* The category new business on loans includes the new agreements during the reporting period (all contracts and conditions which determine the interest rate on a loan for the first time as well as all renegotiations of the conditions on an existing instrument, including those that are terminated/matured during the reporting period). Based on weekly statistical information, monthly amounts on new business are calculated as a sum total of the amounts for the weeks of the month.

¹ For the purpose of comparison, BIR is capitalised on an annual basis. Since 1 February 2005 BIR is capitalised at day-count convention of '30/360' for the calendar month. Up to 31 January 2005 end-month BIR capitalised at day-count convention 'number of days from the day of issue to the maturity of three-month government securities/360' is reported.

² The category *new business on time deposits, repos and loans* includes the new agreements during the reporting period (all contracts and conditions which define for the first time the interest rate on a deposit, repo or a loan as well as all re-negotiations of the conditions on an existing instrument, including those that are terminated/matured during the reporting period) as well as re-negotiated under the same conditions deposits/repos during the period. Interest rates and amounts on new business on overnight and savings deposits coincide with those on outstanding amounts at the end of the reporting period.

³ Interest rates on short-term loans include overdraft also.

* Analytical reporting of the balance of payments in accordance with IMF 5th edition of the Balance of Payments Manual.

¹ Preliminary data.

² Data based on customs declarations as of the date of customs clearings, provided by the Customs Agency, processed by the BNB and supplemented with NSI information. Data are coordinated with the NSI.

³ BNB estimates.

⁴ Estimates according to the methodology of the BNB and the Ministry of Economy.

⁵ A minus sign denotes flight of capital (increase in assets or decrease in liabilities).

⁶ Data provided by the companies with international interest, the Privatisation Agency, the NSI, the Central Depository, commercial banks, etc.

⁷ Data based on reports of residents' obligations on financial credits to non-residents received at the BNB.

⁸ The item includes all transactions associated with acquisitions and mergers.

⁹ Due to introducing of a new reporting form for investment portfolio, data are subject to revision after their processing.

¹⁰ Bulgaria's external claims on trade credits (paid advances and claims on suppliers) are included in this item.

¹¹ BNB data, subject to revision.

¹² Bulgaria's external liabilities on trade credits (received advances and obligations to suppliers) are included in this item.

¹³ Excluding changes in BNB international reserves due to valuation adjustments. A minus sign denotes an increase in international reserves and a positive sign a decrease.

* Analytical reporting of the balance of payments in accordance with IMF 5th edition of the Balance of Payments Manual.

¹ Preliminary data.

² Data based on customs declarations as of the date of customs clearings, provided by the Customs Agency, processed by the BNB and supplemented with NSI information. Data are coordinated with the NSI.

³ BNB estimates.

⁴ Estimates according to the methodology of the BNB and the Ministry of Economy.

⁵ A minus sign denotes flight of capital (increase in assets or decrease in liabilities).

⁶ Data provided by the companies with international interest, the Privatisation Agency, the NSI, the Central Depository, commercial banks, etc.

⁷ Data based on reports of residents' obligations on financial credits to non-residents received at the BNB.

⁸ The item includes all transactions associated with acquisitions and mergers.

⁹ Due to introducing of a new reporting form for investment portfolio, data are subject to revision after their processing.

¹⁰ Bulgaria's external claims on trade credits (paid advances and claims on suppliers) are included in this item.

¹¹ BNB data, subject to revision.

¹² Bulgaria's external liabilities on trade credits (received advances and obligations to suppliers) are included in this item.

¹³ Excluding changes in BNB international reserves due to valuation adjustments. A minus sign denotes an increase in international reserves and a positive sign a decrease.

* Analytical reporting of the balance of payments in accordance with IMF 5th edition of the Balance of Payments Manual.

¹ Preliminary data.

² Data based on customs declarations as of the date of customs clearings, provided by the Customs Agency, processed by the BNB and supplemented with NSI information. Data are coordinated with the NSI.

³ BNB estimates.

⁴ Estimates according to the methodology of the BNB and the Ministry of Economy.

⁵ A minus sign denotes flight of capital (increase in assets or decrease in liabilities).

⁶ Data provided by the companies with international interest, the Privatisation Agency, the NSI, the Central Depository, commercial banks, etc.

⁷ Data based on reports of residents' obligations on financial credits to non-residents received at the BNB.

⁸ The item includes all transactions associated with acquisitions and mergers.

⁹ Bulgaria's external claims on trade credits (paid advances and claims on suppliers) are included in this item.

¹⁰ BIS data for the January – September 2004 period. BNB data for October – December 2004, subject to revisions.

¹¹ Bulgaria's external liabilities on trade credits (received advances and obligations to suppliers) are included in this item.

¹² Excluding changes in BNB international reserves due to valuation adjustments. A minus sign denotes an increase in international reserves and a positive sign a decrease.

* Analytical reporting of the balance of payments in accordance with IMF 5th edition of the Balance of Payments Manual.

¹ Preliminary data.

² Data based on customs declarations as of the date of customs clearings, provided by the Customs Agency, processed by the BNB and supplemented with NSI information. Data are coordinated with the NSI.

³ BNB estimates.

⁴ Estimates according to the methodology of the BNB and the Ministry of Economy.

⁵ A minus sign denotes flight of capital (increase in assets or decrease in liabilities).

⁶ Data provided by the companies with international interest, the Privatisation Agency, the NSI, the Central Depository, commercial banks, etc.

⁷ Data based on reports of residents' obligations on financial credits to non-residents received at the BNB.

⁸ The item includes all transactions associated with acquisitions and mergers.

⁹ Bulgaria's external claims on trade credits (paid advances and claims on suppliers) are included in this item.

¹⁰ BIS data for the January – September 2004 period. BNB data for October – December 2004, subject to revisions.

¹¹ Bulgaria's external liabilities on trade credits (received advances and obligations to suppliers) are included in this item.

¹² Excluding changes in BNB international reserves due to valuation adjustments. A minus sign denotes an increase in international reserves and a positive sign a decrease.

* Analytical reporting of the balance of payments in accordance with IMF 5th edition of the Balance of Payments Manual.

¹ Preliminary data.

² Data based on customs declarations as of the date of customs clearings, provided by the Customs Agency, processed by the BNB and supplemented with NSI information. Data are coordinated with the NSI.

³ BNB estimates.

⁴ Estimates according to the methodology of the BNB and the Ministry of Economy.

⁵ A minus sign denotes flight of capital (increase in assets or decrease in liabilities).

⁶ Data provided by the companies with international interest, the Privatisation Agency, the NSI, the Central Depository, commercial banks, etc.

⁷ Data based on reports of residents' obligations on financial credits to non-residents received at the BNB.

⁸ The item includes all transactions associated with acquisitions and mergers.

⁹ Bulgaria's external claims on trade credits (paid advances and claims on suppliers) are included in this item.

¹⁰ BIS data for the January – September 2004 period. BNB data for October – December 2004, subject to revisions.

¹¹ Bulgaria's external liabilities on trade credits (received advances and obligations to suppliers) are included in this item.

¹² Excluding changes in BNB international reserves due to valuation adjustments. A minus sign denotes an increase in international reserves and a positive sign a decrease.

Private non-guaranteed external debt	5860.4	6371.2	7086.9
Revolving credits ⁷	351.1	349.6	357.8
Trade credits ⁷	1032.8	1086.1	1244.5
Credits payable at request ⁷	785.1	799.5	849.0
incl. intercompany loans	466.2	486.3	512.0

¹ Preliminary data. Euro equivalent is calculated using average monthly exchange rates of respective foreign currencies as of end of period.

² Data source: *Register of Government and Government Guaranteed Debt* of the Ministry of Finance. Preliminary data as of 26 April 2005. Excluding debt liabilities of public sector companies and government guaranteed debt.

³ Brady bonds, Eurobonds, Global bonds and government securities (denominated in BGN and foreign currency) held by non-residents are included in this item.

⁴ In accordance with the residence concept, government securities issued and held by residents on international financial markets are subtracted from debt; therefore, they are shown with a minus sign (at nominal value).

⁵ Data source: commercial banks (including data on private and state-owned banks). Deposits related to contingent liabilities are excluded.

⁶ Data on public and private companies, including government guaranteed loans. Intercompany loans are excluded. Data cover only loans registered by the BNB and on which the BNB has received information.

⁷ Data are included in the *Gross external debt* amount.

¹ Actual disbursements. Preliminary data. Data are recalculated in euro based on monthly average exchange rates of respective foreign currencies.

² Data source: *Register of Government and Government Guaranteed Debt* of the Ministry of Finance. Preliminary data as of 26 April 2005. Excluding data on debt liabilities of public sector companies and government guaranteed debt.

³ Principal payments on Brady bonds, Eurobonds, Global bonds and government securities held by non-residents.

⁴ In accordance with the residence concept, government securities issued and held by residents on international financial markets are subtracted from debt; therefore, they are shown with a minus sign. The net increase in the stock of Brady bonds, Eurobonds and Global bonds held by residents represents a net decrease in liabilities to non-residents and is reflected with a positive sign.

⁵ Data source: commercial banks.

⁶ The net increase in the stock of deposits is reported in the *Gross External Debt Disbursements* table and the net decrease in the *Gross External Debt Service* table. Deposits related to contingent liabilities are excluded.

⁷ Including principal and interest payments (excluding intercompany loans) registered by the BNB and on which the BNB has received information, as well as payments on government guaranteed debt (Source: *Register of Government and Government Guaranteed Debt* of the Ministry of Finance. Preliminary data as of 26 April 2005).

⁸ Data not included in the *Gross External Debt Service* tables by debtor and by creditor.

⁹ The net increase in the trade credit stock over the reporting month is reported in supplementary tables to the *Gross External Debt Disbursements* table, while the net decrease is reported in supplementary tables to the *Gross External Debt Service* table.

Source: BNB.

