a detailed presentation of the main elements (by sector and instrument).

5. Principles of Data Processing

- ✓ Aggregation – summing up data by balance of all institutional units within a sector or subsector, or of all assets and liabilities in the framework of a particular indicator. For sectors and subsectors, data on financial assets and liabilities is aggregated in instruments (i.e. credits classified by sector of debtor and deposits classified by sector of creditor). Further aggregation is used to combine the instruments into indicators.
- ✓ Consolidation – it refers to elimination of stocks and flows that occur between institutional units, residents of the country, where they are grouped. The institutional units consisting of head office and branches report consolidated data through elimination of claims and obligations between them. (This rule does not apply to consolidation of data between a head office and nonresident branches.) Further consolidation is made in the monetary survey between commercial banks and the BNB.
- ✓ Netting – a general principle set in the international statistical standards is that data should be collected and compiled on a gross basis. Despite this fact, some categories of data in the monetary survey are also presented in net form due to their use for analytical needs. In the monetary survey, the following items are presented in net form: foreign assets, claims on the central government, other items; concurrently, gross claims on and gross liabilities to nonresidents, central government and other unclassified assets and liabilities are shown.

6. Data Processing and Calculation Methods, Breaks in Time Series

Monetary statistics is collected weekly and monthly from all commercial banks and the BNB. According to the standard established in 1995 and valid until the end of 2003, reporting units submit complete trial balances by sector, instrument and currency breakdown of accounts. On the basis of these data analytical reporting of the BNB and commercial banks is compiled. Weekly publication based on complete accounting reports contains more aggregate indicators than monthly publication.

Data is compiled electronically – through BNB's virtual network with the commercial banks (as of 1 March 2002).

Revisions of published data are made in the following cases:

- error in data;
- change in accounting or statistical standard.

Revisions are marked by the sign **R** and an explanatory text. In case of change in the standard, historical data is also revised starting from the moment of occurrence of the event or change in the standard. Revisions are made both in weekly and monthly data. Since the weekly publication precedes monthly publication, revision is announced for the first time in the weekly publication. Preliminary data is usually published in the weekly publication.

Breaks in the time series are marked by the sign **X**.⁷

⁷ A break in the time series occurs in case of a change in the accounting standard of government securities reporting (see *Specific Methodological Notes* – table 1.3.11).

The following signs are also used:

0	–	less than 0.05 but more than nil;
-	–	nil;
R	–	revised data;
P	–	preliminary data.

7. Publications

Weekly and monthly monetary statistics are published.

Weekly publication contains data as of the end of the week (Friday) and is issued one week after the reporting period (until the next Friday). Monthly data is as of the end of the reporting period and is published one month after the reporting period (until the end of the next month). Monthly statistical data is also included in periodical publications of the central bank: annual and semiannual reports of the BNB, monthly bulletins. Publications are available on paper and on the web site of the BNB: www.bnb.bg.

Appendix: Comparative Sector Table

		ESA'95 definitions	
		Sectors in the ESA'95	
		Sectors in the monetary statistics (BG)	S.12 Financial corporations
Money-creating sector	S.121 Central Bank	S.121 Central Bank	The <i>Central bank</i> subsector consists of all financial corporations and quasi-corporations ⁸ whose principal function is to issue currency, to maintain the internal and external stability of the currency and to manage all or part of the international reserves of the country.
	S.122 Commercial banks	S.122 Other monetary financial institutions	The <i>Other monetary financial institutions</i> (MFI) subsector consists of all financial corporations and quasi-corporations (with the exception of those classified under the <i>Central bank</i> subsector) which are basically involved in financial intermediation and whose business is to receive deposits and/or close substitutes of deposits from institutional units other than MFI, and to grant loans and/or invest in securities on their own account.
Money-holding sector	S.123, S.124, S.125 Nonbank financial institutions	S.123 Other financial intermediaries with the exception of insurance corporations and pension funds	The <i>Other financial intermediaries</i> subsector (with the exception of insurance corporations and pension funds) consists of all financial corporations and quasi-corporations which are basically involved in financial intermediation by assuming liabilities in forms other than currency, deposits and/or close substitutes of deposits from institutional units other than MFI, or insurance technical reserves. The subsector also includes leasing and factoring corporations, mutual funds, import/export enterprises, etc.
		S.124 Financial auxiliaries	The <i>Financial auxiliaries</i> subsector (making auxiliary financial operations) consists of all financial corporations and quasi-corporations which are basically involved in auxiliary financial activities, that is activities closely related to financial intermediation but which are not financial intermediaries. These include stock exchanges, exchange bureaux, consultants, brokers, etc.
		S.125 Insurance corporations and pension funds	The <i>Insurance corporations and pension funds</i> subsector consists of all financial corporations and quasi-corporations which are basically involved in financial intermediation, hence pooling of risks.

⁸ Quasi-corporations are not legally independent and maintain a full set of accounts. Nevertheless, they could have economic and financial behavior other than that of their owners and similar to that of corporations. Therefore, they are considered independent in decision-making and are treated as separate institutional units.

	Sectors in the monetary statistics (BG)	Sectors in the ESA '95	ESA '95 definitions
Money-holding sector	S.11001 Nonfinancial public corporations	S.11 Nonfinancial corporations	<p>The <i>Nonfinancial corporations</i> sector consists of institutional units whose distributive and financial transactions are distinct from those of their owners and which are market producers whose subject of activity is production of goods and nonfinancial services.</p> <p>An institutional unit, a corporation, a household or a government unit may control a corporation by owning more than half of voting shares, that is by controlling more than half of shareholders' voting power.</p> <p>For the purposes of the Bulgarian monetary statistics nonfinancial corporations sector is divided into two subsectors – nonfinancial public corporations and nonfinancial private corporations.</p>
	S.11002+S.11003 Nonfinancial private corporations		
	S.14 Households	S.14 Households	<p>The <i>Households</i> sector includes individuals or groups of individuals as consumers and entrepreneurs producing market goods and nonfinancial and financial services (market producers). It also includes individuals or groups of individuals as producers of goods and nonfinancial services, earmarked exclusively for own final use.</p> <p>The sector also includes sole proprietorship and partnership without independent legal status which are market producers.</p>
		S.15 Nonprofit institutions serving households (NPISH)	<p>The <i>Nonprofit institutions serving households</i> sector consists of nonprofit institutions which are separate legal entities serving households. Their major resources, apart from those derived from occasional sales, are derived from voluntary contributions in cash or in kind from households in their capacity as consumers, from payments made by general government⁹ and from property income. The NPISH sector includes: trade unions, political parties, foundations, associations, churches or religious societies, social, cultural and sport clubs.</p> <p>For the purposes of monetary statistics the ECB requires monthly data on NPISH sector together with <i>Households</i> sector.</p>

⁹ Nonprofit institutions controlled and mainly financed by general government are classified under the general government sector.

Money-neutral sector	Sectors in the monetary statistics (BG)	Sectors in the ESA'95	ESA'95 definitions	
Money-neutral sector	S.1311 Central government	S.1311 Central government	The <i>Central government</i> subsector includes all administrative departments of the State and other central agencies whose competence extends normally over the whole economic territory, with the exception of the administration of social security funds. It includes also those nonprofit institutions which are controlled and mainly financed by central government and whose competence extends over the whole economic territory.	
	n.a.		S.1312 State government	The <i>State government</i> subsector consists of all administrative units of the state and other central agencies whose competence extends over the state territory.
	S.1313 Local government		S.1313 Local government	The <i>Local government</i> subsector includes those types of public administration whose competence extends to only a local part of the economic territory, apart from local agencies of social security funds. It includes those nonprofit institutions which are controlled and mainly financed by local government and whose competence is restricted to the economic territory of the local government.
	S.1314 Social security funds		S.1314 Social security funds	The <i>Social security funds</i> subsector includes all central, state and local institutional units whose major activity is to provide social benefits and meet the following two criteria: 1) by law or regulation certain groups of the public are obliged to participate in the scheme or to make contributions; 2) general government is responsible for the management of the institution in respect of the settlement or approval of the contributions and benefits regardless of its role of a supervisory body or employer.
Nonresident sector	S.2 Banks Governments Other	S.21 EU countries S.212 EU institutions S.22 Third countries and international organizations	The <i>Rest of the world</i> sector consists of nonresident units, ¹⁰ insofar as they are involved in transactions with resident institutional units, or have other economic relations with resident units. Its accounts provide an overall view of the economic relationships linking the national economy with the rest of the world. The sector includes such institutional units which are physically located on the territory of the country. The ECB divides the sector into banks and nonbanks and the latter are subdivided into <i>General government and Other</i> . ¹¹	
	S.2 Rest of the World		S.2 Rest of the World	
	S.2 Rest of the World		S.2 Rest of the World	

¹⁰ Including European Union institutions and international organizations.

¹¹ International and supranational institutions are treated as part of the *General government* (e.g. IMF, World Bank, UN, OPEC, OECD, etc.).

Specific Methodological Notes

The monetary statistics is presented in dynamics in a monetary survey, two analytical reporting (of the BNB and commercial banks) and in some additional tables which contain more detailed information. The principle of the organization of all tables is the following: the data is broken down by sector, indicator, national/foreign currency, instrument and maturity, while the indicators on the asset side are grouped by sectors and instruments and on the liability side – by instruments and degree of executables.

Simultaneously monthly sectoral surveys of the BNB and commercial banks are compiled and published. These are static tables presenting the relevant assets and liabilities indicators in a way which allows identification of the sector affiliation of the balance sheets items.

Monetary statistics (dynamic or static) is compiled on the basis of the monthly reporting of the BNB and commercial banks. Information on the non-operating banks is presented in an annex to the monetary survey which has informative purposes only.

Tables 1.3.1. and 1.3.2. Short and Detailed Monetary Survey

The structure of monetary survey may be expressed by the following mathematical identity:

$$\text{net foreign assets} + \text{net domestic assets} = \text{broad money}$$

Net domestic assets include domestic credit, capital and reserves (with a reverse sign) and other items (net).

Indicators

Net foreign assets – a balance between gross foreign assets and liabilities of the banking sector. Gross foreign assets are reported by instrument and include Bulgaria's international forex reserves and other foreign assets of the BNB and commercial banks. Gross foreign liabilities reflect liabilities of the BNB and commercial banks to the foreign sector. A split of gross foreign assets and liabilities is made in the Foreign Assets and Liabilities table.

Domestic credit – incorporates credit to the consolidated general government sector and nongovernment sector.

Credit to the consolidated general government sector includes net claims on the central government and gross claims on local government, and social security funds. Credit to the nongovernment sector includes gross claims on nonfinancial public enterprises, private enterprises, households and nonbank financial institutions.

Capital and reserves – include shareholder capital of the banking system; reserve funds and banks' financial result.

Other items (net) – consolidates all components of the balance sheets of the BNB and commercial banks which are not included in the instruments displayed above. They include interbank relations (net), other unclassified assets¹² and liabilities (net) and relations between the BNB and commercial banks (net). The balance on the Relations between the BNB and Commercial Banks (net) item reflects the float as a result of netting the asset items – Claims on Commercial Banks (analytical reporting of the BNB) and Reserves (analytical reporting of commercial banks) by the liability items – Reserve Money, subitem Deposits of Commercial Banks (analytical reporting of the BNB) and Liabilities to the BNB (analytical reporting of commercial banks). Reserves item, Cash subitem is subtracted from the upper result.

Broad money (money supply) comprises liabilities with money character of banks to the resident sector with the exception of the liabilities to the central government¹³ and the banking sector. Monetary aggregate instruments are grouped by liquidity and are presented by currency and sector.

¹² Fixed assets also included.

¹³ Excluding suspense accounts of the central government included in M3.

The following monetary aggregates are used: M1, M2, and M3. The M1 monetary aggregate, commonly referred to as narrow money, includes the most liquid instruments used in settlements (currency outside banks and demand deposits in national currency). The M2 monetary aggregate comprises quasi-money and the M1 monetary aggregate. Quasi-money comprises time deposits, savings deposits in levs, and foreign currency deposits. The least liquid financial instruments include debt securities issued, credits received and restricted deposits. They are denominated in national and foreign currencies and together with M2 form the broadest monetary aggregate, M3, commonly referred to as money supply (broad money).

Types of Instruments Grouped within the Indicators

Short methodological notes (definitions) to those indicators in the monetary survey, which are not presented in a separate table, are given below.

Assets side:

1. *Credits* – see table 1.3.10.
2. *Securities other than shares* – includes securities other than shares and other equity which give the holder the unconditional right to fixed income or contractually determined income in the form of coupon payments and/or stated fixed sum at a stated date or dates starting from the issue date till the date set as maturity/redemption date. These securities do not grant the holder any ownership rights and interest over the issuing company. Also included are instruments with the same characteristics but with options for conversion into shares or other forms of ownership. The *Securities other than shares* indicator covers various types of bonds and other debt securities of bond nature, regardless of the intention for their acquisition and the period of holding. The intention of acquisition involves holding securities to maturity, securities for trade, and securities put up for sale. This indicator includes marketable and high-liquid instruments, i.e. money market instruments of the nongovernment sector held by commercial banks, with an original maturity of up to one year, freely transferable and marketable. The indicator includes discount bills and bills accepted by CBs as well as other commercial paper used by bankers as a form of short-term investment. Also included in the Nonfinancial Public Enterprises sector are compensatory instruments held by CBs.¹⁴
3. *Shares and other equity* – holdings of securities which represent property rights in corporations. These securities generally entitle the holders to a share in the profit of corporations and to a share in their own funds in the event of liquidation.

Liability side:

1. *Currency outside banks* is currency into circulation less commercial banks' vault cash.
2. *Deposits* comprise the monetary resources of the government sector, enterprises and households with the BNB and the commercial banks. These are liabilities of the financial institution.
 - ✓ *Demand deposits* include all deposits immediately convertible into currency or transferable on demand through banker's order or by cheque without significant restrictions or penalties.
 - ✓ *Time deposits* are not immediately available as they have a fixed term or advance notice. These deposits cannot be used in settlements and are not convertible into currency without any significant restrictions or penalties.

¹⁴ Compensatory instruments include compensatory bills and housing compensatory bills issued under the Law on Compensation of the Owners of Nationalized Properties and registered compensatory bills issued under the Law on the Restitution of Ownership and the Use of Agricultural Lands. These instruments are issued by the government and are freely transferable. Pursuant to the Law on Public Offering of Securities, these are referred to as securities.

- ✓ *Savings deposits* are used for safekeeping of funds against issuance of a personal savings book or analogous document. These include lending for house purchase, children's deposits and other deposits.
- ✓ *Restricted deposits* are those for which withdrawals are restricted on the basis of legal, regulatory, commercial or other requirements.

Debt securities issued include securities other than shares and other equity issued by CBs, generally traded in the secondary market, that do not grant the holder any ownership rights over the issuing bank. Nonmarketable instruments issued (which have not been initially placed through a stock exchange or other official marketplace) and subsequently becoming marketable also belong to this item.

Received *credits* represent borrowed funds against a stated price (interest).

Tables 1.3.3 and 1.3.4. Analytical Reporting of the BNB and Commercial Banks

The tables are intended to display data in format convenient to compile the monetary survey. Data on analytical reporting is obtained from the BNB and individual commercial banks, and is classified by residency, sector and instrument.

Indicators

Assets of all sectors are broken down by sectors which are presented by the following major indicators: cash, deposits, credits, securities other than shares, shares and other equity, fixed assets, other assets. In liabilities side, the indicators included in the money supply (M1, M2 and M3) are presented separately and each of them is additionally displayed by sector. Sectors which take part in forming the sources of money supply (foreign liabilities, central government and liabilities to the BNB) are displayed separately, broken down by instruments. All asset and liability indicators which have foreign currency component are additionally shown in levs and in foreign currency.

Table 1.3.5. Monetary Base (Reserve Money) and Money Supply Mechanism

Money supply is based on commercial bank monetary base (currency outside banks and bank reserves) multiplication. Money supply is determined by using M1, M2 and M3 monetary aggregates.