¹ Actual payments. Preliminary data. Data are recalculated in euro based on monthly average exchange rates of respective foreign currencies.

² Data source: *Register of Government and Government Guaranteed Debt* of the Ministry of Finance. Preliminary data as of 7 March 2005. Excluding data on debt liabilities of public sector companies and government guaranteed debt.

³ Principal and interest payments on Brady bonds, Eurobonds, Global bonds and government securities (denominated in BGN and foreign currency) purchased by non-residents are included in this item.

⁴ In accordance with the residence concept, payments on government securities issued and held by residents on international financial markets are subtracted from external debt payments; therefore, they are shown with a minus sign (at nominal value). The net increase in the stock of Brady bonds, Eurobonds and Global bonds held by residents represents a net decrease in liabilities to non-residents and is reflected with a positive sign.

⁵ Data source: commercial banks.

⁶ The net increase in the stock of deposits is reported in the *Gross External Debt Disbursements* table and the net decrease in the *Gross External Debt Service* table. Deposits related to contingent liabilities are excluded.

⁷ Including principal and interest payments (excluding intercompany loans) registered by the BNB and on which the BNB has received information, as well as payments on government guaranteed debt (Source: *Register of Government and Government Guaranteed Debt* of the Ministry of Finance. Preliminary data as of 7 March 2005).

⁸ Data not included in the *Gross External Debt Service* tables.

⁹ The net increase in the trade credit stock over the reporting month is reported in supplementary tables to the *Gross External Debt Disbursements* table, while the net decrease is reported in supplementary tables to the *Gross External Debt Service* table.

Overview

BNB Monthly Bulletin includes data on the state and dynamics of the national economy. It focuses on financial and external sectors since information on these sectors is prepared at the BNB. In general, the content, structure and format of statistical information presented in the bulletin are harmonized with the requirements and criteria of the IMF General Data Dissemination System (GDDS), and, to a certain extent, with its higher and stricter form, the Special Data Dissemination Standard (SDDS).

A common principle is adopted: tables represent information on the current and the previous year, and charts, on the current and the preceding two years. Depending on availability, specificity, compatibility and comparability of data, tables and charts may contain information on separate periods (months, quarters, years), as well as cumulative data since early year.

All data published in the *Monthly Bulletin* is in redenominated levs.

1 Financial Sector

The information presented in this section covers seven major categories:

- (a) monetary survey;
- (b) analytical accounts of the central bank;
- (c) analytical accounts of commercial banks;
- (d) monthly sectoral survey;
- (e) monetary aggregates;
- (f) interest rates;
- (g) other financial statistics.

**General
Methodological Notes
of Monetary
and Banking
Statistics**

1. *Methodological Conceptions and Rules of Monetary Statistics Organisation*

Monetary statistics is collected and compiled according to the international statistical standards and covers, to a great extent, the rules of international financial statistics. The most important standards include:

- ✓ European System of Accounts (ESA'95) and System of National Accounts (SNA'93);¹
- ✓ Regulation No. 13 of 22 November 2001 and Money and Banking Statistics Compilation Guide, ECB, 1998;
- ✓ Money and Banking Statistics Sector Manual: Guidance for the Statistical Classification of Customers, ECB, 1998;
- ✓ Monetary and Financial Statistics Manual, IMF, 2000.

Bulgaria is a member of the Special Data Dissemination Standard (SDDS) developed by the IMF (see the National Summary Data Page on BNB website: *Statistics Section, Other*).

Main Rules:

- a) Accounting rules – the accounting rules followed by commercial banks and the BNB are presented in the Accountancy Law (November 2001) and International Accounting Standards.²
- b) Reporting rules:
 - ✓ Valuation of assets and liabilities – all financial assets and liabilities are reported at market or close to market price. Financial instruments, however, as currency in circulation, deposits, capital and reserves, cash and credits are reported at nominal value.
 - ✓ Revaluation of foreign currency positions – exchange rates as of end of the period are applied.
 - ✓ Reporting of credits and provisions – for the purposes of statistics credits are shown on a gross basis until their writing off. Accrued provisions are classified under *Other liabilities*.
 - ✓ Definition of the reporting period – the reporting period finishes on the last calendar day and if it coincides with a holiday, on the last business day of the month.

¹ European System of Accounts – an international framework of accounts for a systematic and detailed description of the country's economy, its components, as well as its relationships with other economies developed by Eurostat. ESA'95 is fully compatible with SNA'93 (a joint paper of the IMF, UN, OECD, the European Commission and the World Bank). ESA'95 focuses primarily on conditions and data necessary for the EU.

² Unified national accounting standards harmonised with the international standards, valid until end-2002. After that the International Accounting Standards came into effect.

c) Economic territory and residency. The economic territory of the country consists of the geographic territory administrated by the government; within this territory, persons, goods and capital circulate freely. The economic territory includes the airspace, territorial waters, and continental shelf lying in international waters over which the country has executive rights. Also it includes territorial enclaves, i.e. geographic territories situated in the rest of the world and used, under international treaties or agreements between states, by general government agencies of the country (embassies, consulates, military bases, scientific bases, *etc.*), and any free zones.

Residents of the country are defined as institutional units which have a centre of economic interest³ within the economic territory of the country; their residence is on the same territory and they manage a significant output in which they participate or intend to participate.

Branches of resident banks abroad with a centre of economic interest on the territory of another country are treated as non-residents. Branches of foreign banks licensed to operate in the country are residents and are included in money-creating sector (see *Sector Table*).

Borderline cases of residency:

1) Bulgarian diplomatic, consular, commercial and other representations, as well as their members and staff, and all Bulgarian citizens working for them who are staying abroad by an appointment of the Bulgarian government, regular servicemen on long-term commission abroad and civil persons from the Ministry of Defence employed in missions, headquarters and bodies of international organisations, as well as the members of their families are deemed residents. The foreign ones are classified as residents of their native countries.

2) The following persons are classified as resident units:

- ✓ Bulgarian citizens staying abroad for education purposes, irrespective of the length of their stay;
- ✓ Bulgarian citizens staying abroad for medical treatment, irrespective of the length of their stay.

The concept of residency is consistent with the Bulgarian Foreign Exchange Law, ESA'95, and IMF Balance of Payments Manual, 5th edition.

d) Sector distribution – ESA'95 standards of sector classification of institutional units are followed. The main sectors by residency include: *Resident Sector* (S.1) and *Rest of the World* (S.2). The Resident Sector is divided into monetary financial sector, general government sector and non-government sector. Monetary financial sector covers the BNB (S.121) and commercial banks (S.122); general government sector (S.13) consists of three sub-sectors: central government (S.1311), local government (S.1313) and social security funds (S.1314); non-government sector includes non-financial public corporations (S.11001), non-financial private corporations (S.11002+S.11003), financial intermediaries and auxiliaries other than insurance companies and pension funds (S.123 and S.124), insurance companies and pension funds (S.125), households (S.14) and non-profit institutions serving households (S.15). Non-resident Sector is divided into *European Union* and *Other countries and international institutions* (see *Sector Table*).

e) Instrumental categories – in the Monetary Survey and Analytical Reporting, indicators are defined in conformity with ECB Regulation No. 13, the Monetary and Financial Statistics Manual of the IMF in accordance with ESA'95 and SNA'93. Definitions of most of the instruments are given in the corresponding tables in Specific Methodological Notes.

f) Foreign currency distribution – all indicators and instruments are in levs and foreign currency, including euro of the foreign exchange component.

g) Maturity structure – for the purposes of statistics financial assets and liabilities are presented according to the original term to maturity (Regulation No. 13 of the ECB and SNA'93).

2. Reporting Units

As of the present moment they include the monetary financial institutions residing on the territory of the Republic of Bulgaria. These are the BNB and all commercial banks, including foreign banks' branches registered in Bulgaria. Of all commercial banks, 29 are licensed to conduct bank operations in Bulgaria and abroad and six are foreign banks' branches.

³ An institutional unit has a centre of economic interest within a country when there exists some location – dwellings, place of production or other premises, which the unit engages or intends to engage in economic activities and transactions for an indefinite period of time or for a definite but longer period of time.

Resident monetary financial institutions (MFI)⁴ are included in the MFI list of EU accession countries. This list is maintained by the ECB on the website <http://www.ecb.int/mfi/mfi/accessioncountries.htm>. Also a hyperlink to this site from the BNB website is created.

3. *Non-operating Banks*

A specific feature of the monetary statistics in Bulgaria is the reporting of non-operating commercial banks, which in fact is not included in the official monetary statistics. Data on such banks is shown in a separate table: *Monthly Sectoral Survey of Non-operating Banks*. The purpose is to get a clear picture of the banking system processes, if a bank with a revoked license and under insolvency proceedings is excluded from the scope of the official statistics and included in the group of non-operating banks⁵ and subsequently, if it is excluded from the statistical survey.⁶

4. *Basic Framework of Monetary Statistics*

Reporting units shall submit reports pursuant to Article 55 of the Law on Banks. Data are collected electronically via BNB's virtual network with the commercial banks (as of 1 March 2002).

Monetary statistics framework includes two levels of data compilation and presentation:

On the first level, the accounting data received from individual reporting units are aggregated in *analytical reporting* containing comprehensive balance sheet data on the BNB and commercial banks. Analytical reporting of the BNB and analytical reporting of CBs aim to provide data classified by residency, sector and instrument.

On the second level, data from analytical reporting are consolidated into a *monetary survey*. The monetary survey is the main form of monetary statistics and contains a lot of important indicators necessary for macroeconomic analysis. It reveals the mechanism of multiplying the monetary base into aggregate money supply serving transactions in the national economy. Its structure is built so as to facilitate the analysis of broad money and its sources. The monetary survey is accompanied by a detailed presentation of the main elements (by sector and instrument).

5. *Principles of Data Processing*

- ✓ Aggregation – summing up data by balance of all institutional units within a sector or sub-sector, or of all assets and liabilities in the framework of a particular indicator. For sectors and sub-sectors, data on financial assets and liabilities are aggregated in instruments (i.e. credits classified by sector of debtor and deposits classified by sector of creditor). Further aggregation is used to combine the instruments into indicators.
- ✓ Consolidation – it refers to elimination of stocks and flows that occur between institutional units, residents of the country, where they are grouped. The institutional units consisting of a head office and branches report consolidated data through elimination of claims and obligations between them. (This rule does not apply to consolidation of data between a head office and non-resident branches.) Further consolidation is made in the monetary survey between commercial banks and the BNB.
- ✓ Netting – a general principle set in the international statistical standards is that data should be collected and compiled on a gross basis. Despite this fact, some categories of data in the monetary survey are also presented in a net form due to their use for analytical needs. In the monetary survey and analytical reporting, the following items are presented in net form: foreign assets, claims on the central government, other items; concurrently, gross claims on and gross liabilities to non-residents, central government and other unclassified assets and liabilities are shown.

⁴ According to the EU legislation, the scope of monetary financial institutions is wider and it includes the central bank, credit institutions, money market funds and other institutions covering the definition, i.e. such institutions which collect deposits or close substitutes for deposits from physical and legal persons, other than monetary and financial institutions, and grant credits or invest in securities on their own account irrespective of the nature of their business.

⁵ Fourteen banks in December 1997, one in January 1999, and one in April 2000.

⁶ Exclusion from statistical survey:

a) acquisition of non-operating banks by operating banks: six banks (July 2000, March 2001, February, August, November and December 2002);

b) acquisition of non-operating banks' assets by the government represented by the State Receivables Collection Agency: three banks in April, June, and December 2000 and two banks in January and February 2002; by companies outside the banking system: one bank in July 2000.

6. Policy of Revisions and Statistical Processing

Revisions of published data are made in the following cases:

- ✓ error in data;
- ✓ change in accounting or statistical standard.

Revisions are marked by the sign **r** and an explanatory text. In case of change in the standard, historical data are also revised starting from the moment of occurrence of the event or change in the standard.

Upon occurrence or creation of prerequisites for publishing a new indicator – sector, instrument, *etc.* – historical time series are constructed by using statistical methods as of the moment of indicator occurrence (where appropriate conditions exist).

7. Publications

Monthly data are as of the end of the reporting period and are published one month after the reporting period (until the end of the next month). Monthly statistical data are also included in periodical publications of the central bank: annual and semi-annual reports of the BNB, monthly bulletins. Publications are available on paper and on the website of the BNB: <http://www.bnb.bg>

SECTORS IN BULGARIA'S MONETARY STATISTICS		DEFINITIONS	
Money-creating sector	Central bank	S12 Financial corporations	A financial corporation whose principal function is to issue currency, to maintain the internal and external value of the national currency and to hold the international reserves of the country.
	Other monetary financial institutions		Financial corporations, except those classified in the central bank sub-sector, which are principally engaged in financial intermediation and whose business is to receive deposits and/or close substitutes for deposits from institutional units other than monetary financial institutions, and, for their own account, to grant loans and/or to make investments in securities.
Money-holding sector	Other financial intermediaries and auxiliaries, except insurance companies and pension funds		<ol style="list-style-type: none"> 1) Financial corporations, which are principally engaged in financial intermediation by: <ol style="list-style-type: none"> a) incurring liabilities (in forms other than currency, deposits and/or close substitutes for deposits) from institutional units other than monetary financial institutions, or b) incurring liabilities other than insurance and pension reserves. 2) Financial corporations – auxiliaries, which are closely connected with financial intermediation but are not financial intermediaries. Here are included financial and leasing houses, investment companies, loan offices, stock exchanges, exchange bureaux, consultants, brokers, <i>etc.</i>
	Insurance companies and pension funds		Financial corporations, which are principally engaged in financial intermediation as the consequence of taking insurance and pension risks (and which incur liabilities in the form of insurance and pension reserves).

⁷ Institutional sectors in Bulgaria's monetary statistics totally meet ECB requirements under strict consistency with ESA'95.

	SECTORS IN BULGARIA'S MONETARY STATISTICS	DEFINITIONS
Money-holding sector	Non-financial public corporations	Non-financial corporations, which are market producers, and whose main activity is the production of goods and non-financial services. For the purposes of the monetary statistics non-financial corporations are presented according to type of ownership – public and private. ⁸ Public corporations are non-financial corporations subject to control by units of the public sector, i. e. public units hold 50% and more of the capital and are directly or indirectly entitled to setting the company policy and appointing directors. Private corporations are non-financial corporations subject to control by private national or foreign institutional units, i.e. these units hold 50% and more of the capital and are directly or indirectly entitled to setting the company policy and appointing directors.
	Non-financial private corporations	
	Households	Individuals or groups of individuals as consumers and possibly also as entrepreneurs producing market goods and non-financial and financial services (market producers). The sector includes individuals or groups of individuals as producers of goods and non-financial services for exclusively own final use. The sector also includes sole proprietorship and partnership without independent legal status which are market producers.
	Non-profit institutions serving households (NPISHs)	Non-profit institutions which are separate legal entities, whose main activity is connected with servicing, supporting and assisting households. Their principal resources, apart from those derived from occasional sales, are derived from voluntary contributions in cash or in kind from households in their capacity as consumers, from payments made by general government sector ⁹ and from property income. Here are included trade unions, political parties, foundations, associations, churches or religious societies, social, cultural and sports clubs.

⁸ See Sectoral monthly balance sheet and Table 1.3.7: Claims on Credits to Non-financial Corporations, Households and NPISHs.

⁹ Non-profit institutions controlled and mainly financed by general government are classified in the general government sector.

SECTORS IN BULGARIA'S MONETARY STATISTICS		DEFINITIONS	
Money-neutral sector	Central government	S13 General government sector	All institutional units, which offer public services, deal with distribution of national income and guarantee the operation of social and economic system. These are ministries, institutions and other central agencies, non-budget funds and administrative departments of the state whose competence extends normally over the whole economic territory, except for the administration of social security funds. Here are included those non-profit institutions which are controlled and mainly financed by central government and whose competence extends over the whole economic territory.
	Local government		All institutional units, which offer public services, deal with distribution of national income and guarantee the operation of social and economical system locally. This is the local administration, whose competence extends to the economic territory, except for the administration of social security funds. Here are included those non-profit institutions which are controlled and mainly financed by local government bodies and whose competence is restricted to the economic territory of the local government.
	Social security funds		Central and local institutional units whose main activity is to provide social benefits and which fulfill each of the following two criteria: 1) by law or by regulation certain groups of population are obliged to participate in the scheme or to pay contributions; 2) general government is responsible for the management of the institution in respect of the settlement or approval of the contributions and benefits independently from its role as supervisory body or employer.
Non-resident sector	European Union	S2 Rest of the world	All non-resident units ¹⁰ engaged in transactions with resident institutional units, or have other economic links with resident units. Its accounts provide an overall view of the economic relationships linking the national economy with rest of the world. The sector includes such institutional units, which are physically located on the territory of the country. It is divided into two sub-sectors: The European Union and Other countries and international organisations.
	Other countries and international organisations		

¹⁰ Including institutions of the European Union and international organisations.

Specific Methodological Notes

The monetary statistics is presented in dynamics in a monetary survey, analytical reporting of the BNB and analytical reporting of commercial banks, and in some additional tables which contain more detailed information. The principle of the organisation of all tables is the following: the data are broken down by sector, indicator, national and foreign currency, including euro, instrument and maturity, while the indicators on the asset side are grouped by sector and instrument and on the liability side – by instrument and degree of executables.

Simultaneously monthly sectoral surveys of the BNB and commercial banks are compiled and published. These are static tables presenting the relevant assets and liabilities indicators in a way which allows identification of the sector affiliation of the balance sheets items.

Monetary statistics (dynamic or static) is compiled on the basis of the monthly reporting of the BNB and commercial banks. Information on the non-operating banks is presented in an annex to the monetary survey which has informative purposes only.

Tables 1.3.1–1.3.4: Short Monetary Survey, Monetary Survey and Analytical Reporting of the BNB and Analytical Reporting of Commercial Banks

The structure of the monetary survey may be expressed by the following mathematical identity:
net foreign assets + net domestic assets = broad money + long-term liabilities

Net domestic assets include domestic credit, fixed assets and other items (net).

The analytical reporting of the BNB and commercial banks follow the format of the monetary survey.

Indicators

*Net Foreign Assets*¹¹ – a balance between gross foreign assets and liabilities of the banking sector. Gross foreign assets are reported by instrument and include Bulgaria's international reserves and other foreign assets of the BNB and commercial banks. Gross foreign liabilities reflect liabilities of the BNB and commercial banks to the foreign sector. A split of gross foreign assets and liabilities of the BNB is made in Table 1.3.6: Foreign Assets and Liabilities of the BNB.

Domestic credit – incorporates credit to the consolidated general government sector and non-government sector.

Credit to the consolidated general government sector includes net claims on the central government and gross claims on local government, and social security funds. Credit to the non-government sector includes gross claims on non-financial corporations, financial corporations, households and NPISHs.

Fixed assets – movable or immovable non-financial assets which monetary financial institutions intend to use over a period longer than one year in their main activity.

Other items (net) – consolidates all components of the balance sheets of the BNB and commercial banks which are not included in the instruments displayed above. They include relations between commercial banks (net), other assets and liabilities (net) and relations between the BNB and commercial banks (net). Accrued and overdue interest, derivatives, depreciation, provisions, as well as assets and liabilities which are not included elsewhere are part of the *Other assets and liabilities (net)* item. The balance on the Relations between the BNB and Commercial Banks (net) item reflects the float as a result of netting of claims and liabilities between commercial banks and the BNB.