Monetary base (reserve money) consists of currency outside banks and commercial bank funds (bank reserves). The latter include commercial bank deposits with the BNB and cash in commercial bank vaults. Commercial bank deposits include minimum required reserves and excess reserves (demand, time and restricted deposits). Dynamics of reserves depends on the amount of required reserves (comprising a set portion of deposits) and excess reserves. The amount of required reserves is set by the Managing Board of the BNB and is the only instrument of the central bank monetary policy under a currency board. Upon currency board introduction minimum required reserves accounted for 11% and as of July 2000 they were reduced to 8%. The amounts of excess reserves reflect the liquidity of commercial banks and the trend toward greater security. The monetary base is compiled by the BNB report (including the part of CBs deposits) and CBs report (including the part of CBs vaults).

Money Supply Mechanism

Money supply (M3) may be expressed as a product of monetary base and the *money multiplier* variable.

Money multiplier characterizes the degree of multiplication effect as a result of commercial bank activity. This effect is measured by the ratios of broad money (M3) or individual monetary aggregates (M1 and M2) to reserve money. The money multiplier reflects the currency outside banks to deposits¹⁵ ratio and

¹⁵ Debt securities issued and received credits are included.

the bank reserves to deposits ratio, known as factors in determining money supply. The currency outside banks to deposits ratio depends primarily on the public behavior, while the bank reserves to deposits ratio reflects commercial bank behavior.

Sources of Reserve Money

Under a stable money multiplier, total money supply may be influenced through reserve money sources.

BNB net foreign assets reflect a proportional increase/decrease in Bulgaria's forex reserves. Under a currency board changes in forex reserves at the expense of government deposit do not directly affect the monetary base and it is automatically sterilized.

Claims on central government (net) – the net position of the government is a result of assets netting (balances on lev loans disbursed prior to June 1997 pursuant to the former Law on the BNB and balances on forex loans under Article 45 of the Law on the BNB) its liabilities, excluding the suspense accounts which are component of the money supply).

Claims on commercial banks – the balance sheet reports balances on loans extended prior to June 1997 and unpaid interest on these loans.¹⁶

Other items (net) – besides assets and liabilities, which are not classified to any other item, Other items (net) includes also commemorative coins, nonmonetary gold and other precious metals as well as claims on nonfinancial state enterprises in the assets side and depreciation and provisions in the liabilities side.

Tables 1.3.6 and 1.3.7. Foreign Assets and Liabilities of the BNB and CBs

The tables display claims and liabilities of the banking sector to nonresidents forming the positions of foreign assets and liabilities. The first table reflects BNB relations with *nonresidents* and the second, *commercial banks'* relations with *nonresidents*. The information is classified by nonresident sector, financial indicator and currency.

Instruments

BNB Foreign Assets

Central bank's foreign claims are divided into two groups according to their liquidity – international reserves and other foreign assets:

1. *International foreign exchange reserves* include the most liquid foreign assets. Under a currency board (introduced on 1 July 1997) international foreign exchange reserves shall be equal to the assets of the Issue Department included in the BNB consolidated balance sheet (described in Article 28, para. 3 of the Law on the BNB).

International forex reserves are divided into two sectors (nonresident banks and governments) including the following indicators:

- ✓ Cash – banknotes and coins held in freely convertible foreign currency;
- ✓ Deposits – funds in freely convertible currency held by the BNB on accounts with foreign central banks graded by degree of liquidity (demand and time);
- ✓ Securities other than shares – debt instruments held by the BNB, issued by nonresident banks, financial institutions and governments, whereof liabilities are assigned one of the two highest ratings by two internationally recognized credit rating agencies, and which are payable in freely convertible currencies with the exception of debt instruments given or received as collateral;

¹⁶ Article 33. (1) The Bulgarian National Bank may not extend credits to banks, except in the cases under para. 2. (2) Upon emergence of a liquidity risk that may affect the stability of the banking system, the Bulgarian National Bank may extend to a solvent bank lev-denominated credits with maturity no longer than three months, provided they are fully collateralized by gold, foreign currency or other such high-liquid assets.

- ✓ Reserve position in the IMF – Bulgaria’s unconditional right to draw funds from the IMF. This indicator reflects the payment of forex component in Bulgaria’s quota and indicates the balance between the quota and the cash of IMF in national currency;¹⁷
 - ✓ Special Drawing Rights¹⁸ held by the BNB (SDR);
 - ✓ Gold consisting of gold bullion in standard form (monetary gold) and monetary gold deposited with foreign banks. Pursuant to Article 28, para. 3, item 6 of the Law on the BNB, the stock of monetary gold is valued at DEM 500 per troy ounce, or at market value if lower;
 - ✓ Other international reserves include claims on interest accrued and overdue interest.
2. *Other foreign assets* include less liquid claims on nonresidents which after the introduction of the currency board are reported as part of assets of the Banking Department. This position is also divided into two sectors (nonresident governments and other nonresidents) and includes the following instruments:
- ✓ Securities other than shares – debt securities which are not included in international reserves;
 - ✓ Shares and other equity – capital investment in international financial institutions (e.g. BIS, Basel);
 - ✓ Other – include claims on interest accrued on investments which are not included in the international reserves and other unclassified assets.

Foreign Liabilities of the BNB

Foreign liabilities of the BNB reflect central bank’s liabilities to the nonresident sector grouped into three subsectors – nonresident banks, governments and other nonresidents. Following the introduction of the currency board, foreign liabilities are comprised only of Bulgaria’s liabilities to the IMF and include the following instruments:

- ✓ credits – interest-bearing loans with a fixed term received from IMF common funds;
- ✓ other – this item includes IMF settlements on account No. 1 denominated in levs and interest payable to the IMF.

Foreign Assets and Liabilities of Commercial Banks

Foreign assets are classified into three sectors – nonresident banks, nonresident governments and other nonresidents. Foreign liabilities are divided into two sectors – nonresident banks and other nonresidents. All instruments used also for resident sectors are included: cash, deposits, credits, securities other than shares (in liabilities side – debt securities issued), other. *Nonresident banks* include also the relations between the commercial banks’ head offices and branches abroad by corresponding instrument. The *Other* item includes: i) interest and settlements with other foreign banks; ii) intrabank relations between resident banks and their head offices or branches, with these relations being unconsolidated due to the principle of residency (see General Methodological Notes, ‘economic territory and residency’).

Tables 1.3.8 and 1.3.9. Liabilities to the General Government Sector

The tables reflect deposits and other liabilities of monetary financial institutions to the general government sector. The general government sector includes the following subsectors: central government, local governments and social security funds (see Appendix: *Comparative Sector Table*). The tables present BNB and commercial bank liabilities to the general government sector.

¹⁷ Reserve position can be raised to the amount of funds in national currency used by the IMF in transactions with other member countries.

¹⁸ Special Drawing Rights are reserve assets established by the IMF in addition to existing reserve assets. The value of SDR is set on the basis of a basket of reference currencies (euro, British pound, US dollar, Japanese yen).

Types

Deposits are formed by funds on budget, extrabudgetary and suspense accounts of the three subsectors, as well as state funds. Deposits of individual subsectors are reported by liquidity (demand, time and restricted) and currency.

The *Other liabilities* indicator includes the relations between the BNB and commercial banks with government entities in respect of arisen interim liabilities and settlements.

Specific Features of Reporting

The central government sector is considered a money-neutral sector and its deposits are beyond the scope of monetary aggregates. There is only one exception: deposit liabilities of monetary nature¹⁹ are included in money supply. *Social security funds* and *local governments* are reported under the *money-holding sector* and included in the scope of monetary aggregates according to their liquidity degree.

Table 1.3.10. Credits to the Nongovernment Sector

This table is intended to reveal information on credits (their residual value) by type, currency and sector. Credits are reported under the *Claims on nongovernment sector* item in the monetary survey and analytical reporting. Credit definition conforms with those provided by international standards. Credits are financial assets providing funds, commodities and services to borrowers. Credit conditions (set by the creditor or agreed upon) are usually finalized in a non-transferable document. A loan is an unconditional debt payable upon maturity and bearing income in the form of interest. Credits to the nongovernment sector are extended only by commercial banks, as after the introduction of the currency board in 1997 the BNB may not extend loans to this sector.²⁰

Types of Credits

1. By maturity

- ✓ Short-term credits – credits with an original maturity of one year or less. Short-term credits, overdraft and overdue short-term credits are reported in this category.
- ✓ Long-term credits – credits with an original maturity exceeding one year, including overdue long-term credits.