Broad money (money supply) comprises liabilities with money character of banks to the resident sector with the exception of the liabilities to the central government and the banking sector (money-holding sectors: see *Sector Table*). Monetary aggregate instruments are grouped by liquidity and are presented by currency and sector.

The following monetary aggregates are used: M1, M2, and M3. The M1 monetary aggregate, commonly referred to as narrow money, includes the most liquid instruments used in settlements (currency outside banks and overnight deposits in national and foreign currency). The M2 monetary aggregate comprises quasi-money and the M1 monetary aggregate. Quasi-money comprises deposits with agreed maturity of up to two years and deposits redeemable at notice of up to three months (including savings deposits). The least liquid financial instruments include repo agreements and debt securities issued up to two years. They are denominated in national and foreign currency and together with M2 form the broadest monetary aggregate, M3, commonly referred to as money supply (broad money).

¹¹ Monetary gold, Special Drawing Rights holdings, claims on interest and interest liabilities in *Net foreign assets* are in BNB only.

Long-term liabilities and monetary financial institutions – include liabilities of monetary financial institutions with maturity of over two years or with a notice of over three months, as well as capital and reserves. Capital and reserves comprise the statutory fund of the banking system, reserves and financial result.

Types of Instruments Grouped within the Indicators

Assets side:

1. *Repo agreements* – funds extended under agreements for reverse repurchases of securities where one of the parties receives funds against securities sold under a firm commitment to purchase the same or similar securities at a particular price on a fixed future date.

2. *Credits* – financial assets arising to provide borrowers with funds, goods or services. Credit terms (fixed by the creditor or negotiated) are set in an untransferable document. Credit is an unconditional debt which shall be repaid upon maturity and shall generate income in the form of interest (see Table 1.3.7).

3. *Securities other than shares* – includes securities other than shares and other equity which give the holder the unconditional right to fixed income or contractually determined income in the form of coupon payments and/or stated fixed sum at a stated date or dates starting from the issue date till the date set as maturity/redemption date. These securities do not grant the holder any ownership rights and interest over the issuing company. Also included are instruments with the same characteristics but with options for conversion into shares or other forms of ownership. The *Securities other than shares* indicator covers various types of bonds and other debt securities of bond nature, regardless of the intention for their acquisition and the period of holding. The intention of acquisition involves holding securities to maturity, securities for trade, and securities put up for sale. This indicator includes marketable and high-liquid instruments, i.e. money market instruments of the non-government sector held by commercial banks, with an original maturity of up to one year, freely transferable and marketable. These can be discount bills and bills accepted by commercial banks as well as other commercial paper used by bankers as a form of short-term investment. Also included in the Non-financial Public Enterprises sector are compensatory instruments held by commercial banks.¹²

4. *Shares and other equity* – holdings of securities which represent property rights in corporations. These securities generally entitle the holders to a share in the profit of corporations and to a share in their own funds in the event of liquidation.

Liabilities side:

1. *Currency outside banks* is currency into circulation less commercial banks' vault cash.

2. *Deposits* are funds accepted by monetary financial institutions payable at sight, without any notice, at notice or under other preliminary agreed payment conditions. Deposits are agreed upon between the parties by negotiating the terms of keeping deposit accounts, interest amount (if the agreement provides for interest accrual), terms of payment and sanctions for the parties in case of failure to perform their obligations. These are liabilities of the financial institution.

- ✓ *Overnight deposits* include deposits without agreed maturity and which are immediately convertible into cash or transferable on demand through banker's order or by cheque without significant restrictions or penalties. One-day deposits are also included in this item.
- ✓ *Deposits with agreed maturity* are not immediately available as they have an agreed term prior to withdrawal. These deposits cannot be used in settlements and are not convertible into cash without any significant restrictions or penalties. They are broken down by maturity: up to two years and over two years. These include credits received with the exception of those from the IMF.
- ✓ *Deposits redeemable at notice* include savings deposits and other deposits redeemable at notice. Savings deposits are untransferable deposits without specified maturity used for safekeeping of funds of households against issuance of a personal savings book or analogous document. These include lending for house purchase, children's deposits and other deposits. Other deposits redeemable at notice are untransferable deposits without speci-

¹² Compensatory instruments include compensatory bills and housing compensatory bills issued under the Law on Compensation of the Owners of Nationalised Properties and registered compensatory bills issued under the Law on the Restitution of Ownership and the Use of Agricultural Lands. These instruments are issued by the government and are freely transferable. Pursuant to the Law on Public Offering of Securities, these are referred to as securities.

fied maturity which cannot be converted into cash without any notice. Their conversion into cash is not possible or they can be converted into cash prior to the term of the notice but by imposing a sanction. Untransferable deposits with specified maturity which can be converted into cash prior to maturity only at notice are also included here. The maturity structure of the term of notice presented is up to three months and over three months.

Repo agreements include cash received against securities sold by a monetary financial institution under a firm commitment to purchase the same (or similar) securities at a particular price on a fixed future date.

Debt securities issued include securities other than shares and other equity issued by commercial banks, generally traded in the secondary market, that do not grant the holder any ownership rights over the issuing bank. Non-marketable instruments issued (which have not been initially placed through a stock exchange or other official marketplace) and subsequently becoming marketable also belong to this item. Debt securities issued are broken down by maturity: up to two years and over two years.

Table 1.3.5: Monetary Base and Money Supply Mechanism

Money supply is based on commercial bank monetary base (currency outside banks and bank reserves) multiplication. Money supply is determined by using M1, M2 and M3 monetary aggregates.

Monetary base (reserve money) consists of currency outside banks and commercial bank funds (bank reserves). The latter include commercial bank deposits with the BNB and cash in commercial bank vaults. Commercial bank deposits include minimum required reserves and excess reserves (overnight deposits and deposits with agreed maturity). Dynamics of reserves depends on the amount of required reserves (comprising a set portion of deposits) and excess reserves. The amount of required reserves is set by the Governing Council of the BNB and is the only instrument of the central bank monetary policy under a currency board. The amounts of excess reserves reflect the liquidity of commercial banks and the trend toward greater security.

Money Supply Mechanism

Money supply (M3) may be expressed as a product of monetary base and the money multiplier variable.

Money multiplier characterises the degree of multiplication effect as a result of commercial bank activity. This effect is measured by the ratios of broad money (M3) or individual monetary aggregates (M1 and M2) to reserve money. The money multiplier reflects the currency outside banks to deposits¹³ ratio and the bank reserves to deposits ratio, known as factors in determining money supply. The currency outside banks to deposits ratio depends primarily on the public behaviour, while the bank reserves to deposits ratio reflects commercial bank behaviour.

Sources of Reserve Money

Under a stable money multiplier, total money supply may be influenced through reserve money sources.

Foreign assets (net) reflect an increase/decrease in Bulgaria's international reserves. Under a currency board changes in international reserves at the expense of government deposit do not directly affect the monetary base and it is automatically sterilised.

Claims on central government (net) – the net position of the government is a result of assets netting (balances on lev loans disbursed prior to June 1997 pursuant to the former Law on the BNB and balances on foreign exchange loans under Article 45 of the Law on the BNB) its liabilities.

Claims on non-government sector include only claims on shares and other equity on the non-government sector.

Claims on commercial banks – the balance sheet reports balances on loans extended prior to June 1997 and unpaid interest on these loans.¹⁴

Remaining items (net) include assets and liabilities, which are not classified to any other item.

¹³ Repo agreements and debt securities issued and received credits are included.

¹⁴ Article 33. (1) The Bulgarian National Bank may not extend credits to banks, except in the cases under para. 2. (2) Upon emergence of a liquidity risk that may affect the stability of the banking system, the Bulgarian National Bank may extend to a solvent bank lev-denominated credits with maturity no longer than three months, provided they are fully collateralised by gold, foreign currency or other such high-liquid assets [...].

Table 1.3.6: Foreign Assets and Liabilities of the BNB

The table displays claims and liabilities of the BNB to non-residents forming the positions of foreign assets and liabilities.

Instruments*BNB Foreign Assets:*

Central bank's foreign claims are divided into two groups according to their liquidity – international reserves and other foreign assets:

1. *International reserves* include the most liquid foreign assets. Under a currency board (introduced on 1 July 1997) international reserves shall be equal to the assets of the Issue Department included in the BNB consolidated balance sheet (described in Article 28, para. 3 of the Law on the BNB).

International reserves are divided into three sub-sectors: non-resident banks, non-resident governments and other non-residents including the following indicators:

- ✓ Cash – banknotes and coins held in freely convertible foreign currency;
- ✓ Special Drawing Rights (SDR)¹⁵ held by the BNB;
- ✓ Monetary gold consisting of gold bullion in standard form in vault and monetary gold deposited with foreign banks. Pursuant to Article 28, para. 3, item 6 of the Law on the BNB, the stock of monetary gold is valued at BGN 500 *per* troy ounce, or at market value if lower. Monetary gold is reported at its market value in a memo to the table;
- ✓ Deposits – funds in freely convertible currency held by the BNB on accounts with foreign central banks graded by degree of liquidity (overnight deposits, deposits with agreed maturity, deposits redeemable at notice);
- ✓ Repo agreements include funds received in the BNB against a sale of securities with a commitment of reverse repurchase of the same or similar securities at a particular price on a fixed future date;
- ✓ Securities other than shares – debt instruments held by the BNB, issued by non-resident banks, financial institutions and governments, whereof liabilities are assigned one of the two highest ratings by two internationally recognised credit rating agencies, and which are payable in freely convertible currencies with the exception of debt instruments given or received as collateral;
- ✓ Reserve position in the IMF – Bulgaria's unconditional right to draw funds from the IMF. This indicator reflects the payment of foreign exchange component in Bulgaria's quota and indicates the balance between the quota and the cash of IMF in national currency;¹⁶
- ✓ Interest receivable includes claims on accrued interest. The specificity associated with the currency board suggests that interest receivables and interest payable are reported as part of the *International reserves*, correspondingly as part of Bulgaria's foreign liabilities. Therefore, they are not reported as part of *Other assets* and *Other liabilities* as in other reporting units.

2. *Other foreign assets* include less liquid claims on non-residents which after the introduction of the currency board are reported as part of assets of the Banking Department. This position is divided into two sectors (non-resident governments and other non-residents) and includes the following instruments:

- ✓ Securities other than shares – debt securities which are not included in international reserves;
- ✓ Shares and other equity – capital investment in international financial institutions (e.g. BIS, Basle);

Foreign Liabilities of the BNB

Foreign liabilities of the BNB reflect the central bank's liabilities to the non-resident sector grouped into non-resident banks, governments and other non-residents. Following the introduction of the currency board, foreign liabilities are comprised only of Bulgaria's liabilities to the IMF and include the following instruments:

- ✓ credits – interest-bearing loans with a fixed term received from IMF common funds;
- ✓ accrued interest payable – this item includes interest payable to the IMF.

¹⁵ Special Drawing Rights are reserve assets established by the IMF in addition to existing reserve assets. The value of SDR is set on the basis of a basket of reference currencies (euro, British pound, US dollar, Japanese yen).

¹⁶ Reserve position can be raised to the amount of funds in national currency used by the IMF in transactions with other member countries.

Table 1.3.7: Claims on Credits to Non-financial Corporations, Households and NPISHs

This table reveals information on credits (their residual value) by type, currency and sector. Credits are reported under the *Claims on non-government sector* item in the monetary survey and analytical reporting. Credits are financial assets providing funds, commodities and services to borrowers. Credit conditions (set by the creditor or agreed upon) are usually finalised in a non-transferable document. A loan is an unconditional debt payable upon maturity and bearing income in the form of interest. Credits to non-financial corporations (public and private) and households and non-profit institutions servicing households (NPISHs) are extended only by commercial banks, as after the introduction of the currency board in 1997 the BNB may not extend loans to these sectors.¹⁷

Types of Credits**1. By maturity**

- ✓ Short-term credits – credits with an original maturity of one year or less. Short-term credits, overdraft and overdue short-term credits are reported in this category.
- ✓ Credits with maturity of over one to five years – credits with an original maturity exceeding one year but less than five years, including overdue credits.
- ✓ Credits with maturity of over five years – credits with an original maturity exceeding five years, including overdue credits.

2. By quality

- ✓ Standard credits – credits contracted and regularly serviced by customers in accordance with the terms of the credit agreement.
- ✓ Overdue credits – due credits on which payments have not been made or which have not been written off. This includes credits with past-due payment or credits collectible on violation of other contractual terms. The bulk of overdue credits are *legal claims on credits*, including loans recoverable by law as well as already adjudged but unpaid claims in favour of banks. (Subject to reporting are only legal claims on credits which represent balance sheet assets.)

3. By use

- ✓ Consumer credits – these are credits extended to households. Consumer credits are used to buy goods and services for personal use by households.
- ✓ Lending for house purchase – these are credits made to households against security (mortgage, guarantee, etc.) to finance real estate construction or purchase of homes. Also included are credits for home improvements.
- ✓ Other credits include credits extended to households for business purposes, training, etc. These are credits made to physical persons with commercial, production or other purposes (e.g. financial leasing, agricultural credits, etc.)

4. By manner of disbursement

- ✓ Overdraft – overdrafts are credits made by banks when funds on customer current accounts are insufficient to meet ordered payments. Payment is automatic upon receipt of funds on current accounts. Included are both overdrafts with pre-agreed interest terms and amounts and without pre-agreed terms.
- ✓ Credits (see item 1).

Tables 1.3.8 and 1.3.9: Memorandum on Other Assets and Liabilities to the Analytical Reporting of the BNB and CBs

The memoranda show accrued interest and interest arrears on claims and liabilities by type of instrument, derivatives as well as all adjusting balance sheet items employed in accounting practices (i.e. depreciation and provisions).

Data in the table are as of December 2001 since when there is available information.

Description of Items

Accrued interest is interest receivable/payable accrued that has not matured, recorded on a current accrual basis. According to the analytical reporting this interest is recorded in the Other liabilities item in the monetary survey. A specificity of the BNB analytical reporting is that interest

¹⁷ Article 56, item 1 of the Law on the BNB: Except in the cases provided for by this Law, the Bulgarian National Bank may not: 1. extend credits or buy securities or any other negotiable instruments.

accrued on international reserves and IMF credits is recorded in the *Foreign assets* item, correspondingly the *Foreign liabilities* item.

Interest arrears are interest accrued that has not been collected at maturity. Subject to reporting are only balance sheet reported items.

Provisions include allocated provisions for impairment loss (currently the specific provisions on assets), as well as provisions recognised as liabilities in accordance with IAS and Bulgaria's effective legislation. For statistical purposes, assets subject to provisioning are stated on a gross basis and the allocated provisions are included in the Other liabilities item. (See General Methodological Notes)

Depreciation represents a kind of adjustment to depreciable long-term tangible and intangible assets. In the published information, long-term assets are reported on a gross basis and accrued depreciation is recorded in the Other liabilities item.

Derivatives include the gross fair value of all derivatives held by monetary financial institutions and reported in the balance sheet.

Tables 1.4.1 – 1.4.4: Monthly Sectoral Survey of the BNB and CBs

Monthly sectoral surveys show on a gross basis the claims and liabilities of CBs and of the BNB so that asset and liability balance sheet items can be identified by sector. The tables are static and contain information on end-of-month balances. Presented data are in compliance with the main principles of sectoral classification and aggregation of instruments into indicators.

1. Sectoral classification – the main principles set out in ESA'95 have been complied with. All items that are not classified by sector as well as banks' own claims and liabilities are reported in a separate column as not allocated.

2. Financial indicators – the scope and content of the indicators are described underneath respective tables. In terms of items, they are identical to monetary survey items and analytical reporting.

Specific Features of Monthly Sectoral Survey of the BNB

For the purposes of the table, BNB foreign claims are grouped by sector where foreign assets, included in international reserves, and other foreign assets of the central bank are presented together. Cash in foreign currency, Special Drawing Rights and monetary gold are represented in column Not allocated. Foreign assets grouped according to their liquidity as international reserves or other foreign assets are represented in table 5: BNB Foreign Assets and Liabilities.

Tables 1.5.1 and 1.5.2: Monthly Sectoral Survey of Non-operating Banks

An appendix is created to the monthly monetary survey, Monthly Sectoral Survey of Non-operating Banks, designed to inform without being part of the official monetary statistics.

The monthly sectoral survey reflects the current state of the group of non-operating banks (four in number at present). The structure and principles of preparation correspond to the Monthly Sectoral Survey of operating banks. Maturity and liquidity are excluded from these indicators, given the specifics of these banks.

Specific Features

The bankruptcy proceedings for the first group of banks began in 1996. At that time the operative law provided protection for some deposits and the Ministry of Finance assumed these banks' liabilities to depositors. This way the banks' debts to depositors were transformed into a debt of the government. For this debt the government issued deposit insurance securities denominated in BGN and USD in favour of the banks that had taken its service. The banks' liabilities to the government are presented as liabilities of the government sector.

In 1998 the legal framework was changed in order to set up the Deposit Insurance Fund and this Fund assumed the debts and subrogated the depositors' rights to the banks up to the guaranteed amounts.

Table 1.5.A: Monetary Aggregates

The table presents monetary aggregates and their counterparts according to the European Central Bank format.

Interest Rate Statistics

Interest rate statistics provides the possibility for observing the tendencies in the developments of interest rates on new business¹⁸ applied by commercial banks in Bulgaria on loans and deposits, interest rates on newly accepted interbank deposits, as well as the yield on government securities achieved at the auctions.

Reporting units of the interest rate statistics: commercial banks which are registered in Bulgaria and foreign bank branches operating on the territory of Bulgaria. Banks in liquidation do not fall under the scope of the interest rate statistics.

Base interest rate: for the purposes of comparison, the base interest rate capitalised on an annual basis and effective as of the end of the reporting month is published. Since 1 February 2005 the base interest rate has been capitalised at day-count convention '30/360'. Until 31 January 2005 the base interest rate was determined on the basis of the average effective annual yield on three-month government securities attained at the primary auctions.

Short-term interest rates cover maturities of over one day up to one year, and long-term interest rates maturities of over one year.

Interest rates on loans and deposits on new business are calculated by applying the method of averaging interest rates by weighing amounts of new business for the weeks of the month (for loans) and for the calendar month (for deposits). Interest rate levels are average-weighted for the resident sectors: *Non-financial corporations and households and NPISH*. They are presented in lev, euro and US dollars.

Yield on government securities is calculated by weighing the average annual yield attained at primary auctions by the amounts of issues sold.

Real interest rates on lev short-term loans and one-month deposits are based on the average nominal interest rates during the month deflated by the monthly inflation rate reported for the same period.¹⁹

2 External Sector

Information on the external sector includes four major categories:

- (a) balance of payments (revised as of 16 May 2005);
- (b) trade in goods;
- (c) debt indicators;
- (d) exchange rates.

Balance of Payments

The Bulgarian National Bank is in charge of the compilation of Bulgaria's balance of payments. The legal framework of the balance of payments compilation in Bulgaria is provided for in Article 42 of the Law on the Bulgarian National Bank (published in the *Darjaven Vestnik*, issue 46 of 10 June 1997). Data for the purposes of the BOP compilation are collected on the basis of Article 42 of the Law on the Bulgarian National Bank as well as pursuant to Articles 7–10 of the Foreign Exchange Law (published in the *Darjaven Vestnik*, issue 83 of 21 September 1999; amended, issue 60 of 2003). The data are processed by the Balance of Payments and External Debt Division within the BNB Statistics Directorate keeping its confidentiality. At present, the Bulgarian National Bank compiles and publishes analytical presentation as well as standard presentation of the balance of payments in accordance with the Fifth Edition of the **Balance of Payments Manual** (IMF, 1993) and the **Guideline of the European Central Bank**.²⁰

The balance of payments' methodology is conceptually related to that of the *System of National Accounts* (SNA). The items of the balance of payments correspond closely to the relevant categories of the *Rest of the World* account in the SNA.