2. By quality

- ✓ Standard credits – credits contracted and regularly serviced by customers in accordance with the terms of the credit agreement.
- ✓ Overdue credits – due credits on which payments have not been made or which have not been written off. This includes credits with past-due payment or credits collectible on violation of other contractual terms. The bulk of overdue credits are *Legal claims on credits*, including loans recoverable by law as well as already adjudged but unpaid claims in favor of banks. (Subject to reporting are only *legal claims on credits* which represent balance sheet assets.)

3. By use

- ✓ Consumer credits – these are credits extended to households. Consumer credits are used to buy goods and services for personal use by households.
- ✓ Lending for house purchase – these are credits made to households against security (mortgage, guarantee, *etc.*) to finance real estate con-

¹⁹ Including the so-called *central government* sector suspense accounts used for keeping funds under particular conditions which are received from other persons or raised in favor of other persons (nonbudget organizations). They include guarantees from customs administration, legal system, *etc.*; temporary deposits of other persons for participation in tenders, auctions, *etc.*

²⁰ Article 56, item 1 of the Law on the BNB: 'Except in the cases provided for by this Law, the Bulgarian National Bank may not: 1. extend credits or buy securities or any other negotiable instruments.'

struction or purchase of homes. Also included are credits for home improvements.

4. *By manner of disbursement*

- ✓ Overdraft – overdrafts are credits made by banks when funds on customer current accounts are insufficient to meet ordered payments. Payment is automatic upon receipt of funds on current accounts. Included are both overdrafts with pre-agreed interest terms and amounts and without pre-agreed terms.
- ✓ Credits (see item 1).

Table 1.3.11. Holdings of Debt Securities Issued by Central Government

This table is designed to report commercial bank claims on debt securities issued by the central government. Securities are classified by currency (national and foreign), type and by original term to maturity.

Types of Instruments

This indicator includes government securities. They are stated by type and include: short-term securities issued under Regulation No. 5 (treasury bills); medium- and long-term securities issued under Regulation No. 5, eurobonds and Brady bonds²¹ and other bonds: issued under ZUNK,²² CMDs²³ and the Law on State Protection of Deposits and Accounts with Commercial Banks.²⁴

Specific Features of Reporting

The initial valuation of government securities is at acquisition price and subsequent valuations are by category in compliance with international accounting standards. (By end-1998, banks had reported government securities at nominal value.)

Tables 1.3.12 and 1.3.13. Memoranda to the Analytical Reporting of the BNB and CBs

Memoranda show accrued interest and interest arrears on claims and liabilities. All adjusting balance sheet items employed in accounting practices (i.e. depreciation and specific provisions) are disclosed and stated in the *Other liabilities* item in the monetary survey insofar as all financial assets and liabilities data should be aggregated and reported on a gross basis for statistical purposes (see *General Methodological Notes*). For the purposes of the monetary statistics accrued interest is incorporated into the outstanding amounts of the instruments, for these included in the money supply and in *Other claims/liabilities (broken down by sectors)* – for all other. Data on accrued interest and allocated specific provisions is presented by sector of counterpart (see Appendix: *Comparative Sector Table*).

Data in the table is as of December 2001 since when there is available information.

Description of Items

Accrued interest is interest receivable/payable accrued that has not matured, recorded on a current accrual basis.²⁵

Interest arrears are interest accrued that has not been collected at maturity. Subject to reporting are only balance sheet reported items.

According to the effective legislation in Bulgaria, *specific provisions for impairment loss* decrease the value of balance sheet assets and represent items of

²¹ Brady bonds issued by the MF in US dollars for foreign debt reduction by replacing creditor bank claims with a number of different types of claims. There are three types of Brady bonds: 1) front-loaded interest reduction bonds, FLIRBs, maturing in 2012, which are convertible and contain a buyback option, 2) discount bonds, DISCs, maturing in 2024, and 3) interest arrears bonds, IABs, maturing in 2011.

²² ZUNK – bonds issued by the MF, targeted at banks holding in their assets nonperforming credits of state-owned enterprises to banks. BGN-denominated and USD-denominated bonds have been issued, with floating coupon payments.

²³ Bonds of specific purpose have been issued pursuant to Council of Ministers Decrees.

²⁴ Guaranty government securities issued under the Law on State Protection of Deposits and Accounts with Commercial Banks in respect whereof the BNB has instituted bankruptcy proceedings. The MF issues these bonds to assume the debt of closed banks to their depositors. The issues are denominated in BGN and USD.

²⁵ Pursuant to Article 4, para. 1 of the Accountancy Law.

accounting expense.²⁶ For statistical purposes, assets subject to provisioning are stated on a gross basis and the allocated specific provisions are included in the *Other liabilities* item. In addition, banks allocate specific provisions on contingent liabilities reported as off-balance sheet items. (These are not segregated by sector, as they are not subject to statistical reporting.)

Depreciation represents kind of adjustment to depreciable long-term tangible and intangible assets. In the published information, long-term assets are reported on a gross basis and accrued depreciation is recorded in the *Other liabilities* item.

Tables 1.4.1 – 1.4.4. Monthly Sectoral Survey (MSS) of the BNB and CBs

MSSs are tables showing gross claims and liabilities of CBs as a whole and of the BNB to identify asset and liability balance sheet items by sector, as represented by respective indicators. Tables are static and contain information on end-of-month balances. Presented data is in compliance with the main principles of sectoral classification and aggregation of instruments into indicators.

1. Sectoral classification – the main principles set out in ESA'95 have been complied with. All items that are not classified by sector as well as banks' own claims and liabilities are reported in a separate column as not allocated. Depreciation and specific provisions, which are reported in column Not allocated are represented in tables 1.3.12 and 1.3.13: Memoranda to the Analytical Reporting of the BNB and CBs.
2. Financial indicators – the scope and content of the indicators are described underneath respective tables. In terms of items, they are identical to monetary survey items and analytical reporting. For the purposes of the monetary statistics accrued interest and interest arrears, which are not included in the money supply, are reported as *Other assets/liabilities* (by sector). Accrued interest and interest arrears are incorporated in the relevant instruments, for these included in the money supply. Data on the interest is represented in tables 1.3.12 and 1.3.13: Memoranda to the Analytical Reporting of the BNB and CBs.

Specific Features of Monthly Sectoral Survey of the BNB

For the purposes of the table, BNB foreign claims are grouped by sector and simultaneously foreign assets, included in international reserves, and other foreign assets of the central bank are presented together. Cash in foreign currency, Special Drawing Rights and monetary gold are represented in column Not allocated. Foreign assets grouped according to their liquidity as international reserves or other foreign assets are represented in table 1.3.6: BNB Foreign Assets and Liabilities. Settlements of the central bank with international institutions are part of not allocated other assets/not allocated other liabilities in the table. They are not part of the own foreign assets/liabilities of the central bank.

Tables 1.5.1 – 1.5.3. Monthly Sectoral Survey and Analytical Reporting of Nonoperating Banks

An appendix is created to the monthly monetary survey, *Monthly Sectoral Survey of Nonoperating Banks*, designed to inform without being part of the official monetary statistics.

The monthly sectoral survey reflects the current state of the group of nonoperating banks (four in number as of December 2002). The structure and principles of preparation correspond to the Monthly Sectoral Survey of operating banks. Maturity and liquidity are excluded from these indicators, given the specifics of these banks.

²⁶ Pursuant to BNB Regulation No. 9 on the Evaluation and Classification of Risk Exposures of Banks and the Allocation of Provisions for Impairment Loss, 2003.

Analytical reporting of nonoperating banks (table 1.5.3) is presented. Data in the tables will serve as bridges to the earlier reports including these banks.