¹⁸ The category *new business on time deposits, repos and loans* includes the new agreements during the reporting period (all contracts and conditions which define for the first time the interest rate on a deposit, repo or a loan as well as all re-negotiations of the conditions on an already existing instrument, including those that are terminated/matured during the reporting period) as well as re-negotiated under the same conditions deposits/repos during the period. Interest rates and amounts on new business on overnight and savings deposits coincide with those on outstanding amounts at the end of the reporting period.

¹⁹ Inflation is measured by the chain consumer price index (CPI) announced by the NSI.

²⁰ Guideline of the European Central Bank on the Statistical Reporting Requirements of the European Central Bank in the Field of Balance of Payments Statistics, the International Reserves Template and International Investment Position Statistics (ECB/2004/15).

There is a close relationship between the *International Investment Position* and the balance of payments as well. The BOP financial account reveals economy's transactions in external financial assets and liabilities which affect the amount of external financial assets and liabilities reported under the international investment position.

I. Accounting Principles and Conventions

The basic convention applied in constituting Bulgaria's balance of payments is the implementation of the *double entry system*. Credit, with a positive sign, includes: exports of goods and services, income receivable, offsets to unrequited real and financial resources received (transfers), increases in financial liabilities, decreases in financial assets. Debit, with a negative sign, includes: imports of goods and services, income payable, offsets to unrequited real and financial resources provided, increases in financial assets, decreases in financial liabilities.

The *time of recording* the balance of payments transactions is the time of the change in ownership.

Transaction valuations are based on market prices. If the actual market prices are not available, the average market prices are used as approximation.

Valuation changes in Bulgaria's external assets and liabilities due to valuation adjustments are not included in the balance of payments.

The units of account for the balance of payments of Bulgaria are euro, lev and US dollar. The conversion into the unit of account is based on the exchange rate at the time of transaction. If not available, or inapplicable due to other practical reasons, the average exchange rate for the reporting period is used.

II. Balance of Payments Components

The balance of payments components are compiled using basically the *International Transactions Reporting System* (ITRS), which includes (i) commercial banks' reports, and (ii) reports of enterprises which have bank accounts opened abroad (pertaining to the residents' international transactions). These reports cover all components of the balance of payments table. In addition, the data on individual BOP components collected *via* ITRS are substituted by data from other sources: (i) direct investment enterprise survey, (ii) reports by other institutions, (iii) reports by enterprises which have received (extended) financial loans by (to) non-residents, and (iiii) reports by enterprises on other liabilities and claims (other than financial loans) to non-residents.

In the analytical presentation, the balance of payments components are classified in the following major categories:

A. Current Account

The *current account* comprises the acquisition and provision of *goods and services, income, and current transfers* between Bulgaria and the rest of the world. The flows recorded on the credit side represent that part of the gross domestic product, which is provided to the rest of the world (exports of goods and services), as well as the provision of factors of production expressed by income received or receivable – compensation of employees, and investment income (interest, dividends, etc.). Offsets to unrequited real and financial resources received (transfers) are also recorded.

The flows on the debit side represent the gross product created in the rest of the world and acquired by the national economy (imports of goods and services), as well as the acquisition of factors of production expressed by income paid or payable. Offsets to unrequited real and financial resources provided are also recorded.

- The *Goods* component of the BOP current account covers movable goods for which changes in ownership between residents and non-residents occurred. Data on imports and exports FOB (free on board) are based on customs declarations, as the codes used are in compliance with the Harmonised System for Description and Coding of Commodities of the World Customs Organisation, introduced in 1988 and supplemented in 1992.

Data sources: Customs Agency (since early 2003) and Information Services AD or the Information Computing Centre Directorate (for the previous years). The Bulgarian National Bank and the National Statistical Institute receive exports and imports data, supplement them and further process them.

The BNB and the NSI coordinate import and export data before publishing them. The data are published eight weeks after the expiry of the reporting period.

- The *Services* component comprises *transportation, travel, and other services*.

The Bulgarian National Bank derives the data on *freight transportation* from foreign trade data and the data on *passenger transportation* from travel data on the basis of estimates. The Bank is currently working on a project for a new methodology for estimation of the receipts and expenditures from transportation services.

Travel covers goods and services, including those related to health and education, acquired by travellers for business and personal purposes. The data on travel are based on data from the Ministry of Internal Affairs on the number of travellers crossing the borders and on estimates of *per capita* expenditures, the latter based on the methodology for estimation of the receipts and expenditures from travel services – *Methodology for Estimation of the Receipts and Expenditures from Travel in the Bulgarian Balance of Payments* (the Bulgarian National Bank, Ministry of Trade and Tourism, 18 November 1999).

Other Services item covers receipts and payments related to services other than transportation and travel (communication, construction, financial, insurance, leasing, cultural, sport and recreational services, etc.).

The *major sources* of information on this item are the commercial banks' reports and the reports of enterprises having accounts abroad.

- *Income* consists of two categories: (i) *compensation of employees*, and (ii) *investment income*. *Compensation of Employees* covers wages, salaries and other benefits paid to non-resident workers in Bulgaria or received by resident workers abroad. *Investment Income* covers receipts and payments of income associated with external financial assets and liabilities: on direct investment (dividends and reinvested earnings), portfolio investment, other investment, and on reserve assets (deposit accounts).

The *major sources* of information on the *Income* component are the commercial banks' reports and the reports of enterprises, the Ministry of Finance, and the Bulgarian National Bank.

- *Transfers* are all real resources and financial items provided without a *quid-pro-quo* from one economy to another. *Current Transfers* directly affect the level of disposable income of an economy, and the consumption of goods and services. That is, current transfers reduce the income and consumption potential of the donor and increase the income and consumption potential of the recipient. Receipts from EU preaccession funds, private persons' money transfers, as well as gifts, grants, inheritances, prizes won from lotteries, pensions, current taxes, social security contributions, etc. are included in the *Current Transfers*.

Sources: The Bulgarian National Bank obtains information on current transfers from the Ministry of Finance, the Bulgarian Red Cross, the Agency for Foreign Aid, and from the monthly commercial banks' reports.

B. Capital Account

The *Capital Account* consists of two categories: (i) *capital transfers*, and (ii) *acquisition or disposal of intangible, non-financial assets*. If in kind, a capital transfer consists of (i) a transfer of ownership of fixed assets, or (ii) forgiveness of a liability by a creditor when no counterpart is received in return. If in cash, a transfer is *capital* when it is linked to, or conditional on, the acquisition or disposal of fixed assets (for example, an investment grant).

C. Financial Account

The *Financial Account* comprises all transactions (actual and imputed) in the external financial assets and liabilities of an economy. The external assets and liabilities are primarily classified according to the type of investment. The *Financial Account* includes (i) *direct investment*, (ii) *portfolio investment*, and (iii) *other investment*.

- *Direct Investment* covers direct investment abroad, direct investment in reporting economy and mergers and acquisitions. The *Mergers and acquisitions* subitem shows the transactions related to mergers and acquisitions. The purpose of its inclusion was to eliminate the influence of such transactions over the reported foreign direct investment data. International practice shows that, first, these transactions hardly have any real impact on production capacities and employment, and, second, the conclusions drawn from the analysis of direct investment data in which data on mergers and acquisitions have been included might be misleading as regards investment flows, their dynamics and their branch and geographical structure (see *European Central Bank, Eurostat, Foreign Direct Investment Task Force Report*, March 2004, para. 332).

Sources: The Bulgarian National Bank receives monthly data on direct investments in Bulgaria from the Privatisation Agency, the Central Depository and from commercial banks' reports; quarterly data are obtained from the Financial Supervision Commission, from quarterly reports of companies with foreign interest and the NSI statistical survey carried out among non-financial sector enterprises; annual data are obtained from commercial banks' annual financial statements and enterprises' reports provided to the BNB. The Bulgarian National Bank receives data on direct investment abroad from the forms for declaring direct investment in the BNB, quarterly reports of non-financial sector's corporations and commercial banks' monthly reports. After data examination intended to avoid information duplication, these data substitute the monthly data received from banks and previously included in the balance of payments.

- *Portfolio Investment* includes portfolio investment assets and portfolio investment liabilities.

The *major source* of information on the liabilities side of the *Portfolio Investment* is the data provided by the Ministry of Finance, the Bulgarian National Bank, commercial banks, enterprises holding bank accounts abroad, and the Central Depository.

Data on the assets side of the *Portfolio Investment* are provided by commercial banks, the Bulgarian National Bank and the Ministry of Finance.²¹

- *Other Investment* includes trade credits, loans, currency and deposits, and other assets and liabilities.

According to the balance of payments conventions, trade credit arises from the direct extension of credit from a supplier to a buyer, i.e. this is a credit extended by a trade partner without issue of tradable securities.

Information on trade credits is provided mainly by the quarterly reports of residents on their claims on/liabilities to non-residents.

The *Loans* item includes received and paid principals on long- and short-term loans between residents and non-residents if no issue of tradable securities is involved with these loans. Transactions concerning disbursements and repayments of principals on IMF loans and disbursements on loans on BOP support are not included in the *Loans* item. They are recorded under the corresponding items of the *E. Reserves and Related Items* group.

Data on loans are based on information received from the Ministry of Finance, the Bulgarian National Bank, the commercial banks and directly from the enterprises that have extended loans or received credits from abroad. The latter report quarterly data to the BNB because of which the monthly data on *Loans, Other sectors* (assets and liabilities) are revised each quarter.