Specific Features

The bankruptcy proceedings for the first group of banks began in 1996. At that time the operative law provided protection for some deposits and the Ministry of Finance assumed these banks' liabilities to depositors. This way the banks' debts to depositors were transformed into a debt of the government. For this debt the government issued guarantee securities denominated in BGN and USD in favor of the banks that had taken its service. The banks' liabilities to the government are presented as liabilities of the government sector.

In 1998 the legal framework was changed in order to set up the Deposit Insurance Fund and this Fund assumed the debts and subrogated the depositors' rights to the banks up to the guaranteed amounts.

Interest Rate Statistics

The *base interest rate* is the effective interest rate at end of month based on the average annual yield attained at three-month government securities primary auctions.

Interest rate statistics includes summarized data on interest rate levels of banks, except those in liquidation. Interest rates are averaged on a weekly basis for a month.

Short-term interest rates cover maturities from one day up to twelve months, and long-term interest rates maturities over twelve months.

Interest rates on credits and deposits are the average weighted rates of three sectors: state-owned companies, private enterprises and the public.

Interest rates on *credits* reflect interest rates on newly negotiated lev and foreign currency loans during the corresponding month.

Annual compounding of the base interest rate is made on a quarterly basis, that of credits on a monthly basis, and that of deposits by maturity.

Yield of government securities is computed as the average weighted yield of all issues during the calendar month in actual amount.

Real interest rate levels on lev credits and deposits are based on the average interest rates during the month deflated by the monthly inflation rate reported for the same period.

2

External Sector

Information on the external sector includes four major categories:

- (a) balance of payments;
- (b) trade in goods;
- (c) debt indicators;
- (d) exchange rates.

Balance of Payments

The Bulgarian National Bank is in charge of the compilation of Bulgaria's balance of payments. The legal framework of the balance of payments compilation in Bulgaria is provided for in Article 42 of the Law on the Bulgarian National Bank (published in the State Gazette, issue 46 of 10 June 1997). Data for the purposes of the BOP compilation is collected on the basis of Article 42 of the Law on the Bulgarian National Bank as well as pursuant to Article 8, para. 2 of the Foreign Exchange Law (published in the State Gazette, issue 83 of 21 September 1999). The data is processed by the Balance of Payments and External Debt Division within the BNB Statistics Directorate keeping its confidentiality. At present, the Bulgarian National Bank compiles and publishes analytical presentation as well as standard presentation of the balance of payments in ac-

cordance with the Fifth Edition of the *Balance of Payments Manual* (IMF, 1993) and the *Balance of Payments Textbook* (IMF, 1996).

The balance of payments' methodology is conceptually related to that of the *System of National Accounts* (SNA). The items of the balance of payments correspond closely to the relevant categories of the *Rest of the World* account in the SNA.

There is a close relationship between the *International Investment Position* and the balance of payments as well. The BOP financial account reveals economy's transactions in external financial assets and liabilities which affect the amount of external financial assets and liabilities reported under the international investment position.

I. Accounting Principles and Conventions

The basic convention applied in constituting Bulgaria's balance of payments is the implementation of the *double entry system*. **Credit, with a positive sign**, includes: exports of goods and services, income receivable, offsets to unrequited real and financial resources received (transfers), increases in financial liabilities, decreases in financial assets. **Debit, with a negative sign**, includes: imports of goods and services, income payable, offsets to unrequited real and financial resources provided, increases in financial assets, decreases in financial liabilities.

The *time of recording* the balance of payments transactions is the time of the change in ownership.

Transaction valuations are based on market prices. If the actual market prices are not available, the average market prices are used as approximation.

Valuation changes in Bulgaria's external assets and liabilities are not included in the balance of payments.

The unit of account for the balance of payments of Bulgaria is the US dollar. The conversion into the unit of account is based on the exchange rate at the time of transaction. If not available, or inapplicable due to other practical reasons, the average exchange rate for the reporting period is used.

II. Balance of Payments Components

The balance of payments components are compiled using basically the *International Transactions Reporting System* (ITRS), which includes (i) commercial banks' reports, and (ii) reports of enterprises which have bank accounts opened abroad (pertaining to the residents' international transactions). These reports cover all components of the balance of payments table. In addition, the data on individual BOP components collected *via* ITRS is substituted by data from other sources: (i) direct investment enterprise survey, (ii) administrative records, (iii) reports by enterprises which have received foreign financial loans, and (iiii) reports by enterprises having borrowed from foreign creditors (other than financial loans).

In the analytical presentation, the balance of payments components are classified in the following major categories:

A. Current Account

The *current account* comprises the acquisition and provision of *goods and services, income, and current transfers* between Bulgaria and the rest of the world. The flows recorded on the credit side represent that part of the gross domestic product, which is provided to the rest of the world (exports of goods and services), as well as the provision of factors of production expressed by income received or receivable – compensation of employees, and investment income (interest, dividends, *etc.*). Offsets to unrequited real and financial resources received (transfers) are also recorded.

The flows on the debit side represent the gross product created in the rest of the world and acquired by the national economy (imports of goods and services), as well as the acquisition of factors of production expressed by income paid or payable. Offsets to unrequited real and financial resources provided are

also recorded.

- The *Goods* component of the BOP current account covers movable goods for which changes in ownership between residents and nonresidents occurred. Data on imports and exports FOB (free on board) is based on customs declarations, as the codes used are in compliance with the Harmonized System for Description and Coding of Commodities of the World Customs Organization, introduced in 1988 and supplemented in 1992.

Data sources: Customs Agency and Information Services AD (the Information Computing Center Directorate). The Bulgarian National Bank and the National Statistical Institute receive exports and imports data, supplement it and further process it.

In accordance with the common methodology, the BNB and the NSI coordinate the data before publishing it. The data is published eight weeks after the expiry of the reporting period. Due to the existing system for processing of customs data, outside the BNB and the National Statistical Institute, the preliminary foreign trade data is subject to frequent revisions.

- The *Services* component comprises *transportation, travel, and other services*.

The Bulgarian National Bank derives the data on *freight transportation* from foreign trade data and the data on *passenger transportation* from travel data on the basis of estimates. The Bank is currently working on a project for a new methodology for estimation of the receipts and expenditures from transportation services.

Travel covers goods and services, including those related to health and education, acquired by travellers for business and personal purposes. The data on travel is based on data from the Ministry of Internal Affairs on the number of travellers crossing the borders and on estimates of *per capita* expenditures, the latter based on the methodology for estimation of the receipts and expenditures from travel services – *Methodology For Estimation of the Receipts and Expenditures from Travel in the Bulgarian Balance of Payments* (the Bulgarian National Bank, Ministry of Trade and Tourism, 18 November 1999). Therefore, the data for the 1995 – 1999 period on the *Travel* item was revised.

Other Services item covers receipts and payments related to services other than transportation and travel (communication, construction, financial, leasing, insurance, cultural, sport and recreational services, etc.).

The *major sources* of information on this item are the commercial banks' reports and the reports of enterprises having accounts abroad.

- *Income* consists of two categories: (i) *compensation of employees*, and (ii) *investment income*. *Compensation of Employees* covers wages, salaries and other benefits paid to nonresident workers in Bulgaria or received by resident workers abroad. *Investment Income* covers receipts and payments of income associated with external financial assets and liabilities. Receipts and payments on direct investment, portfolio investment, other investment, and receipts on reserve assets are also included.

The *major sources* of information on the *Income* component are the commercial banks' reports and the reports of enterprises, the Ministry of Finance, and the Bulgarian National Bank.

- *Transfers* are all real resources and financial items provided without a *quid-pro-quo* from one economy to another. *Current Transfers* directly affect the level of disposable income of an economy, and the consumption of goods and services. That is, current transfers reduce the income and consumption potential of the donor and increase the income and consumption potential of the recipient. Gifts, grants, inheritances, prizes won from lotteries, pensions, current taxes, social security contributions, etc. are included in the *Current Transfers*.

Sources: The Bulgarian National Bank obtains information on current transfers from the Bulgarian Red Cross, the Agency for Foreign Aid, and from the monthly commercial banks' reports.

B. Capital Account

The *Capital Account* consists of two categories: (i) *capital transfers*, and (ii) *acquisition or disposal of intangible, nonfinancial assets*. If in kind, a capital transfer consists of (i) a transfer of ownership of fixed assets, or (ii) forgiveness of a liability by a creditor when no counterpart is received in return. If in cash, a transfer is *capital* when it is linked to, or conditional on, the acquisition or disposal of fixed assets (for example, an investment grant).

C. Financial Account

The *Financial Account* comprises all transactions (actual and imputed) in the external financial assets and liabilities of an economy. The external assets and liabilities are primarily classified according to the type of investment. The *Financial Account* includes (i) *direct investment*, (ii) *portfolio investment*, and (iii) *other investment*.

- *Direct Investment* is a category of international investment in which a resident of one economy, a direct investor, acquires a long-term interest (at least 10% of the ordinary shares or the voting power) in a resident enterprise of another economy, a direct investment enterprise. Direct investment includes both the initial transaction, through which the relationship between the direct investor and the direct investment enterprise is established, and all subsequent transactions between them. Direct investment involves transactions associated with changes in the direct investor's share in the equity of the direct investment enterprise, intercompany debt transactions, as well as the share of the direct investor in the undistributed earnings/loss of the direct investment enterprise. Direct investment abroad is reported as assets, and direct investment in the reporting country as liabilities.

Sources: The Bulgarian National Bank receives monthly data on direct investments in Bulgaria from the Privatization Agency, the Central Depository and from commercial banks' reports; quarterly data is obtained from the Insurance Supervision Directorate at the Ministry of Finance, the reports for intercompany debt transactions and the NSI statistical survey carried out among nonfinancial sector enterprise; annual data is obtained from commercial banks' annual financial statements (balance sheet and income statement). The Bulgarian National Bank receives monthly data on direct investments abroad from commercial banks' reports, and annual data from the survey carried out by the BNB among direct investment enterprises in the country. Given the various periodicity of data reporting by individual sources of information on direct investments, the data on this item is subject to periodical revisions.

- *Portfolio Investment* includes transactions in shares and equity if the investor's share in the equity/shareholder capital is less than 10%, transactions in bonds, notes, money market and other tradable securities and transactions in financial derivatives.

The *major source* of information on the liabilities side of the *Portfolio Investment* is the data provided by the Ministry of Finance, the Bulgarian National Bank, commercial banks, enterprises holding bank accounts abroad, and the Central Depository.

Data on the assets side of the *Portfolio Investment* is provided by enterprises holding bank accounts abroad, commercial banks, the Bulgarian National Bank and the Ministry of Finance.

- *Other Investment* includes trade credits, loans, currency and deposits, and other assets and liabilities.

According to the balance of payments conventions, trade credit arises from the direct extension of credit from a supplier to a buyer, i.e. this is a credit extended by a trade partner without issue of tradable securities.

Information on transactions related to trade credits up to 1999 (inclusive) had been provided by the monthly reports of enterprises which had bank accounts abroad, as well as by the BNB semiannual survey of Bulgaria's enter-

prises with direct foreign investments (the survey is intended to collect information on all transactions with nonresidents, and not only those with the direct investor).

Information on trade credits is provided mainly by the quarterly reports of enterprises on their liabilities to nonresidents.

The *Loans* item includes received and paid principals on short- and long-term loans between residents and nonresidents on loans for which no tradable securities are issued. Transactions concerning disbursements and repayments of principals on IMF loans and disbursements on loans on BOP support are not included in the *Loans* item. They are recorded under the corresponding items of the *E. Reserves and Related Items group*.

Data on the liability side of the *Loans* item is received by the Ministry of Finance, the Bulgarian National Bank, commercial banks and directly by the enterprises that have drawn loans from abroad. As the latter provide reports on a quarterly basis to the BNB, the monthly data on the *Loans, Other Sectors* item (liabilities side) is revised quarterly.

The *Currency and Deposits* component shows the changes in the residents' currency and deposits held abroad on the assets side, and the changes in the liabilities of the resident commercial banks to nonresidents in national and foreign currency on the liabilities side. Following the basic accounting principle and conventions set in the *Balance of Payments Manual* (IMF, 1993), when compiling this item, the Bulgarian National Bank excludes any changes therein due to exchange rate changes.

The *Other Forex Deposits* component (subitem of *Other Investment, Assets*) shows changes in the foreign exchange deposits held by the public and private enterprises with domestic commercial banks. Increases in deposits of the public and private enterprises are recorded with a positive sign, and decreases with a negative sign. Due to improved methodology for the balance of payments compilation, the *Other Forex Deposits* component will be excluded from the balance of payments table upon publishing the January 2003 data. Data for preceding periods will be revised.

The *Other Assets* and *Other Liabilities* items include all transactions on miscellaneous accounts receivable and payable not included elsewhere and transactions in arrears.

D. Net Errors and Omissions

The *Net Errors and Omissions* component is an offsetting item. This component exists in the BOP presentation as the data collection system used by the Bulgarian National Bank is not a closed one but a combination of various sources of information. Unlike other statistical reports, e.g. monetary statistics, data collection required for the balance of payments compilation could not be limited to the financial statements of commercial banks as the only source of information.

The fluctuations in the *Net Errors and Omissions*, both in sign and in size, are mainly due to: (i) revisions of export and import data, (ii) the improvement of the methodology for compiling individual balance of payments' components, and (iii) the existence of objective obstacles to collecting data on particular balance of payments' items.

E. Reserves and Related Items

- *Reserve Assets* include the external assets available to and controlled by the central bank (government) for direct financing of balance of payments imbalances. The reserve assets comprise monetary gold, SDRs, reserve position in the International Monetary Fund, foreign exchange assets (including currency and deposits, and securities), and other claims. The entries under this category pertain to transactions on BNB external holdings which are administered by the Issue Department. Data on reserve assets changes included in the BOP table excludes valuation adjustments, due to exchange rate fluctuations.

In the analytical presentation of the balance of payments this group includes also the *Use of Fund Credit* and the *Exceptional Financing* items. The exceptional financing comprises the BOP support as well as deferred/rescheduled payments and payments on arrears, associated with balance of payments difficulties. In accordance with the methodology for accounting exceptional financing transactions (*Balance of Payments Manual*, Fifth Edition (IMF, 1993), p. 454), the principal repayments on the BOP support credits are included in the *Financial Account – Other Investment – Liabilities – Loans – General Government*.

III. Periodicity, Frequency and Timeliness of the Balance of Payments Publications

The Bulgarian National Bank compiles and publishes the balance of payments of the Republic of Bulgaria on a monthly basis. In accordance with its schedule, the Bulgarian National Bank publishes the balance of payments data within eight weeks after the close of the reference period.

IV. Data Revision Policy

Revisions to published BOP estimates are typical of many balance of payments compilation systems. With the revision publication, the users are duly informed about the revised data on the corresponding items. The data revision policy pursued by the Bulgarian National Bank is based on the following principles:

(i) As for the most frequent data, each monthly publication includes revisions of the data for the last three months and each quarterly publication includes revisions of the monthly data for the whole current year.

(ii) When current changes are made due both to additional information collected and elimination of errors, the Bulgarian National Bank duly informs the users through the monthly press releases and the notes to the balance of payments table.

(iii) When significant revisions are made due to changes in the methodology for reporting particular BOP components or any other reasons, the Bulgarian National Bank publishes in advance information on the changes to facilitate the users.

V. Data Dissemination

The Bulgarian National Bank disseminates the monthly balance of payments data on its web site – <http://www.bnb.bg>.

The data is published also in the Monthly Bulletin of the Bulgarian National Bank.

Data on Bulgaria's balance of payments is included in the semiannual and annual reports of the Bulgarian National Bank. The data is provided to the President of the Republic of Bulgaria, the Prime Minister, the Minister of Economy and the Minister of Finance 24 hours prior to publication of the BNB press release.

VI. Contacts

If you have any questions on the methodology applied by the Bulgarian National Bank or on the published balance of payments data, please do not hesitate to send them to Emil Dimitrov, Head of the Balance of Payments and External Debt Division, via e-mail at Dimitrov.E@bnbank.org, to Radoslava Gancheva, economist Gancheva.R@bnbank.org, or by mail to the following address:

Bulgarian National Bank
Balance of Payments and External Debt Division
1, Knyaz Alexander Battenberg Square
1000 Sofia, Bulgaria

Imports and Exports

The data on Bulgaria's imports and exports is based on customs declarations, and the codes used comply with the World Customs Organization Harmonized System for Description and Coding of Commodities introduced in 1988 and supplemented in 1992.