The *Currency and Deposits* component shows the changes in the residents' currency and deposits held abroad on the assets side, and the changes in the liabilities of the resident commercial banks to non-residents in national and foreign currency on the liabilities side. Following the basic accounting principle and conventions set in the *Balance of Payments Manual* (IMF, 1993), when compiling this item, the Bulgarian National Bank excludes any changes therein due to exchange rate changes.

The *Other Assets* and *Other Liabilities* items include all transactions on miscellaneous accounts receivable and payable not included elsewhere and transactions in arrears.

D. Net Errors and Omissions

The *Net Errors and Omissions* component is an offsetting item. This component exists in the BOP presentation as the data collection system used by the Bulgarian National Bank is not a closed one but a combination of various sources of information. Unlike other statistical reports, e.g. monetary statistics, data collection required for the balance of payments compilation could not be limited to the financial statements of commercial banks as the only source of information.

The fluctuations in the *Net Errors and Omissions*, both in sign and in size, are mainly due to: (i) revisions of export and import data, (ii) the improvement of the methodology for compiling individual balance of payments' components, and (iii) the existence of objective obstacles to collecting data on particular balance of payments' items.

²¹ Due to introducing a new reporting form for portfolio investment assets, data are subject to revisions after their processing.

E. Reserves and Related Items

• *Reserve Assets* include the external assets available to and controlled by the central bank (government) for direct financing of balance of payments imbalances. The reserve assets comprise monetary gold, SDRs, reserve position in the International Monetary Fund, foreign exchange assets (including currency and deposits, and securities), and other claims. The entries under this category pertain to transactions on BNB external holdings which are administered by the Issue Department. Data on reserve assets changes included in the BOP table excludes valuation adjustments, due to exchange rate fluctuations and price revaluation.²²

In the analytical presentation of the balance of payments, this group includes also the *Use of Fund Credit* and the *Exceptional Financing* items. The exceptional financing comprises the BOP support as well as deferred/rescheduled payments and payments on arrears, associated with balance of payments difficulties. In accordance with the methodology for accounting exceptional financing transactions (*Balance of Payments Manual*, Fifth Edition (IMF, 1993), p. 454), the principal repayments on the BOP support credits are included in the **Financial Account** in *Other Investment Liabilities – Loans – General Government*.

III. Periodicity, Frequency and Timeliness of the Balance of Payments Publications

The Bulgarian National Bank compiles and publishes the balance of payments of the Republic of Bulgaria on a monthly basis. In accordance with its schedule, the Bulgarian National Bank publishes the balance of payments data within eight weeks after the close of the reference period.

IV. Data Revision Policy

Revisions to published BOP estimates are typical of many balance of payments compilation systems. With the revision publication, the users are duly informed about the revised data on the corresponding items. The data revision policy pursued by the Bulgarian National Bank is based on the following principles:

(i) As for the most frequent data, each monthly publication includes revisions of the data for the last three months and each quarterly publication includes revisions of the monthly data for the whole current year.

(ii) When current changes are made due both to additional information collected and elimination of errors, the Bulgarian National Bank duly informs the users through the monthly press releases and the notes to the balance of payments table.

(iii) When significant revisions are made due to changes in the methodology for reporting particular BOP components or for any other reasons, the Bulgarian National Bank publishes in advance information on the changes to facilitate the users.

V. Data Dissemination

The Bulgarian National Bank disseminates the monthly balance of payments data on its website – <http://www.bnb.bg>

The data are published also in the *Monthly Bulletin* and in semi-annual and annual reports of the Bulgarian National Bank.

The data are provided to the President of the Republic of Bulgaria, the Chairman of the National Assembly, the Prime Minister, the Minister of Economy and the Minister of Finance 24 hours prior to publication of the BNB press release.

VI. Contacts

If you have any questions on the methodology applied by the Bulgarian National Bank or on the published balance of payments data, please do not hesitate to send them to Emil Dimitrov, Head of the Balance of Payments and External Debt Division, via e-mail at Dimitrov.E@bnbank.org, to Liliana El Haddad, senior expert (Elhaddad.L@bnbank.org), or by mail to the following address:

Bulgarian National Bank
Balance of Payments and External Debt Division
1, Knyaz Alexander Battenberg Square
1000 Sofia, Bulgaria

²² Since February 2005 monetary gold and other instruments in gold are to be evaluated at market value pursuant to the amended Article 28, para. 3, item 6 of the Law on the BNB effective as of 1 February 2005.

Imports and Exports

The data on Bulgaria's imports and exports are based on customs declarations, and the codes used comply with the World Customs Organisation Harmonised System for Description and Coding of Commodities introduced in 1988 and supplemented in 1992.

Bulgaria's exports are reported at FOB prices, and imports at CIF prices. However, for the purposes of the balance of payments statistics, total imports are recalculated at FOB prices.

In accordance with the common methodology of the Bulgarian National Bank and the National Statistical Institute, since 1999 the exports and imports are reported in accordance with the *Special Trade* system under which the time of transaction registration is the time of the customs declarations clearance.

For the purposes of the economic analysis, the Bulgarian National Bank publishes '*end-use*' tables. They are based on the four-digit codes under the Harmonised System for Description and Coding of Commodities and grouped by purpose and end use of the respective commodity. The major principles in distribution of the commodities in the respective groups are the purpose of their use and degree of processing. The tables including *major trade partners and regions* contain only the most important countries and regions for Bulgarian exports (imports). The criteria for description of partner countries are as follows: *imports* – by country of origin of commodities; *exports* – by country of consignment, that is, the last known country where the commodities are to be delivered. The tables including *major trade partners by end use* represent cross section of imports and exports data by region and by commodity. The '*Structure of Imports and Exports by Original Currency*' tables represent the shares of the different currencies in export and import transactions.

In all published tables exports are reported at FOB prices, and imports at CIF prices.

Quarterly and annual time series of exports and imports by *end use* and by *major trade partner* since 1995 are published on the website of the BNB. Those series could be searched by period (monthly, quarterly, yearly) and by commodity group (trade partners). In addition, quarterly and annual tables '*Major Trade Regions by End Use*' and '*Structure of Imports and Exports by Original Currency*' are published. Export and import data, as well as foreign trade analysis for the period under review are published on a monthly basis.

The data *sources* are: the Customs Agency and the Information Services AD. The Bulgarian National Bank and the National Statistical Institute receive exports and imports data, supplement it with other information and further process it.

In accordance with the common methodology, prior to publication, data are coordinated by BNB and the NSI. The data are to be published within eight weeks after the expiry of the reporting period.

In principle, the Bulgarian National Bank makes monthly revisions of its data for the last three months, and quarterly revisions of the data for the current year. However, in case the incoming data are incomplete and/or unreliable, the Bulgarian National Bank may revise import and export data more frequently.

The Bulgarian National Bank disseminates import and export data *via* its website – <http://www.bnb.bg>. The data are published also in the *Monthly Bulletin* of the Bulgarian National Bank. The foreign trade data are included in the semi-annual and annual reports of the Bulgarian National Bank.

For further information on the applied methodology by the Bulgarian National Bank or on published foreign trade or balance of payments data, please contact Emil Dimitrov, Head of the Balance of Payments and External Debt Division, *via* e-mail at Dimitrov.E@bnbank.org, (tel. +359 2 9145 1243) or Stoyan Hadjiev, senior economist, at Hadjiev.S@bnbank.org (tel. +359 2 9145 1969).

Gross External Debt²³

In reporting Bulgaria's gross external debt, the Bulgarian National Bank follows the international standards and requirements set out in the *External Debt Statistics: Guide for Compilers and Users*, 2003 issued by several international organisations²⁴ and in the *Balance of Payments Manual*, IMF, 5th edition, 1993. On the one hand, this ensures international data compatibility, and consistency between the external debt statistics and the balance of payments, international investment po-

²³ Revised data as of 23 March 2005.

²⁴ *External Debt Statistics: Guide for Compilers and Users*, IMF, 2003 (Bank for International Settlements, The Commonwealth Secretariat, Eurostat, International Monetary Fund, Organisation for Economic Cooperation and Development, The Paris Club Secretariat, The United Nations Conference on Trade and Development, World Bank).

sition and national accounts, on the other hand. Data on gross external debt are an important information source for particular balance of payments items and the international investment position.

The BNB compiles and disseminates monthly statistical data on the gross external debt by institutional sector:

Publications comprise monthly data on: (1) gross external debt amount (2) gross external debt service and (3) disbursements. Additional analytical external debt data by creditor is disseminated quarterly.

I. Accounting Principles and Conventions

When compiling debt statistics, the BNB follows the **international definition of gross external debt** – ‘Gross external debt, at any given time, is the outstanding amount of those actual current, and not contingent, liabilities that require payment(s) of principal and/or interest by the debtor at some point(s) in the future and that are owed to non-residents by residents of an economy.’²⁵

The main criterion for a liability to be included in the gross external debt of the country is that **it is issued by a resident and is owed to a non-resident**,²⁶ regardless of whether it is issued on domestic or international, money or capital markets. The same principle is applied to transactions: only those between residents and non-residents are recorded. In the debt tables the BNB records only the amount of **tranches actually disbursed**.

The stock of liabilities is recorded at **nominal**, not at **market value** even in the case when they are in the form of tradable securities. The gross external debt of Bulgaria is reported in euro.

The distinction between short-term and long-term debt is based on the **original**, not **residual maturity of the liability**. The long-term debt includes all liabilities with original maturity of over one year, and the short-term debt, liabilities with original maturity of one year or less. All principal and interest arrears are recorded as short-term debt.

II. Gross External debt Components

A. By Institutional Sector

The structure of the *Gross External Debt* table by institutional sector is in compliance with the requirements of the *External Debt Statistics: Guide for Compilers and Users, 2003*,²⁷ prepared by several international organizations and published by the IMF.

The main components of the *Gross External Debt* tables classified by institutional sector are General government, Monetary authorities, Banks and Other sectors. In accordance with the international statistical standards, debt liabilities related to direct investment (intracompany lending) are presented separately. The classification by institutional sector is in compliance with the Fifth edition of the *Balance of Payments Manual (1993)*. Within the sectors, the external debt liabilities are classified by maturity: short-term and long-term and by instrument.