Bulgaria's exports are reported at FOB prices, and imports at CIF prices. However, for the purposes of the balance of payments statistics, total imports are recalculated at FOB prices.

In accordance with the common methodology of the Bulgarian National Bank and the National Statistical Institute, since 1999 the exports and imports are reported in accordance with the *Special Trade* system under which the time of transaction registration is the time of the customs declarations clearance.

For the purposes of the economic analysis the Bulgarian National Bank publishes '*end-use*' tables. They are based on the four-digit codes under the Harmonized System for Description and Coding of Commodities and grouped by purpose and end use of the respective commodity. The major principles in distribution of the commodities in the respective groups are the purpose of their use and degree of processing. The tables including major trade partners and regions contain only the most important countries and regions for Bulgarian exports (imports). The criteria for description of partner countries are as follows: *imports* – by country of origin of commodities; *exports* – by country of consignment, that is, the last known country where the commodities are to be delivered. The tables including major trade partners by end use represent cross section of imports and exports data by region and by commodity. The '*Structure of Imports and Exports by Original Currency*' tables represent the shares of the different currencies in export and import transactions.

In all published tables exports are reported at FOB prices, and imports at CIF prices.

Quarterly and annual time series of exports and imports by end use and by major trade partner since 1995 are published on the web site of the BNB. Those series could be searched by period (monthly, quarterly, yearly) and by commodity group (trade partners). In addition, quarterly and annual tables '*Major Trade Regions by End Use*' and '*Structure of Imports and Exports by Original Currency*' are published. Export and import data, as well as foreign trade analysis for the period under review are published on a monthly basis.

The data *sources* are: the Customs Agency and the Information Services AD. The Bulgarian National Bank and the National Statistical Institute receive exports and imports data, supplement it with other information and further process it.

In accordance with the common methodology, prior to publication, data is coordinated by BNB and the NSI. The data is to be published within eight weeks after the expiry of the reporting period.

In principle, the Bulgarian National Bank makes monthly revisions of its data for the last three months, and quarterly revisions of the data for the current year. However, in case the incoming data is incomplete and/or unreliable, the Bulgarian National Bank may revise import and export data more frequently.

The Bulgarian National Bank disseminates import and export data *via* its web site – <http://www.bnb.bg>. The data is published also in the Monthly Bulletin of the Bulgarian National Bank. The foreign trade data is included in the semi-annual and annual reports of the Bulgarian National Bank.

For further information on the applied methodology by the Bulgarian National Bank or on published foreign trade or balance of payments data, please contact Emil Dimitrov, Head of the Balance of Payments and External Debt Division, *via* e-mail at Dimitrov.E@bnbank.org, (tel. +359 2 9145 1243) or Stoyan Hadjiev, expert, at Hadjiev.S@bnbank.org (tel. +359 2 9145 1969).

Gross Foreign Debt

In reporting Bulgaria's gross foreign debt, the Bulgarian National Bank follows the international standards and requirements set in the *'External Debt Statistics: Guide for Compilers and Users'*, November 2001²⁷ and in the *'Balance of Payments Manual'*, IMF, 5th edition, 1993. On the one hand, this ensures international data compatibility, and consistency between the foreign debt statistics and the balance of payments, international investment position and national accounts, on the other hand. Data on gross foreign debt is an important information source for particular balance of payments items and the international investment position.

The BNB compiles and disseminates monthly statistical data on the gross foreign debt in the following two structures:

- by debtor
- by creditor

The two classifications comprise monthly data on: (1) gross foreign debt amount (2) gross foreign debt service and (3) disbursements.

I. Accounting Principles and Conventions

When compiling debt statistics, the BNB follows the **international definition of gross foreign debt** – 'Gross external debt, at any given time, is the outstanding amount of those actual current, and not contingent, liabilities that require payment(s) of principal and/or interest by the debtor at some point(s) in the future and that are owed to nonresidents by residents of an economy.'²⁸

The main criterion for a liability to be included in the gross foreign debt of the country is that **it is issued by a resident and is owed to a nonresident**,²⁹ regardless of whether it is issued on domestic or international, money or capital markets. The same principle is applied to transactions: only those between residents and nonresidents are recorded. In the debt tables the BNB records only the amount of **tranches actually disbursed**.

The stock of liabilities is recorded at **nominal**, not at **market value** even in the case when they are in the form of tradable securities. The gross foreign debt of Bulgaria is reported in US dollars.³⁰ The debt includes, however, liabilities denominated in foreign currency and in Bulgarian levs which are **converted into US dollars** as follows: 1) using the exchange rate as of the last business day of the reporting month (when compiling the debt stock), and 2) using the average monthly exchange rate (for debt transactions reporting). Consequently, in addition to actually conducted transactions, the amount of debt is also impacted by exchange rate movements in the respective currencies to the US dollar.

The distinction between short-term and long-term debt is based on the **original, not residual maturity of the liability**. The long-term debt includes all liabilities with original maturity of over one year, and the short-term debt, liabilities with original maturity of one year or less. All principal and interest arrears are recorded as short-term debt.

II. Gross Foreign Debt Components

A. Debt Tables by Debtor:

The main components of the gross foreign debt tables classified by debtor include public and private debts. In accordance with the international statistical standards, public debt includes: (1) government debt, (2) government-guaranteed debt, (3) debt of local governments, and (4) debt of banks and nonbank

²⁷ *External Debt Statistics: Guide for Compilers and Users*, Bank for International Settlements, The Commonwealth Secretariat, Eurostat, International Monetary Fund, Organization for Economic Cooperation and Development, The Paris Club Secretariat, The United Nations Conference on Trade and Development, World Bank. Final draft: November 2001.

²⁸ *External Debt Statistics: Guide for Compilers and Users*, Chapter Two, para. 19.

²⁹ For a definition of resident and nonresident, see the *Balance of Payments Manual*, IMF, 5th Edition, Chapter IV, paras. 57–58, page 20.

³⁰ Data for 2003 will be published also in euros.

enterprises with a majority state ownership. **Public Sector** comprises the above mentioned economic agents that are grouped as follows:

1. **Government Debt** includes data on the central government debt. The data source is the *Register of Government and Government Guaranteed Debts* of the Ministry of Finance (before 31 December 2002 the data source was the *System of Debt Registration, Service and Management* of the Ministry of Finance and the Bulgarian National Bank). *Loans* and *Bonds* are the two major subitems of the government debt. Liabilities for which no issue of tradable securities is involved are reported under *Loans* subitem. Loans received by the central government from the IMF are also reported under *Loans* item. The central government liabilities on securities issued on the international markets are reported under *Bonds* subitem, as it comprises the entire stock of the issue. The portion of the issue held by residents at the end of the reporting period is recorded with a negative sign in the *Other* item under part IV. *Other Debtors*. Government securities issued by the government on the domestic market and purchased by nonresidents are also reported under this item.

2. **Government Guaranteed Debt**. In accordance with the international methodology on foreign debt statistics, the BNB includes the loans guaranteed by the government and extended to budgetary and nonbudgetary enterprises in the government guaranteed debt. The data is derived from the *Register of Government and Government Guaranteed Debts* of the Ministry of Finance.

3. **Bulgarian National Bank**. Included herein are the outstanding BNB liabilities to the International Monetary Fund. As this debt is a government debt, the data source is the *Register of Government and Government Guaranteed Debts* of the Ministry of Finance.

4. **Other Debtors** include the external liabilities of municipalities, the state-owned commercial banks and companies. The *Other* item, with a positive sign, includes the amount of the government securities purchased by nonresidents, and with a minus sign, Brady bonds, eurobonds and global bonds held by residents.

Loans and *Bonds* are the two subitems of the *Municipalities* item. The same criterion as with the *Government Debt* subitems, i.e. whether or not tradable securities have been issued, is applied for distinction between the entries under these two subitems. When reporting the amount of liabilities under the *Bonds* subitem, the BNB reports only that portion of the issue which is held by nonresidents at the end of the reporting month. The data is provided by commercial banks.