General Government

General government debt includes: (1) central government debt, (2) local government debt, (3) debt of social security funds and (4) debt of all non-market non-profit institutions that are controlled and mainly financed by government units. Public corporations and unincorporated enterprises that function as if they were corporations (so called quasi-corporations) are explicitly excluded from the *General government* sector and are allocated to *Banks* or *Other sectors* as appropriate. The debt liabilities of the *General government* sector are long-term and are classified by instrument: *Bonds and notes* and *Loans*. Liabilities for which no issue of tradable securities is involved are reported under *Loans*. Loans received by the central government from the IMF are also reported under *Loans*. The central government liabilities on securities issued on the international markets are reported under *Bonds and notes*, as the item comprises the entire stock of the issue. The part of the issue (Brady bonds, Eurobonds and Global bonds) held by residents at the end of the review period is reported with a negative sign in the *Bonds and notes held by residents* item. Government securities issued by the government on the domestic market and purchased by non-residents are also reported under the *Bonds and notes* item.

²⁵ *External Debt Statistics: Guide for Compilers and Users*, p. 7, paras. 2, 3.

²⁶ For a definition of a resident and non-resident, see the *Balance of Payments Manual*, IMF, 5th edition, 1993, paras. 57–58.

²⁷ *External Debt Statistics: Guide for Compilers and Users*, IMF, 2003 (Bank for International Settlements, The Commonwealth Secretariat, Eurostat, International Monetary Fund, Organisation for Economic Co-operation and Development, The Paris Club Secretariat, The United Nations Conference on Trade and Development, the World Bank).

Data sources: The main source of data is the *Register of Government and Government Guaranteed Debt* of the Ministry of Finance (prior to 31 December 2002 the source of that data was the *System for Debt Registration, Service and the Management* of the Ministry of Finance and the Bulgarian National Bank). Other sources are Government and Government Guaranteed Debts Depository Directorate with the BNB and the commercial banks.

Monetary Authorities

In accordance with the international methodology on external debt statistics included herein are the external liabilities of the BNB. The data is derived from the *Register of Government and Government Guaranteed Debt* of the Ministry of Finance.

Banks

Short-term liabilities of the commercial banks include short-term loans, non-residents' deposits with domestic banks as well as other payables to non-residents. Deposits in foreign currencies and in leva of non-residents with domestic banks are included in the *Deposits* subitem. The net increase in deposits in the banking system is reported in the *Gross External Debt Disbursements* table, and the net deposit withdrawal – in the *External Debt Service* tables, as a principal payment under the *Deposits* subitem. In accordance with the *External Debt Statistics: Guide for Compilers and Users*, deposits related to contingent liabilities are excluded.²⁸ Long-term liabilities include loans and bonds and notes issued by the banks and held by non-residents.

Data sources: Data on the amount and transactions on external loans are received monthly directly from the commercial banks through a statistical form on their external liabilities. The Money and Banking Statistics Division with the Statistics Directorate of the BNB provides monthly data for the *Deposits* and *Other liabilities* items. The source for the data on the *Bonds and notes* item is the Central Depository.

Other Sectors

In the *Other sectors* item, the debt of private and state-owned non-bank enterprises (including *Government guaranteed debt*) as well as external liabilities of the households are reported.

Short-term liabilities of *Other sectors* include short-term loans, trade credits as well as other payables to non-residents. Long-term liabilities include loans and bonds and notes issued by the companies and held by non-residents.

Data sources: Data on financial loans are collected through the statistical *Form SPB-4 Report on the Financial Credit Liabilities of Residents to Non-residents* that covers data on the stock and the various types of transactions on the credit. As the Foreign Exchange Law envisages quarterly reporting of these liabilities, for the first two months of each quarter the BNB publishes estimations on the non-bank enterprises based on the debt service schedules provided by companies on the loans extended to them and on estimations. Under the *Trade credits* subitem, the respective liabilities of residents to non-residents²⁹ are reported excluding trade credit liabilities towards foreign direct investors. Such data are collected from the BNB through *Form SPB-6B Report on the liabilities of residents to non-residents*. As the Foreign Exchange Law envisages quarterly reporting of these liabilities, for the first two months of each quarter the BNB publishes estimations of the trade credits stock. Data on liabilities of the resident physical persons are collected through the annual statistical *Form SPB-8 Report on the Assets and Liabilities of Resident Physical Persons to Non-residents*.

Direct Investment: Intracompany Lending

In accordance with the international methodology on external debt statistics, a distinction is made between liabilities owed to direct investors (*Intracompany loans*) and such owed to other creditors. Liabilities related to direct investment relationship are separately identified (equity liabilities arising from direct investment, i.e. equity capital and reinvested earnings except non-participating preferred shares are excluded from external debt).

B. By Creditor

BNB prepares and publishes external debt stock tables by creditor sector.

²⁸ *External Debt Statistics: Guide for Compilers and Users*, IMF 2003, para 2.10

²⁹ For a definition of trade credits, see *Balance of Payments Manual*, IMF, 5th edition, 1993, Chapter XX, para. 414, as well as *External Debt Statistics: Guide for Compilers and Users*, Chapter Three, para. 133.

III. Periodicity, Frequency and Timeliness of the Gross External Debt Publications

The Bulgarian National Bank compiles and publishes data on the stock of the gross external debt of Bulgaria, the debt service payments and the disbursements on a monthly basis. The external sector debt indicators, including external debt indicators, are also disseminated monthly.

The Bulgarian National Bank publishes the data according to its advance release calendar. In case of a change, the BNB informs the users on the new release date at least a week before the advance date.

IV. Data Revision Policy

The data revisions policy of the Bulgarian National Bank is based on the following principles:

(i) Each monthly publication includes revisions of the data for the previous three months, and each quarterly publication includes revisions of the monthly data for the whole current year.

(ii) When on-going changes are made due to additional information collected, as well as resulting from elimination of errors, the Bulgarian National Bank timely informs the users through the monthly press releases, as well as through the notes at the end of the *Gross External Debt* tables.

(iii) When significant revisions are made due to changes in the methodology for reporting of certain external debt components or for other reasons, the Bulgarian National Bank publishes in information on the changes advance to facilitate data users.

V. Data Dissemination

The Bulgarian National Bank publishes monthly gross external debt data on the website of the Bulgarian National Bank: <http://www.bnb.bg>. The data are also published in the BNB *Monthly Bulletin* and in the semi-annual and annual reports of the Bulgarian National Bank. The data are provided to the President of the Republic of Bulgaria, the Chairman of the National Assembly, the Prime Minister, the Minister of Economy and the Minister of Finance 24 hours prior to publication of the BNB press release.

VI. Contacts

If you have any questions on the methodology applied by the Bulgarian National Bank or on the gross external debt data published, please do not hesitate to contact Emil Dimitrov, Head of the Balance of Payments and External Debt Division, via e-mail at Dimitrov.E@bnbank.org and Lilyana El Haddad, senior economist, at ElHaddad.L@bnbank.org, or by mail to the following address:

Bulgarian National Bank
Balance of Payments and External Debt Division
1, Knyaz Alexander Battenberg Square
1000 Sofia, Bulgaria

3 Fiscal Sector

Information on the fiscal sector is classified into three categories:

- (a) government sector operations (government sector);
- (b) government operations (republican budget);
- (c) domestic and external government debt.

Fiscal sector includes all ministries, agencies, extra-budgetary funds, individual units of social security and other institutions of the central government, municipalities, as well as enterprises financed and controlled by them.

The consolidated state budget covers data on the government sector and includes the republican budget, the budgets of social security, legal authorities, universities financed by the government, the Bulgarian Academy of Sciences, municipalities, as well as extra-budgetary funds and accounts. The institutional coverage of the government sector corresponds to the System of National Accounts and Government Finance Statistics 'general government' institutional sector.

The republican budget includes the central republican budget (the budget of the Ministry of Finance), budgets of other ministries and agencies, regional authorities and the National Audit Office. Together with the budgets of the social security, legal authorities, universities financed by the government, Bulgarian Academy of Sciences and their extra-budgetary accounts it forms the government sub-sector. The institutional coverage of this sub-sector corresponds to the System of National Accounts and Government Finance Statistics 'central government' institutional sub-sector.

4 Real Sector

Tables of the real sector are arranged in the following groups:

- (a) macroeconomic indicators (national accounts);
- (b) labour market;
- (c) price indicators.

Real sector covers a few groups of institutional units – residents on the economic territory of Bulgaria. These include 'non-financial corporations' whose main activity is production and sale of goods and non-financial services for the purpose of making profit; 'non-profit institutions serving households' which provide goods and services free of charge or at economically insignificant prices; 'households' – residents in Bulgaria regardless of their type and amount. Real sector also includes unincorporated production units, as well as those with single-entry accounting owned by local physical persons.

This section of the BNB Monthly Bulletin includes data on:

- *gross domestic product* – by component of final demand (under the method of end-of-use expenditure) and by economic sector (under the production method).

In accordance with the requirements of the System of National Accounts, holding gains are excluded from GDP data, i.e. changes in its value due to price fluctuations are excluded. Data not reconciled with Supply – Use final tables of the NSI are preliminary. Due to a change in the methodology for calculation of personal consumption of households and exports (imports) of goods and services components, data for the third quarter and the January – September 1999 period are partially comparable with relevant data for 1997, 1998, and the first half of 1999.

- *labour market* – employed under labour contract (public and private sectors), changes in their number (by economic sector), number of unemployed (total, young people, adults) and unemployment rate, average wage of employed (by type of ownership and by economic sector). From early 2001 the NSI publishes monthly data on employment and average wage in the second month following the end of the relevant calendar quarter.

- *consumer price changes* – total and by major commodity and services group.