The debt of state-owned commercial banks is reported under *Commercial Banks* item. Data on the amount and transactions on external loans is received monthly directly from commercial banks through a statistical form on their external liabilities. Deposits in foreign currencies and in levs of nonresidents with domestic banks are included in the *Deposits* subitem. The net increase in deposits in the banking system is reported in the *New Credits and Deposits Received* table, and the net deposit withdrawal, in the tables on foreign debt service as a principal payment under the *Deposits* subitem.

The debt of state-owned nonbank enterprises is shown in the *Companies* item. A distinction is made between liabilities owed to direct investors³¹ (*Inter-company Loans*) and such owed to other creditors (*Other Loans*). Loans guaranteed by the government are not included in this item, as they are allocated to the *Government Guaranteed Debt* item. Data on financial loans is collected through the statistical *Form PD-2 Report on Financial Credit Liabilities of Residents to Nonresidents*, which includes data on the stock and various types of transactions on the credit. As the Foreign Exchange Law provides for quarterly

³¹ The BNB follows the international definition of direct investment according to which the acquisition of 10% or more of the voting power in the investment enterprise is considered to establish a direct investment relationship.

reporting of these liabilities, for the first two months of each quarter the BNB publishes estimations on nonbank enterprises based on both debt service schedules provided by companies on the loans extended to them and on estimates. The respective liabilities of residents to nonresidents³² are recorded under the *Trade Credits* subitem. Such data is collected by the BNB through *Form PRL-1 Report on the Liabilities of Local Entities to Nonresidents*. As the Foreign Exchange Law provides for quarterly reporting of these liabilities, for the first two months of each quarter the BNB publishes estimates on the stock of trade credit.

Liabilities of private bank and nonbank enterprises are included under **Private Sector** section in the gross foreign debt. The data sources, format and periodicity of *Commercial Banks* and *Companies* subitems match the corresponding items under **Public Debt** sector.

B. Debt Tables by Creditor:

The major division under this classification is between long- and short-term debt followed by type of creditor: official or private. Comparing the data between the two structures, by debtor and by creditor, it should be noted that one creditor might have extended loans to several different debtors (e.g. to the government and to companies).

Under **Long-term Debt**, the *Official Creditors* item includes two subitems: *International Financial Institutions* and *Bilateral Credits*. Under *International Financial Institutions* subitem, only the largest creditors are shown separately, and the rest are included under the *Other* item. The *Bilateral Credits* subitem includes loans extended by foreign governments (*Other Bilateral Credits*), as well as the *Paris Club and Nonrescheduled Debt*.

The liabilities to private creditors by type of instruments issued by residents are separately indicated under the *Private Creditors* item. Liabilities of the government on issued securities (Brady bonds, eurobonds and global bonds) are shown as separate subitems. The part of each type of securities that is held by residents is recorded with a negative sign under *Other Government Securities*. The government securities issued on the local market and held by nonresidents are also recorded under this item. *Other Bonds* include all other bonds issued by residents on local financial market and held by nonresidents. Long-term liabilities of commercial banks and nonbank enterprises to private creditors are shown as subitems: *To Commercial Banks* and *To Companies*.

The **Short-term Debt** item has the same structure as long-term debt but includes only liabilities with original maturity of one year or less.

III. Periodicity, Frequency and Timeliness of the Gross Foreign Debt Publications

The Bulgarian National Bank compiles and publishes data on the amount of Bulgaria's gross foreign debt, the debt service payments and the disbursements on a monthly basis. The external sector debt indicators, including foreign debt indicators, are also disseminated monthly.

The Bulgarian National Bank publishes the data according to its preannounced calendar. Where necessary, the BNB informs the users on the new release date at least a week prior to preliminary announced date.

IV. Data Revision Policy

The data revision policy of the Bulgarian National Bank is based on the following principles:

(i) Each monthly publication includes revisions of the data for the previous three months, and each quarterly publication includes revisions of the monthly

³² For a definition of trade credits, see *Balance of Payments Manual*, IMF, 5th edition, 1993, chapter XX, para. 414, as well as *External Debt Statistics: Guide for Compilers and Users*, Chapter Three, para. 133.

data for the whole current year.

(ii) When ongoing changes are made as a result of additional information collected and elimination of errors, the Bulgarian National Bank duly informs the users through the monthly press releases, as well as through the notes at the end of the foreign debt tables.

(iii) When significant revisions are made due to changes in the methodology on reporting of particular foreign debt components or as a result of any other reasons, the Bulgarian National Bank publishes in advance information on the changes, to facilitate the users of the data.

V. Data Dissemination

The Bulgarian National Bank publishes the monthly gross foreign debt data on the web site of the Bulgarian National Bank: <http://www.bnb.bg>. The data is also published in the *BNB Monthly Bulletin* and in the semiannual and annual reports of the Bulgarian National Bank. The data is provided to the President of the Republic of Bulgaria, the Prime Minister, the Minister of Economy and the Minister of Finance 24 hours prior to publication of the BNB press release.

VI. Contacts

If you have any questions on the methodology applied by the Bulgarian National Bank or on the gross foreign debt data published, please do not hesitate to contact Emil Dimitrov, Head of the Balance of Payments and External Debt Division, via e-mail at Dimitrov.E@bnbank.org and Hristo Genadiev, economist, at Guenadiev.H@bnbank.org, or by mail to the following address:

Bulgarian National Bank
Balance of Payments and External Debt Division

Fiscal Sector

Information on the fiscal sector is classified into three categories:

- (a) government sector operations;
- (b) government operations (republican budget);
- (c) domestic and foreign government debt.

Fiscal sector includes all ministries, agencies, extrabudgetary funds, individual units of social security and other institutions of the central government, municipalities, as well as enterprises financed and controlled by them.

The consolidated state budget covers data on the government sector and includes the republican budget, the budgets of social security, legal authorities, universities financed by the government, the Bulgarian Academy of Sciences, municipalities, as well as extrabudgetary funds and accounts. The institutional coverage of the government sector corresponds to the System of National Accounts and Government Finance Statistics 'general government' institutional sector.

The republican budget includes the central republican budget (the budget of the Ministry of Finance), budgets of other ministries and agencies, regional authorities and the National Audit Chamber. Together with the budgets of the social security, legal authorities, universities financed by the government, Bulgarian Academy of Sciences and their extrabudgetary accounts it forms the government subsector. The institutional coverage of this subsector corresponds to the System of National Accounts and Government Finance Statistics 'central government' institutional subsector.

4

Real Sector

Tables of the real sector are arranged in the following groups:

- (a) macroeconomic indicators (national accounts);
- (b) labor market;
- (c) price indicators.

Real sector covers a few groups of institutional units – residents on the economic territory of Bulgaria. These include ‘nonfinancial enterprises’ whose main activity is production and sale of goods and nonfinancial services for the purpose of making profit; ‘nontrade organizations serving households’ which provide goods and services free of charge or at economically insignificant prices; ‘households’ – residents in Bulgaria regardless of their type and amount. Real sector also includes unincorporated production units, as well as those with single-entry accounting owned by local physical persons.

This section of the BNB Monthly Bulletin includes data on:

- *gross domestic product* – by component of final demand (under the method of end of use expenditure) and by economic sector (under the production method).

In accordance with the requirements of the System of National Accounts, holding gains are excluded from GDP data, i.e. changes in its value due to price fluctuations are excluded. Data not reconciled with Supply – Use final tables of the NSI is preliminary. Due to a change in the methodology for calculation of personal consumption of households and exports (imports) of goods and services components, data for the third quarter and the January – September 1999 period is partially comparable with relevant data for 1997, 1998, and the first half of 1999.

- *labor market* – employed under labor contract (public and private sectors), changes in their number (by economic sector), number of unemployed (total, young people, adults) and unemployment rate, average wage of employed (by type of ownership and by economic sector). From early 2001 the NSI publishes monthly data on employment and average wage in the second month following the end of the relevant calendar quarter.

- *consumer price changes* – total and by major commodity and services group.
